Clerk of the Eastern District of Pennsylvania.

PREFACE.

THE original work, from which the present volume has been in part compiled, has long held a respectable rank among elementary treatises on geography. Except, on the American articles; I have deviated as little as possible from the London edition of 1819, from which most of the articles except those of America, have been taken. In many instances, however, I found that sufficient care had not been used to notice all the recent changes made on the continent of Europe. Several articles therefore differ, very materially from the London copy. For instance, Spain is inserted in this volume, as fixed recently by the Cortes. Sweden, Denmark, and Norway agreeable to the stipulations of the treaty of Kiel; and Germany, Italy, France, the Netherlands, Swiss Cantons, &c. fixed by the treaties of Paris, Vienna, and others.

In the articles included in England and Wales, the original phraseology is preserved. In describing the cities, towns, or other objects, in those two divisions of Great Britain, the description of each place stands in this volume, as it did in the London copy; and, as if published in Great Britain. This course was pursued, in order to avoid unnecessarily increasing the quantum of matter, in that part of the present edition where such a repetition would be of very little use to the reader.

It is respecting America generally, and the United States in particular, that the most essential additions have been made to, and deviations from the original. Very few American articles, stand in the present as they did in any previous edition.

This is the first Geographical Dictionary, in which a detailed and regular description of the counties of the United States has been inserted. In the former editions of Brookes, and in several other similar productions, few, comparatively of the United States counties, were so described, as to be easily found on a map from the description. In this volume, their relative position, length, breadth, area, and in a majority of cases the general features; and in several hundred the staples of the counties are given. No difficulty can therefore occur in finding any given county.

The elements of the population of the United States, oppose great difficulties to a brief classification. Duly reflecting on this subject, I adopted the tabular form, from a conviction, that no other could answer, to render the volume a facile work of reference. So much of the most essential legislation, and so many of the most vital questions in domestick politicks, demand a thorough knowledge of the local position and relative increase or decrease of population, that too much perspicuity cannot be given to that subject. As the tables in this volume are constructed, it is easy, at a single glance, to find any necessary part of the population of any county, as far as the tables of the census of 1810 and 1820, are correct. The classified population, as respects the pursuits of Agriculture, Manufactures, and Commerce, are subjoined to each county; inserted from the census of 1820.

In using the tabular form, brevity was in some measure sacrificed to perspicuity; but I trust, the importance of the subject will warrant the procedure.

In a general view of the natural features of the United States, I have always considered its rivers as objects of primary importance; therefore, my descriptions of the rivers of the United States are unusually in detail. This is more especially the case under the head of *Mississippi*, *Missouri*, *St. Lawrence*, *Susquehannah*, and some others. The extended detail under these articles, have tended less to swell the work, than would

appear on a cursory view. I have engrouped the minor parts under one head, and made references where necessary.

Respecting the new states and territories, I have deemed it not only justifiable, but indeed requisite, to be more ample than is common in a Geographical Dictionary, comprised in a single octavo volume.

It will not be presumption to say, that much is added to the Geography of the United States, by this publication. The editor has travelled extensively over the states of the south, west, and north-west, and wrote respecting most of those sections from personal observation.

It was very desirable, that more precise information could have been given on South America; but so confused and indefinite are the political boundaries in that country, that much uncertainty prevails respecting the extent of almost every subdivision. I could not even venture an article under the general head of, United Provinces of La Plata; though each province is described as accurately as document could be procured.

The Mexican intendancies were so scientifically delineated by Humboldt, as to enable future geographers to place that country before their readers with sufficient correctness. I have given the term Mexican empire, when speaking of that country, to save circumlocution; and not from the circumstance of its present political condition.

Abbreviations at best, are perplexing, and have been entirely excluded from this treatise.

It cannot be reasonably expected that a work of such texture and magnitude, can be free from error; such exemption is not in the nature of things possible; but it has been the sedulous endeavour of the editor to render his production a safe and commodious book of reference, and as free from either omission or mistake, as the present state of the science would admit.

The edition of the Constitution of the United States.

and of the respective states, which forms a part of this volume was added by the publishers, in order to embrace a general view of the geography and constitutional law of the United States. I was not the editor of that part of the publication, nor in reality was formal editorship indispensably necessary for reprinting matter which admitted of no change or addition.

I now take leave of the reader, by claiming a further share of that publick indulgence I have so amply received on former occasions. I place before my fellow citizens the fruit of the painful labours of two years, indulging a hope, that those humble labours have added something to the general stock of information on a most useful science.

GENERAL GAZETTEER.

A A C

AA, river in the duchy of Courland, which rises in Samogitia, and flows into the bay of Riga.

Aa, river that rises in the department of Somme in France, becomes navigable near St. Omer, passes on to Gravelines, where it falls into the German ocean.

Aa, river in Westphalia, which rises near Munster, waters that city, and falls into the river Embs.

Aa, river of Switzerland, which rises in the valley of Engelberg, crosses Unterwalden, from S. to N., and falls into the Waldstätter Sea. Near the abbey of Engelberg, it has a noble cataract.

Aahus, the capital of a small district of Germany, so named, in the circle of Westphalia, and bishopric of Munster. It has a good castle, and lies N E. of Coesfeldt. Lon. 7 1 E. lat. 52 10 N.

Aain-Charrn, village near Jerusalem, said to be the place where Zacharias lived. It is yet frequented by pilgrims; and near it there is a convent, a large elegant building, with a handsome cupola, and under it an extraordinary fine mosaic pavement; the altar, which is a very splendide one encompassed with marble steps, is said to be built on the very spot where John the Baptist was born.

Aalborg, capital of the bishopric of that name, lies on the coast of Lymfur, on the confines of the bishopric of Wiburgh. Next to Copenhagen, it is the richest and most populous city in Denmark. The name signifies Eel-town, great quantities of Eels being caught there. It has an exchange for merchants, a safe and deep harbour (though the entrance near Hals is somewhat dangerous,) and a considerable trade in corn, herrings, guns, pistols, saddles, gloves, &c. It was taken by the Swedes in 1643 and 1658. Lon. 9 46 E. lat. 50 50 N.

Aar, large river in Switzerland, which rises in a lake, near Mount Saalberg, in

A B A

the S. of the canton of Bern, and running N. W. through the whole extent of the lake of Brienz and Thun to Bern, takes a circuitous course to Soleure; whence it flows E. to Arburg, and N E. to Brugg; below which, being joined by the Reuss and Limmat, it falls into the Rhine opposite Waldschut.

Aarhaus, a large district of North Jutland, which extends from that of Wiburgh to Categat, about 15 miles in length, and between 8 and 9 in breadth, and is uncommonly fruitful.

Aarhus, or **Aarhausen**, the capital of the bishopric of that name, lies between the sea and a lake, from which water is conveyed by a pretty broad canal that divides the town into two unequal parts. It is large and populous; and has six gates, two principal churches, two market-places, a university, a free-school, and a well-endowed hospital.

Aaronsburg, post town of Northumberland county containing about 40 dwellings. It is situated a little more than a mile E. of Elk creek, which unites with Penn's, and falls into the Susquehanna, 5 miles below Sunbury.

Arseo, or **Arseo**, town of Algiers, near the mouth of the river Mina.

Abach, or **Wettenburg**, a market town in Lower Bavaria seated on the Danube, 7 miles from Ratisbon. It is defended by a citadel, and is remarkable for Roman antiquities, as well as for its mineral waters, which are celebrated for curing various diseases. Lon. 11 56 E. lat. 48 53 N.

Abadan, town at the mouth of the Tigris.

Abakanskoi, town of Siberia, in the province of Tobolsk, on the river Janeska, under the Russian government. It was founded in 1707, and rebuilt in 1726. It has a garrison, and is provided with artillery. Lon. 94 5 E. lat. 55 5 N.

Abalak, town in Siberia, two miles from

Tobolski, celebrated for an image of the Virgin, which is visited by many pilgrims, and carried in procession annually to Tobolski. Lon. 68 20 E, lat. 58 11 N.

Abascia, or *Abcas*, a country in Asia, tributary to the Turks, surrounded on the E by Mingrelia, on the N and W by Black Circassia, on the S by the Black Sea.

Abassia, the modern name of a kingdom in Ethiopia Proper; it comprehends the provinces of Bagemedier, Gogjam, Walcka, Shewa, &c. and is very mountainous; in some parts the rocks are so steep, that men and cattle are crand up by help of ropes and ladders, yet on the top of these there are woods, meadows, and fish-ponds.

Abberton, near Loxden, Essex. *Abberton*, near Parshore, 7 miles from Worcester, noted for its mineral water.

Abbenhall, small village 12 miles from Gloucester, 3 from Newnham, noted for a mineral spring, very efficacious in the cure of cutaneous eruptions.

Abberwick, large village near Alnwick, Northumberland.

Abbeville, a considerable town of France, in the department of Somme, and late province of Picardy, seated in a pleasant valley, where the river Somme divides into several branches, and separates the town into two parts. It is pretty well peopled: has a woolen manufactory, besides manufactories of sail-cloth. It lies 15 miles E from the British Channel, 20 NW from Amiens, 52 S of Calais, and 80 NW of Paris. Lon. 1 55 E, lat. 50 7 N.

Abbeville, district of S. C. having Pendleton district NW, Laurens NE, Edgfield SE, and the Savannah river SW. It is about 31 ms. in length and breadth, having a superficies of about 1000 sq. ms. The surface is agreeably variegated with hill and dale, and a considerable part of the soil is rich and well watered. Pop. in 1810.

In 1820.

Individuals to the sq. m. 23.

Abbey-Boyle, town of Ireland, in the county of Roscommon, and province of Connaught, remarkable for an old abbey. It lies 23 miles N of Roscommon. Lon. 8 32 W, lat. 53 56 N.

Abbey-Green, village of Scotland, in Lanarkshire, so named from being built around the ruins of a monastery, founded here by King David I. in 1440, dedicated to St. Macule. It contains about 430 inhabitants; and lies 12 miles S of Hamilton, and 4 from Lanark.

Abbey-Holm, town in Cumberland, so called from an abbey built in it by David I. King of Scots. It stands on an arm of the sea, and is 295 miles from London, and 16 SW from Carlisle. Lon. 3 21 W, lat. 54 53 N.

Abbey-Milton, or *Abbey-Middleton*, an ancient but mean town in Dorsetshire, where an abbey formerly stood. It is 12 miles NE of Dorchester, and 122 from London. Lon. 2 24 W, lat. 50 51 N.

Abbingdon, near Royston, Cambridgeshire.

Abbingdon, *Magna*, and *Parca*, near Linton and Bournbridge, Cambridgeshire.

Abbotsbury, town in Dorsetshire, so named from an abbey near it, founded by a Norman lady, about 1026, to which Edward the Confessor and William I. were both benefactors. It lies 7 miles SW of Dorchester, and 127 W by S from London. Lon. 2 42 W, lat. 50 38 N.

Abbots-Castle, or *Apewood-Castle*, an old fortification in Staffordshire, 7 miles from Wolverhampton, on the north side of the road from Shewsbury to London, situated on a lofty round promontory, and a steep ridge of hills, which extend a mile in length, supposed to have been one continued fortification, and a work of the ancient Britons.

Abbots-Langley, village in Herts, 4 miles from St. Albans, famous for being the birth-place of Pope Adrian IV.

Abb's Head, St. a promontory, forming the southern extremity of the Frith of Forth, lying in the Parish of Coldingham and the county of Berwick, Scotland, about 10 miles N of Berwick, and the same distance S from Dunbar. Lon. 1 56 W, lat. 55 54 N.

Abenrade, town of Denmark, in Selswick, now very flourishing, being double the extent it was formerly, and built in a better taste. It is seated on a spacious open bay in the Baltic, surrounded on three sides by high mountains, which render the harbour safe. Lon. 9 14 E, lat. 55 6 N.

Abensperg, or *Abensberg*, town of Bavaria, seated on the Abens, near the Danube, 15 miles SW of Ratisbon. Lon. 11 55 E, lat. 41 46 N.

Aberavon, borough town of Glamorganshire, governed by a port-reeve, seated on the mouth of the Avon, 19 miles NW of Cowbridge, and 195 W from London. The vicarage, which is discharged, is worth 45*l.* yearly. Lon. 3 48 W, 51 35 N.

Aberbrothwick, or *Arbroath*, small neat town on the east coast of Angusshire, 15 miles NE of St. Andrew's, and 40 NNE from Edinburgh. It is situated on the mouth of the small river Brothick: is a royal burgh, well built, and flourishing. The number of its inhabitants has greatly increased within these last 40 years, and they are now estimated at about 7000. The chief manufactures are brown linens, or Osnaburghs, sail-cloth, and white and brown thread. There are about 34 vessels belonging to this place, each from 60 to 160 tons, employed in the Baltic trade. The foreign imports are flax, flax-seed, timber, iron, &c. The glory of this place was formerly the abbey, whose very ruins give some idea of its ancient magnificence. It was founded by William I. the Lion, in 1178, and dedicated to the celebrated primate Thomas à Becket.—The founder was buried here, but there are no remains of his tomb. Fairs are on 31st January, 3d Wednesday of June, and 18th July. Lon. 2 29 W, lat. 56 36 N.

Aberconway, town of Caernarvonshire, pleasantly situated on the river Conway. It has a good harbour, and formerly carried on a considerable trade in corn. Lon. 4 1 W, lat. 53 20 N.

Abercorn, village and parish of West Lothian, on the south bank of the Frith of Forth, 12 miles west from Edinburgh. A monastery existed here in the seventh century; and the castle of Abercorn was a place of great strength in the family of the Douglasses. Though no traces of these buildings now remain, Abercorn still gives the British title of Marquis, and the Scottish title of Earl to a branch of the family of Hamilton. The Roman wall is said to have begun in this parish.

Abercorn, small town of Georgia, United States 13 miles NW of Savannah.

Aberdeen, the principal city in the north of Scotland, situated on the coast of the German ocean, 120 miles NE from Edinburgh, in lon 1 45 W, lat. 57 9 N. Under this denomination are comprehended two towns, *Old* and *New Aberdeen*, which, however are almost united by their respective suburbs.

Aberdeen Old, formerly *Aberdon*, is pleasantly situated on an eminence near the mouth of the river Don, about a mile north of New Aberdeen. It is of great antiquity, and was of some importance so long ago as 893, when according to tradition, King Gregory the Great conferred on it some peculiar privileges. By charter the free burgesses of the town are vested with the power of choosing their own magistracy, who are a provost, three bailies, a treasurer, and council with the deacons of six incorporated trades. The town consists chiefly of one long street. There is a neat town house, a new building, and a Trades Hospital for decayed freemen and their widows, and a hospital for 12 poor men, funded by Bishop William Dunbar. But the chief ornament of Old Aberdeen is the large and stately fabric of King's College, situated on the S. side of the town. It is built round a square, with cloisters on the south side. The structure contains a chapel, library, museum, common hall, and lecture rooms, with a long range of modern houses, for the accommodation of the professors and students. The library and museum are well furnished. The old town, being formerly the seat of a bishop, had a most magnificent cathedral, dedicated to St. Machar, but, like many others, it fell a sacrifice to the religious frenzy of the reformers. Two very antique spires and one isle, which is used as a church, is all that is left. In this cathedral there was a fine library, which was also destroyed. Over the Don at Old Aberdeen, there is a noble Gothic bridge, of one arch, 67 feet span, and 34½ high from the surface of the river. On both sides it rests on a solid ledge of rock. The population of Old Aberdeen and parish was 9911, in 1801.

Aberdeen New, is the capital of the shire of Aberdeen. For extent, trade, and beauty, it far exceeds any town in the north of Scotland. It is built on a gentle eminence, rising from a small bay, formed by the river Dee, over which there is an elegant bridge of 7 arches, built by Bishop Dunbar. The streets are numerous, spacious, and well

paved; the houses are built of granite, (from adjoining quarries,) generally four stories high, remarkably neat and elegant, having almost universally gardens in their rear. The whole town is about two miles in circumference, and the population is estimated at above 20,000. The municipal government is vested in a provost, 4 bailies, a dean of guild, treasurer, town-clerk, a town council, and 7 deacons of incorporated trades. The town is a royal burgh, and uniting with Aberbrothwick, Brechin, Inverbervie, and Montrose, sends a member to parliament. New Aberdeen is graced with an elegant college, founded by George Keith, the Earl Marischal of Scotland, in 1593. The trade is considerable, but might be greatly extended by an attention to the white fisheries. Aberdeen once enjoyed a good share of the tobacco trade; but of late years its chief imports were from the Baltic, and a few merchants trade to the West Indies, the Levant, and North America. Its exports are stockings, thread, salmon and oatmeal. The first is a most important article, being estimated at no less than 183,000*l.* annually; and employing in the spinning, knitting, &c. a very considerable portion of the inhabitants of the county. The thread manufacture is another considerable article, though trifling in comparison of the woollen. The salmon fisheries on the Dee are a good branch of trade. About 46 boats, and 130 men, are employed on the fish; and in some years, 167,000 lbs. of fish have been sent pickled to London, and about 900 barrels of salted fish exported to France, Italy, &c. The inhabitants likewise export considerable quantities of pickled pork, which they formerly disposed of to the Dutch for victualling their East India ships and men of war; the Aberdeen pork has the reputation of being the best cured of any in Europe for keeping on long voyages. Fairs are on the 31st Jan. 3d Wednesday in June, and 13th July.

Aberdeenshire, a county of Scotland, bounded on the NW by Banffshire, and the Deveron; on the N and NE by the German Ocean; on the S by the counties of Kincardine, Angus, and Perth; and on the W by Inverness-shire. Its length from NE to SW is about 10 miles; its breadth not quite 30. It comprehends the districts of Mar, Garioch, Strathbogie, and the greater part of Buchan; and sends one member to parliament. The soil of this extensive county is very various, and agriculture,

in general, rude. The high grounds present much excellent pasture, while great part of the lowlands yield very grateful returns to tillage. This county is noted for the thriving state of its manufactures of linen and woollen, in which it promises shortly to rival the superior region of the Clyde.

Aberdour, small town in Fifeshire, Scotland, with a good harbour, on the Frith of Forth, about 10 miles NW of Edinburgh.

Aberford, or *Aberforth*, small town in the west riding of Yorkshire, 15 miles SW of York, and 184 NNW from London. It has a market every Wednesday, and four fairs on the first Wednesdays of April, May, October, and after St. Luke's day. It is noted for pin-making. Lon. 1 21 W, lat. 53 13 N.

Aberffraw, village of North Wales, in the isle of Anglesey, formerly a place of note, the Princes of North Wales having had a palace in it. It is now much reduced, though it has four fairs, on the 7th March, 23d Oct 11th Dec. and Wednesday after Trinity, all for cattle. In the neighbourhood, a considerable flannel man factory is carried on. It lies 6 miles NW of Newburgh. Lon. 4 36 W, lat. 53 13 N.

Abergavenny, well-built town in Monmouthshire, 16 miles W of Monmouth, and 142 W by N from London, containing about 500 houses, 2 churches, and an old castle. It has two weekly markets and three fairs, on May 1, Tuesday after Trinity, and Sept. 25. Lon. 3 5 W, lat. 51 50 N.

Abergele, village of N. Wales, in Denbighshire, 5 miles W by S of St. Asaph, and 224 from London, which has 4 annual fairs for cattle, on the 2d of April, 20th of August, 9th of October, and the day before Holy Thursday.

Abernethy, small town in Perthshire, in Scotland, seated near the junction of the Erne with the Tay. It is said to have been the seat of the Pictish kings, as well as the see of an archbishop. In the town church-yard is a round tower 74 feet high and 48 in circumference, the only one besides that of Brechin in Scotland. The town is much decayed; the chief manufacture is that of household linen, and silesias for the market of Perth.

Aberystwith, town of S. Wales, in Cardiganshire, seated on the Iwith near its confluence with the Riddall, where they fall into the sea. It lies 203 miles WNW from London, and 30 NE from Cardigan. It was formerly fortified with a castle, and defended with walls; but both are

now in ruins. It is, however, rich and populous, having a great trade in lead, a considerable fishing of herrings, cod, and whittings, and a good weekly market on Monday. In the bathing season, this town is a fashionable watering place. Lon 4 0 W, lat. 52 25 N

Abex, country of Africa, on the Red Sea, which bounds it on the east; on the west it is bounded by Abyssinia and Nubia, on the north by Egypt, and on the south by the coast of Ajan. The chief towns are Arkeko, or Erecoco, and Suaquam; which last is the capital, and the seat of a governor. It is subject to the Turks. It is 500 miles in length, and 100 in breadth.

Abingdon, or *Abington*, a town of Berks on the Thames, so named from an abbey formerly built in it, 6 miles S of Oxford, 47 E of Gloucester, and 56 W from London. It is a good thoroughfare, and has a market on Monday and Friday. It has two churches and two charity-schools.

Abington, post town and capital of Washington county, Virginia, situated near the east side of the north branch of H'stein river. Here is a jail, and a court-house, where the district and county courts are held. It is 300 miles wsw of Richmond, and 557 from Philadelphia. N. lat. 36 51 W. lon. W.C. 5 05.

Abino creek, of Upper Canada, in the County of Lincoln, emptying into lake Erie, in the township of Bertie, at the head of the bay, East of Point Abino.

Abino Point, in the township of Bertie, on lake Erie, is 9 or 10 miles west of Fort Erie.

Abkhas, one of the seven nations in the countries comprehended between the Black Sea and the Caspian. Their principal and most ancient settlements are on the southern slope of the mountains lying between the river Cuban and the Black Sea. They are tributary to the Turks, and are divided into two governments, the Western and the Eastern, each subject to a bashaw, commonly chosen from among the principal natives. One of these resides at Sotchukale, and the other at Soghunkale. The capital is Anacopir, formerly Nicopsis. The Abkhas speak an oriental language, essentially different from all the known languages, though appearing to have a very remote affinity to that of the Circassians. They have very little religion, though they preserve some traces of Christianity.

Ablo, town of Little Territory, lying between the river Bigepeer and the Black Sea. Lon 33 16 E, lat 46 20½ N.

Abo, seaport, the capital of Swedish

Finland, which lies upon the point where the gulfs of Bothnia and Finland unite. It is a good port; and is the see of a bishop, suffragan of Upsal. It has a university, founded by Queen Christina in 1640, and endowed with the same privileges as that of Upsal; besides a school, founded by Gus avus Adolphus, for 300 scholars. The town is tolerably well built, and the inhabitants export linen, corn, and planks. Here the treaty of peace between Russia and Sweden, in 1743 was concluded. It lies 120 miles NE of Stockholm. Lon. 22 18 E, lat. 60 27 N.

Aboukir, small town of Egypt, lying in the desert between Alexandria and Rosetta. It is the ancient *Canopus*; and is situated, according to Mr. Savary, 6 leagues from Pharos. The town is built on a rock, which forms a handsome road for shipping, and is out of the reach of inundations.

Aboutige, town in Upper Egypt, near the Nile, where great quantities of poppies grow, of which the natives make the best opium in the Levant. Lon. 49 0 E, lat. 26 30 N.

Abrantes, town of Portugal, in Estremadura, seated on the Tajo, and belonging to a marquis of that title. It is situated on a high ground, is surrounded with gardens and olive-trees, contains 35,000 inhabitants, and has 4 convents, a hospital, and an alms-house. Lon. 7 18 W, lat. 39 13 N.

Abruzzo, province of Naples, bounded on the e, by the Gulf of Venice, on the s and w by Ancona, Umbria, and the Campagna di Roma, and on the s by the Terra di Lavoro and Molise. It is divided into two parts by the river Pescara, called Ulteriore and Citeriore. The former has Aquila, and the latter Solomona, for its capital. The country, though cold, is fertile in corn, rice, fruits, saffron, vines, and olives.

Abs, town in France, in the department of Ardeche, formerly the chief town of Vivares, and a bishop's see, now in a very ruinous state.

Abgo, or *ibogo* one of the Philippine isls. in the East Indies, between Mindanao and Luzon. Here the Spaniards have a fort, and carry on a good trade with their American territories. Lon. 122 15 E, lat. 10 0 N.

Abussiania, a kingdom of Africa, 800 miles long and 600 broad, bounded on the north by Nubia, east by the Red Sea and Daucala, west by Gorbam, and south by Gog and Alaba. It is one of the most mountainous and precipitous countries in the world; but in a few vales the soil

black and fertile. The rainy season continues from April to September. This is succeeded, without interval, by a cloudless sky, and a vertical sun. Cold nights as instantly follow these scorching days. The earth, notwithstanding these days, is perpetually cold, so as to feel disagreeable to the soles of the feet; partly owing to the six months rain, and partly to the near equality of nights and days. There is no country in the world that produces a greater variety of quadrupeds, both wild and tame; but there are no tigers. The hyenas, however, are very numerous, and dreadful in their ravages. Beside eagles, vultures, &c. there is a species of glede, called had-dayn, which is frequent in Egypt, and comes punctually into Abyssinia, at the return of the sun, after the tropical rains; and storks are numerous in May, when the rains become constant: there are few owls; but these are of an immense size and beauty. The most remarkable insect is the Tsalisal, a large fly, which is so fatal to cattle, that in some particular districts, great emigrations take place in the beginning of the rainy season, to prevent the stock of cattle from being destroyed. There is a remarkable coincidence between the customs in the court of ancient Persia and those of Abyssinia. According to Mr. Bruce, the celebrated river Nile has its source in this country. Gondar is the metropolis.

Acanbom, kingdom on the coast of Guinea in Africa, whose king is absolut, and one of the most powerful on the coast; his subjects though warlike and brave, are haughty, rapacious, and cruel.

Acumy, an inland country on the Gold coast of Guinea, which affords the best gold, and in great plenty: also a town or village in that country. Lon. 0 30 E, lat. 8 30 N.

Acatulco, a considerable town and port in Mexico, on the South sea. It has a fine harbour, from whence a ship, (sometimes two) annually sails to Manilla in the Philippine islands, near the east of China, in Asia; and another returns annually from thence with all the treasures of the East Indies, such as diamonds, rubies, sapphires, and other precious stones; the rich carpets of Persia, the camphire of Borneo; the benjamin and ivory of Pegu and Cambodia; the silks, muslins, and calicoes of Mogul; the gold dust, tea, china ware, silk and cabinets of China and Japan; besides cinnamon, cloves, nutmegs, and pepper, insomuch that this single ship contains more riches than many whole fleets.

Annual ships also arrive from Lima and other ports of Chili and Peru, with specie, &c. The goods brought to Acapulco are carried to the city of Mexico, above 200 miles distant, by mules and pack horses, and from thence to Vera Cruz on the north sea, in order to be shipped for Europe. Acapulco itself is a small place, consisting of about 300 thatched houses, p.p. 4000. The air here is hot, heavy, and unwholesome. Upon the arrival of the galleons, traders flock here from all the provinces of Mexico, to exchange European toys, their own cochineal, and about 437,500l. sterling of silver, for spices, muslins, printed linens, silk, perfumes, and the gold works of Asia. Lon. 29 35 W, lat. 16 40 N.

Acasabastian, river of Mexico, in the province of Vera Paz, which runs into the gulf of Dulce.

Acatulan, village of Mexico, intendancy, Valladolid, N. lat. 19 20, W lon. 100 05.

Acadian coast, or *Acadia*, county of Louisiana, lies along the Mississippi river below Lafouce river.

Accomack, co. of Virg. on the Eastern shore of the Chesapeake Bay, having Northampton s the Atlantic Ocean e, Worcester co. in Maryland N and the Chesapeake Bay w. It is about 20 ms. long and 10 wide, area 240 sq. ms. chief town Drummondstown. The surface generally flat and sandy. Pop. in 1810.

Acham, country in Asia, bounded on the N by Boutan, on the E by China, on the S by Burmah, and on the W by Hindoostan. It is very little known to Europeans.

Acheen, kingdom on the NW part of the island of Sumatra, in the Indian ocean, now very different from what it was, in the beginning of the 16th century, when it was so powerful as to expel the Portuguese from the island where they repeatedly attempted to settle; and when its sovereign received embassies from some of the greatest potentates of Europe. Though no longer the great mart of eastern commodities, it still carries on a considerable trade with the natives of that part of the coast of Hindoostan, called *Telinga*, who supply it with cotton goods of their country, and receive in return, gold dust, sapan wood, betel nut, patch leaf, (*colson Indicus*,) a little pepper, sulphur, camphire, and benzoin. The country is supplied with Bengal opium, and also with iron, and many other articles of merchandize, by the European traders. Acheen is esteemed comparatively healthy, being more free from woods and swamps than most other portions of the island. In various respects the Acheenese excel the other inhabitants of Sumatra; they are taller, stouter, and better proportioned; more sagacious and cunning, more active and industrious, as well as better navigators.

Acheen, or *Achem*, the capital of the kingdom so called, lies 1000 miles SE of Madras, and is situated on a river which runs into the sea near the NW point, or Acheen-head, about two miles from the mouth, in a wild valley, formed by two lofty ranges of hills. A considerable fabric of a thick species of cotton cloth, and of stuff for the short drawers worn by Malays and Achenese, is established here, and supplies an extensive demand. They weave also very handsome silk pieces, of a particular form for that part of the dress which is

called by the Malays *cayen farroag*. Lon. 95 34 E, lat. 5 22 N.

Acre, or *St. John d'Acre*, a seaport of

Syria, in Palestine, and a bishop's see. It is called Ptolemais by the Greeks, and stands on a plain at the north point of a bay, which extends in a semicircle of nine miles to the point of Mount Carmel, near the mouth of the Kardanah, or ancient Belus. In the time of the crusades, it underwent several sieges; and nothing is now to be seen of this ancient city, but the remains of monuments erected by the Christians, and some ruins of a church dedicated to St. Andrew. The new city is distant one mile from the ancient walls, and the fortifications are of little importance. The palace of the grand master of the order of St. John of Jerusalem is the residence of the chief of Acre. Here are three mosques, four churches, and a synagogue. The chief article of commerce are corn and cotton. In 1759, great damage was done by an earthquake; and the year following 5000 persons, near one third of the inhabitants, died by the plague. In 1799, aided by the British, under Sir Sidney Smith, it withstood a severe siege by the French under Buonaparte, who retreated after failing in a twelfth assault. It is 24 miles S of Tyre, and 47 N of Jerusalem. Lon. 35 20 E, lat. 32 32 N.

Azarum, post-town, Hamden county, Massachusetts.

Adana, town of Asiatic Turkey, in Carmania, and a bishop's see, with a strong castle. It has a trade in corn, wine, and fruits: and is seated on a river of the same name, 12

miles from the Mediterranean, and 150 S. E. of Cogni. Long 36 6 E. lat. 37 0 N.

Adda, river of Switzerland, which rises in the Grisons, passes through the lake Como, the Vatteline, and the north part of the Milanese, falls into the Po, 5 miles above Cremona.

Adel, kingdom of Africa, called also *Zeila*, from a rich trading town of that name, situated near its coast on the Red sea. It seldom rains here; but the country is well watered by rivers, and abounds with wheat, millet, frankincense, and pepper. The inhabitants are Mohammedans. It was formerly a part of Abyssinia. The capital is Aucagurel.

Adelfors, town of Sweden, in Smoland, noted for its gold mines, 70 miles N. W. of Calmar.

Aderbietzan, province of Persia, bounded on the N. by Armenia, W. by Ghilan, S. by Irac Agemi, and W. by Curdistan. Tauris is the capital.

Adige, river of Lombardy, which rises S. of the Lake of Glace, and passing by Tyrol, Brixen, Trent, and Verona, falls into the gulf of Venice, a little N. of the mouth of the Po.

Admiralty-Islands, a cluster of islands in the Pacific ocean, to the N. W. of New Ireland. They were discovered in 1767, and are between 20 and 30 in number; some of them appear of considerable extent; and the centre one is supposed to be in lon. 146 44 E. lat. 15 37 N.

Alon, town of Hungary, seated in a fruitful country near the Danube, 12 miles S. of Barla.

Adour, river of France, which rises in the department of Upper Pyrenees, flows by Tarbes and Dax, and enters the bay of Biscay, below Bayonne. The English General, Lord Wellington, effected a passage across this river, with the allied army, in the middle of February, 1814, after considerable difficulty, in the presence of the French army, commanded by Marshal Soult.

Adria, town of Italy, in Polesino di Rovigo, which gives name to the Adriatic sea, and was formerly of great note, but has been much reduced by frequent inundations. It is seated on the Tartaro, 25 miles S. S. W. of Venice.

Adriano, mountain of Spain, in Biscay, over which is a very difficult road to Alba and Old Castle. It is one of the highest mountains of the Pyrenees and is only inhabited by a few shepherds.

Adrianople, city of European Turkey, in

Romania, the see of an archbishop, and formerly the European seat of the Turkish dominion. It is eight miles in circumference, situate in a plain, on the river Marissa, which here receives two tributary streams. Several of the mosques are very splendid, and many of the houses neat, but the streets are narrow and devious. The seraglio is separated from the city by the river Arda, and commands an extensive view of the country, which is fertile, and famous for excellent vines. The commerce of the city by the river is considerable. The Turks took this city from the Greeks, in 1362. It is 112 miles N. W. of Constantinople. Lon. 26 27 E. lat. 41 55 N.

Adriatic Sea. See *Venice*, *Gulf of*.

Adventure Bay, at the S. E. end of Van Diemen's land, so called from the ship in which Captain Furneaux sailed. Lon. 147 30 W. lat. 43 23 S.

Agales, or *Egates*, three small islands on the W side of Sicily, between Marsella and Trapani; their names are Levenzo, Favignana, and Maretima.

Etna, or *Etna*, a celebrated burning mountain of Sicily, now called by the natives *Monte Gibello*. It is situated in the eastern part of the island, in lon. 15 0 E. lat. 38 0 N. Pindar who lived 435 years before Christ, calls it the *Pillar of Heaven*, on account of its great height, which is generally reckoned to be about 11,000 feet; and its circumference at the base 70 miles. It affords an epitome of all the differences of climate. The summit is a league in circumference, and within formed like a vast amphitheatre, from whence flames, ashes, and smoke, issue in divers places. Eruptions of this mountain are mentioned by Dioctorus Siculus, as happening 1693 years before Christ; and Thucydides speaks of three eruptions, which happened in 734, 477, and 425, B. C. From this period till 1447, there were about 18 different eruptions, the most destructive of which were in 1169 and 1329. There have been other eruptions since, which has done immense damage, particularly those in 1669, 1780, and 1787.

Afghanistan, country of Asia, stretching from the mountains of Tartary to the Arabian sea, and from the Indus to the confines of Persia. The inhabitants of this wide domain have no written character, and speak a language peculiar to themselves. They are a robust hardy race of men; and being generally addicted to a state of predatory warfare, their manners partake of a barbarous insolence; they avow a fixed contempt for the occupations of civil life; and are esteemed the most negligent of religious observances of all the Mohammedans. Their common dress consists of a shirt, which falls over the upper part of long and narrow trowsers; a wool-

sen vest, fitted closely to the body, and reaching to the middle; and a high turned up cap, of broad cloth or cotton, usually of one colour, and of a conic form, with two small parallel slits in the upper edge of its facing. The principal cities of Afghanistan are Candahar and Cabul, the former of which was the capital; but the late and present sultans have kept their court at Cabul. About the year 1720, an army of Afghans invaded Persia, took Ispahan, and made the sultan Husseyn prisoner. They kept possession of Ispahan and the southern provinces for ten years, when they were defeated in several battles, and driven out of the country by Nadir Kuli, commonly known in Europe by the name of Kouli Khan. After Nadir had deposed his sovereign, Shah Thamas, he laid siege to and took Candahar; but afterwards received a considerable body of Afghans into his army, who became his favourite foreign troops. On his assassination, in 1747, the general of the Afghan troops, though furiously attacked by the whole Persian army, effected a safe retreat into his own country, where he caused himself to be acknowledged sovereign of the Afghan territories, by the title of Ahmed Shah. He was succeeded in 1773, by his son, Timur Shah, and he by Zemaun Shah, the present sultan.

Africa, one of the four principal parts of the world; bounded on the N. of the Mediterranean sea, W by the Atlantic ocean, S by the Southern ocean, and E by the isthmus of Suez, the Red Sea, and the Indian ocean. It is a peninsula of prodigious extent, being joined to Asia by the isthmus of Suez, which is 40 miles over. In its greatest length, from the most northern part to the Cape of Good Hope, it is 4600 miles; and in the broadest part, from Cape Verd to Cape Guardafui, it is 3500. The greatest part of it is within the torrid zone, which renders the heat almost insupportable in many places. However, the coasts in general are very fertile, the fruits excellent, and the plants extraordinary. There are more wild beasts here than in any other part of the world; there are also some animals peculiar to this country; as the hippopotamus, or river horse; the rhinoceros, with two horns on its nose; and the beautiful striped zebra. Besides these, there are crocodiles, ostriches, camels, and many other animals not to be met with in Europe. There are several deserts, particularly one of a large extent, called Zahara; but these are not quite without inhabitants. There are many large rivers; but the principal are the Nile, Niger, Zaire, Senegal, and Gambia. The most considerable mountains are the Atlas, the Mountains of the Moon, and the Sierra Leon. The inhabitants consist of pagans, Mohammedans,

and Christians. In the central parts, on the South, appear to be the native regions of the negroes, whose colour, features, and hair, distinguish them from all other races of mankind. In the seventh century, the Mohammedan Arabs subdued the North of Africa, and their descendants, under the name of Moors, constitute a great part of the present population. The principal divisions of Africa are Barbary, Egypt, Biledulgerid, Zahara, Negroland, Guinea, Bornou, Cashna, Fezzan, Senna, Nubia, Aoyssinia, Abex, Loango, Congo, Angola, Benguela, Matama, Zanguebar, Monomotapa, Monomugi, Sofola, Caffiraria, and the country of the Hottentots. In 1788, an association was formed for the purpose of exploring the interior regions of Africa; and Mr Ledyard and Mr. Lucas, were selected as their missionaries. Mr. Ledyard died on his journey. Mr. Lucas was prevented from pursuing the plan sketched out for him, and was obliged to content himself with such imperfect information as his guides could give him. In 1795, the African association despatched Mr. Park to explore this immense continent. His journey has brought to our knowledge more important facts respecting the geography of Africa, than the accounts of any former traveller. He has pointed out to us the sources of the great rivers, the Senegal, Gambia, and Niger; the course of this last he has determined to be from W to E, and thus set this much disputed point for ever at rest.

But though the actual east course of the Niger is now determined, the final discharge of that stream remains a problem, not yet solved; and though its entrance into the Atlantic ocean is probable, the fact is not yet established.

Alaba, or *Alava*, one of the three smallest districts of Biscay in Spain, but pretty fertile in rye, barley, and fruits. There are in it very good mines of iron. Vitoria is the capital.

Alabama, one of the United States, having Tennessee N; Georgia E; Florida, and the gulf of Mexico S; and the Mississippi W. This state extends from N. lat. 30 12 to N. at. 35, or 334 miles with a mean width of 155 miles; extending over 51,770 square miles, 33,132,800 acres. The face of Alabama is much variegated, the soil also differs in quality from the worst to the best. That section of the state which lies along the gulf of Mexico, is low and sandy, but this character of country rapidly changes, within 10 or 12 miles from the coast, the hills commence, and gradually gain elevation advancing north. The bay of Mobile penetrates this section 30 miles, and is followed by an overflowed tract, which extends again 32 miles to the junction of the Alabama and Tombigbee rivers. Between the head of Mobile bay, and the union of the two latter streams, a number of channels wind through the alluvial tract, the principal of which, are those of the Mobile and Tensaw. The bay and the alluvial bottoms above are limited on each side by hills of moderate elevation covered with pine timber. The pine region extends into the centre of the state, and forms much the largest portion of its soil. The Tombigbee, Blackwarrior, Catawba, Coosa, Tallapoosa, Alabama, and some minor streams peninsula the pine section of Alabama. Extensive bodies of river alluvion skirt those rivers, and much interval land of second rate quality, spread between the river bottoms and the open pine woods; but the far greater share of the central parts of the state is barren. The foregoing character continues to the sources of the waters flowing towards the gulf of Mexico. Tennessee river enters the state at the north-east corner, and leaves it at that of the north-west, sweeping by an elliptical curve to the south as far as N. lat. 34 17. The northern extremity of the state is the most fertile, and valuable

of its natural sections. The spurs of the Appalachian ridges extend into, and cross Alabama obliquely, rendering its central and northern extremity much broken; the rivers wind in deep valleys. The climate and seasons partake of the extended variety of latitude and natural physiognomy. Stretching through near 5 degrees, and differing so much in relative elevation, the temperature and vegetable production exhibits a very rich variety.

It is productive in maize in all parts of the state; and small grain, in the hilly and northern sections. Cotton is, however the staple commodity, cultivated for export, though some tobacco is also raised for market in small quantities. A very great variety of fruit trees and garden vegetables are cultivated; the principal fruits are, apples, peaches, pears, plums, and towards the gulf of Mexico, the pomegranate and fig. By the census of 1820 Alabama contained the following counties, with the population annexed to each

The foregoing was the population of Alabama 1820 from the Marshals return; but, by subsequent information laid before the Congress of the United States, it appeared that the enumeration was too small by more than 16,000 persons; and, consequently the state contained above 143,000 inhabitants. Of these, about 35,000 were engaged in agriculture, in commerce 500; and, in manufactures 8000. Cahaba, is the seat of government.

Alabama, post town of Monroe county Alabama, on the Alabama river, about 10 miles below Fort Jackson.

Alabama, river in Alabama is formed by

the united streams of Coosa, and Tallapoosa. The general course of this river is from north-east to south-west, and following the windings of near 300 miles in length; it receives only one considerable branch, the Cahaba from the north, and uniting with the Tombigbee at N. lat. 31 06 forms the Mobile, about 35 miles above the head of Mobile bay. The banks of the Alabama are in general extremely fertile. Cotton and tobacco chief staples. It is navigable by schooners drawing 5 feet water, to the first rapid near Fort Claiborne, and for boats of considerable tonnage to the head, at the mouth of Coosa, and Tallapoosa.

Albany, city, capital, and post town of Albany county; state of New York it is also the seat of government of the state, situated on the right bank of the Hudson, 143 miles north from the city of New York. It is divided into 5 wards with a population in 1820, of 12,867; and in commerce, wealth, and general improvement, is the second city in the state. The situation is excellent, as an entrepot between the city of New York and the interior country. Sloops of large tonnage go up to Troy, 5 miles still higher on the Hudson, and when the two great canals of Champlain and Erie are completed, Albany and Troy will occupy the common centre of an immense inland trade. Albany possesses many splendid private buildings; a state house upon a very commanding site, an academy, 4 banks, 11 or 12 places of public worship; it is supplied by pipes, with excellent water from a fountain distant 5 miles. This city is one of the most ancient in the United States, the Dutch having a fort there as early as 1612. Many of the old fashioned buildings with their gable ends to the streets still remain. A large and very respectable body of the inhabitants are of Dutch descent. N. lat. 42 39. E. lon. W. C. 3 17.

Alby, ancient town of France, lately the capital of the territory of Albigeois in Languedoc, and an archiepiscopal see. It is situated in the department of Tarn, and contains 10,000 inhabitants. In point of architecture and decorations, the principal church is one of the most curious in France. The inhabitants were called Albigenenses; and were the first that disputed the authority of the pope; they were condemned by a council here in 1176. It has 4 gates through which you may view all the beauties of a delightful plain, which produces all kinds of grain, excellent wines, flax, hemp, saffron, aniseed, coriander, and wood. The fine pastures afford wool of a good quality, which is manufactured into knit stockings for the soldiers, ratteens of all colours, shalloons, coarse woollens, &c. The wax candles of Alby are equal in whiteness to those of Mans. This town is 42 miles N E of Toulouse, and 335 S of Paris. Lon. 2 14 E. lat. 44 15 N.

It is seated in an open country, abounding in all sorts of corn and fruits, on the river Sar, 20 miles N of Mans, and 97 S W of Paris. Lon. 0 10 E. lat. 46 1 N.

Alentejo, large province of Portugal, having Algarve south, Spanish Estramadura east; the river Tagus north; and Atlantic ocean west. Chief towns Evora, Beja, Eboas and Villa Vicosa.

Aleppo, capital of Syria, inhabited by Turks, and different denominations of Christians, who have each a bishop and a church, and the free exercise of their religion. The city and suburbs contain 235,000 persons. Next to Constantinople and Cairo, it is the most considerable city in the Turkish empire. It is situated in the vast plain, which extends from the Orontes to the Euphrates, and which towards the south terminates in the desert. It is built on eight hills, on the highest of which the castle is erected, and is supposed to be the castle of Beræa. The houses are large and commodious, having terraces on their tops, and generally sky-lights in form of a dome, to let the light into the rooms, which from their loftiness, the gilding on the window-shutters, cupboards, &c. have at first entrance a very agreeable effect. The streets are carefully paved; have gutters and a foot pavement on each side; and the middle of the street is laid with brick, the small end upwards, for the convenience of horses. There is also a cleanliness observed here, unknown to the other cities of Turkey, there being ass drivers who go about the city and take up the rubbish and dust, which each inhabitant is obliged to sweep together. The mosques are numerous and some of them magnificent. Before each of them is an area, with a fountain in the middle, designed for ablutions before prayers. The bazars or market-places are long covered narrow streets, on each side of which are a great number of small shops, just sufficient to hold the tradesman and his goods, the buyer being obliged to stand without. The situation of Aleppo, besides the advantage of a rich and fruitful soil, possesses also that of a stream of fresh water, which never becomes dry. Near Aleppo, its banks are covered with a fertile earth, and laid cut in gardens, or rather orchards, which in a hot country, and especially in Turkey, cannot but be delightful. The city is itself one of the most agreeable in Syria. On whatever side it is approached, its numerous minarets and domes present an agreeable prospect to the eye, fatigued with the continued sameness of the brown and parched plains. Aleppo is the emporium of Armenia and the Harbekar; sends caravans to Bagdad and into Persia; and communicates with the Persian gulf and India, by Bassora, with Egypt and Mecca by Damascus, and with Europe and Alexandria and Latakia. Their chief commodities are raw or spun cottons, clumsy linens fabricated in the villages, silk stuffs manufactured in the city, copper, coarse cloths, goat-hair, the galls of the Kourdestan, the merchandise of India, such as shawls and muslins. Eighteen miles S E of Aleppo, is a large plain, called the Valley of Salt, bounded by low rocky hills.

which form a kind of natural basin that retains the rain descending from the rocks, together with the water rising from a few springs, and cause the whole to be overflowed in winter. The extent of the surface prevents this water from being of any great depth; so that it is soon evaporated by the sun, when it leaves a cake of salt, in some places half an inch thick; and, in April, people are employed to gather this salt, which is sufficient to supply all this part of the country. Aleppo is seated on a small brook, 70 miles E of Alexandretta, and 170 N by E of Damascus. Lon. 37 20 E lat. 35 45 N.

Alessano, town of Naples, in the province of Otranto, with a bishop's see, 15 miles S W of Otranto. Lon. 18 25 E. lat. 40 10 N.

Alessia, town of Albania, with a bishop's see, near the mouth of the Drino. Lon. 20 6 E. lat. 42 8 N.

Alessio, town of Turkish Dalmatia, with a bishop's see, seated on a mountain 25 miles from Spalatro.

Alet, town of France, in the department of Aude and late province of Languedoc. It was lately an episcopal see, and is remarkable for its baths, and for the grains of gold and silver found in the stream which runs from the Pyrenees, at the foot of which it stands. It is seated on the river Aude, 15 miles S of Carcassone. Lon. 2 25 E. lat. 42 59 N.

Aleutian Islands, or Northern Archipelago; a long range of islands stretching between North America, and Asia, from the peninsula of Alaska, to Cape Lopatka the south point of Kamschatka. It is an immense chain extending upwards of 900 geographic miles. They are included in the Russian province of Irkutsk, and exceed 40 in number. Between N. lat. 52 and 54 W. lon. W. C. from 85 to 113.

Alexander, post town of Genesee county New York, population 1820, 1496.

Alexander, township of Athens county Ohio, population 1820, 837.

Alexander, county of Illinois, at the confluence of the Ohio and Mississippi. The features of this county is varied; these parts extending along the rivers, are low, flat, and to a considerable extent, annually inundated; in the interior rise hills of considerable elevation. The soil is in general fertile. Some cotton has been cultivated, but the climate is rather too cold for the growth of that vegetable. Maize, wheat, rye, oats, &c. are produced in abundance, as are garden vegetables, and fruit trees, such as apples, peaches, pears, and plums. Pop. in 1820.

Alexanderville, village of Ohio in Montgomery county, situated on the Miami river, 7 miles below Dayton.

Alexandretta, or *Scanderoun*, town of Syria, in Asia, at the extremity of the Mediterranean sea, and the seaport of Aleppo, from which it is distant 28 or 30 leagues. It is now properly speaking nothing else but a village without walls, in which the tombs are more numerous than the houses, and which entirely owes its existence to the road which it commands. This is the only road of all Syria, where vessels anchor on a s lid bottom, without their cables being liable to chafe: but in other respects it has many inconveniences. It is infested, during winter, by a peculiar wind, which rushing from the snowy summits, frequently forces ships to drag their anchors several leagues. But the worst circumstance is the extreme unwholesomeness of the air. It may be affirmed that this every year carries off one third of the crews of the vessels which remain here during the summer, nay, ships frequently lose all their men in two months. To this baneful epidemic, Alexandretta from its situation seems to be irremediably condemned; for the plain on which the town is built is so low and flat, that the winds finding no declivity can never reach the sea. On this account, while the heats are excessive, the principal inhabitants retire to the neighbouring villages, among the mountains, where there is excellent water and delicious fruits. It is 70 miles W. of Aleppo. Lon. 36 23 E. lat. 36 35 N.

Alexandria, strong and considerable town of Italy, belonging to the duchy of Milan, with a bishop's see, and a strong castle. It was taken by Buonaparte when he overran Italy, retaken by Suwarrow, and since taken by the French, June 1800. It is seated on the Tanaro, 40 miles S by E of Milan. Lon. 8 43 E. lat. 44 55 N.

Alexandria, town of Ohio in Sciota county, at the mouth of Sciota river.

Alexandria, post town and seat of justice for the parish of Rapides, situated upon the

right bank of Red river, immediately below the Rapids. It is about 350 miles above New Orleans by water, and 65 below Natchitoches. Number of inhabitants about 600. N. lat. 31 18. W. lon. W. C. 15 39.

Alexandria, or *Scandaria*, an ancient and once rich and famous town of Egypt, now much decayed, though there are still some remains of its ancient splendour. This city was built by Alexander the Great, about 333 years before Christ, and was a league and a half long, by one-third in breadth, which made the circumference of its walls about four leagues. Lake Mareotis bathed its walls on the south, and the Mediterranean on the north. It was intersected lengthwise by straight parallel streets. This direction left a free passage to the northerly wind, which alone conveys coolness and salubrity into Egypt. A street of 2000 feet wide began at the gate of the sea, and terminated at the gate of Canopus. This street, the handsomest in the universe, was intersected by another of the same breadth, which formed a square at their junction of half a league in circumference. At present the city of Alexandria is reckoned to have about 14,000 or 15,000 inhabitants; a strange colluvies of different nations; as well as from various parts of the Turkish empire. The present condition of Alexandria is very despicable, being now so far ruined, that the rubbish in many places overtops the houses. The famous tower of Pharos has long since been demolished, and a castle called *Farillon*, built in its place. Some parts of the old walls of the city are yet standing, and present us with a masterpiece of ancient masonry. But what most engages the attention of travellers is the Pillar of Pompey, as it is commonly called, situated at a quarter of a league from the southern gate. It is composed of red granite. The capital is Corinthian with palm leaves, and not indented. It is nine feet high. The shaft and the upper member of the base are of one piece of 90 feet long, and 9 in diameter. The base is a square of about 15 feet on each side. This block of marble, 60 feet in circumference, rests on two layers of stone bound together with lead. Nothing can equal the majesty of this monument; seen from a distance, it overtops the town, and serves as a signal for vessels. Approaching it nearer, it produces an astonishment mixed with awe. One can never be tired, with admiring the beauty of the capital, the length of the shaft, nor the extraordinary simplicity of the pedestal. It was formerly a place of great trade, all the treasures of the East Indies being deposited there: but since the discovery of the Cape of Good Hope, this trade is in a great measure lost. This place is subject to the grand signior, who, however, has but a limited authority.

It is seated on the most westerly branch of the river Nile, 125 miles N W of Cairo. It was taken by the French under Buonaparte in their expedition to Egypt, but they have been forced to abandon it. Lon. 31 11 E. lat. 30 21 N.

Alfacs, the name of certain islands near the mouth of the Ebro, in the principality of Catalonia, in Spain.

Alfeizerao, town of Portugal, in Estramadura, on the sea side. Lon. 9 10 W. lat. 39 30 N.

Alfred, post town of York county, Maine; situated on the Mousam river, 576 miles from Washington city. In 1800, the township contained 900 inhabitants, in 1810, 1106, and in 1820, 1271.

Alfreton, town in Derbyshire, with a market on Monday; pleasantly seated on a small hill, 13 miles N of Derby, and 141 N N W of London. Lon. 1 25 W. lat. 53 8 N.

Algaiola, small fortified seaport in Corsica. It was almost destroyed by the malecontents in 1731, but has since been restored. Lon. 8 55 E. lat. 42 30 N.

Algarva, province of Portugal, 67 miles in length, and 20 in breadth: bounded on the W and S by the sea, on the E by the Guadiana, and on the north by Alentejo. It is fertile in figs, almonds, dates, olives, and excellent wine; the capital is Faro; population about 100,000.

Algezira, strong town of Spain, in Andalusia, on the straits of Gibraltar; but at present in a mean condition, the harbour being decayed. It is 10 miles N W of Gibraltar. Lon. 5 22 W. lat. 36 14 N.

Algher, or *Aleeri*, town of Sardinia, on the N W coast, with a bishop's see. Lon. 8 40 E. lat. 40 10 N.

Algiers, one of the states of Barbary, bounded on the E by Tunis, on the N by the Mediterranean, on the S by Mount Atlas, and on the W by Morocco. It extends 600 miles from E to W. The air is very temperate, and the land toward the N fertile in corn. The valleys are full of

fruit; but a great part is dry, mountainous, and barren. The melons have an exquisite taste, some of which are ripe in summer, and others in winter. The stems of the vines are so large, that a man can hardly grasp them with his arms; and the bunches of grapes are a foot and a half long. It is divided into three provinces, namely, Tlemisam on the W. Titerie on the S. and Constantia to the E. of the city of Algiers. The Turks, who have the government in their hands, are not above 7000 in number; and yet the moors, or natives of Africa, have no share in it. It is only a kind of republic under the protection of the grand signior, and it is governed by a sovereign called the dey, but he can do nothing of consequence without the council of the Janissaries. The Arabs, who live in tents, are a distinct people, governed by their own laws and magistrates, though the Turks interpose as often as they please. The dey of Algiers is an absolute monarch, but elected by the Turkish soldiers, and frequently deposed, and put to death by them. The revenues of the government arise from the tribute paid by the Moors and Arabs, a detachment of the army being sent into each province every year to collect it; and the prizes they take at sea sometimes equal the taxes they lay upon the natives. The dey has several thousand Moors in his service, both horse and foot: and the deys or viceroys of the provinces, have each an army under his command. Their religion is Mohammedanism, and their language a dialect of the Arabic. They have likewise a jargon, composed of Italian, French, and Spanish, called *Lingua Franca*, that is understood by the common people and merchants. The complexion of the natives is tawny, and they are strong and well made.

Algiers, large and strong town of Africa, in Barbary, the capital of the kingdom of Algiers. It is built on the declivity of a mountain, and is in the form of an amphitheatre next the harbour; inasmuch, that the houses appearing one above another, make a very fine appearance from the sea. The tops of the houses are all flat, for which reason they walk upon them in the evening to take the air; besides, they are covered with earth, and serve for a sort of gardens. The streets are narrow, and serve to keep off the extreme heat of the sun. The mole of the harbour is 500 paces in length, extending from the continent to a small island, where there is a castle and a large battery of guns. The number of inhabitants is said to be 100,000 Mohammedans, 15,000 Jews, and 4000 Christian slaves. Their chief subsistence is derived from their prairies, for they make prizes of all Christian ships that are not at peace with them. The country about

Algiers is adorned with gardens and fine villas, watered by fountains and rivulets; and thither the inhabitants resort in the hot seasons. Algiers though it has, for ages braved the resentment of the most powerful states in Christendom, it is said, could make but a weak defence against a regular siege. The emperor Charles V. in 1541, lost a fine fleet and army, in an expedition against it. The English burnt their vessels in the harbour in 1635 and 1670. It was bombarded by the French in 1688. In 1775, the Spaniards made a descent near the city with a formidable army, but were defeated with great slaughter. In 1784, they sent a powerful fleet to attack the forts that defend the harbour; but they were repelled by the Algerines, although they made eight successive attacks with great spirit and bravery. In 1767, the Algerines took the lead of the other states of Barbary, in refusing to pay any longer their usual tribute to the Porte. Algiers is situate opposite Minorca, 380 miles W of Tunis. Lon. 2 18 E. lat. 34 9 N.

Algonquins, nations of Indians, west and north-west from lake Superior, and around the heads of the Mississippi, Winipeg, and Assiniboin rivers.

Alhama, town of Spain in Granada. A little below it are hot baths, accounted the best in Spain. It is seated on a valley, surrounded by craggy mountains, 25 miles S W of Granada. Lon. 3 24 W. lat. 36 56 N.

Alhambra. See *Granada, the city*.

Ajuburota, town of Portugal, in Estramadura, 10 miles south from Leiria, famous for a battle between the Castilians and Portuguese, August 14th 1384, in which the former was defeated.

Alicant, seaport of Spain in Valencia; remarkable for its excellent wine, and the fertility of its soil, which produces excellent fruits, and plenty of rosemary of an extraordinary size. The castle, on a high rock, was reckoned impregnable; but it was taken by the English in 1706. It was likewise taken by the French and Spaniards, after a siege of almost two years; and then part of the rock was blown up. It is seated on the Mediterranean, on a bay of the same name, 85 miles S of Valencia. Lon. 0 5 W lat. 38 16 N.

Aligata, town of Sicily, remarkable for corn and good wine. It is seated on a peninsula, 22 miles S E of Gergenti. Lon. 15 48 E. lat. 37 11 N.

Aliahabad, city of Oude, in Hindoostan proper, seated at the confluence of the two great rivers, the Ganges and Jumna. It was founded by the emperor Achar, who intended it as a place of arms; but its fortifications will hardly resist the battering of a field-piece. It is 470 miles N W of Calcutta. Lon. 82 0 E. lat. 24 45 N.

Alburgh, township in Grand Isle county and state of Vermont. It is situated on the Michiscoui bay and contains about 1000 inhabitants.

Alleghany, or *Appalachian Mountains*, a long range of mountains in N. America, between the Atlantic, the Mississippi, and the lakes; extending nearly parallel with the sea-coast, 900 miles in length, and from 60 to 200 in breadth. The different ridges which compose this immense range have different names in the different states. Advancing from the Atlantic, the first ridge of Pennsylvania, Virginia, and North Carolina, is the Blue Ridge, or South Mountain, from 130 to 200 miles from the sea, and about 1200 feet mean elevation from its base. Between this and the North Mountain, spreads a large fertile vale. Next lies the *Alleghany*, which is the principal ridge, and has been descriptively called the *back-bone* of the United States. Beyond this is the long ridge called the Laurel Mountains. From these several ridges proceed innumerable nameless branches or spurs. The Kittatiny, or Blue Mountains, run through the northern parts of New Jersey and Pennsylvania. These mountains are not in general confusedly scattered and broken, rising here and there into high peaks overtopping each other, but stretch along in uniform ridges, scarcely half a mile high. They spread as they proceed S, and some of them terminate in high perpendicular bluffs. Others gradually subside into a level country, giving rise to the rivers which run southerly into the gulf of Mexico. In the back parts of Pennsylvania, scarcely one acre in ten of this range is capable of culture; but this is not the case in all parts; for numerous tracts of fine arable and pasture land intervene between the ridges, having generally a rich black soil. Indeed, some of the mountains will admit of cultivation almost to their tops.

Alleghany River, is an important stream in the western part of Pennsylvania. The head waters have their rise in the N part of Pennsylvania near New York state and nearly in an E and W centre of the state. Winding a N W direction it passes into New York, and then taking a S W and S course through a fertile part of Pennsylvania, joins with the Monongahela at Pittsburgh, and forming the Ohio river. A very slight inspection of the Map of Pennsylvania will convince a person that this river will at some future day, perhaps not very distant, be one of the great channels of communication between the Western and Eastern waters of the United States. At present the transportation is considerable on one of its small branches. French creek is the only stream of consequence which the Alleghany receives from the westward.

The creek has its source near Lake Erie, from which to Waterford the commencing point of navigation there is a portage over a turnpike of 14 miles. Upwards of 70,000 bushels of salt from the Onondaga works in New York, were entered in one year at Erie, a considerable portion of which descended French creek and the Alleghany for the supply of the different Ohio river towns. It is the Eastern branches of the Alleghany which interlocking with the navigable branches of the Susquehanna make this river of great importance to the state of Pennsylvania. Of these branches, Toby's creek from the N W and Kiskiminetas river from the S W are the most conspicuous. The navigable branches of the former approach the navigable waters of the W branch of the Susquehanna within 20 miles, while the navigable head waters of the former may be connected with the navigable waters of Juniata by a portage of 25 miles. Thus, nature has left comparatively but little for the exertions of man to form a complete water communication between New York and Philadelphia and the Ohio waters, giving the industrious planter and merchant a choice of a market either in the Gulf of Mexico, or in the metropolis of their own state, one at a distance of 2000 miles, the other not more than 300 from his own door.

Alleghany, county of New York, having Pennsylvania S. Cattaraugus W. Niagara N W. Genesee, and Ontario N and Steuben E. It is 52 miles long from north to south, and 30 miles wide from east to west, and covering an area of 1560 square miles. The face of the country is hilly, and even mountainous, though containing much fertile land. Chief town Angelica.

Alps, the highest mountain in Europe separating Italy from France and Germany. They begin on the side of France towards the Mediterranean, between the territory of Genoa and country of Nice; and terminate at the gulf of Carnero, which is part of the gulf of Venice. They consist of lofty chains of mountains, ranging one upon another, with only narrow valleys between. They are composed of stupendous rocky masses, two, four and even six being piled upon each other, and from 4000 to 12000 feet high. There are few passes over them, and those of difficult access. Switzerland take up a good part of these mountains, or rather the valleys between them. The famous Hannibal crossed the Alps on the side of Piedmont, in the winter season, when he invaded Italy, and lost most of his elephants among them.

Amazon, or *Orellana*, a great river of S. America, which has its source in Peru, not far from the Pacific Ocean, and running E falls into the Atlantic Ocean by a number of channels, which in the rainy season overflow their banks, and fertilize the country. Its course is between 4 and 5000 miles, including all its windings. The country included within its various mouths. It is 150 miles broad, and receives in its progress, near 200 other rivers, many of which have a course of 5 or 600 leagues. The principal of these tributary streams are the Napo, Japura and Negro from the north; the Tocantinas, Xingus, Tapajoes, Madeira, Jurus, Intay, Grand Para, Gualaga, and Lauricocha from the south. The Amazon, including all its confluent and their tributaries drains an area of more than 2,800,000 square miles. It enters the Atlantic Ocean under the equator, Lon. E W C 28.

Amazonia, a country in S. America, bounded on the N by Terra Firma and Guana, on the E by the Atlantic Ocean and Brazil, on the S by La Plata, and on the W by Peru. It is indeed a vague term to designate all the interior regions of South America, watered by the Amazon river, and yet inhabited only by the native tribes of savages. It was discovered in 1580, by Francisco Orellana, who sailed down the river Amazon to the Atlantic. Observing companies of women in arms on its banks, he called the country Amazonia, and gave the name of Amazon to the river. But this was probably a fiction, for M. Condamine could perceive no such women. It is generally a flat region, abounding in woods, lakes, rivers, bogs, and morasses. The soil is very rich and

fertile; the trees and plants are verdant all the year. The rivers and lakes are infested by alligators and water-serpents. Their banks are inhabited by different tribes of Indians, governed by petty sovereigns. The Spaniards have made many vain attempts to settle this country. On that part of the coast between Cape North and the mouth of the Amazon and along that river the Portuguese have indeed some settlements.

Amelia Island, in the Atlantic Ocean, coast of East Florida, situated 20 miles north of St. Augustine, and extending 13 miles from the mouth of Nassau to St. Mary's rivers, with a mean width exceeding a mile.

Ameliasburgh Township, in the county of Prince Edward, is the westernmost township of that county, bounded by the carrying place, which leads from the head of the bay of Quinte to Lake Ontario, and is washed by the waters of the bay and the lake.

Amelia, township of Dutchess county, in the state of New York. It contained about 3,114 inhabitants in 1820.

AMERICA, *continent of*, one of the great sub-divisions of the terraqueous globe. Taken in its fullest extent, America extends from S lat. 56, to the utmost known land towards the north pole. It is washed on the east by the Atlantic Ocean, which separates it from Africa and Europe; by the Pacific Ocean west, separating it from Asia, Austral Asia, and Polynesia; and on the north by the Frozen Ocean, and the various inlets separating the numerous islands of that inhospitable region. America is naturally divided into two immense sections, which have received the relative adjective names of North America, and South America. North America extends from the isthmus of Darien N lat. 8 to the utmost known regions of the north, and spreads from Bhering's straits to those of Bellisle, or rather to embrace Greenland. Its breadth is very irregular, not exceeding 15 or 20 miles near Panama, whilst from Bhering's straits to the straits of Bellisle, it extends to a distance of 3,300 geographical, or 3,800 English miles, bearing N 76 W. From the straits of Bellisle to the isthmus of Darien is 4,500 geographical, equal to 5212 English miles. North America is traversed by two great chains, and several minor ranges of mountains. The Appalachian or Alleghany mountains extend through the United States from N E to S W from the state of New York, to Georgia, Alabama, and Mississippi, with a mean width of about 50 miles. Several detached ranges or groups rise north-east off the Hudson, and south-east off the St. Lawrence. The Masserne or Ozark mountains extend from the centre of the state of Missouri towards Texas, and the other Spanish internal provinces.

in a direction nearly parallel to the Appalachian chain. The length of the Appalachian is about 900 miles with a mean elevation of, from 1,200 to 2,000 feet. The extent of the Masserne chain is not very accurately known, but must exceed 600 miles; its mean height cannot, in the present state of Geographical knowledge, be estimated with any approximate degree of accuracy. The great spine of North America is the Chippewan, Rocky, or as it is termed in Mexico that of Anahuac. This immense chain reaches from the peninsula of Tehuantepec N lat. 16, to the Frozen Ocean at N lat. 68, or through upwards of 50 degrees of latitude; encircling nearly one-seventh part of the globe. In neither the Appalachian, or Masserne chains, nor in any of their neighbouring groups, have any active or extinct volcanoes been discovered; but in the southern part of the great central chain an immense range of volcanoes or volcanic summits rise to from 10,000 to 17,700 feet. It is generally supposed that the mountains of the isthmus of Darien are continuations of the chain of Anahuac; but there is strong reason to believe that the former are distinct and unconnected with the latter. A nameless range skirts along the Pacific Ocean, which from the defective surveys yet taken, cannot be very distinctly delineated. That part of North America west of the Chippewan mountains, and north of Colorado river, except the central parts of the valley of Columbia, remains either imperfectly or entirely unknown. North America has five great systems of rivers; that of the Atlantic Ocean; that of the gulf of Mexico; that of the Frozen Ocean; that of Hudson's bay; and that of the Pacific Ocean.

In the Atlantic system the principal rivers are, St. John's of Florida, Altamaha, Savannah, Santee, Pedee, Cape Fear, Roanoke, James, Potomac, Susquehanna, Delaware, Hudson, Connecticut, Kennebec, Penobscot, St. John's of New Brunswick, and St. Lawrence. In the system of Hudson's bay are included, besides many streams of lesser note, Rupert's, Albany, Severn, and Sashasshawin rivers. Into the Northern Ocean McKenzie's, Peace, or Unjiga river is the only stream of considerable magnitude yet known to enter from the continent of North America. The rivers of the central valley of North America, are discharged into the gulf of Mexico, amongst which the Mississippi presents its overwhelming flood; but besides that vast river, the Appalachicola, Mobile, Colorado, of the gulf of Mexico, Rio Grande del Norte, and several others, are streams of great magnitude. The Santiago, Hiaqui, the Colorado of the gulf of California, and the Columbia, are the only extensive rivers the courses of which are correctly known,

and which enter the Pacific Ocean from the continent of North America.

South America reaches from Cape Vela, N lat. 12 15, to Cape Horn, S lat. 56, or through more than 68 degrees of latitude, in nearly a north and south direction, exceeding 4,700 miles in length. Its greatest breadth is nearly at right angles to its greatest length; the former stretching from Cape St Roque, in the Atlantic Ocean, to Cape Blanco in the Pacific Ocean, through 35 degrees of longitude, on S lat. 5, or over upwards of 2760 miles. South America is traversed by three great chains of mountains, the Andes, ranging along the western coast; the mountains of Brazil; and those of Caracas or Venezuela. The Andes are commensurate with South America in its utmost length. Like the Appalachian the Andes chain is composed of a number of collateral or rather parallel ridges. Those of the Andes rise to enormous volcanic summits of from 10,000 to upwards of 20,000 feet, and are, those of the Asiatic chain of Himalaya excepted, the highest on the globe. The Andes also similar to the chain of Anahuac, rise into and extend wide elevated habitable valleys from 2,000 to 9,000 feet elevation. From this vast system of mountains the largest rivers of the earth have their sources, pouring their mighty volumes, however, from the position of the mountains, all towards the Atlantic ocean. The Magdalen, Orinoco, Amazon, and Plate, have but comparative rills as contrasts on the Pacific side of the continent. The chain of Caracas seems to be rather an embranchment of the general chain of the Andes than a distinct system. The course of the Caracas chain from west to east, appears to form its most distinguishing feature, whilst the general range of the Andes are from north to south nearly. The Caracas chain in no part rises above about 8450; it extends along the coast at no great distance from the sea, and expires towards the gulf of Cora, or mouth of the Orinoco river. The Brazilian chain is distinct, rising about S lat. 30, and stretching towards the equator, expires near the Atlantic Ocean, between the mouth of the Amazon river and Cape St Roque. This chain extends upwards of 2,000 miles, but is no place very elevated. South America exhibits four systems of rivers; that of the Pacific Ocean; that of the Caribbean sea; the great central system, and that of Brazil. The Pacific system of South American rivers presents, in a distance of near 5,000 miles, an innumerable list of small streams; but from the approximation of the Cordillera to the Pacific Ocean, no single river of any considerable magnitude. The Calicaia, Imperial, Biobio, Quillota, and a few others in Chili, with the Guaquil in Quito, are the principal streams discharged west-

ward from the Andes. Atrato, Magdalena, and Tacuya, in the republic of Columbia, are the only rivers of the Caribbean system of any magnitude worthy notice. The most interesting river system not only in America, but upon the globe, is that of the centre of South America. This vast system extends from the 52 S lat to the 10 N lat. through upwards of 4300 miles in length, with a breadth from the extreme western sources to the mouth of the Amazon river, through 30 degrees of longitude on the equator, or above 2000 miles. Over this immense surface flow, besides innumerable smaller streams, the Orinoco, Amazon, and Plate, with their various branches, many of which are themselves rivers of great length and magnitude. An elongation of this system reaches beyond the Plate, and stretches to the river Galegas, or Cape Fairweather, S lat. 51 30. In this space is included the rivers Colorado, Negro, St. Mathias, Camerones, Point Desire, and Gallegos. The fourth and last of the river systems of South America, extends from Cape Santa Maria S lat. 34 50, to S lat. 1, and is bounded west by the Brazilian mountains, or dividing line between the waters of the Amazon and Plate rivers, and those included within itself, and on all other sides by the Atlantic ocean. This system may be correctly designated the Brazilian, and contains the streams of the Rio Grande, Parayba, Doce, Patuxo, St. Francisco, Paranaiba, Pinare, and Gurupy. The islands of the West Indies form a part of America, but it is difficult to assign any point of division in this Archipelago, to mark the line of separation between the two great sections of the continent. Indeed any such division must be arbitrary. In common estimation the Caribbean islands, from Barbada to Trinidad inclusive, are viewed attached to South America, whilst the Leeward islands, and St. Domingo, Jamaica, Cuba, and the Bahamas, are joined with North America. Each great section has, however, numerous islands unequivocally belonging to it. To North America may be added the vast but desolate expanse of Greenland, together with a nameless maze of frozen islands along the entire northern extent of the continent. Iceland, from its proximity to Greenland, is decidedly an American island. In the gulf of St. Lawrence are the islands of Newfoundland, Anticosti, the Magdalen islands, Prince Edward, Cape Breton, and some of lesser note. Along the Pacific side of North America are found a few small islands in the gulf of Panama; the group of Revillagigedo, west of Mexico, and south of the Peninsula of California; Quadra and Vancouver, Queen Charlotte, Prince of Wales and King George, with many smaller islands, lie opposite and close to the coast between N.

lat. 48 and N. lat. 58. In the great bay between the peninsula of Alaska and Prince William's sound, beside several others, are the islands of Montagu and Kightak. The Fox or Aleutian islands extend S W and W from the point of Alaska towards Asia. Along the North American coast, and within the sea of Kamschatka, some unimportant islands exist, and completes the list of North American islands. South America, compared with its extent, is in a remarkable manner unaccompanied with islands. However, independent of those already noticed, are found along the Columbian coast, Curagoa, Buenos Ayres, Orchilla, and Margarita. In the mouth of the Amazon and Tocantinas, and the Delta of the Orinoco are an immense number of nameless islands, with a few of sufficient importance to merit designating terms. Joannes in the estuary of the Amazon is the most extensive of those two groups. From the mouth of the Amazon to the straits of Magellan are innumerable small and interesting islands, but no one the size of which would entitle it to particular notice in a general view. Separated from the continent by the straits of Magellan, spreads the large but desolate island of Terra del Fuego; and about 300 miles to the N E of the latter, stands the still more barren and inhospitable group of the Falkland islands. Passing the straits of Magellan into the Pacific Ocean, and following the South American coast, are first met the group of the Toledo islands; farther north the island of Madre de Dios; the fine Archipelago of Chiloe opens between S lat. 42 and 44. The group of Juan Fernando, S. lat. 34, W lon. W C 3, is generally considered as American. Beyond the latter, proceeding north, at a long interval, we find a few small islands in the bay of Guaquil; and under the equator, W lon. W C 13, the Galapagos group closes the list of South American islands.

Independent of the aborigines, America is now held by Russia, Great Britain, Denmark, the United States, Mexico, Columbia, Spain, France, the Kingdom of the Netherlands, Portugal, Buenos Ayres, Chili, and Peru. Russian America extends agreeable to the claims of that government, along the coast of North America, from N. lat. 51 to the utmost known lands north, extending indefinitely inland, and embracing all the islands within 100 miles off the coast; and must include 1,160,000 square miles of land. British America consists of all the northern parts of the continent east of the Russian territories, and north from those of the United States, with the islands of Newfoundland, Anticosti, Cape Breton, Prince Edward, Bahamas, Virgin islands, Jamaica, Trinidad, and some others of lesser note. Mexican America extends from

the confines of the kingdom of Guatimala, W of the gulf of Mexico, and S W of the United States, as far as N lat. 42. The republic of Columbia embraces the vast regions formerly included in the captain-generalship of Venezuela, and the viceroyalty of New Grenada, with a part of northern Peru. Spanish America contains the still unsevered fragments of the once mighty American empire of that nation, consisting chiefly of Guatimala, Cuba, and Porto Rico. Danish America includes Iceland, Greenland, and the small islands of St. Croix and St. Thomas. The kingdom of the Netherlands claims St. Eustatius, and some other islands of little note, with extensive territories on the South American coast in Guyana. France holds Guadeloupe, Martinico, and a part of Guyana. The wide spread regions held by the Portuguese in America, extend from the 4th of N lat. to the 35 of S lat. along the Atlantic Ocean, and inland to the 72 of lon. west of London, and embracing a territory of 2,700 miles in length from north to south, and 2,600 miles in breadth from east to west. The United Provinces of Buenos Ayres or La Plate, claim all that formerly appertained to Spain upon the waters of that mighty river, as do Chili and Peru along the Pacific Ocean, from the limits of New Grenada to the utmost bounds of civilized settlement towards the southern extremity of the continent.

Amsterdam, large, rich and populous city in Holland, capital of the United Provinces. The walls are high, and well fortified; and the bridge which joins the rampart is built over the river Amstel, and is one of the finest pieces of Architecture in these parts. Few cities have their public buildings so fine, numerous, and well kept. Here are many handsome churches, and hospitals for persons of all religions and countries. The exchange is one of the principal ornaments of the city, and the harbour is one of the largest and finest in Europe, where a vast number of merchant ships may always be seen; though there is a bar at its entrance, which is, however, a great security against foreign enemies. The foundation of this town is laid upon piles, driven into a morass, and under the stadhous alone are 13,000. The streets are spacious and well paved, and most of them have canals, with rows of trees on each side. It is computed to be about half as large as London. It surrendered to the king of Prussia in 1787, when the prince invaded Holland, in favour of the stadtholder, but was evacuated on the restoration of the latter to his rights. Since it surrendered to the French in 1795. It is seated at the confluence of the rivers Amstel and Wyer, 65 miles N of Antwerp, 175 E by N of London, 240 N by E of Paris, and 560 NW of Vienna. Andes, or *Cordilleras*, chain of mountains in South America, which running from the most northern part of Peru, to the straits of Magellan, are the longest and most remarkable in the world. They divide the whole southern part of America, and run a length of 4300 miles. They are much superior in height to any other known mountains; those of Gangetic Hindoostan excepted, for the plain of Quito, which may be considered as the base of the Andes, is elevated nearly as far above the sea as the top of the Pyrenees; and they rise, in different places, more than one third above the Peak of Teneriffe, once thought to be the highest land in the ancient hemisphere. The Andes may literally be said to hide their heads in the clouds; the storms often roll, and the thunder bursts below their summits, which, though exposed to the rays of the sun in the torrid zone, are covered with everlasting snow. The Andes are not composed of one continued, but of many collateral ridges, with, in many places very wide and elevated valleys. The following are the most elevated peaks of this chain, which have been scientifically measured, but it is supposed that a number of the summits in that part of the Andes which traverses Chili, are as elevated as any of those within the tropical regions.

All the climates of the world are included in the slopes and valleys of the Andes, and upon its snow clad summits. Indeed many of its most elevated peaks reach above the region of vapour, and of course above that of snow. The vegetation upon those immense slopes partake of the variety of elevation, every vegetable is found from the most tender tropical plants to the Lichens of the arctic regions. The highest points to which the activity and perseverance of travellers have ever attained have been reached in the Andes by Humboldt, and Bonpland. By their own calculation those adventurers, and intelligent philosophers, ascended to 19,000 feet, and

found the summit of Chimborazo rising to 2,140 feet still higher, giving in all 21,440 feet. This is the highest land yet measured on the western hemisphere. To the height of about 5000 feet reigns a perpetual spring seldom varying 7 or 8 degrees of Fahrenheit. The limit of perpetual congelation according to Humboldt, is under the equator 15,700 feet, lowering about 700 feet at N. lat. 20, or about 35 feet in each degree of lat. Between the tropics and below an elevation of 5000 feet, lies the region of plantains, cassava, cocoa, maize, indigo, sugar, cotton, coffee, and other very tender plants. Below 9000 feet the oreol graminæ, the apple, and many other European vegetables, but above that elevation, large trees begin to disappear. Grasses appear as high as 15,000 feet, but above that elevation the lichens close the last vestige of vegetable life, and leave the highest summits clothed with eternal frost. The truth of the commonly received opinion is very problematical, that the Andes of South America, and the Mexican mountains are detached parts of the same chain.

Antiparos, the ancient Olearos, an island off the Archipelago, two miles W of Paros. It is only a rock, 16 miles in circuit; yet in some parts it is well cultivated, and produces as much barley as serves a small village. It has a grotto, which is one of the greatest curiosities in nature; it appears to be about 80 yards high and 100 broad; and the roof forms a pretty good arch, which entertains the eye with a vast variety of figures, of white transparent chry-stalline substance. It was first discovered by an Italian traveller, who gives a very entertaining account of it. "Our candles being all lighted up, (says he) and the whole place completely illuminated, never could the eye be presented with a more glittering or more magnificent scene. The roof all hung with solid icicles, transparent as glass, yet solid as marble. The eye could scarce reach the noble and lofty ceiling; the sides were regularly formed with spars; and the whole presented the idea of a magnificent theatre, illuminated with an immense profusion of lights. Appalachicola, river of the United States. The basin of the Appalachicola is remarkable, as forming the connecting link between the waters which flow into the gulf of Mexico, from those which enter the Atlantic Ocean. The Appalachicola is formed by two streams, the Chatahooche and Flint rivers. The former rises in the Appalachian mountains, at N lat. 35°, interlocking with the sources of Tennessee, Oakmulgee, Oconee, and Savannah rivers; and flowing south west by south through two degrees of latitude, turns thence nearly due south, to N lat. 30° 45', where it receives the Flint. The latter, an inferior stream to the former, has its sources in the angle between the Oakmulgee, and Chatahooche rivers, at N lat. 33° 40', flowing south-west by south, 200 miles, unites with the Chatahooche, and forms the Appalachicola.

This latter fine river flows a little west of south, to N lat. 29 50, having an entire course of about 70 miles; its mouth is into St. George's sound.

The basin of the Appalachicola affords an inland navigable expanse of 400 miles in length, with a mean width of 150 miles, and having an area of about 20,000 square miles. Though interrupted by some falls, and many shoals, the rivers of Chatahooche and Flint are navigable almost to their sources; and schooners of considerable size ascend the Appalachicola, to its head. Cotton, tobacco, grain, tar, and lumber, are the common staples of this basin.

Arabia, country of Asia, bounded on the N by the ancient Mesopotamia; on the E by the gulfs of Persia and Ormus; on the S by the Indian Ocean; and on the W by the Red Sea and Egypt. It is divided into three parts, Arabia Petrea, Deserta, and Felix. Arabia Petrea is the smallest of the three, and towards the N, is full of mountains, with few inhabitants, on account of its barrenness. It had its name from the town Petrea, its ancient capital, now destroyed. It differs little from Arabia Deserta, so called from the nature of the soil, which is generally a barren sand: but there are great flocks of sheep and herds of cattle near the Euphrates, where the land is good. In the desert are great numbers of ostriches, and there is a fine breed of camels in several places. Arabia Felix is so called, on account of its fertility with regard to the rest. The Arabs in the desert live wandering lives, removing from place to place, partly for the sake of pasture, and partly to lie in wait for the caravans, which they often rob, as they travel over part of this desert from Bussora to Aleppo, and from Egypt to Mecca, in order to visit Mahomet's tomb. Arabia Felix

produces frankincense, myrrh, balm of Gilead, gum arabic, and coffee, of which latter they export prodigious quantities. The famous Mahomet was a native of this country, and his followers soon after his death, conquered a great part of Asia, Africa, and Europe, establishing their religion wherever they came. It lies between 35 and 60 E lon. and 12 and 33 N lat. extending 1430 miles in length, and 1200 in breadth.

Aracan, or *Reccan*, country of Asia, bounded on the N by Russia, on the E by Burmah, on the S by the coast of Ava, and on the W by the gulf of Bengal. They have only two seasons, the rainy season, which continues from April to October, and the fair season which includes all the rest of the year, and is called the summer. There are such numbers of elephants, buffaloes, and tigers, that but few places are inhabited on account of the ravages made by these animals. The commodities are timber, lead, tin, and elephants' teeth; and sometimes the traders meet with diamonds, rubies, and other precious stones.

Aral, lake of Asia, 200 miles E of the Caspian sea. It is 300 miles in length, and in some places 150 in breadth. It lies between 58 and 62 of E lon. and between 42 and 47 N lat.

Arkansas, river of the United States, which rises in the Chippewan or Rocky mountains, about lat. 40 N, lon. W C 37 W; and joins the Mississippi river at lat 34 N, lon. W C. 14 W. This great river has a general or comparative course of more than 1400 miles, and by its windings exceeds 2000 miles. It receives numerous branches, the principal of which are the Canadian, Fork, Negracka, and Potean. The Arkansas flows through, and gives name to the territory of the same name.

Arkansas, territory of the United States, formed out of the ancient Louisiana. It is bounded E by the Mississippi river; S by

Louisiana, and Red river; west by Texas; and N by the unappropriated territories of the U. S. and by Missouri; being about 550 miles in length from east to west, with a mean width of near 200, extending over an area of about 100,000 square miles. It lies between N lat. 33, and 36 30. The face of the country from its great extent, is very much diversified. It is intersected, by besides the Arkansas, the branches of Red, Ouachita and White rivers. The Ozark or Maserne mountains traverse from NE to SW rising in Missouri, and stretching through Arkansas, extend into Texas. That part of the territory to the southeast off the Masernes is generally low and in many places liable to annual submersion. To the northwest of the mountains the physiognomy of the country presents a generally open expanse of prairie, without wood, except near the margin of the streams. The seasons of the year partake also of the extremes incident to so great an extent, and in a country where the face of earth affords so much difference of level. The summers are as remarkable as is the winters for extremes of temperature. As low as N lat. 35, and on a level with the Arkansas river, the thermometer ranges from 97 above, to upwards of 20 below zero. The soil exhibits every variety from the most productive to the most sterile; therefore it may be easily conceived, that in a region where the temperature of the air, and the qualities of the soil offer so much variety, vegetation must be very greatly influenced. The indigenous forest trees are specifically numerous and very large. The principal species, are oaks, many species; hickory many species; ash, many species; sycamore, cotton wood, linden, maple three or four species: lircodendron tulipifera, locust, and pine. The cultivated fruit trees are the apple, pear, peach, plum, nectarine, cherry and quince. The various kinds of small grain, succeeds well, such as wheat, rye, oats, barley, and maize. Garden plants are abundant and grow luxuriantly. In metallic wealth, Arkansas is productive in iron ore, gypsum, and common salt. Indications of other minerals are common, but the country has been too imperfectly surveyed to develop its fossil resources. Cotton, Indian corn, flour, peltry, salted provisions, and lumber are the staples of the territory. Arkansas, was amongst the most ancient settlements of the French in Louisiana. That nation had a hunting and trading post on the Arkansas river as early as the beginning of the eighteenth century; but from the peculiar situation of the adjacent country, the settlements upon that river made little advance before the transfer of Louisiana to the United States. Since that period Arkansas has been involved in the various vic-

cissitudes of the country of which it formed a part - and on the formation of Missouri into a state, became a territory of the United States.

In 1820, it was politically divided into the following counties, which had the number of inhabitants annexed to each respectively.

Artois, late province of the French Netherlands. It now forms part of the department of the Straits of Calais.

Aruba, island near Terra Firma, in S. America, subject to the Dutch. Lon. 67 45 W, lat. 12 30 N.

Arve, rapid river of Savoy, which rises in Faucigny, and joins the Rhone below Geneva. It has a cataract near Salenche in Savoy. Its fall is said to be above 1100 feet rushing with great noise and violence from a prodigious impending rock. See *Arpenas*.

Arun, river of Sussex, which meandering through a beautiful country, falls into the English channel, below Arundel. It is famous for mullets.

Arundel, borough in Sussex, with a market on Wednesday and Saturday. It is seated on the side of a hill, on the Arun, where small ships may ride. The castle, the ancient seat of the dukes of Norfolk, stands on the summit of a hill, and is said to be a mile in compass. It is said to be governed by a mayor, sends two members to parliament, and is eight miles E of Chichester, and 68 SSW of London. Lon. 0 29 W. lat. 50 55 N.

Arundel, township of York county, in the district of Maine. It is situated along the Saco river, about 20 miles from York,

Population in 1820, 2371, and in 1820, 2478.

Arwangen, castle and village of Switzerland, on the river Aar, over which it has a covered bridge.

Arzilla, ancient seaport of Africa, in the kingdom of Fez, once in possession of the Portuguese, who abandoned it. It is 50 miles SSW of Tangier. Lon. 6 3 W. lat. 35 30 N.

Arzina, river of Russian Lapland, into a bay of which, in 1553, two English ships (which had penetrated as high as the 72 N lat. to Spitsbergen) were forced by stress of weather; and their crews were frozen to death.

Asaph, St. city of Flintshire, on the river Elway, where it unites with the Clwyd; and over both is a bridge. It is a poor place, of note only for its cathedral. It is 24 miles W of Chester, and 203 NW of London. Lon. 3 36 W. lat. 53 12 N.

Ascension, barren, uninhabited island, in the Atlantic. 600 miles NW of St. Helena. Lon. 14 18 W. lat. 7 40 N.

Ascension, parish of Louisiana, lying along both banks of the Mississippi river; having Assumption, and St. James SE; the Atchafalaya river SW; Iberville NW and the Amite river NE. It is 40 miles long from northeast to southwest, with a mean breadth of 10; area 400 square miles. The face of this parish is an almost undeviating plain. The soil is exuberantly productive, though the margins of the rivers excepted, liable to annual submersion. Staples, sugar and cotton. Chief town Donaldsonville.

Ashton-under-Line, village in Lancashire, seven miles E of Manchester, with a manufactory of cotton, and an iron foundery.

Ashwell, village in Hertfordshire, on the river Rhee, that issues from a rock at the S end of the town. Near the church are the remains of a Roman camp, which consists of 12 acres of land, enclosed by a deep ditch, and formerly a rampart. It is four miles N of Baldock.

ASIA, one of the four great parts of the world, situated between lon. 25 and 180 E from London, and between the equator and lat. 80 N. It extends 4,740 miles from the Dardanelles on the W, to Bhering's straits; and, 4,380 miles from the most southern part of Malacca, to the most northern cape of Nova Zembla; being superior in extent, as well as in many other respects, to Africa and Europe. It is separated from Europe, according to the English geographers, by the Mediterranean, the Archipelago, the Black Sea, the Palus Mæotis, the Don, part of the Wolga, and the Ural mountains; from America by Bhering's straits, and the Pacific Ocean; and from Africa by the Red Sea and the isthmus of Suez. But the French and German geographers, separate Asia and Europe, by the Ural mountains, Ural river, Caspian Sea, Caucasus mountains, Black Sea, straits of the Bosphorus, sea of Mamora, straits of Dardanelles, and Archipelago. All the other parts are surrounded by the ocean. The principal countries in this continent are Siberia, Tartary, China, Thibet, Hindoostan, Siam, Burmah, Persia, Arabia, Syria, Palestine, Natolia, Diarbecker, Irac, Armenia, Georgia, Curdistan, &c. Asia is looked upon as that part of the world, which, of all others, has been most peculiarly distinguished by heaven. There it was the first man was created; there the patriarchs lived; there the law was given to Moses, and the greatest and most celebrated monarchies were formed. Lastly, in Asia, Jesus Christ appeared, and from thence it is that the light of the gospel was diffused over all the world. Laws, arts, sciences, and religion, almost all had their origin in Asia.

Astorga, very ancient city of Spain, in Leon, well fortified by art and nature, seated in a pleasant plain, 25 miles S W of Leon. Lon. 5 32 W, lat. 42 22 N.

Astrabad, large town of Persia, capital of a province of the same name, on the Caspian Sea, 200 miles N of Isfahan. Lon. 35 35 E, lat. 36 30 N.

Astracan, (the Chatterken of the middle ages) episcopal city of the Russian empire, capital of a province of the same name. It

is large and populous, has a good harbour, and is surrounded by strong walls. The river Volga, on which it stands, overflows like the Nile: and when the water is run off, the grass grows with much rapidity. The city of Astracan is about two miles and a half in circumference, surrounded by a brick wall, which is now in a ruinous condition: but, if we comprehend the suburbs, the circuit will be near five miles. The number of inhabitants amounts to 70,000, including Armenians and Tartars, as well as a few Persians and Indians. All round the city, at the distance of two miles, are seen a great number of gardens and orchards. This city is supposed to have been, in early times, the general staple for the productions of Persia, India, and Arabia. It is seated on an island formed by the Volga, 40 miles N W of the Caspian Sea. Lon. 47 40 E, lat. 46 22 N.

Asturias, province of Spain, 120 miles in length, and 45 in breadth; bounded on the E by Biscay, on the S by Old Castile and Leon, on the W by Galicia, and on the N by the Atlantic. It is divided into two parts, Asturia d'Oviedo, and Asturia de Santillana. This province is full of mountains and forests, and its wine and horses are excellent. It has mines of gold, lapis lazuli, and vermilion, and belongs to the eldest son of the king of Spain, who is styled prince of Asturias.

Asylum, town of Luzerne county, Pennsylvania, on the S W side of Susquehannah river, 67 miles N W of Wilkesbarre. Here there is a post-office, 327 miles from Washington.

Atacama, harbour of South America, in Peru. There is a great desert of the same name. Lon. 70 0 W, lat. 22 0 S.

Atacapas, a considerable settlement in lower Louisiana, lying west off the Atchafalaya river; being bounded by that river E; by Opelousas N and N W; and by the gulf of Mexico S. It is divided into the parishes of St. Martin's and St. Mary's, which see.

Atalaya, town of Portugal, in Estramadura, seated on an eminence, with a strong fortress, five miles S of Tomar. Lon. 7 56 W, lat. 39 25 N.

Atchafalaya River, may be strictly called the continuation of Red River; it is only 114 chains along the right bank of Mississippi, from the ingress of Red River to the egress of Atchafalaya, the latter may therefore be considered as leaving the Mississippi exactly on lat. 31 N. It is only at high floods, however, when any quantity of water leaves the Mississippi by Atchafalaya; when the former is at a moderately low stage, the current into the latter ceases. The Atchafalaya, below its efflux, continues S W about two miles, where it assumes a south course, which continues,

with a small deviation to the east, 50 miles, in a direct line. The river then turns S E 10 miles, and again E 25 miles, to its junction with Plaquemine from the Mississippi. Below the Plaquemine the Atchafalaya re-assumes a south course of 60 miles, falls into the gulf of Mexico, having an entire length of 147 miles. A few spots of land sufficiently high for cultivation are found on the left bank of Atchafalaya, near its efflux from the Mississippi; those, however, soon cease, and both banks are generally liable to inundation. A very heavy forest covers both shores of this river, until within a few miles of its mouth. Twenty-six miles below its efflux commences the great raft. This singular phenomenon, about which so much mistake and speculation has been made, was measured by the writer of this article; the following is the fruit of his observations on the subject. From the course of that particular bend of the Mississippi, out of which the Atchafalaya issues, the drift timber of the former is thrown into the latter. In 1778, this drift timber passed into the Atchafalaya, in such quantity as to form a compact mass, too large to pass down with the current, and therefore choked and became settled. Other accessions have annually augmented the original body, and now form rafts of more or less extent, for about 25 miles along the river. It is a very erroneous, though a common opinion, that the raft is sufficiently compact to admit the passage of horses, and that trees are formed upon it: both these statements are entirely unfounded. It is with considerable difficulty and danger, that a man can cross the river on the timber; the body of which rises and falls with the water of the river, and at all seasons maintains an equal elevation above the surface. The raft is in fact subject to continual change of position, to which superadding its recent formation, renders either the solidity of its structure, or the growth of large timber impossible. Some small willows, and other aquatic bushes, are frequently seen amongst the drift wood, but are too frequently destroyed by the shifting of the mass to acquire any considerable size. The distance between the extremities of the raft is, as stated, about 25 miles; but of this space not more than 10 miles is impeded by raft. The width of the river is about 220 yards. If we allow the timber to be eight feet deep, 10 miles by 220 yards, will yield 2,240, 500 solid cords.

The first stream of consequence which enters Atchafalaya, is the Courtableau, which comes in from the N W, half a mile above the lower raft. (See *Courtableau*.) Around the mouth of Courtableau is one wide overflow. Towards Opelousas and Attacapas this drowned tract reaches eight

or nine miles in a direct line from the Atchafalaya. The intermediate space at high water is a lake. The currents of the smaller bayons are lost in the maze, and only remain distinguishable by the openings of their channels. The many lakes that mingle with the outlets of the river, and with each other, render this region in an extraordinary manner intricate. Below Courtableau many outlets leave the Atchafalaya, which flow in a lake Chetimaches, and whose waters again enter the main stream by the outlet of that lake. From Courtableau to the Cow Island is S E 25 miles in a direct line. Here the river turns east. So numerous are the outlets between Courtableau and Cow Island, that the current of the Atchafalaya passes by them into lake Chetimaches, and therefore from Cow Island to the Plaquemine, the volume of the former river is nearly stagnant. The river here winds diagonally over an inclined plane, and when the swell of the waters rise above the banks, the water naturally flows down the direct slope, and consequently, when the river assumes an eastern course, the current at high water is at right angles to the river. Within a short distance below the Cow Island, there is a very narrow selvedge of high land commences on the right shore, which continues to the entrance of Plaquemine, but cut by 20 or 30 outlets, great and small. In this eastern course of Atchafalaya, the light coloured water of Mississippi disappears, and the stream assumes the dark green tinge of the waters of the swamps. This change is effected by a bayon, whose banks are in general above overflow, and which comes in from towards Tausse Riviere, and flowing S W carries the Mississippi waters towards Cow Island.

Where the Atchafalaya and Plaquemine form their junction, the united stream assumes a south course, which it maintains to the gulf of Mexico, the distance by a meridian line 54 miles, or about 70 miles pursuing the river. A summary of all the distances gives the whole length of the Atchafalaya, by comparative course, 133 miles, and along the stream 193 miles.

A particular description of this river below Plaquemine would be mere repetition. It is sufficiently explicit to observe that 10 miles below Plaquemine another small raft impedes the navigation, boats being obliged to be taken by an outlet through lake Natchez, and thence again into the main stream below. The Atchafalaya passes through lake Chetimaches, and three miles farther down contracts again into a river of about 240 yards wide, receives the Teche, five or six miles below which timber ceases, and the level grassy sea marsh reaches the banks, and continues with the Atchafalaya to its mouth. The only spots of valuable

arable land on the entire banks of Atchafalaya in all its course, is near the mouth of Teche, and the opposite bank, a few miles below, at Rice's Island. See *Teche*, and *Rice's Island*.

The tide flows up the Atchafalaya, when the Mississippi is low, as high as the great raft, and at other seasons in proportion to the height of the streams in the interior.

Atchafalaya Bay, at the mouth of Atchafalaya river, on the coast of Louisiana, about 30 miles long from S E to N W, and 20 miles wide. A long bar from Point Chevreuil to Point au Fer, on which at low tides there is about 9 feet water, prevents vessels above that draft from entering, though the depth within and up the Atchafalaya, to the mouth of Teche, would admit vessels of any assignable tonnage.

Atna, town of Naples, in Principato Citeriore, 22 miles N of Policastro. Lon. 15 58 E, lat. 40 36 N.

Ath, town in Austrian Hainault, seated on the Dender, 12 miles N W of Mons. Lon. 3 44 E, lat. 50 35 N.

Athelney, island of Somersetshire, at the confluence of the Thone and Parret, memorable for having afforded shelter to king Alfred.

Athens, now called *Setines*, once a celebrated city, the capital of ancient Attica, but now of Livadia, in European Turkey. After many revolutions, the Turks finally wrested it from the Venetians; and it has now not more than 10,000 inhabitants, of whom three fourths are Christians of the Greek church; the remainder Turks. It is the see of an archbishop; and is defended by a citadel on the summit of a lofty rock. The town stands beneath the citadel; not encompassing the rock as formerly, but spreading into the plain to the W and N W. Some masses of brick work, standing separate without the town, belonged perhaps to the ancient wall, of which other traces also appear. The houses are mostly mean and straggling. In the lanes, the high walls on each side, which are commonly white-washed, reflect strongly the light of the sun. The streets were very irregular; and anciently were neither uniform nor handsome. There are many magnificent ruins, which testify its former grandeur. It is situated on the gulf of Engia, 100 miles N E of Lacedemon, and 320 S by W of Constantinople. Lon. 23 57 E, lat. 38 5 N.

Athens, town of Somerset county, Maine, 22 miles N N E from Norridgewock. Population in 1810, 374, and in 1820, 590.

Aihens, town of Windham county, Vermont. Population, 1820, 480.

Athens, post town and seat of justice in Greene county, New York, situated on the right bank of the Hudson river, opposite Hudson. It is a fine flourishing village,

containing about 500 houses, and, including the township, 2030 inhabitants in 1820.

Athens, post town of Bradford county, Pennsylvania, situated on the Susquehanna, containing in 1820, including the township, 1108 inhabitants.

Athens, post town in Clarke county, Georgia, 70 miles N from Milledgville. Franklin college, located in this town, went into operation in 1803. Its endowments are, a president, four professors, and two tutors. The students amounted recently to about fifty. Its support is founded upon funds arising from 100,000 dollars, bank stock, and 50,000 acres of land; 12,000 dollars have been appropriated to the purchase of a library and philosophical apparatus.

Athens, county of Ohio, having Meigs and Gallia S; Jackson S W; Hocking W; Perry and Morgan N; Washington and Ohio river E. It is about 40 miles in length from east to west; mean width 23; area 900 square miles. The country is hilly, but well wooded and watered. The soil extremely fertile. Chief town, Athens.

Azores, or *Western-Islands*, a group of islands, in the Atlantic Ocean, between 25 and 33 W lo. and between 37 and 20 N lat. 900 miles W of Portugal, and is many E of Newfoundland. They were discovered by the Flemings in the 15th century, but were afterwards taken possession of by the Portuguese, to whom they have been subject ever since. They are nine in number, viz. St. Maria, St. Michael, Tercera, St. George, Gracioso, Fyal, Pico, Flores, and Corvo. They were called the Azores, from the number of hawks found among them. The two westernmost were named Flores and Corvo, from the abundance of flowers on the one, and of crows on the other. They are subject to a governor-general, who resides at Angra, in Tercera. No poisonous animal it is said, is to be found in the Azores, and if carried thither it will expire in a few hours. All of them are fertile, and enjoy a salubrious air, but are subject to violent earthquakes.

B

Baal Beck, or the *Valley of Baal*, a fertile country of Asia, between Lebanon and Antilibanus, about 30 miles from Damascus, where there was formerly a magnificent temple of the Sun, the ruins of which are still admired by travellers. Some geographers make it a part, and the others the whole of Cælosyria; but all agree, that it was one of the most pleasant spots on the earth.

Baltimore, city and port of entry, Baltimore county, Maryland, situated on the N side of the Patapsco river, 14 miles above North Point, 88 miles NE from Washington; 100 miles SW from Philadelphia. Lat. 39 17 N, Lon. W C 0 27 E.

This city is built at the head of a bay, which extends from the Patapsco river. Its harbour is spacious and convenient. Below the city the bay narrows to a very confined strait, which is amply commanded by Fort M'Henry. Jones' Falls creek divides the city and harbour into two sections. The lower part of the city is called Fell's point, to which vessels of 600 tons can ascend, but the water shallows so rapidly, that at the city the depth is insufficient for any of heavier draught than 200 tons. Baltimore is extremely well situated for commercial connexion with the valley of Ohio; it commands the trade of Maryland, more than one half of that of Pennsylvania, and a part of New York. Having the advantage of climate, the harbour of Baltimore is not so liable to obstruction from ice as that of Philadelphia. Its relative amount of shipping places it the third in rank in the United States.

The edifices necessary for the transaction of judicial and commercial business are splendid and convenient, whilst the interests of science and elegant amusements, have met their due share of encouragement. The city contains a state penitentiary; almshouse; a court-house and jail; a custom-house; an exchange; a museum; theatre; and hospital. Besides the foregoing, there are in this city three market houses, 10 banks, and upwards of 30 places of public worship. Washington's monument, erected of marble, at the north end of Charles street, on an elevated spot, will be, when completed, a very sublime production of art. It is intended to be 163 feet in height, exclusive of the statue of Washington, which is to crown the edifice. The monument erected to the memory of the men who fell in defence of the city, on the 12th and 13th of September, 1814, is a handsome structure in north Calvert street.

The literary institutions of this city are respectable. In 1807 a medical college was founded, which subsequently received the title of the University of Maryland,

and embraces the ordinary pursuits connected with such an institution. St. Mary's college possesses a fine library, with a chemical and philosophical apparatus, and is supported by about 150 students. Baltimore college has about 50 students.

The increase of Baltimore has been fully commensurate with the advantages of its local position. In 1790 it contained 13,503 inhabitants; and in 1800, 26,514. The following table exhibits its subsequent advance.

Basel, or *Basle*, canton of Switzerland, 24 miles long and 21 broad; bounded on the N by Brigau; E by the Forest towns; S by the canton of Soleure, and W by the bishopric of Basel and France. It contains about 33,000 inhabitants, and is of the Calvinist religion.

Basel, bishopric in the NW part of Switzerland; bounded on the E by the canton of Basel; S by that of Soleure, and W and N by France. The bishop was a prince of the German empire. In 1798, the French seized on this territory, annexed it to France, and made it a new department, called Mont Terrible.

Basel, the capital of the canton of the same name, and the largest town in Switzerland. It is surrounded by thick walls, flanked by towers and bastions; and is divided into two parts by the Rhine, which communicate by a handsome bridge. The largest part is on the side of Switzerland, and the least on that of Germany. The larger has five gates, six suburbs, numerous streets and fountains, and is partly seated on a hill: the other stands on a plain, and has but two gates, with several streets and fountains. The principal church is an elegant Gothic building, but disfigured by rose-coloured paint spread over the whole edifice. Under a marble tomb in it, is interred the great Erasmus. The town-house, and fine paintings in fresco, are much admired. The university, founded in 1459, has a fine library, and a rich cabinet of medals. The clocks here are always an hour too fast; because the town-clock went so on a day appointed to murder the magistrates, by which the conspiracy was disconcerted. Basel has several manufactures, particularly of paper, ribands, and cottons; and it carries on an extensive trade. Three treaties of peace were concluded here in one year, 1795, with the French republic; namely, by Prussia, Spain, and Hesse Cassel. The al-

lies passed through this city when they invaded France, in December, 1813. Basel is capable of containing 100,000 inhabitants; but the number is scarcely more than 14,000. It is 174 miles N by E of Geneva, and 250 E by S of Paris. Lon. 7 30 E, lat. 47 35 N.

Bashee, island in the China sea, the most eastern of a cluster called, from this, the Bashee islands, lying to the S of Formosa. The productions are plantains, bananas, pine-apples, sugar-cane, potatoes, yams, and cotton. The quadrupeds are goats and hogs. Bashee is of a circular form, six miles in diameter, and has a town of the same name. Lon. 121 50 E, lat. 20 30 N.

Basilicata, province of Naples, bounded on the N by Capitanata and Bari; E by the gulf of Taranta; S by Calabria Citeriore; and W by Principato Citeriore and Ulteriore. It has some mountains continually covered with snow, but is fertile in corn, wine, oil, cotton, honey, and saffron. Accrenza is the capital.

Basiliptamo, river of European Turkey, in the Morca, which flows into the gulf of Colocythia. It was called Eurotas by the ancients.

Basin-Harbor, post village of Addison county, Vermont.

Basin Minas, bay or small gulf at the NE extremity of the bay of Fundy.

Basingstoke, a corporate town in Hampshire, with a market on Wednesday. It has a great trade in corn and malt, a manufacture of druggets and shalloons, and a navigable canal to the river Wey, near its entrance into the Thames. It is 18 miles NNE of Winchester, and 45 W by S of London.

Baskenridge, post town of Somerset county, New Jersey, seven miles SSW from Morristown. Here, on the 13th December, 1776, General Lee was taken prisoner by Colonel Harcourt of the British army.

Basques, late territory of France, which included Lower Navarre, Labourd, and Soule, and now forms, with Bearn, the department of Lower Pyrenees.

Bass, an insulated rock near the coast of Scotland, at the entrance of the frith of Forth, between the towns of N Berwick and Dunbar. On the S side it is almost conic; on the other it overhangs the sea in a tremendous manner. It is inaccessible on all sides, except the SW, and there it is with difficulty a man can climb up by the help of a rope or ladder. In May and June it is quite covered with the nests, eggs, and young birds of the gannets, or solan geese. The rock is one mile in circumference, and has a rabbit warren, and pasture, for a few sheep. A ruinous castle, once the state prison of Scotland, stands

at the edge of the precipice. The garrison, in 1694, surrendered to king William, and the fortifications were demolished.

Bass Strait, channel about 40 leagues wide, which separates Van Diemen Land from the S. extremity of N. W. Holland. It contains a chain of small islands extending N and S. It was discovered in 1798 by surgeon Bass.

Bassano, town of Vicentino, in the territory of Venice, on the river Brante, in a country fertile in excellent wine. Lon. 11 24 E. lat. 45 51 N.

Basse, town of France, in the department of the North and late province of Flanders, famous for the many sieges it has sustained: but its fortifications are now demolished. It is 18 miles SW of Lisle. Lon. 2 52 E. lat. 50 28 N.

Bassee, city and fortress in the Decan of Hindoostan, opposite the N. end of Salsette. It is 27 miles N of Bombay. Lon. 72 10 E. lat. 19 19 N.

Bassenthwaite-water, a fine lake in Cumberland, three miles NW of Keswick. It is four miles long, bounded on one side by high hills, wooded, in many places, to their bases; on the other, by the fields, and the skirts of Skiddaw.

Basseterre, capital of St. Christopher, built by the French, before the island was ceded to the English in 1713.

Basseterre, capital of Guadalupe, in a district of the same name, in the W part of the island. It is defended by a citadel and other fortifications. Lon. 61 59 W. lat. 15 29 N.

Bass Cove, in Adolphustown, bay of Quete, Upper Canada.

Bass Island, in the bay of Quinte, lies off near to the town plot in Adolphustown.

Bass Islands, an interesting group in lake Erie, appertaining to Huron county Onto. This cluster is composed of three principal and several smaller islands. In the southern Bass island is the fine harbour of Put-in-bay, about 5 or 6 miles west of which on September 10th 1813, captain Perry captured the British fleet, under the command of captain Barclay.

Bassora, or *Bussarah*, city and seaport of Turkey in Asia, 49 miles NW of the gulf of Persia. It stands on the Euphrates, a canal from which divides the city into two parts; and over it is a bridge of boats. The houses are constructed of bricks dried in the sun, and have a very mean aspect. The circumjacent tract is looked upon by the Arabs to be one of the most delightful spots in Asia, and even as one of the most beau-

tiful gardens in the world. The hot winds that blow here are very troublesome to travellers, sometimes overwhelming them with sand driven out of the neighbouring deserts. In 1691, the plague destroyed 80,000 of the inhabitants. It is 240 miles S by E of Bagdad. Lon. 44 52 E. lat. 29 26 N.

Bastard, township of Upper Canada, between Lansdowne and Leeds.

Bastia, seaport in Albania, in Turkey in Europe, opposite the island of Corfu, at the mouth of the river Calamu. Lon. 20 20 E. lat. 39 40 N.

Bastia, capital of Corsica, with a good harbour, a strong castle, and a bishop's see. It surrendered to lord Hood, in 1794, but has since revolted to France. It is 70 miles SSW of Leghorn. Lon. 9 30 E. lat. 42 39 N.

Bastimentos, the name of some small islands near Terra Firma, in South America, at the mouth of the bay of Nombre de Dios, with a fort and a good harbour. Lat. 9 32 N. lon. WC 2 40 W.

Basleigne, town of Austrian Luxembourg, 25 miles NW of Luxembourg. Lon. 6 0 E. lat. 50 0 N.

Batacola, seaport on the coast of Malabar, between Onore, and Barcolore. Here are the remains of a once considerable city on the banks of a small river, four miles from the sea. The country produces a good deal of pepper; the English had a factory here, but were all massacred by the natives, because one of their bull dogs killed a consecrated cow.

Bataseck, tower of Lower Hungary, on the Danube, 70 miles S of Buda. Lon. 19 20 E. lat. 6 15 N.

Batavia, city of the island of Java, capital of all the Dutch settlements in the East Indies. In general, the place is very beautiful and built of white stones; they have canals in the principal streets, planted on each side with evergreen trees. It is the residence of the governor general of all the Dutch colonies in the East Indies. It has a handsome hospital and arsenal; and all the goods brought from other parts of the East Indies are laid up here, till they are exported to their places of destination. The air is very unwholesome; and this place is represented as the grave of European navigators. Shortly after the Dutch declared war against England, Batavia was captured by the British. Lon. 106 51 E. lat. 6 19 S.

Batavia, post town and capital of Genessee county New York, 48 miles west from Canandaigua, and 38 miles east from Buffalo. It is a thriving village;

population, including the township of the same name, in 1820, 2597.

Batavia, township in Clermont county Ohio. Population in 1820 1208

Batcah, town of Mexico, in Yucatan, on the side of the bay of Campeachy.

Bath, city in Somersetshire, with a market on Wednesday and Saturday. It has been famous from the time of the Romans, for its hot springs, which are not only used as baths, but internally as a medicine. The reputation of these waters has so much increased, that Bath is become the principal resort, next to the metropolis, for the nobility and gentry, and the constant residence of many opulent invalids, as well as of numerous votaries of dissipation. In splendour and elegance of buildings it exceeds every town in England; they are constructed of a white stone, and the fronts, which are all three stories high, are adorned with three rows of columns in pairs of the Doric, Ionic, and Corinthian orders. The principal seasons for the waters are spring and autumn. The poor who come here to drink the waters, may be received into a magnificent hospital. Bath is seated on the Avon, which has been made navigable hence to Bristol: 12 miles ESE of Bristol, and 107 W of London. Lon. 2 21 W. lat. 51 32 N.

Bavaria, late circle and electorate of

Germany, now a kingdom. It is bounded NE and S by the Austrian empire; W by Wittenburg and Baden; and N by several German states. It contains Bavaria Proper, the Upper Palatinate, the bishoprics of Freisingen and Passau; the duchy of Neuburg, and the archbishopric of Salzburg, and some other states, with 35 cities, 94 towns, 753 castles, 4700 villages, 8 great abbeys, and 75 cloisters and monasteries, besides those of the mendicants; comprehending in all a superficial area of 32,000 English square miles, a population of 3,560,000 and a revenue of 2,600,000*l*. Among the numerous revolutions which the power of France has brought about on the Continent, this electorate has assumed its ancient regal honours, having been erected into a kingdom by Napoleon Buonaparte who has nearly doubled her territory at the expense of Austria, and was acknowledged an independent kingdom by the emperor of Austria, at the treaty of peace concluded between Austria and France, at Presburg, in 1805, and since that by the European powers. The policy of France, was admirably directed in this measure to its own interest, by reducing the dangerous power of Austria, and establishing a useful ally on that important side of the French territories. But notwithstanding, the king of Bavaria withdrew his troops from those of France, and joined the Grand Alliance against that empire, in October, 1813, on condition of their guaranteeing the integrity of his dominions. The accession which Bavaria received to support this regal dignity, has been the incorporation of the whole of the German and Italian Tyrol, the bishopric of Anspach, with several other large bishoprics and lordships in Germany; and all claims to fiefs and manorial rights the emperor has resigned. The inhabitants are strong and laborious and exercise themselves in shooting with rifle muskets at a mark, to render themselves expert against an enemy.

Bavaria Proper, late duchy, and the principal part of the late circle of Bavaria. It is 125 miles long and 87 broad, and divided into Upper and Lower Bavaria. Toward the S the country is mountainous, intersected with forests, lakes, morasses pastures; and toward the N are large plains which produce plenty of corn; there are likewise many salt works, medicinal springs and baths, mines of copper, silver, and lead, and quarries of excellent marble. The principal rivers are the Danube, Inn, Isar, and Nab. The inhabitants are deemed the most zealous catholics in Europe. The capital is Munich.

Bavaria, Palatinate of, late duchy, sometimes called *Nordgau*, from its situation in the N part of the late circle of Bavaria; and sometimes the Upper Palatinate, distinguished from the late palatinate of the Rhine, often called the Lower Palatinate. It is very fertile, and watered by the Nab, and several smaller rivers. The capital is Amberg.

Bengal, country of Hindoostan Proper, bounded on the W by Orissa and Bahar, on the N by Bootan, on the E by Assam and Meckley, and on the S by the bay of Bengal. Its greatest extent from W to E is about 730 miles, and from N to S above 300. The country consists of one vast plain, of the most fertile soil, which, in common with other parts of Hindoostan, annually renders two, and, in some parts, even three crops. It is sometimes subject to such extremes of heat as render it fatal to Europeans. The great cause of the unhealthiness of Bengal, however, is owing to the inundations of the Ganges and Burrampooter, by which such quantities of putrescible matters are brought down as infect the air with the most malignant vapours when the waters retire. By the latter end of July, all the lower parts of Bengal, contiguous to the Ganges and Burrampooter, are overflowed, and present a surface of water more than 100 miles wide. As some of the lands in Bengal would receive damage from such a copious inundation, they must for this reason be guarded by strong dykes to resist the waters, and admit only a certain quantity. One particular branch of the Ganges is conducted for 70 miles between dykes: and when full, the passengers look down upon the adjacent country as from an eminence. Its principal products are sugar, silk, fruit, pepper, opium, rice, saltpetre, lac, and civit. It is compared to Egypt for fertility; the Ganges dividing here into several streams, and, like the Nile, annually overflowing the country. Bengal has been subject, ever since 1765, to the English East India Company. Its annual revenue, including that of Benares, is near 1,290,000l. and its population is 11,000,000. Calcutta is the capital.

Bengal, post town of Oneida county, New York.

Benguela, kingdom of West Africa, bounded on the N by Angola; on the S by Mataman; on the E by the river Rimba; and on the W by the Atlantic. Its coast begins at Cape Ledo on the N, and extends to cape Negro on the S; that is, from lat. 9 20 to 16 30 S. The climate is very pernicious to Europeans.

* Berks, in 1810, included what is now Schuylkill, which then contained the townships of Upper and Lower Mahantango, Pinegrove, Norwegian, Manheim, Brunswick, and Schuylkill. These townships at that epoch contained an aggregate of 5,819 inhabitants, reducing the census of what is now Berks county to 37,327.

Berkshire, county in the state of Massachusetts, divided into 26 townships. The inhabitants are about 35,000. It is the most westwardly county of the state, and is for the most part mountainous; bounded S by Litchfield county in Connecticut; W by Columbia and Rensselaer counties, New York; N by Bennington county, Vermont; and E by Franklin, Hampshire, and Hampden counties, Massachusetts. Length, from N to S, 48 miles, mean width 13 miles; area 360 square miles. The Green mountains traverse this county in all its length. Other mountain ridges also chequer its surface, giving a mountainous aspect to the whole. The soil is, however, in general fertile, and peculiarly adapted to grazing. Staples, grain, flour, and salted provisions. It is abundant in marble and limestone. Chieftown, Lenox.

Berlin, city of Germany, capital of the electorate of Brandenburg, and of the whole Prussian dominions; one of the largest, best built, and best governed of any in Germany. It is defended partly by walls, partly by palisades, and has 15 gates. The streets are straight, wide, and long; and its large squares, magnificent palaces, churches, and other buildings, are scarcely to be equalled. It is 12 miles in circumference; but within this enclosure are numerous gardens, and many beautiful houses are let in stories to mechanics. The population in 1803, was 153,128, exclusive of the garrison. The royal palace contains a fine library, a rich cabinet of curiosities and medals, and the supreme colleges of government. Near the palace stands the magnificent cathedral. Here are also several academies and hospitals, an astronomical observatory, a superb arsenal, and a royal cloth manufacture. Berlin has a flourishing trade, occasioned by its numerous manufactures of silk, wool, cotton, camels hair, linen, Prussian blue, cutlery, and porcelain; and by its enamelled, inlaid, and embroidered works. It is seated on the river Spree, from which there is a canal to the Oder on the E, and another to the Elbe on the W; that it has a communication by water, both with the Baltic sea and the German Ocean. This city was taken, in 1760, by an army of Russians, Austrians, and Saxons, who were obliged to evacuate it in a few days. In 1806, ten days after the battle of Jena, the French entered this

city, and Buonaparte held a court in the palace. It is 100 miles N of Dresden, and 185 miles NW off Breslau. Lon. 13 22 E, lat. 52 31 N.

Bermuda, *Somers*, or *Summer Islands*, a cluster of small islands, nearly in the form of a shepherd's crook, and surrounded by rocks, which render them almost inaccessible to strangers. They lie in the Atlantic Ocean, 500 miles E of Carolina, and are inhabited by the English. They were discovered by Juan Bermudez, a Spaniard; but not inhabited till 1609, when Sir George Somers was cast away upon them, and they have belonged to Britain ever since. It is universally agreed that the nature of these islands has undergone a surprising alteration to the worse since they were discovered; the air being much more inclement, and the soil much more barren than formerly. The town of St. George on St. George's Island, is the capital. Lon. 63 28 W, lat. 32 35 N.

Bethlehem, post town and township in Northampton county, Pennsylvania, at lat. of 40 37 N, and lon. W C 1 46 E. The united brethren were settled here by Count Zinzendorf in 1741. In 1800 the town contained 543 inhabitants, and the township 1343. In 1810, the township contained 1436, and in 1820, 1860 inhabitants, principally of the same sect. The buildings are not remarkable for grandeur or elegance; but are generally comfortable. They have one house for public worship, a separate apartment for the residence of the single brethren, and another for the sisters. There likewise, is a seminary for the education of young ladies, in which are taught all the useful and some of the ornamental branches of education; and so great is the reputation of these schools, for the attention paid to the morals as well as the literary improvement of the pupils, as to invite them from Philadelphia and other capital cities. The scenery around Bethlehem, and the primitive manners of its

inhabitants, give the place an aspect of peculiar interest to the eye of a traveller, and render it eminently calculated to refine the taste, and preserve the morals of the students. It may be doubted whether the world affords a more pleasing scene than can be enjoyed in a fine summer evening in Bethlehem, when the groups of beautiful, simply but elegantly dressed, and happy young females, are "let loose from school."

It is the principal town of the Moravians, or *Unitas Fratrum*, in Pennsylvania, is situated on the north or left bank of the river Lehigh, in a township of the same name, at the mouth of Manockicy creek, on ground descending towards the river, and towards the creek, which gives it a fine appearance, when viewed from the south or west.

It is closely built on three streets, the principal ones, extending north and south, and the other two running from this towards the east.

The public buildings, are a large *Stone Church*, built in the Gothic style and plastered outside with a gray cement. It is 140 feet long, and 68 feet wide, of a proportionable height and having a small tower rising from the centre of the top, surmounted with an elegant dome, in which is a small bell. It is handsomely furnished in the inside, having rows of benches on each side for the two sexes. A *Sisterhouse* or building for the unmarried women. A seminary for young ladies, where all the females Moravian children are educated, and also many others from various parts of the United States. The number at present is one hundred. A *Public Tavern*, being the only one permitted in the town, where of course all strangers are lodged. Their burial ground, is in the NE part of the town, and is laid out in regular alleys and walks, planted with trees. The graves, contrary to the custom of other Christians, are laid with their feet to the south. The number of dwelling houses is 72, besides shops and other out-houses, and they are generally built of stone only one story high, forming a great contrast with their large church. Bethlehem is 11 miles W by S from Easton, and fifty two N by W from Philadelphia. Here is a wooden bridge over Lehigh 400 feet long and 4 arches.

Birmah, extensive empire in Asia, to the S of the bay of Bengal; containing the kingdoms of Birmah, Cassay, Aracan, and Pegu, and all the W coast of Siam. The kingdom of Birmah, frequently called Ava, from the name of its ancient capital, has Pegu on the S, and occupies both sides of the river Irrawaddy to the frontiers of Assam on the N; on the W it has Aracan and Cassay, and on the E China and Upper Siam. This kingdom was conquered in

1752, by the king of Pegu, who carried the Birman monarch prisoner to Pegu, and caused him to be murdered there in 1754. But Alompra, a Birman of low distinction who was continued by the conqueror as chief at Mouchabon, a small place to the N of Ava, revolted against the Peguese, got possession of Ava in 1763, and after continued battles, with various success, became the conqueror of Pegu, in 1757. This deliverer of his country continued in a state of warfare to his death, in 1760; and his successors have since added the other countries, which now form the Birman empire. The climate of Birmah is very salubrious; the seasons being regular, and the extremes of heat and cold seldom experienced. The soil is remarkably fertile, producing rice, sugar canes, tobacco, indigo, cotton, and all the tropical fruits in perfection; and on the banks of the Irrawaddy, which runs S through the whole country, is produced pure amber, and the finest teak timber in the world. The kingdom of Birmah abounds in minerals; it has mines of gold, silver, rubies, and sapphires; and affords amethysts, garnets, chrysolites, jasper, load-stone, and marble. The general disposition of the Birmans is strikingly contrasted with that of the natives of Hindoostan, though separated only by a narrow ridge of mountains, in several places admitting of an easy intercourse. The Birmans are a lively inquisitive race, active, irascible, and impatient; but the character of their Bengal neighbours is known to be the reverse. The passion of jealousy, which prompts most eastern nations to immure their women, and surround them with guards, seems to have little influence on the minds of the Birmans; for their wives and daughters have as free intercourse with the other sex as the rules of European society admit. The Birmans are extremely fond both of poetry and music. Their religion is, in fact, that of the Hindoos, though they are not votaries of Brahma, but sectaries of Boodh. Their system of jurisprudence is distinguished above any other Hindoo commentary for perspicuity and good sense. The emperor of Birmah is a despotic monarch; and, like the sovereign of China, acknowledges no equal. The prevailing characteristic of the Birman court is pride. There are no hereditary dignities or employments in the government; for all honours and offices, on the demise of the possessor, revert to the crown. The capital of the kingdom, and metropolis of the empire, is Ummerapoora.

Birmingham, town in Warwickshire, with a market on Thursday. It is a place of great antiquity, and stands on the side of a hill, forming nearly a half-moon. The lower part is filled with workshops and

warehouses, and consists chiefly of old buildings. The upper part contains many new and regular streets, and a handsome square. It has two churches; one in the lower part of the town, which, though lately cased with brick, is a very ancient building, with a lofty spire, the other, a grand modern structure, having a square stone tower, with a cupola and turret; it has also two chapels, several meeting-houses, a large school endowed by Edward VI an elegant theatre, and the completest set of baths in the kingdom. The hardware manufactures of Birmingham have been noted for a considerable period; but of late years, by great additions to its trade from a vast variety of articles, such as metal buttons, buckles, plated goods, japanned and paper ware, &c. it has risen greatly in population; and in 1811, contained upward of 70,000 inhabitants. It is plentifully supplied with coal by means of a canal to Wedn sbury; and it has a communication with the Great Trunk from the Trent to the Severn, by a branch passing by Wolverhampton. The improved steam engines, made here by Bolton and Watt, deserve to rank high among the production of human ingenuity; their application to various mechanical purposes, and particularly to the draining of mines, places them among the most valuable inventions of the age. Birmingham is 17 miles NW from Coventry and 116 from London. Lon. 1 50 W. lat. 52 30 N.

Biscay, province of Spain, 97 miles long and 50 broad; bounded on the N by the bay of Biscay, E by Upper Navarre, S by Old Castile, and W by Asturias. It contains three divisions; Biscay Proper, Guipuscoa, and Alaba. This province is a kind of republic, in the hands of the nobility, under the protection of the crown. Here are neither garrisons, custom-houses, stamps, nor excise; and of all the royal taxes, none are known but the *donativo*, or gratuitous donation. Biscay receives by mere condescension a corregidor and a commissary of marines; but does not permit any order of the Spanish government to be executed without the sanction of the province. It produces apples, vines and grain; and has also wood for building ships, and mines of iron and lead. The Biscayans are stout, brave, and choleric to a proverb: and the lowest labourer deems himself a gentleman. They speak the ancient Cantabrian language, which has no affinity with any other in Europe. Bilboa is the capital.

Blue Lick, Upper, on Licking river, Fleming county, Kentucky.

Blue Lick, Lower, see *Ellisville*.

Blue Mountain, sometimes called *Kittatiny*, was originally called by the Indians *Katatatin chunk*, which is said to signify "main or principal mountain." It crosses the Delaware, which forms a deep gap, through it, about 24 miles above Easton, and running WSW, crosses the Lehigh, which forms also a gap, through it and continues nearly the same direction westward of the Susquehannah. The height of this mountain is at three points in the county of Northampton, as follows: On the west side of the Delaware, at the Delaware Watergap, it is found to be 1250 feet; on the west side of Lehigh Watergap, it measures 1175 feet, and on the east side of Kunkles Gap, or Allentown road, it mea-

tures 1135 feet. These measurements were taken by the common geometrical method, and will give the average height of the Mountain in the county of Northampton, at 1186 feet. The Blue Mountain so far as it extends in Northampton county, is a very regular ridge, nearly uniform in its height, and has properly but four passes or *Gaps*, in the county. These are the *Delaware Water Gap*, the *Wind Gap*, the *Lehigh Water Gap*, and *Little Gap*, between the *Wind Gap*, and *Lehigh Water Gap*. The Mountain is in all places steep, thinly covered with poor timber, generally rocky, and unfit for cultivation.

Blue Ridge, one of the ranges of the Appalachian, or Allegany mountains, and generally, though erroneously considered the southeast ridge of that system. It extends from the Hudson river into Georgia. The great Limestone valley, as it is called by pre-eminence extends along the NW side of the Blue ridge. The real Limestone range, is, however, much more limited than generally believed. In New Jersey and Pennsylvania it is seldom as much as 10 miles wide from the foot of the mountain, and followed by clay slate, which forms the substrata, on the NW side of the valley. The line of separation crosses the Delaware about 20 miles above the borough of Easton; the Lehigh at the Slates: the Schuylkill above the mouth of Maiden creek; and the Susquehanna at Harrisburg. Between the Susquehanna, and Potomac, the relative distances and distinction between the two formations, maintain a nearly similar position. From the latter stream SW we are unprepared to mark their respective limits.

The entire length of the Blue Ridge as a separate range, is upwards of 700 miles. Its general elevation varies considerably. In New Jersey, Pennsylvania, and Maryland it is humble; but in Bedford county, Virginia the Peaks of Otter exceed 5000 feet above the level of the Atlantic Ocean; and are the most elevated part of the Appalachian system SW from Hudson river.

Bormio, town of the country of the Grisons, capital of a county of the same name, bounded on the S by the state of Venice, on the E by the territory of Austria, and on the S and W by Caddea. It contains about 1000 inhabitants, and has a desolate appearance. The houses are of stone plastered: a few make a tolerable figure amid many with paper windows; and several, like the Italian cottages, have only wooden window shutters. It is 40 miles SE of Coire. Lon. 19 5 E, lat. 46 25 N.

Borneo, island in the Indian Ocean, discovered by the Portuguese in 1521; before the discovery of New Holland, thought to be the largest in the world, being 1800 miles in circumference. It is seated under the equator, that line cutting it almost through the middle. It is almost of a circular figure, abounds with gold, and the finest diamonds in the Indies are found in its rivers, being probably washed down from the hills by torrents. It produces likewise rice, pepper, fruits, and bees'-wax, which last is used instead of money. The beasts are oxen, buffaloes, deer, goats, elephants, tigers and monkeys. This island has fine rivers, especially toward the W and S. The rainy season continues for eight months in the year, and, as during that time all the flat country is overflowed, the air is rendered very unhealthful, and the inhabitants are forced to build their houses on floats which they make fast to trees. The houses have but one floor with partitions made of cane. The people are very swarthy, and go almost naked. There

are Mahometans on the sea coast; but the rest are Gentoos. The capital, of the same name, is large and populous, with a good harbour, and seated on the NW side. Lon. 112 27 E, lat. 4 55 N.

Bornholm, island of the Baltic Sea, 20 miles SE of Schonen in Sweden. Lon. 14 56 E, lat. 54 55 N.

Bornou, extensive country in Africa, bounded on the NW by Fezzan; on the N by the desert of Bilma; on the SE by Cashna; and on the SW by Nubia. It extends from 12 to 22 degrees of E lon. and from 17 to 21 degrees of N lat. The northern part is poor, and like the rest of the provinces of Zaara: but all the rest is well watered by springs and rivers that tumble down with a dreadful noise from the mountains: rendering the country prolific in corn, grass, and fruits, and giving it a pleasing aspect. The eastern and western frontiers are divided into mountains and valleys, the latter being all covered with flocks of cattle, fields of rice and millet, and many of the mountains with wood, fruit-trees, and cotton. The climate is said to be characterized by excessive, though not by uniform heat. Two seasons, one commencing soon after the middle of April, the other at the same period in October, divide the year. The first is introduced by violent winds, that bring with them, from the SE and S an intense heat, with a deluge of sultry rain, and such tempests of thunder and lightning as destroy multitudes of the cattle and many of the people. At the commencement of the second season, the ardent heat subsides; the air becomes soft and mild, and the weather perfectly serene. The complexion of the natives is black; but they are not of the negro cast. The capital is of the same name.

Bornou, the capital of the empire of Bornou, situated in a flat country. Lat. 40 N.

Borodino, on the Moskwa, village of Russia, 90 miles W. from Moscow, famous for a sanguinary battle between the French and Russians, September 7th, 1812.

Boet, strong town of Persia, capital of Sablestan. Lon. 64 15 E, lat. 51 50 N.

Boston, borough of Lincolnshire, seated on both sides of the Witham, not far from its influx into the sea; but its harbour can admit vessels of inferior burden only. It has a navigation from Lincoln, partly by the Witham, and partly by a canal, at the termination of which, in Boston, is a large and curious sluice; and there is another canal to Bourn. It is a flourishing town, with a spacious market-place, and the tower of its Gothic church is one of the most lofty and elegant of the kind, and a noted seaport. It is 37 miles SE of Lincoln, and 115 N of London. Lon. 0 5 E, lat. 53 1 N.

Boston, seaport and city of Massachusetts, in Suffolk county, on a fine peninsula extending into Massachusetts's bay about two miles, with a mean breadth of one

mile. The surface on which the city stands is undulating, and gives an agreeable variety to the streets, and affords, with the aid of the buildings, particularly the state house, some very fine prospects of the adjacent country, bay, and islands. The harbour is spacious, and has sufficient water for the admission of the largest vessels, and adequately land-locked for their protection from all winds. It is very seldom so much incommoded with ice, as to render it inaccessible at the severest seasons of frost. The entrance is narrow, and defended by forts Warren and Independence.

Boston is a very commercial city, and in proportion to her resident population, contains an immense mass of wealth. In point of tonnage the shipping of Boston stands next, amongst the cities of the United States, to New York. In 1815, the tonnage of the former exceeded 143,000 tons. To facilitate the operations of commerce, agriculture, and internal intercourse. Boston is connected with the surrounding country by excellent roads, and the interior of Massachusetts and New Hampshire, by the Middlesex canal. This city is indeed flourishing and prosperous. It is not, however, from the amount of its capital, or the extent of its commerce, that Boston founds its most solid claim to the respectable rank it possesses amongst the cities of the United States; it is upon the number and exalted character of its literary institutions which this city has based her true grandeur. It would be to swell this article to a much too extensive length to enumerate its various literary establishments; we may therefore notice the Athenæum, with 18,000, and the Boston library with 6000 volumes, as rich stores of intellectual wealth; and as in a scientific point of view Cambridge is only a suburb of Boston, we may in this view include the most extensive collection in the United States, exceeding 25,000 volumes, which appertains to the university in the former place.

The natural disadvantages which must have existed in mutual communication between town and country, from the insular situation of Boston, is amply obviated by four fine bridges. One over Charles river, from Boston to Charleston, exceeds 1500 feet in length, with a breadth of 42 feet; West Boston bridge, leading to Cambridge, is based on 180 piers, and extends 3,433 feet; Craigies bridge is between the two former. A fourth bridge over the bay to the SW from Boston, with a wing dam, constructed to procure by aid of the tide, an immense water power, intended to put in operation different kinds of machinery.

The appearance of the streets and houses of Boston affords ample monuments of the change of taste, wealth, and views of convenience. In the ancient parts of the city,

the streets are narrow and crooked; and the houses low and plain; but in the western, and more modern quarters, the streets are wide, and cutting each other at right angles; and the houses in a high degree spacious, splendid, and elegant.

The public buildings of Boston are numerous and spacious. The state house, standing upon an elevated spot, with the park, an open space of near 10 acres, and a fine descending slope from the front of the edifice, presents, particularly from its dome, an expansive prospect over the harbour, with its numerous islands, and the adjacent city and country. The new court house, a fine building, reared at an expense of near 100,000 dollars; Faneuil hall; an alms house; custom house; and near 50 places of public worship adorn the city.

The population has constantly advanced; in 1800, it stood at 24,937; in 1810, at 32,250; and in 1820, at 42,526. The vicinity is also very populous, well cultivated, and embellished with the most splendid country seats in the United States: 115 miles from Portland in Maine, 40 miles from Providence, Rhode Island; 160 from Hartford, Connecticut; 210 from New York; 300 from Philadelphia; and 436 from Washington. Lon. W C 5 58 E, lat. 42 22 N.

Boston, township in the western part of Portage county, Ohio. Population in 1820, 270.

Bosworth Market, town in Leicester-shire, with a market on Wednesday. In its vicinity was fought the famous battle between Richard III. and the earl of Richmond, afterward Henry VII. in which the former lost his crown and life. It is seated on a hill, 13 miles W of Leicester, and 106 NNW of London.

Botany Bay, bay of New South Wales, discovered by Captain Cook in 1770. and so called from the great quantity of herbs found on the shore. The promontories which form its entrance are named Cape Banks and Point Solander. It was originally fixed on for a colony of convicts from Great Britain, which, in the sequel, took place at Port Jackson, 13 miles further to the N. Lon. 151 21 E, lat. 34 0 S.

Botany Island, small island in the Pacific Ocean, to the SE of New Caledonia. Lon. 167 17 E, lat. 22 17 S.

Botesdale, town in Suffolk, with a market on Thursday, seated in a valley, 13 miles NE of Bury, and 86 of London.

Botetourt, county, on the sources of James and Rappahannock rivers; bounded by Franklin S; Montcomery and Giles S W; Monroe W; Bath N; Rockbridge NE; and Bedford SE; length 40; mean width 28; area 1,120 square miles. Em-

bracing a part of the great limestone and slate valley NW from the Blue Ridge, much excellent soil exists in this country, though much of its surface is mountainous. Chief town, Fincastle.

Bothnia, East, province of Sweden, in Finland, on the E side of the gulf of Bothnia, between the provinces of Kimi and Finland Proper and Russia. It is 300 miles in length, and from 90 to 220 in breadth. On the seacoast, and toward the S, the land is low and marshy, and the summers are often so cold as to destroy great part of the crops. The inhabitants are thinly spread over this large space, the cattle small, and bears numerous. The principal exports are timber, butter, whale oil, pitch, and tar. This province is sometimes called Cajania, and the capital is Cajaneburg.

Bothnia, West, province of Sweden, in Nordland, on the W coast of the gulf of Bothnia. It is 230 miles in length, between the seacoast and Swedish Lapland, and from 25 to 50 in breadth. The soil is tolerably fertile, but sudden frosts in July often destroy the crops; and it has mines of copper and iron, and numerous forests. The chief articles of commerce are the skins of foxes, ermins, bears, wolves, and reindeer, otters, &c. The capital is Uma.

Bothnia, Gulf of, sea or large gulf, branching N from the Baltic, at the isle of Aland, and bounded on the W, N, and E by the dominions of Sweden. On its coasts are many small islands.

Bourchemin, seigniory Lower Canada, Richelieu county, 35 miles E from Montreal.

Bordeaux, ancient city of France, in the department of Gironde, and late province of Guienne. It is built in the form of a bow, of which the river Garonne is the string. This river is bordered by a large quay, and the water rises four yards at full tide, for which reasons the largest vessels can come up to it very readily. The ancient city of Bordeaux, though considerable in point of size, was ill built, badly paved, without police, or any of those municipal regulations, indispensably requisite to render a city splendid or elegant. It

has entirely changed its appearance within these last 40 years. The public edifices are very noble, and all the streets newly built are regular and handsome. The quays are four miles in length, and the river itself is considerably broader than the Thames at London bridge. The ruins of a very large amphitheatre yet remain, constructed under the emperor Galienus, built of brick; likewise several aqueducts. It is 87 miles S of Rochelle, and 325 SW of Paris. Lon. 0 34 W, lat. 44 50 N.

Bourdines, town of the Austrian Netherlands, in Namur, five miles NW of Huy. Lon. 5 0 E, lat. 50 35 N.

Bowman's Mountain, called the *Bald Mountain*, near the western limits of Luzerne county, is a high regular barren range, whose average height may be 1000 feet. This extends from the East, to the West Branches of the Susquehannah river, between which it appears to have no other name, than those mentioned, except, that in a small territory, on the head of Fishing Creek, the inhabitants call it the *North Mountain*. Westward of the waters of the Susquehannah, it forms the main ridge of Allegany Mountains. It crosses the East Branch of Susquehannah, at the mouth of Tunkhannock and Bowman's creeks, and extending north eastwardly—it is called *Tunkhannock Mountain*, and terminates in Susquehannah county, where it is called the Elk Mountain.

Bowyer's Bluff, precipice of limestone rock, forming the W point of Washington harbour, Green bay, lake Michigan, about 100 miles SW from Mackinaw.

Bowyer, Fort, situated on Mobile point. This was merely a small water battery erected to defend the main pass into Mobile bay. Here on Sept 15th, 1814, major W. Lawrence, with a garrison of 158 men, repulsed an attack made by a British squadron, of which the Hennes of 28 guns was destroyed. The fort was invested by a land and naval force on the 8th of Feb. 1815, and surrendered to general Lambert, by major Lawrence on the 10th of the same month; and on the ratification of peace was restored to the U. S.

Brasil, an extensive country of South America, claimed and in part possessed by Portugal. It extends along the Atlantic Ocean from Cape Orange, lat. 4 N. to near lat. 33 S and from Cape St. Roque lon. W C 44 E to the mouth of the Javary river, lon. W C 5 E; extending through 39 degrees of latitude. It is bounded NE by the Atlantic Ocean; N by Guayana and Columbia; NW by Columbia; SW by Peru, and the United Provinces of La Plata; and SE and E by the Atlantic Ocean. It is intersected by a chain of mountains ranging along the Atlantic coast from S lat. 10 to 30. The aspect of a country of such vast extent must present an indefinite variety of surface and soil; Brasil is, however in general rather plain than mountainous. The Amazon, with its numerous branches water and fertilizes these immense regions, affording the most extensive tracts of productive soil in one connected body, ever united under one sovereignty.

The Brasils is about 2500 miles in length and breadth, with an area of about three

millions of square miles. It is very difficult to fix its population; supposed to be about 2,000,000, independent of the aborigines not subject or tributary to the crown of Portugal. It is divided into the captain generalships of Rio Grand, St. Pauls, Minas Ceraes, Janeiro, Bahia, Pernambuco, Ceara, Maranh, Grand Para, Mattagrosso and Goias. It would be needless to enumerate the productions of Brasil, either mineral or vegetable: it is sufficient to observe that in both kingdoms, the objects are almost commensurate with all that can administer to the wants, comforts, or luxury of human beings.

Brassos a Dios, river of Texas, in the independence of St. Louis Potosi; the sources of the Brassos, are not correctly known, but are supposed to be south of Red river, about N lat. 33, and W lon. Bristol, city and seaport in Gloucestershire and Somersetshire; to which last county it was accounted to belong, before it formed a separate jurisdiction. In wealth, trade, and population, it has long been reckoned the second in this kingdom. It is seated at the confluence of the Avon with the Frome, 10 miles from the influx of the Avon into the Severn. Bristol has a prodigious trade; for it is reckoned that hence 2000 ships sail yearly. The tide rising to a great height in these narrow rivers, brings vessels of considerable burden to the quay. But the largest ships are discharged at Kingroad, four miles below the city, and the goods are brought to the quay by lighters. There are some considerable woollen manufactures; and no less than 15 glass-houses, and a sugar refinery, which is one of its principal manufactures. For supplying the city with water there are six public conduits; and handsome hackney coaches may be hired at reasonable rates. Hither is a great resort in the summer of invalids as well as other company; for whose accommodation and entertainment there is a pump-room, ball-room, coffee-house, with taverns, and a great number of elegant lodging houses, both below, on a level with the well, and above in the delightful village of Clifton, which is situated on the brow of a hill, from whence there are downs extending several miles where the company ride out for exercise. It has 18 churches, beside the cathedral, a bridge over the Avon, a custom-house, and an exchange. The Hot Well, about a mile from the town, on the side of the Avon, is much resorted to: it is of great purity, and has obtained a high reputation in consumptive cases. In St. Vincent's Rock, above this well, are found those native chrystals, so well known under the name of Bristol stones. Besides this well, there is a cold spring which gushes out of a rock on the side of a river that supplies the cold bath. Here are used sledges instead of carts, because the vaults and common sewers would be injured by them. Bristol is governed by a mayor, has a market on Wednesday, Friday, and Saturday, and sends two members to parlia-

ment. It is 12 miles WNW of Bath, 34 SSW of Gloucester, and 124 W of London. Lon. 2° 36' W, lat. 51° 28' N.

Buenos Ayres, city and seaport, the capital of Paraguay and the seat of a late viceroyalty, and now of the united provinces of La Plata. A great part of the treasures and merchandise of Peru and Chili are brought here, which are exported to Spain. It was founded by Mendoza, in 1535, but afterward abandoned; and in 1544, an other colony of the Spaniards came here, who left it also; but it was rebuilt in 1582, and inhabited by Spaniards and the native Americans. It is a bishop's see, and has an elegant cathedral, a small Indian church, two monasteries, five convents, a college, a beautiful square, and about 70,000 inhabitants. The trade is carried on with the provinces of Peru by means of carts drawn by oxen, which travel together in caravans. The country around is quite open and level, furnishing every species of American and European productions, but the most extraordinary circumstance is the propagation of cattle, which have multiplied so immensely that a great many are killed merely for their hides. The trade of this city already considerable may become immense. Placed upon the bank of the

Plata river, its situation would enable an enterprising people to form it into an emporium for the merchandize of the wide spread regions drained by that stream and its numerous confluent. At present the exports are, gold, silver, beef, tallow, hides, &c.; and imports manufactured goods, principally from Great Britain. An extensive inland commerce, by caravans is carried on over the Andes, to Chili and Peru. The harbour is yet an open road without moles or quays, but the advance of commerce in the hands of a free people, will superinduce the necessary improvements. Of the present population about one third are civilized Indians. In 1806, Buenos Ayres was surrendered to the English, under major-general (now lord) Beresford; but was retaken by the Spanish forces about two months afterwards, when the general and his army were made prisoners of war. In July, 1807, the English again made an attack on this place, with 10,000 men, but without success. It has since shared the vicissitudes of the revolutionary war, but may now be considered as the seat of a new and rising empire. It is seated on the Plata, 220 miles from the ocean, though the river there is 21 miles in breadth. Lon. W C 18 29 E. lat. 34 25 S.

Buenos Ayres, province of South America one of the United provinces of La Plata; bounded SE by the Atlantic Ocean; SW by the Colorado river; W by Cordova; and NE by the Rio de la Plata; length from the SW to NE 400; mean width 200 miles; area, about 80,000 square miles. It is in general an open and flat country, with a soil of exuberant fertility; and situated between 33 and 40 of S lat. produces in abundance the grains and fruits of a temperate climate. The extent of its unwooded plains, however, invite to and superinduce pastoral pursuits. Agriculture is too much neglected and the attention of the inhabitants drawn to the rearing of cattle and horses. Manufactures can scarcely be said to exist in their most incipient state. Relative population uncertain.

Buffalo, lake, of North America, laid down by Heume. Lon. W C 34 W. lat. 67 20 N.

Buffalo, port of entry, post town, and seat of justice in Niagara county, New York, on lake Erie, at the head of Niagara river, 22 miles above Niagara falls. This town is admirably situated to become a great interior mart. Buffalo creek is of sufficient depth, 12 feet, to admit an excellent harbour, and the necessary works to meliorate its entrance to lake Erie, and to facilitate, the ingress, and egress of vessels, are now in an inconsiderable state of forwardness. The grand canal of N. York, is intended to debouch into lake Erie, at

Buffalo harbour. The town is built upon an elevated and dry plain, extending in great part in one long street on each side of the road, leading from the harbour to the interior of New York. This fine village was burnt by the British in the late war, but has risen in an improved state from its ashes. The present population in the village separate from the other parts of the township exceeds a thousand.

Burrampooteer, river of Asia, which rises near the head of the Ganges, in the mountains of Thibet. It first takes its course to the E directly opposite to that of the Ganges, and winding with a rapid current through Thibet, where it is named Sampoo, or Zanchin, it washes the border of the territory of Lassa, and proceeds SE to within 220 miles of Yunnan, the westernmost province of China: then turning suddenly to the W through Assam, it enters Bengal on the NE, where it assumes the name of Burrampooteer. It then makes a circle round the western point of the Garrow mountains, and altering its course to S, meets the Ganges about 40 miles from the sea, after having meandered for more than 2000 miles. During the last 60 miles before its junction with the Ganges, it forms a stream which is regularly from four to five miles wide; and, but for its freshness, might pass for an arm of the sea. Common description fails in an attempt to convey an adequate idea of the grandeur of this magnificent object.

Bursa, or *Prusa*, one of the largest cities of Turkey in Asia, capital of Beccan-gil. It stands upon several little hills, at the foot of mount Olympus, and on the edge of a fine plain full of fruit trees. The mosques are elegant, as are the caravansaries. Bursa is 99 miles S of Constantinople. Lon. 29 5 E, lat. 39 22 N.

Burton, a flourishing post-township in Geauga county. It is principally settled with farmers; but contains the village of Burton, in which is a post-office, and a store. Population in 1810, 517; and in 1820, 506.

Burton, township in Stafford county, New Hampshire. Population in 1810, 194; and in 1820, 209.

Burton upon Trent, town in Staffordshire, with a market on Thursday. It had formerly a large abbey; and over the Trent is a famous bridge of freestone, a

quarter of a mile in length, supported by 37 arches. It consists chiefly of one long street, which runs from the site of the abbey to the bridge, and has a good market for corn and provisions. It is 12 miles NE of Litchfield, and 124 NNW of London. Lon. 1 40 W, lat. 52 48 N.

Bury, town in Lancashire, with a market on Thursday, seated on the Irwell, and noted for its fustian manufacture, and the coarse goods called half-thicks and kerseys. In 1787, the theatre fell, and buried under its ruins more than 300 persons, many of whom were killed or much bruised. Bury is 36 miles SE of Lancaster, and 190 NNW of London. Lon. 2 24 W, lat. 53 36 N.

Bury, St. Edmunds, borough in Suffolk, with a market on Wednesday and Saturday. The situation is very pleasant, and the air is supposed to be the best in England; for which reason it is frequented by genteel people. The noble ruins of its abbey, are still standing near the two churches, which are both large, and seated in one churchyard. Bury sends two members to parliament, and took its name from St. Edmund the king, who was buried here, after being murdered in a wood. The assizes are held here. It is 14 miles E of Newmarket, and 72 NNE of London. Lon. 0 46 E, lat. 52 22 N.

<i>Cabotia</i> , or <i>British North America</i> , north from the limits of the United States. This comprehensive term has been adopted by the British geographers, and includes Nova Scotia, New Brunswick, Lower Canada, Upper Canada, East Main, New South Wales, and all other British territories in North America, from those we have named to the extreme known regions towards the Northern Ocean.		
<i>Cabot's Head</i> , Upper Canada, very large promontory running into lake Huron, west of Gloucester, or Matchedash bay, and embays a large part of that lake at its easternmost extremity, stretching itself towards the Manitou islands.		
<i>Cabreria</i> , island in the Mediterranean, about seven miles S of Majorca. It has a large harbour defended by a strong castle.		
<i>Cabul</i> , or <i>Kabul</i> , province of Hindoostan Proper, bounded on the W by Persia, on the North by the Hindoo-ko, on the NE by Caferistan, and on the E by Cashmere, and on the S by Candahar. It is a country highly diversified; consisting of mountains covered with eternal snow; hills of moderate height and easy ascent; rich plains and stately fores; and these enlivened by innumerable streams. It produces every article necessary to human life, with the most delicate fruits and flowers. It is sometimes called Zabulistan, from Zabul		

one of the names of Ghizni, which was the ancient capital of the country. This province is subject to the king of Candahar.

Cabul, or *Kabul*, the capital of the province of Cabul, and of the dominions of the king of Candahar, seated near the foot of the Hindoo-ko, and the source of the Attock, which runs near it. In a political light it is considered as the gate of India towards Tartary. It is 680 miles NW of Delhi. Lon 68 58 E, lat. 34 56 N.

Cacaca, town of the kingdom of Fez, with a fort upon a rock. The Moors retook it from the Spaniards in 1534. Lon. 2 53 W, lat. 35 2 N.

Caceres, town of Spain, in Estramadura, famous for its fine wool, and seated on the Sabrot, 22 miles SE of Alcantara. Lon. 5 44 E, lat. 39 11 N.

Cachan, or *Cashan*, town of Persia, in Irac Agemi, where they carry on a considerable trade in silks, silver and gold brocades, and fine earthen ware. It is seated in a vast plain, 55 miles N by W of Ispahan. Lon. 51 55 E, lat. 33 20 N.

Cachao, the capital of a province of the same name, in Tonquin, on the W side of the river Hotti, 80 miles from the gulf of Tonquin. The factories purchase silks and lackered ware, as in China. Lon. 105 31 E, lat. 22 10 N.

Cache, township and settlement in Phillips county, Arkansas on White river. Population in 1820, 178.

Cacheo, town in Negroland, seated on the river St. Domingo. It is subject to the Portuguese, who have three forts, and carry on a great trade in flax and slaves. Lon. 14 55 E, lat. 12 0 N.

Cacongo, small kingdom of Africa, on the river Zaire. The inhabitants have a considerable trade; and their manners, religion and government, are the same as in Loango. It lies in lat. 5 0 S.

Cadene, town of France, in the department of the Mouths of the Rhone, 28 miles SE of Avignon. Lon. 5 30 E, lat. 43 42 N.

Cadillac, town of France, in the department of Gironde and late province of Guienne, seated on the Garonne, with a handsome castle, 15 miles SE of Bourdeaux. Lon. 0 22 W, lat. 44 40 N.

Cadiz, a large and rich city of Spain in Andalusia, with a good harbour. It is a bishop's see, and seated on an island, 18

miles in length and nine in breadth; but the NW end, where the city stands, is not two broad. It has a communication with the continent, by a bridge. The bay formed by it is 12 miles in length and six in breadth. The S side is inaccessible by sea because it is edged with craggy rocks; and two forts, the Puntal and Malagorda, command the passage into the harbour. Except the *Calle Ancha*, all the streets are narrow, ill-paved and insufferably stinking. The roofs are flat, covered with an impenetrable cement, and few are without a turret for the purpose of commanding a view of the sea. High above all these, stands the tower of signals. Here flags are hung out on the first sight of a sail, marking the size of the ship and the nation it belongs to. The public walk or Alameda is pleasant in the evening. The sea air prevents the trees from thriving, and destroys all hopes of future shade. Westward of the Alameda is Camposanto, a large esplanade, the only airing for coaches. Opposite to it is the fortress of St. Sebastian, built on a neck of land running out into the sea. The round tower at the extremity is supposed to have saved the city in the earthquake in 1755, from being swept away by the fury of the waves. The inhabitants are computed at 100,000. It is a very ancient place, being built by the Phenicians; it was afterwards a Roman town; and there are still several remains of Roman antiquities. It is 45 miles W of Gibraltar, and 90 W by S of Malaga. Lon. 6 11 W, lat. 36 31 N.

Cadiz, a post town and seat of justice for Harrison county, Ohio, is a thriving town, situated in a township of the same name, on the road from Wheeling to New Philadelphia, 20 miles from the former, and 30 from the latter.

Cadorino, province of Italy in the territory of Venice; bounded on the E by Friuli Proper, on the S by the Bellunese, and on the N by Brixen. The chief town is Cadore.

Cadron, township in Pulaski county, Arkansas. Population in 1820, 717.

Cadsand, island on the N coast of Flanders, at the mouth of the Scheldt, which river it commands.

Caen, considerable city of France, in the department of Calvados and late province of Lower Normandy, of which it was the capital. It has a celebrated university, and an academy of literature, and the inhabitants are computed at 40,000. Wil-

liam the conqueror was buried here in the abbey of St. Stephen, which he founded. The river Orne runs through the city, to which the tide brings up large vessels. It is 65 miles W by S of Rouen, and 125 W of Paris. Lon. 0 17 W, lat. 49 11 N.

Caer, for some places that begins thus, as Caerthiff, see under Car.

Caernarvon, township of Lancaster county, and state of Pennsylvania. It is watered by little Canestogoe creek, and bounds on Berks county on the NE. The population is about 1000 persons.

Caermarthenshire, county of S. Wales, 48 miles long, and 25 broad, area — square miles. It is bounded S by Bristol channel; W by Pembrokeshire, N by Cardiganshire; and E by Brecknockshire, and Glamorganshire. The principal rivers are the Towy, Coty, and Tawe; of which the first abounds with excellent salmon. It contains 328,000 acres; is divided into eight hundreds, and 145 parishes; and has six market towns. In 1801, the inhabitants amounted to 67,317; in 1811, 77,387; and in 1821, 90,359. It abounds with ancient forts, camps, and tumuli. Near Caermarthen, towards the E may be seen the ruins of Kastele, Karry, and several vast caverns, supposed to have been copper mines of the Romans. Near this spot is a fountain, which ebbs and flows twice in 24 hours. The county and city send each a member to parliament.

Caermarthen, borough of Wales, capital of Caermarthenshire, with a market on Wednesday and Saturday. It is seated on the Towy, over which is a stone bridge, to which small vessels may come up. It was fortified with a wall and a castle, now in ruins; and on the E side of the town, near the river, are the remains of a monastic building of considerable extent. Caermarthen is a county of itself, governed by a mayor. There are iron and tin mines in the neighbourhood. It is 24 miles SE of Cardigan, and 220 W by N of London. Lon. 4 23 W, lat. 52 12 N.

Caernarvonshire, county of N. Wales, bounded on the N and W by the sea, on the S by Merionethshire, and on the E divided from Denbighshire by the river Conway. It is about 50 miles in length, and 20 in breadth. It contains 310,000 acres; is divided into seven hundreds, and 68 parishes; has one city and five market towns; and sends two members to parliament. In 1801, the inhabitants amounted to 41,521; in 1811, to 49,536; and in 1821, to 57,958. The principal rivers are the Conway and Saint. This county being the most rugged district of N. Wales, may be truly called the British Alps. Its central part is occupied by the famed Snowdon; and the prospects around

are rude and savage in the highest degree, but not without a mixture of beauty, when the dimensions of the vales admit the varieties of wood, water, and meadows. The soil in the valleys on the side next Ireland is pretty fertile, especially in barley; great numbers of black cattle, sheep, and goats, are fed on the mountains; and the sea, lakes, and rivers, abound with variety of fish. Copper mines have been worked in various parts of these mountains, as well as lead; and quantities of stone excellent for hones, are dug near Snowdon; to the dreary region of which the rich vale of Conway below forms a pleasing contrast. The chief manufacture is woollen cloth.

Caernarvon, borough and seaport of Wales, capital of *Caernarvonshire*, with a market on Saturday. It is seated on a strait of the sea, called Menai, near its entrance into Caernarvon bay, and carries on a considerable trade with Ireland, and the principal English ports. It has a celebrated castle, built by Edward I. in which his son Edward II, the first prince of Wales was born. Caernarvon is governed by the constable of the castle, who is always mayor. Here are salt water baths, and elegant hot and cold baths, which are much frequented during the season. It is seven miles SW of or Bangor, and 244 NW of London. Lon. 4 20 W lat. 53 8 N.

Caernarvon, or *Churchtown*, post town of Lancaster county, Pennsylvania, see *Curranian*.

Caerleon, town in Monmouthshire, with a market on Thursday. It was a Roman town, as is evident from the antiquities found here; and it has the ruins of a castle. It is seated on the Usk, 19 miles SW of Monmouth, and 148 W by N of London. Lon. 3 6 W lat. 51 40 N.

Caerphilly, town of Wales, in Glamorganshire, with a market on Thursday. The ruins of its celebrated castle more resemble that of a city than a single edifice. It is seated between the Taff and Ruanney, seven miles N of Cardiff, and 160 W of London.

Caerwent, village in Monmouthshire, four miles SW of Chepstow. It is the Venta Silurum of the Romans, once crowded with palaces and temples; but now the buildings within its ruined walls are only a church and a few scattered houses, the rest of the area being laid out in fields and orchards, where a tessellated pavement, and numerous other antiquities have been discovered.

Caerwys, town of Wales, in Flintshire, with a market on Tuesday, five miles W of Flint, and 212 NW of London.

Cesars Creek, township in Greene county, Ohio. Population in 1810, 649, and in 1820, 1131.

Caffa, or *Theodosia*, the largest town of the Crimea, with an excellent road and harbour. It was taken, in 1265, by the Genoese, who made it one of the most flourishing towns in Asia. It was taken from them by the Venetians, in 1297, but soon recovered; however, in 1474, the Tartars, assisted by the Turks, finally expelled them. It was the last post in the Crimea of which the Genoese retained the sovereignty. Caffa was the Theodosia of the ancients; a name which has been restored to it since the Russians became possessed of the Crimea. It contains about 20,000 inhabitants, and is constantly well garrisoned. The trade consists in wax, furs, lamb-skin leather, horses, and female slaves; most of the latter are brought from Circassia, and are here sold at from 4 to 800 pounds each, in proportion to their charms. Caffa is seated on a bay of the Black sea, at the foot of some high mountains, 65 miles E by N of Sevastopol, and 130 SE of Precop. Lon. 35 20 E. lat. 45 0 N.

Caffy, *Strait of*, the ancient Cimmerian Bosphorus, a strait that forms the communication between the Black sea and the sea of Asoph, and a separation between Europe and Asia.

Caffraria, a very extensive country of Africa bounded on the N by Negroland and Abyssinia, on the W by part of Guinea, Congo, and the sea; on the S by the Cape of Good Hope, and on the E by the sea.

Ca-Ira, post village in Cumberland county, Virginia.

Cairngorn, mountain of Scotland, between the counties of Banff and Murray. It rises in a conical form 1750 feet above the level of a small lake near its base, which is the source of the Avon, and 4050 feet above the level of the sea; its sides clothed with firs, and its top generally covered with snow. It is famous for beautiful rock-crystals, much esteemed by lapidaries.

Cairo, or *Grand Cairo*, a large city, capital of Egypt. It consists of three towns, about a mile apart; Old Cairo, New Cairo, and the port termed Bulac. The population is estimated at 300,000. Old Cairo is now reduced to a small place. New Cairo is a mile from the river, and seven miles in circumference. This city was taken by the French under Buonapart, in 1798, and retaken by the British in 1801. It stands on the right

bank of the Nile, 100 miles S of its mouth. Lon. 31 18 E, lat. 30 3 N.

Caithness-shire, most northerly county of Scotland, 35 miles long and 20 broad; bounded on the N by Pentland frith; E and SE by the German Ocean; and W by Southerlandshire. The S angle is occupied by mountains; and a vast ridge of hills forms the SW boundary ending in a promontory called the Ord of Caithness, which runs out into the sea. The rest of the county may be deemed an immense morass, interspersed with some fruitful spots, producing oats and barley, and others affording pasture for sheep and black cattle. Its other chief products are butter, cheese, yarn, skins, feathers, and kelp. It sends a member to parliament alternately with Buteshire. English is chiefly spoken on the coast, but in the highlands the Gaelic prevails. Population in 1801, 22,600; in 1811 23,419; and in 1821, 30,238. Wick is the capital.

Caket, town of Persia, near mount Caucasus. Its trade consists chiefly in silk. Lon. 46 15 E lat. 33 0 N.

Calcar, town of the duchy of Cleaves, seated near the Rhine eight miles SE of Cleaves. Lon. 5 55 E, lat. 51 40 N.

Calcasieu, river of Louisiana, rises in the pine woods, 20 miles S of Natchitoches. The Calcasieu is very remarkable for its almost perfect compliance with the curve of the Sabine, the two rivers being a trifling deviation from 35 miles asunder, the entire length of the former; and like the Sabine, the Calcasieu receives the largest tributaries from the right. After an entire course of 70 miles, the Calcasieu enters the lake of the same name, at lat. 30 8 N, lon. W C 16 23 W.

This stream rises in a forest of pines, which tree composes nine tenths of all the timber found on its banks. About 10 miles in a direct line above the head of the lake Calcasieu, the forest begins to become chequered with prairie, copses of timber gradually become more scattered, and at the head of the lake, trees entirely disappear. On the left side the open prairies skirt the river 15 or 20 miles higher than on the opposite shore. In the prairie between Calcasieu and Marmontau, are scattered copses of wood mostly pine, with a few oaks; soil poor and thin. Very little of the whole surface watered by Calcasieu is fit for culture, though high, dry, and well watered with limpid and excellent spring water. One immense pine forest covers the country around by Calcasieu north of the prairies. The tide flows up the Calcasieu as far as the head of the prairies.

Calcasieu Lake, of Louisiana, is about 30 miles in length, and 10 or 12 miles wide, communicates with the gulf of Mexico a channel of about 8 or 10 miles in length, and from one mile to 200 yards wide. At the mouth of this outlet is a bar, having not more than four feet water. The lake, like that of Sabine, is shallow, not having more than 506 feet water in any part, and near the shores not more than two or three. The banks of Calcasieu outlet and lake are something higher than those of the Sabine; but on each the entire absence of timber preclude settlement.

Calcutayres, province of Peru, NE from Cuzco.

Calcutta or *Fort William*, the emporium of Bengal, situated on the E side of the Hoogly, or western arm of the Ganges, 100 miles from the sea, in the bay of Bengal. It is a modern city, having risen on the site of the village of Govinpour, about 90 years ago. It extends from the western point of Fort William, along the banks of the river, almost to the village of Cossipoor, four miles and a half; the breadth, in many parts, inconsiderable. In 1756 Calcutta was taken by the soubah of Bengal, who forced the feeble garrison, to the amount of 146 persons, into a prison called the Black Hole, a cube of 18 feet, out of which only 23 came alive. It was retaken the next year; the victory of Plassey followed; and the inhuman soubah was deposed, and put to death by his successor. Immediately after this victory the erection of Fort William commenced, which is superior to any fortress in India. Calcutta is 1030 miles NNE of Madras. Lon. 88 28 E, lat. 22 23 N.

Calliqua port of the West Indies, in the west part of St. Vincents.

California, general name of the western coast of North America, from Cape St. Lucas N lat. 22 52 to N lat. 42, or through nearly 20 degrees of latitude. It is divided into two parts, Old California and New California.

Old California was discovered under the direction, and in part, by the personal observation of Cortez, the conqueror of Mexico, and found to be a long narrow peninsula extending through 11 degrees of latitude, and united to the continent to the NW, by a neck of land reaching from the mouth of the Colorado river, westward 160 miles to a bay since called San Diego. A chain of mountain ranges through this extensive peninsula. "The sky," says Hum-

boldt, "is constantly serene, of a deep blue, and without a cloud." The Cerro Giganta, the highest peak of its mountains reaches to near 5,000 feet. The soil is sandy and arid, and rain scanty and unfrequent. Springs of fresh water are also rare. It extends over 56,000 square miles, with a population of not more than 10,000. Toward the close of the 17th century, the Jesuits formed several settlements here, and endeavoured to govern the natives with the same policy and authority that they exercised in their missions in Paraguay. They seem studiously to have depreciated the climate and soil of the country; but on their expulsion from the Spanish dominions, the court appointed don Joseph Galvez to visit this peninsula. His account of the country was favourable; he found the pearl fishery on its coast to be valuable, and he discovered mines of gold of a promising appearance. On the few spots where water is found, the soil is excellent; and it is reported that vines grow naturally in the mountains, and that the Jesuits, when they resided here, made abundance of wine, in taste approaching to that of Madeira. The chief town is Loreto.

New California, extends from Old California to the utmost limits of the Spanish claims, on the North American coast of the Pacific Ocean, or from the thirty third to the forty second degree of N lat. about 600 miles. The breadth inland is trifling, and the interior unknown, or at least very imperfectly explored. The whole extent actually peopled by civilized inhabitants, does not exceed, if it amounts to 16,000 square miles. The soil is, however, as remarkable for its fertility and abundance of limpid water, as is that of Old California for its arid sterility. The climate of the Pacific coast of North America, being milder than that of the Atlantic; the inhabitants of New California enjoy more temperate seasons than, does those of the United States, from the Carolinas to Connecticut, inclusive. According to Humboldt, this is a very flourishing and valuable colony. The same chain of mountains which ranges through Old California, reach into and intersect also, New California. Monterey is the capital. Population in 1803, 15,562.

California, gulf of North America, extends from the mouth of the Colorado river, between Sonora and Old California, in a south east direction 800 miles. It gradually widens from its head, at the mouth of the Colorado, to its mouth between Cape Palmo in Old California, and Mazatlan in Sonora, where it is about 120 miles wide. It is full of islands and shoals, and is very difficult to navigate. From Old California, no stream of any great consequence enters this gulf; but from Sonora, it receives, beside the Colorado and

Gila, the Ascension, Hiaqui, Mayo, Fuerte, Inaya, Culiacan, Iabala, Rostla; and a brook which forms Mazatlan harbour.

Cambridge, village in Gloucestershire, near Berkley, on the river Cam.

Cambridge, post town in Middlesex county, Massachusetts, and a flourishing university, which consists of four elegant brick houses, and is, with respect to its library, philosophical apparatus, and professorships, the first literary institution in America. It was established by the original settlers of Massachusetts in 1638. Its officers are a president, 20 professors, 2 tutors, 4 proctors, and a regent. The library is the most extensive in the United States; and the necessary philosophical and chemical apparatus very complete. Attached to it also a botanical garden, cabinet of minerals, and an anatomical museum. The buildings are extensive and appropriate. In 1818, the students amounted to nearly 400, and the whole number, according to Mr. Morse, educated in this seminary, from its institution up to 1818, amounted to 4412.

Cambridgeshire, county of England, 50 miles long and 25 broad; bounded on the NW by Lincolnshire, NE by Norfolk, E by Suffolk, S by Essex and Hertfordshire, and W by the counties of Huntingdon, Bedford, and Northampton. It contains 500,000 acres; is divided into 15 hundreds, and 64 parishes; has a city, a university, and eight market towns; and sends six members to parliament. In 1801, the number of inhabitants was 89,346; and 1811, 101,109; and in 1821, 121,909. The principal rivers are the Ouse, Nen, and Cam. The southern and eastern parts are pleasant and healthy; but the northern part, called the isle of Ely, is low and feney, from the confluence of many rivers. All the waters of the middle part of England, which do not flow into the Thames or the Trent, run into these fens; and in the latter part of the year, they are sometimes overflowed by water, or appear covered with fogs. See *Bedford Level*.

Camden, post town, and seat of justice in Kershaw district, South Carolina, on the left side of the Wateree river, 36 miles NE from Columbia; and 110 NE from Augusta. It contains 200 houses, and about 1000 inhabitants; the common buildings necessary for judicial purposes; an Academy, and several places of public worship. The river is navigable from the ocean for boats and other vessels of 70 tons, which renders Camden a place of considerable trade. Two battles were fought here during the revolutionary war; one August 16th, 1780, in which the army of the United States under General Gates, was defeated by the British under Lord Cornwallis; the other April 3rd, 1781, between General Greene, and Lord Rawdon.

Canada, or the province of Quebec. By the royal proclamation of the 7th of October, 1763, this province was bounded on the E by the river St. John, and from thence, by a line drawn from the head of that river through lake St. John, to the S end of lake Nipissing; from whence the line, crossing the river St. Lawrence and lake Champlain in the 45th parallel of N latitude, passes along the high lands which divide the rivers that empty themselves into the river St. Lawrence, from those which fall into the sea; and also along the N coast of the Baye de Chaleurs, and the coast of the Gulf of St. Lawrence to Cape Rosiers; and from thence, crossing the mouth of the river St. Lawrence, by the W end of the island of Anticosti, terminates at the river St. John.

An act of parliament passed in 1774, has removed the northern and western limits of the province of Quebec, adding to its jurisdiction all the lands comprised between the northern bounds of New York, the western line of Pennsylvania, the Ohio, the Mississippi, and the southern boundaries of Hudson's Bay Company.

Canada, *Upper*, commences at a stone boundary on the N bank of the lake St. Francis, at the cove west of Pointe au Boquet, in the limit between the township of Lancaster and the seignior of New Longueuil, running along the said limit in the direction of N 34 degrees W, to the westernmost angle of the seignior of New Longueuil; thence along the north-western boundary of the seignior of Vaudreuil, running N 25 degrees E until it strikes the Ottawa river, and ascends by it into lake Timiskamian; and from the head of that lake by a line drawn due north, until it strikes the boundary line of Hudson's bay, including all the territory to the westward and southward of the said line, to the utmost extent of the country known by the name of Canada.

Upper Canada is divided into Eastern, Midland, Home, and Western Districts, and subdivided into 19 counties, viz. Glengary, Stormont, Dundas, Grenville, Leeds, Frontenac, Ontario, consisting of the islands in the lake of that name, Addington, Lennox, Prince Edward, Hastings, Northumberland, Durham, York, consisting of two Ridings, Lincoln, consisting of four Ridings, Norfolk, Suffolk, Essex, Kent

These counties are divided into townships, ordinarily, of 9 by 12 miles. They send 16 representatives to the provincial parliament, who, with a legislative council, are called together once every year. The representatives are elected for four years, to serve in the assembly, unless the parliament be sooner dissolved by the person administering the government.

The land in the townships adjoining the St. Lawrence is, for the most part, fertile, and under as high a state of cultivation as can be expected from the time it has been settled; the first improvements being made since the peace of 1783, when all was in a state of nature, and heavily timbered.

There are now between 30 and 40 mills in the extent mentioned, on this river, the most remarkable of which are on the Gananoque. Good roads have been opened, and bridges well constructed; some of them over wet lands, and the mouths of creeks and rivers of very considerable extent; and the first settlers have been able, by their very great industry, to erect comfortable houses.

In the rear of the townships, on the St. Lawrence, are upwards of twenty others, in which, settlements have commenced, to the southward of the Ottawa or Grand river, which many of them front; others are well supplied by the waters of the Radeau, and river Petite Nation, with the Gananoque lakes and streams, all of which afford abundance of situations for mills. These rivers, like most others in Canada, abound in carp, sturgeon, perch, and catfish; the ponds affording green and other turtle, with fish of various sorts. The lands in their vicinity are differently timbered, according to their quality and situation. The dry lands, which are generally high, bear oak and hickory; the low grounds produce walnut, ash, poplar, cherry, sycamore, beech, maple, elm, &c. and in some places there are swamps full of cedar and cypress.

The banks of most of the creeks abound in fine pine timber, and the creeks themselves afford in general good seats for saw mills; materials for building are readily procured.

The heads of the rivers Radeau and Petite Nation, communicate by short portages, or carrying places, with the waters which fall into the St. Lawrence, and promise to afford great advantages to all kinds of inland communication. The forks of the Radeau, about which are the townships of Oxford, Marlborough, and Gower, promise to be, at some future period, an emporium for interior commerce.

The birch canoes, which go to the north-west country, pass up the Ottawa river with merchandize, and return with peltries.

All the townships on the north side of

lake Ontario, are well watered by small streams, at the mouths of which are ponds, and low land capable of being drained and converted into meadows.

The number of inhabitants 1806 was 80,000, composed chiefly of emigrants from New England and New Jersey.

Canada, Lower, extends from lat. 45 to 52 N, and from lon. 14 E, to 3 30 W from Washington city; bounded S by the United States; W by Upper Canada; N by the territories of the Hudson Bay Company; and E by the gulf of St. Lawrence; reaching about 500 miles from S to N; and 500 from E to W; with an area of 120,000 square miles. It is divided into four large districts, Montreal, Three Rivers, Quebec, and Gaspe, which were again in 1792, subdivided into 21 counties, Bedford, Buckingham, Cornwallis, Devon, Dorchester, Effingham, Gaspe, Hampshire, Hertford, Huntingdon, Kent, Leinster, Montreal, St. Maurice, Northumberland, Orleans, Quebec, Richlieu, Surry, Warwick, and York. The original grants of land in Lower Canada were made in general under the name of seigniories, upon the principles of feudal tenure, and now compose a third species of civil division, next in order to the counties. The grants made by the British government since its domination in Canada, have been laid out in townships, and founded on free and common soccage.

In a state of nature Lower Canada was covered with an immense forest of very lofty timber, much of which yet remain. The settlements extend along or near the streams, in general where the soil is most fertile, and means of navigation most attainable. In the angle N from lat. 45 N, to the St. Lawrence river, the soil is generally very productive, and settlements advancing rapidly. Eastward of this triangle, to the gulf of St. Lawrence, the country is hilly, broken, barren, and but very thinly settled. From the Mingan settlement, on the N side of the gulf of St. Lawrence, to a short distance above Quebec, the left shore of that great stream is rocky and precipitous. This range of hills leaves the river below the mouth of St. Maurice, and extends towards the Ottawa, which it intersects about 120 miles above its junction with St. Lawrence. A very productive body of land is enclosed between this ridge and the respective rivers. Beyond this latter tract, and the margin of the streams, the country to the northward is but very imperfectly known.

The air of all Canada has been noted for its purity and general serenity. The soil of such a vast extent, necessarily includes every variety; though the general character may be given as productive. Population has constantly, but irregularly advanced since the British conquest. In

1763, it was supposed to contain about 70,000 inhabitants; in 1775, 90,000, and in 1814, 335,000. Of this mass, more than two thirds are descendants of the original French emigrants, who with a considerable part of those from the British islands, render the Roman Catholic religion most prevalent in the colony. This ritual is under the pastoral guidance of one bishop, nine vicars general, and upwards of 200 parochial curates.

The civil government of Lower Canada, is administered by a governor, lieutenant governor, executive council, and legislative council appointed by the king; with a house of representatives elected by the people.

For the defence of the Canadas, a regular military establishment is maintained by the British government, amounting in common to between 20,000 and 30,000 men. This force is stationed at various points, along the great line of the St. Lawrence. The commerce of the Canadas, is confined at present, to one outlet the St. Lawrence. The completion of the Grand Canal of New York, will slowly divest a share of the trade of the Upper Province to New York. The exports of this extensive country, have been augmenting in more than a ratio with the mean increase of population. In 1769, they amounted to 163,105*l.*; and in 1815, to 1,156,000*l.* and the imports, to upwards of 600,000*l.*

Canada, East, a creek of New York, rising in Montgomery and Herkimer counties, flows SSW, about 20 miles into the Mohawk, which it enters at Openheim.

Canada, West, the largest northern branch of the Mohawk, rises in Montgomery county, and flowing first west 20 miles, to the borders of Oneida, turns to the SE, and flowing in that direction 20 miles, falls into the Mohawk, at Herkima.

Canada, Creek, north-western branch of Wood creek, in Oneida county, New York.

Canadaway, creek of New York, in Chautauque county, enters lake Erie about 2½ miles W from Dunkirk.

Canadaway. See *Fredonia*.

Canadae, township in Allegany county, New York. Population in 1820, 696.

Canadian River, the great south-western branch of Arkansaw river, rises by two large branches in the mountains of New Mexico, and flowing by comparative courses about 600 miles each, unite at N lat. 35, and 18 degrees W from Washington City. Below the confluence of the two principal branches, the Canadian Fork continues E 40 miles, where it unites with the Arkansaw, receiving in the intermediate distance another large branch from the SW. For the true position, course, and relative extent of the Canadian Fork, the public stands indebted to Major Long.

Canandaigua, lake of New York, in On-

tario county, 15 miles in length, and 1 mile mean width. It receives a number of creeks, and discharges its waters at the village of Canandaigua, into an outlet which flows NE 20 miles, joins Mud creek at Lyons.

Canandaigua, post town and seat of justice in Ontario county, New York, on a rising plain at the outlet of Canandaigua lake. It is one of the most elegant and thriving villages in the interior of the United States, extending in one street near two miles from the lake. Many of the houses are edifices vying in architectural magnificence with those of the most flourishing commercial sea ports. The style of building and gardening, are so tastefully displayed as to give to Canandaigua a peculiarly interesting aspect to the passing traveller. Lon. WC 00 17 W, lat. 42 54 N; 207 miles W from Albany, and 90 E from Buffalo.

Canandaigua, township in Ontario county, New York, including the village of the same name. Population in 1820, 4,680.

Cananahairy, township of Montgomery county, in the State of New York; situated on the Mohawk river, about 40 miles westward from Schenectady. Population in 1820, 4,677.

Cananore, large seaport on the coast of Malabar. It was ceded by Tippoo Sultan, regent of Mysore, to the English East India Company, in 1792. Lon. 74 10 E, lat. 12 0 N.

Canara, province on the coast of Malabar, subject to the regent of Mysore. Its most northerly port is Onore, in lat. 14 20 N.

Canard, small river of Upper Canada, falls into Detroit river, between Amherstburg and Sandwich.

Canaria, or *The Grand Canary*, principal of the Canary islands, about 180 miles from the coast of Africa, which gives name to the whole. It is a fruitful island, and famous for the wine that bears its name; and the temperature of its air is delightful; and it abounds with good water, with trees, herbs, and delicious fruits. Here are two wheat harvests, in February and May, and the corn makes bread as white as snow. It is 42 miles long, and 27 broad; and lies 18 leagues W by S of Fuertaventura. Lon. 15 34 W, lat. 28 14 N.

Canary Islands, anciently called the Fortunate Islands, on account of their temperate healthy air and excellent fruits, are seven in number, lying in the Atlantic ocean, near the continent of Africa; namely, Palma, Ferro, Gomera, Teneriffe, Canaria, Fuertaventura, and Lancerota; to which may be added several smaller isles, as Graciosa, Roccas,

Aliegranza, St. Clare, Inferno, and Lobos. From these islands the Canary birds originally came. The NE point of these is in lon. 15 38 W, lat. 28 13 N.

Canary, the capital of the island of Canaria, with a bishop's see, an inquisition, supreme council of the Seven Islands, and a castle seated on a hill. They have sugar houses, in which a great quantity of sugar is made. The wine called Sack, has hence been often termed Canary. It is computed that 10,000 hogsheds are sent annually to England in time of peace. Lon. 15 50 W, lat. 28 4 N.

Cancale, bay on the coast of France, 10 miles E of St. Maloes, where the English made a descent, under the duke of Marlborough in 1758, and hence proceeded to burn the ships at St. Maloes.

Candahar, rich trading city of Asia, capital of a kingdom of the same name. While the Persian and Mogul empires were severally undivided, it was the frontier fortress of Hindoostan towards Persia; and was esteemed the key of the western provinces of the latter, and not unfrequently changed masters, although very strong by situation, being surrounded by fens and rocks. It is 145 miles SW of Cabul. Lon. 67 15 E. lat. 33 0 N.

Candahar, kingdom of Asia, between the river Indus and Persia, bounded on the N by Cabul, on the E by Lahere, on the SE by Moultan, and on the W by Persia. The dominions of the king of this country extend westward to the neighbourhood of the city of Tarshish; including generally Cabul, Candahar, Chizni, Gaur, Paishawur, Korasan, and Seistan: this tract is not less than 800 miles in length; its breadth is not well known, and on the E side of the Indus, he possesses the territory of Cashmere, and some districts above the city of Attock. Ashmed Abdalla the founder of this kingdom, was originally the chief of an Afghan tribe, named Abdal, (whence the name Abdalli) who was stript of his country by Nadir Shah, in 1739. On the death of Nadir, he suddenly appeared among his former subjects, and erected a considerable kingdom in the eastern part of Persia, adding to it most of the provinces to the W of the Indus, which had been ceded by the Great Mogul to Nadir Shah, together with Cashmere on the E of that river.

Candia, island in the Mediterranean, formerly Crete, and to the S of the Archipelago. The capital of the same name, though populous formerly, is little better than a desert, there being nothing but rubbish, except at the bazar or market-place; and the harbour of Candia is now fit for nothing but boats; but the

walls of the towns are standing, and it is the see of a Greek archbishop. This island was taken by the Turks, in 1669, after a war of 25 years. It was attempted to be retaken by the Venetians, in 1692, without effect. The products are corn, wine, oil, wool, silk, and excellent honey. The climate of Candia is delightful. The heat is never excessive; and in the plains violent cold is never felt. In the warmest days of summer the air is cooled by breezes from the sea. Except December and January the whole year is one continued fine day. The sky is always unclouded and serene; the winds, mild and refreshing breezes. The mountains are covered with a great number of odoriferous plants. In a word, from the hills, the vales, and the plains, on all hands there arise the most exquisite perfumes, which embalm the air, and render it a luxury to breathe it. Candia is 200 miles in length, and 50 in breadth. It is 500 miles SW of Constantinople. Lon. 25 18 E, lat. 35 18 N.

Canterbury, ancient city, the capital of Kent, with an archbishop's see, the metropolitan of all England. The cathedral, a large structure, was once famous for the shrine of Thomas Becket, to which so great was the resort, and so rich the offerings, that Erasmus, who was an eye witness of its wealth, says, the whole church and chapel in which he was interred, glittered with jewels. But Henry VIII. in 1538, not only pillaged this rich shrine, but

caused the saint to be cited in court, tried, and condemned as a traitor; ordering his name to be struck out of the calendar, his bones to be burnt, and his ashes thrown into the air. In this cathedral are interred Henry IV. and Edward the Black Prince. The city has likewise 14 parish churches; the remains of many Roman antiquities; and an ancient castle, with walls and a deep ditch. It is governed by a mayor, and possesses a share of the silk manufactures introduced by the Walloons, who have here a church under the cathedral. Good Hope, Cape of, the southern extremity of Africa, discovered by the Portuguese navigator, Bartholomew Diaz, in 1493, who gave it the name of *Cabo Tormentoso*, from the boisterous weather which he met with near it ; but Emanuel, king of Portugal, on the return of Diaz, changed its name to that of Cape of Good Hope, from the hope he entertained of finding a passage beyond it to India ; and in this he was not deceived, for Vasco da Gama, having doubled this cape on the 20th November, 1497, proceeded to India, and landed at Calicut, on the 22d of May, 1498. The Cape of Good Hope was first touched at by the Dutch in 1600, and 1650, they established a settlement at this place, of which they held undisturbed possession for near 150 years. Here is a neat town called Cape-town, rising in the midst of a desert, surrounded by black and dreary mountains. See *Cape Town*.

Cape of Good Hope, colony, extends over all the southern regions of Africa ; bounded by the Atlantic Ocean W ; by the great South Sea S ; by Cafferland NE ; and by the deserts of interior Africa N ; length from W to E 600 miles ; mean width 200 ; area, about 120,000 square miles. It is divided into the districts of the Cape, Zwillingdam, Stellenbosch, and Graafreynet. This fine Dutch colony surrendered by capitulation to the British in 1795, but restored in 1802, by the treaty of Amiens. It again surrendered to the British, in 1806 ; and now forms part of their dominions.

Cape-Town, capital of the cape colony, stands on the W side of Table-bay, in lon. 18 23 E. lat. 33 56 S. See *Hottentots, Country of the*. To the SE of the town are some vineyards, which yield the famous wine called Constantia. The store-houses of the Dutch E. India Company are situate next the water, and the private buildings lie beyond them, on a gentle ascent toward the mountains. The castle, or principal fort, which commands the road, is on the E side ; and another strong fort, called Amsterdam Fort, is on the W side. The streets are broad and regular ; and the houses, in general, are built of stone, and white washed. Here are two churches ; one for the Calvinists, the established re-

ligion, the other for the Lutherians. The slaves are lodged and boarded in a spacious house, where they are likewise kept at work : these slaves, a few Hottentots excepted, were all originally brought from the E. Indies, and principally from Malacca. Another great building serves as a hospital for the sailors belonging to the Dutch E. India ships which touch here : it is situate close to the Company's gardens to which the convalescents have free access. The inhabitants, though stout and athletic, have not all that phlegm about them which is the characteristic of the Dutch in general. The ladies are lively, goodnatured, familiar, and gay. The inhabitants, in general, travel in a kind of covered wagons, drawn by oxen, which better suit the roughness of the country than more elegant vehicles ; but some of the principal people keep coaches, which are drawn by horses. The mountains behind Cape-town are the Table Mountain, which is the highest ; the Sugar-loaf, so named from its form ; the Lion's head, Charles Mount, and James Mount, or the Lion's Rump. From these mountains descend several rivulets which flow into the different bays, as Table Bay, False Bay, &c. The view from the Table mountain is very extensive ; and along the valleys and rivulets, among these mountains, are a great number of plantations.

Carham, village in Northumberland, five miles E of Kelso. Near it a battle was fought between the English and Danes, in which 11 bishops and two English counts were slain, beside a great number of soldiers. Here likewise was a battle between the English and Scots, in 1018, in which the latter were victorious. In 1370, sir John Liburne was defeated near this place, and taken prisoner by the Scots.

Cariaco, gulf of South America, in Cumana, extending between the continent and a long narrow peninsula terminated by cape Araya, NW 17 miles from the city of Cumana.

Cariaco, small river falling into the gulf of the same name.

Cariaco, town of Cumana, at the head of the *Cariaco* gulf.

Cariati, town of Naples, in Calabria Citeriore, near the gulf of Taranto, 25 miles N of St. Severino.

Caribbean Sea, that part of the Atlantic Ocean lying between Cuba, St. Domingo, and Porto Rico on the N, and the republic of Columbia.

Caribbe Islands, the most eastern islands of the West Indies, divided into Windward and Leeward islands.

Cariboeuf, island in lake Superior about 100 miles NW from the falls of St. Mary.

Carical, town of Hindoostan, in the Carnatic, where the French had a settlement, which was taken by the British in 1760. It stands at the mouth of a branch of the Cavery, eight miles S of Tranguebar.

Carignan, town of France, in the department of Ardennes. It was formerly called Ivoix, and belonged to Luxemburg; but was ceded to Louis XIV. who changed the name. It is seated on the Chiers, eight miles ESE of Sedan.

Carignan, town of Piedmont, in a district of the same name, with a castle, seated on the river Po, 12 miles S by W of Turin.

Cariman Java, cluster of islands to the north of Java, at the principal of which ships touch for refreshment, in their voyage to Borneo. Lon. 110 12 E. lat. 5 56 S.

Carinacou, chief of the Granadilla islands, in the West Indies, 16 miles NNE of Granada. It produces much cotton, and has a good harbour. Lon. 61 22 W, lat. 12 28 N.

Carinola, town of Naples, in Terra di Lavoro, seated near Mount Massico, 25 miles NW of Naples.

Carinthia, duchy of Germany, in the circle of Austria, E by Stiria, S by Carniola and Friuli, and W by Tyrol and Salzburg. It is mountainous and woody, but yields good pasturage, and abounds in excellent iron and lead. Clagenfurt is the capital.

Carion Crow, creek of Louisiana, forming part of the limit between Opelousas and Attacapas.

Carisbrook Castle, ancient castle, near Newport, in the Isle of Wight, one mile S of Newport, remarkable for its castle and church, which are both very ancient. The church had once a convent of monks annexed, part of which is now a farm-house, still retaining the name of the priory. The castle stands on an eminence, and was the prison of Charles I. in 1647, before he was delivered to the parliament forces. It is now the seat of the governor of the Isle of Wight, and has a strong garrison.

Caristo, or *Castel Rosso*, episcopal town of Greece, at the S extremity of the island of Negropont. Lon. 24 35 E. lat. 38 4 N.

Carlentini. See *Lentini*.

Carlingford, borough and seaport of Ireland, in the county of Lowth, with a castle on a rock. It is noted for excellent oysters, and seated on Carlingford bay, 21 miles N of Drogheda. Lon. 6 0 W. lat. 54 11 N.

Carlinwark, village of Scotland, at the N corner of a lake of its name, seven miles NE of Kirkcudbright, with a considerable manufacture of cotton.

Carlisle, city and the capital of Cumberland, with a market on Wednesday and Saturday. It is governed by a mayor, and contains about 12,000 inhabitants. Carlisle has considerable manufactures of coarse linens, cottons, calicoes, muslins, whips, and fish-hooks. In 1645 it surrendered, through famine, to the parliamentary forces, after a blockade of eight months. It was taken by the rebels in 1745, but retaken by the duke of Cumberland. It is 60 miles S of Edinburgh, and 301 NNW of London. Lon. 2 53 W. lat. 54 46 N.

Carlisle, township in Middlesex county, Massachusetts. Population in 1810, 672, and in 1820, 681.

Carlisle, post village and township in Schoharie county, New York. Population in 1820, 1583.

Carlisle, post town and capital of Cumberland county, Pennsylvania, on the south side of Conedogwinnereck, 118 miles W by S

from Harrisburg, 37 N by W of York, about NW from Lancaster, and 118 from Philadelphia. The county was divided from Lancaster, and Carlisle made the principal seat of justice of Cumberland county, January, 1749-50. The town is pleasantly situated, and the houses are built principally with bricks and limestone, plain and commodious. The streets are laid out in straight lines, and of a convenient width. It is the seat of a seminary of learning, called Dickinson college, founded in 1783, which after languishing many years, has been revived by the exertions of individuals, and by a liberal grant from the legislature of Pennsylvania. See *Dickinson College*.

Carlisle, post town, borough, and township in Cumberland county, Pennsylvania. Population in 1810, 2491, and in 1820, 2908.

Carlisle, post village, of Kentucky Bourbon county.

Carlisle, post village of Nicholas county, Kentucky.

Carlow, or *Catherlough*, county of Ireland, in the province of Leinster, 28 miles in length, and eight in breadth; bounded on the E by Wicklow and Wexford, on the W by Queen's county and Kilkenny, and on the N by Kildare.

Carlow, or *Catherlough*, town of Ireland, in a county of the same name, on the river Barrow, 16 miles NE of Kilkenny. Lon. 7 14 W. lat. 52 48 N.

Carlowitz, town of Slavonia, seated on the Danube, 38 miles NW of Belgrade. Lon. 20 5 E. lat. 44 45 N.

Carlsrona, or *Carlsroon*, seaport of Sweden, in the province of Blekingen. It derives its origin and name from Charles XI. who first laid the foundations of a new town in 1680, and removed the fleet from Stockholm to this place on account of its advantageous situation in the centre of the Swedish seas. The town contains about 11,000 inhabitants; and the suburbs are fortified, toward the land by a stone wall. Formerly vessels in this port, when careened and repaired, were laid upon their sides in the open harbour; until a dock was hollowed in the solid rock, in 1724, capable of receiving a first rate man of war. A project for constructing 30 covered docks, and other improvements, was begun in 1759: but they have proceeded slowly. One dock was finished in 1779, and gives an idea of the expense and greatness of the plan; the bottom and sides are of hewn granite; rows of granite pillars support the roof, and bear rather the appearance of a colonnade to a temple than a receptacle for ships. Carlsrona is 220 miles SW of Stockholm. Lon. 15 26 E. lat. 56 20 N.

Carlstadt, capital of Croatia, on the river Kulp, 140 miles S of Vienna. Lon. 15 21 E. lat. 56 2 N.

Carlstadt, town of Sweden, in Werme-

land, on the island of Tingwalla, which is formed by two branches of the Clara Elbe. It is a bishop's see. The town contains 1500 inhabitants, who carry on a trade in iron and wood across lake Wenner. It is 153 miles W of Stockholm. Lon. 13 43 E. lat. 59 16 N.

Carlstadt, town of Germany, in the bishopric of Wurtzburg, seated on the Maine, 16 miles N of Wurtzburg. Lon. 9 12 E. lat. 49 56 N.

Carmagnola, trading town of Piedmont, with a strong citadel. It was taken by the French in 1691, but retaken by prince Eugene the same year. It is seated on a small river, which runs into the Po, 14 miles S of Turin. Lon. 7 45 E. lat. 44 51 N.

Carmel, a mountain in Palestine, noted for having been the retreat of the prophet Elias, and for a monastery of Carmelites. It is 50 miles N of Jerusalem.

Carmel, post town and township in Penobscot county, Maine. Population in 1820, 153.

Carmel, post town and township in Putnam county, New York. Population in 1820, 2,247.

Carmi, post town and seat of justice in White county, Illinois, on the Little Wabash, 20 miles above its mouth, 42 N from Shawneetown.

Carnarvon. See *Caernarvon*.

Carnarvon, township in the SE part of Berks county, Pennsylvania. Population in 1810, 723, and in 1820, 829.

Carnarvon, township in the NE part of Lancaster county, Pennsylvania. Population in 1810, 1,084, and in 1820, 1,412.

Carnatic, country of the peninsula of Hindoostan, extending from the Guntoor circar, along the whole coast of Coromandel, to Cape Cormorin; including its appendages, which are Tanjore, Maravar, Trichinopoly, Madura, and Tinevelley. It is 570 miles from N to S, but no where more than 120 wide, and commonly no more than 75. The annual revenue of the nabob of Arcot, its sovereign, is stated at about 1,500,000*l*. out of which he pays a subsidy of 160,000*l*. to the English East India company toward the expense of their military establishment. The British possessions in the Carnatic are confined chiefly to the tract called the Jaghire, whose annual revenue is 150,000*l*. There is, besides, a land revenue dependent on Madras, of 725,000*l*. The Carnatic is rich, fertile, and populous; and contains an incredible number of fortresses; public monuments too, the unequivocal marks of civilization and opulence, are more common here than in the northern parts of India. In 1787, the East India company took the whole administration of the Carnatic, and

the collection of the nabob's revenues, into their own hands. Areet is the capital.

Carnesville, county town of Franklin county, Georgia, about 60 miles NW of Columbia.

Carniola, a province of Germany, in the circle of Austria; bounded on the N by Carinthia and Stiria, on the E by Sclavonia and Croatia, on the S by Morlachia and Istria, and on the W by Friuli. It is full of rocks and mountains, some of which are cultivated, others naked and barren, and others continually buried in snow. Laubach is the capital.

Carolina, North, one of the United States of North America; bounded on the N by Virginia; on the E by the Atlantic; on the S by South Carolina and Georgia, and on the W by Tennessee. It is 460 miles long, and 110 broad; divided into eight districts and 62 counties. This country is seated between the extremities of heat and cold; the heat being more troublesome in summer, than the cold in winter. The air is generally serene and clear the greater part of the year, but in February the inhabitants have a custom of burning the woods, which causes such a smoke as would seem to proceed from a thickness in the air. Beside the vegetable products common to America, there are ground peas which run on the surface of the earth, and are covered by hand with a light mould, and the pods grow under ground; they are eaten raw or roasted, and taste much like a hazle nut. Cotton also is universally cultivated here. The most remarkable of their trees is the pitch pine, which affords pitch, tar, turpentine, and various kinds of lumber. Among their medicinal herbs and roots, this country abounds with the ginseng, Virginia and Seneca snake-root, and lion's-heart, a sovereign remedy for the bite of a serpent. The indigo is, however, inferior to what comes from the Caribbee Islands. The inhabitants of this state were estimated, in 1790, at 210,000 whites, and 60,000 negroes. Newbern is the capital.

North Carolina is now (1822) divided into the following counties, which, in 1820, contained the relative population annexed to each respectively.

The population of North Carolina is composed of the following elements—whites, 419,200; free coloured persons, 14,612; and slaves, 205,017. Area of the state, 48,000 square miles. Population to the square mile, 13, in 1820. Lying between lat. 33 50, and 36 30 N.

North Carolina, is naturally divided into three sections; sea sand alluvian; the hilly region above the falls of the rivers; and the mountainous section. Through the sea sand border, the rivers find their way to the sea, over extensive flats and bars, rendering the coast of this state the least favourable to navigation of any of the

maritime states of the United States. Cape Fear river, with 18 feet water over its bar, is the best entrance into the interior of North Carolina. Extensive canal improvements have been projected, and partially executed; but hitherto, the trade of the northern waters of North Carolina has centred in Virginia; whilst that of the interior of the state has generally found its discharge at Charleston in South Carolina. Laudable efforts are making, to open an easy and direct communication with the Ocean, which the advance of wealth and population, will no doubt ultimately effect.

The interests of education, formerly much neglected, is at present fostered in this state. Besides the University of North Carolina, there are upwards of 50 Academies in operation. The government of the state, is essentially similar to the other states of our confederacy, consisting of a senate and house of commons, annually chosen. The governor is rather the creature of the legislature than the people, being chosen by joint ballot of both houses. The staples of this state, are some grain, and flour, tar, pitch, turpentine, lumber, and tobacco. Raleigh is the seat of government.

Carolina South, one of the United States of N. America; bounded on the E by the Atlantic, on the N by North Carolina, and on the S and SW by the river Savannah, which divides it from Georgia; its western boundary has not yet been accurately ascertained. It is 200 miles long, and 125 broad; divided into 29 counties. Beside Indian corn, wheat, &c. for home consumption, large quantities of tobacco, and some indigo and wheat, are raised for exportation. Their rivers are large, and abound with delicate fish; besides water fowl of different kinds.

South Carolina, agreeable to the census of 1810, contains the following districts, with the annexed population.

Of this mass, 231,812 are whites; 251,783 slaves; and 6,714 free people of colour. Area of the state 24,000 square miles. Population to the square mile, 20, in 1820. Lying between lat. 32 0 and 35 8 N.

South Carolina, like North Carolina, is naturally divided into three sections, those of the sea sand alluvion; hilly above the river falls, and mountainous. The former extends from the coast about 100 miles, and is intersected by a number of rivers, winding in sluggish channels towards the sea coast. None of the rivers in this state, are navigable to any considerable distance inland. The Santee, is united to the harbour of Charleston, by a canal 22 miles in length. This artificial channel, opens to Charleston the commerce of the interior of both North and South Carolina. The ridge of hills, give rise to the appropriate distinction of lower and upper country, differing from each other in every essential respect. The lower country, with a soil fit and sandy, covered with pine, is in general sterile, interspersed with marshes, and in summer and autumn, more or less unhealthy. The hilly region, is ushered in advancing from the sea coast by the sand hills, or hillocks, which extend for 20 or 30 miles, and gradually merge into other and more elevated hills, which lead into a finely diversified, fertile, well watered, and healthy country. This latter region, is terminated by the mountains, which are confined to the extreme NW angle of the state. On the lower or sandy tract, the banks of the streams are in many places composed of excellent soil, upon which rice and cotton are extensively cultivated. The middle, or sand hill zone, partakes of the general character of the sea sand alluvion, with the exceptions noted, both have an arid and barren aspect. The soil of the upper country is most produc-

tive; cotton is there also the common staple.

Schools are numerous in South Carolina; and at Columbia, Beaufort, Abbeville, and Williamburgh, colleges have been erected. Collegiate establishments have, however, in most cases languished in the southern sections of the United States. Thirty thousand dollars have been appropriated in South Carolina, by legislature benefaction to support free schools.

The government of South Carolina, is vested in a governor, senate, and house of representatives; the senate quadrennially, and the representatives biennially elected. The governor chosen by joint ballot of both houses.

In proportion to extent of surface, South Carolina is a very productive state. In 1818, its exports placed it in the third rank of agricultural value. The principal staples are, cotton, rice, lumber, pitch, tar, turpentine, maize, and other minor articles. Charleston, is the most extensive seaport of the United States, on the Atlantic border, south of Baltimore. Columbia is the seat of government.

Carondelet, or *Vider Poche*, post village of Missouri, in St. Louis county, six miles below St. Louis and opposite Cahokia.

Carondelet, Canal of, at New Orleans, extends from the bayou St. John, two miles to a basin in the rear of the city. Vessels drawing five feet water enter the basin. By this channel, water communication is open from New Orleans into lake Portchartrain.

Caronitchico, or *Paragua*, river of Columbia in South America, rises at N lat. 4 and flowing nearly north falls into the right side of the Orinoco, at N. lat. 8 30 after a comparative course of upwards of three hundred miles. Its mouth is about 100 miles below Angostura, or St. Tome.

Carora, city of Columbia, in Venezuela, 140 miles W from Valentia; and 70 miles SW from Coro.

Carpathian or *Krapusc Mountains*, mountains which separate Hungary and Tran-

sylvania from Poland, and Transylvania from Wallachia, and Moldavia.

Carpenters-Point, post village, of Orange county, New York.

Carpentras, episcopal town of France, in the late province of Provence, and capital of Venaissin. Before the French revolution, it was subject to the pope. It is seated on the Auson, at the foot of a mountain, 14 miles NE of Avignon. Lon. 5 6 E. lat. 44 8 N.

Carpi, town of Italy, in the Modenese, with a castle, eight miles N of Modena. Lon. 11 16 E. lat. 44 41 N.

Carpi, town of Italy in the Veronese, seated on the Adige, 24 miles SE of Verona. Lon. 11 39 E, lat. 45 10 N.

Caribbean. See *Caribbean Sea*.

Carrick on Sure, town of Ireland, in Tipperary, 14 miles NW of Waterford. Lon. 7 10 W. lat. 52 24 N.

Carrickfergus, populous borough and seaport of Ireland, in Antrim, with a castle. It is seated on a bay in the Irish Channel, of the same name, 85 miles N of Dublin. Lon. 5 46 W, lat. 54 43 N.

Carron, river of Stirlingshire, which rises on the S side of the Chamsey Hills, and flows into the Frith of Forth, below Falkirk. Its stream is small and scarcely deserves the notice of the traveller; yet there are few rivers which have been the scene of so many memorable transactions. When the Roman empire was in its glory, the banks of Carron were its boundaries on the NW, and Antonius' wall, which was raised to mark the limits of that vast empire, ran parallel to this river for several miles. Two miles from its source, it forms a fine cascade, called the Fall of Anchinlilly.

Carron, village in Stirlingshire, Scotland, remarkable for its extensive foundry, belonging to the Carron Company, on the river Carron, one mile from Falkirk, consisting of the greatest iron works in Europe. All sorts of iron goods are made in it, from the most trifling article to a cannon that discharges a ball of 42 pounds. The short piece of ordnance called a carronade, was first made here, and hence received its name. These works were erected in 1761; before which time there was not a single house on the spot. At present the buildings are of vast extent, and the machinery, constructed by Mr. Smeaton, is the first in Britain, both in elegance and correctness; 6500 tons of iron are smelted annually from the mineral with pit-coal, and cast into cannon, cylinders, &c. in one place, where coal is converted into coak, by discharging it of its sulphur, and the fire spreads of course over a large surface, the volumes of smoke, the spiry flames, and the suffocating heat of the glimmering air, are wonderfully affecting; and at night, its glare is inconceivably grand

How vast the fire is we may conceive, when we are told that it often burns 100 tons of coal in a day. The fire of the furnace thus roused becomes a glowing spot, which the eye can no more look at than at the sun. Under such intense heat the rugged stone instantly dissolves in streams of liquid iron.

Carrying river, sometimes called *Portage river*; river of Ohio, flows into the SW part of lake Erie.

Cartago, city and capital of Costa Rica, in Guatimala, on the Cartago river, 60 miles above its mouth into the gulf of Nicoya; and 100 miles from the mouth of St. Juano river. Lon. W C 5 40 W. lat. 9 50 N.

Cartago, small river of Costa Rica, flows into the gulf of Nicoya.

Cartago, city of South America, near the Magdalena river, 200 miles NE by N from Popayan, and 100 W from Santa Fe de Bogota. Lon. 1 0 E. lat. 4 40 N.

Cart, name of two rivers in Renfrewshire, distinguished by the appellations of Black and White.

Cartama, town of Spain in Granada, at the foot of a mountain near the river Guadala Medina, eight miles NW of Malaga. Lon. 4 43 W. lat. 36 40 N.

Cartama, river of Columbia, in New Grenada in the province of Antioquia, flows into the Cauca.

Carter, county of Tennessee, on the sources of the Watanga branch of Holston river; bounded by North Carolina E and SE; by Washington county SW; and by Sullivan NW. Carthagena, seaport of Spain, in Murcia, built by Asdrubal, a Carthaginian general, and named after the city of Carthage. It has the best harbour in Spain, but nothing else very considerable. It was taken by Sir John Leake in 1706, but the duke of Berwick retook it. It is seated on a gulf of the same name, 27 miles S of Murcia. Lon. 0° 8' W, lat. 37° 37' N.

Carthagena, a province of South America, in Columbia, bounded on the W by the isthmus of Darien; on the NW and N by the Carribbean Sea; on the E by Santa Martha; and on the S by Antioquia. Population, whites, 70,000; civilized Indians, 15,000; and about 8,000 black slaves.

Carthagena, capital of the province of Carthagena, in Columbia, one of the most populous, opulent, and beautiful cities in South America. Its harbour is one of the safest and best fortified in the republic of Columbia. This was not the only circumstance to which Carthagena owed its splendour and importance; it was chosen as the port in which the galleons should first begin to trade, on their arrival from Europe, and to which they were directed to turn, in order to prepare for the voyage homeward. The fortifications both of the city and its suburb are built after the modern manner and lined with free stone. The streets are broad, uniform, and well paved. All the houses are built of stone or brick, only one story high, neat, and furnished with balconies of wood, which is more durable in that climate than iron, the latter being soon corroded by the pernicious quality of the atmosphere. It was taken by the English in 1585, and by the French in 1697, who found a great booty; but admiral Vernon, in 1741, though he had taken the castles, was obliged to abandon the siege. Lon. W 0° 50' E, lat. 10° 24' N.

Cartmel, town in Lancashire, with a market on Monday, and a handsome church, built like a cathedral. It is seated among the hills called Cartmel Fell's, not far from the sea, and near the river Kent, 12 miles N by W of Lancaster, and 260 NNW of London. Lon. 3° 6' W, lat. 54° 12' N.

Cashgur, or *Cashgar*, city of Asia, capital of a country of the same name. It stands at the foot of the Himmala mountains, and enjoys a good trade with the neighbouring countries. Lon. 73 25 E, lat. 41 30 N.

Cashmere, province of Hindoostan Proper, subject to the king of Candahar, bounded on the W by the Indus, on the N by the Himalah mountains, on the E and S by Lahore. The valley or country of Cashmere is 80 miles long, and 40 broad; and is celebrated for its romantic beauties, the fertility of the soil, and the temperature of the atmosphere. Particulars may be accounted for, when it is considered, that it is an elevated and extensive valley, surrounded by steep mountains that tower above the regions of snow; and that its soil is composed of the mud deposited by a capital river, which originally formed its waters into a lake that covered the whole valley, until it opened itself a passage through the mountains, and left this fertilized valley an ample field to human industry, and to the accommodation of a happy race. It appears that the periodical rains, which almost deluge the rest of India, are shut out of Cashmere by the height of the mountains, so that only light showers fall there; these however are in abundance enough to feed some hundreds of

cascades, which² are³ precipitated into the valley, from every part of this stupendous and romantic bulwark that encircles it. The soil is the richest that can be conceived, and its productions those of the temperate zone. A vast number of streams, from all quarters of the valley, bring their tribute to the Chelum, the parent of the soil, and a large navigable river. Many lakes are spread over the surface, and some of them contain floating islands. In a word, the whole scenery is beautifully picturesque; and a part of the romantic circle of the mountains makes a part of every landscape. All Cashmere is holy land, and miraculous fountains abound. They are constantly subject to earthquakes; and, to guard against the most terrible effects, all their houses are built of wood. Among other curious manufactures of Cashmere is that of shawls; and the delicate wool of which they are made, is the product of a species of goat of this country, or of the adjoining Thibet. Here are bred a species of sheep, called Hundoo, which are employed in carrying burdens. The Cashmereans have a language of their own, said to be anterior to that of the Sanscrit; and a religion too, it is thought, different from that of the Hindoos.

Cashmere, large city of Hindoostan Proper, capital of the province or valley of Cashmere. It is seated on both sides of the Chelum, 285 miles E by S of Cabul. Lon. 73 11 E, lat. 33 49 N.

Cashna, extensive empire of Africa, part of the region called Negroland; bounded on the N by Fezzan and Zahara, on the S by the Niger, and on the E by Zamphara and Bornou. It resembles Bornou in climate, soil, and natural productions, and in the colour, genius, religion and government of the people. The rains, indeed, are less violent than those of Bornou. A thousand towns and villages are said to be included in this empire, which, like Bornou, consists of different tribes or nations, subject to the dominion of one ruling power.

Cashna, capital of the empire of Cashna; in Africa, 970 miles S by W of Mesurata, in 16 20 N lat.

Casimir, town of Poland, in the palatinate of Lublin. Lon. 22 3 E, lat. 51 0 N.

Caspian Sea, great inland sea of Asia; bounded on the N by the country of the Kalmucks, on the E by a tribe of the Turcomans, on the S by Persia, and on the W by Georgia and Circassia. It is 690 miles in length, reckoning from Gurief to Medshetifar, and in no part more than 260 miles in breadth. It has no

tide; and, on account of its frequent shoals, is navigable only for vessels drawing from 9 to 10 feet water; it has strong currents, and its water is salt. There are certain winds that domineer over it with such absolute sway, that vessels are often deprived of every resource, and in the whole extent of it there is not a port that can truly be called safe. The surface of this lake or sea, has been found by recent admeasurement, upwards of 320 feet depressed below that of the Euxine or Black sea.

Caspian, small lake of Vermont, in Greensborough, Caledonia county, Vermont.

Cassano, town of Italy, in the duchy of Milan, with a castle, memorable for the defeat of Prince Eugene by the duke de Vendome, in attempting to force the passage of the Adda. Cassano is seated on the Adda, 15 miles NE of Milan. Lon. 9 24 E, lat. 45 30 N.

Catahoola, river of Louisiana, rises in the parishes of Natchitoches and Ouachitta, and flowing SE enters the parish of the same name, expands into a lake 300 miles in length by from 3 to 6 miles wide, turns E, contracts again to a river of about 70 yards wide, flows 10 miles and joins the Ouachitta and forms Blackriver, after an entire comparative course of 120 miles. The country drained by the Catahoola is generally sterile pine woods. See *Ocatahoola*.

Catahoola, lake of Louisiana. This lake is one of a species, perhaps peculiar to Louisiana. It is a natural reservoir, filled and emptied by turns. When the Mississippi river is rising, it throws a volume over the intermediate space into the Ouachitta which thus swelled forces the current to repulse into the Catahoola lake, which then becomes filled; but as the Mississippi depresses, the water drains from the lake, and in autumn its bottom becomes one great meadow of succulent herbage, with the river winding its devils way through its wide spread plain.

Catawre, river of North and South Carolina, rises in the latter, and flowing SE by S into the latter, and takes the name of Wateree, joins the Congaree, and together forms the Santee. See *Wateree*.

Champlain, lake of North America, extending from Whitehall in New York, in a north direction, 112 miles, to Ash Island in Canada, with a width from 1 to 16 miles. Its shores are mostly bold and rocky, in some places they are precipitous. From the NW angle it receives the discharge of lake George, from the S Wood creek, Paulet and Hubberton, and from the east, Otter, Onion, La Moelle, and Mississque rivers. From the W; Bouquet, Sable, Saranac and Chazy. Its outlet is the river Sorelle. Considerable commerce is carried on upon this lake, amounting to perhaps 8000 tons of shipping. Lake Champlain is now united to Hudson river by a navigable canal, cut from Whitehall to a point on Hudson river below Glenn's Falls. This lake was discovered and named by M. Champlain, first governor of Canada, in 1611. In 1814, a British fleet and army attacked Plattsburgh, in Clinton county, at the mouth of Saranac. Charleston, City, and seaport in Charleston district, South Carolina, at the junction of Cooper and Ashley rivers. Lon. W C 2 54 W, 79 54 W from London; lat. 32 50 N, 112 miles SSE from Columbia; and 550 SSW from Washington. Ashley river is navigable 20 miles above the city by vessels of considerable

burden; but it being placed on a low spot of ground, and in the vicinity of the Ocean, it is subject to be inundated by high tides, and has often suffered from this cause, as well as by fires and tremendous whirlwinds. The harbour is united to Santee river by a fine navigable canal, 22 miles in length, which opens to its merchants the trade of the interior of South Carolina, and North Carolina. The harbour has two channels of entrance, the deepest of which admit vessels drawing 16 feet water. The entrance of the harbour is defended by a fort on Sullivan's Island, about six miles below the city. This fort repelled the attack of a British fleet under Sir P. Parker; in the revolution war, with a very destructive effect to the assailants.

Charleston is nevertheless a capital of great riches and commerce; the exports of 1803 amounting to \$7,811,108; and in 1815, its tonnage exceeded 36,470 tons.—The banks of the rivers above and below the town are beautified with fine plantations, and walks, interspersed with rows of trees. The streets that lie E and W, run in straight lines, from river to river, and are intersected by others at right angles, though they have one common fault of being too narrow, some of them being not above 35 feet wide. Most, if not all of them are provided with subterranean drains that carry off the water and filth of the city.—The houses lately built are principally of brick, and some of them in a style of comparative grandeur and elegance. The chief public edifices are an exchange, a state house, a bank, an armory, and a public almshouse, with ten or a dozen places of religious worship. Here are two banks, besides a branch of the United States' bank.

The Orphan Asylum is a very respectable foundation, consisting of a large and spacious building, where 150 children are protected, clothed, fed and educated. A Library Society formed some years past, have now a library exceeding 13,000 volumes. This city has kept full pace with the other great seaport towns of the United States. In 1790, the inhabitants amounted to 16,359, in 1800, to 18,711. Its subsequent advance is seen by the annexed table.

Cherson, capital of New Russia, in the government of Catharineslaf. It is a new town erected by Catharine II. on the N bank of the Dneiper, 10 miles below the mouth of the Ingulec. It is intended to be the principal mart of all the commodities of export and import. It has a dock, for the construction of large vessels from which several men of war and merchant ships have been already launched. It is supplied with fuel by reeds only, of which there is an inexhaustible forest in the shallows of the Dneiper, opposite the town. Rails, and even temporary houses, are made of them. They are tall and strong, and afford shelter to various kinds of aquatic birds, some of which are very beautiful. The fortifications are made, and the plantations formed, by malefactors, who amount to some hundreds. In 1787, the empress made a triumphant journey to this capital, and met the emperor Joseph II. Her intention it is said, was to be crowned here queen of Taurica, and empress of the East. But the design, whatever it was, did not take place; and she was content to have inscribed over one of the gates of the city, "Through this gate lies the road to Byzantium." In this place, in 1790, the excellent Mr. Howard, so well known for his plans of reform of the different hospitals and prisons of Europe, tell a victim to his indefatigable humanity. Cherson is 50 miles E of Oczakow. Lon. 33 10 E. lat. 46 5 N.

Chester, county of Pennsylvania; bounded by Maryland SW; Lancaster W; Berks NW Montgomery NE; and Delaware county, and the state of Delaware SE; length about 38; mean width $19\frac{1}{2}$ miles; area 732. This county is extremely diversified in its surface. The western parts towards Lancaster county is hilly, and even mountainous, whilst those sections skirting Maryland and Delaware, though not level, are much less elevated than the W and NW parts of the county. Octararo creek, North-east river, and Elk river rise in the SW part of Chester county, and flow southward into Maryland, fall into the Susquehanna, or Chesapeake bay. The centre of the county is drained by the sources of Brandywine, Chester, Ridley, and some smaller creeks entering Delaware river. The Schuylkill limits the county on the NE. The soil is also greatly varied; changing from rocky to the productive limestone valleys extending from the river Schuylkill SW across the waters of the Brandywine. The staples are numerous, consisting of every article of agricultural production suitable to the climate. Chief town, West Chester.

Chestnut Hill, township in Northampton county, Pennsylvania. Population in 1810, 1138, and in 1820, 1026.

Chesuncook, lake of Maine, crossed by the line between Somerset and Penobscot counties. It receives from the NW, the Upper Penobscot, and several lesser streams.

Chettimaches, lake of Louisiana, between the Atchafalaya and Teche rivers, is about 40 miles in length, with a breadth from

one to six miles. It is shallow, and environed by a low, annually inundated and uninhabitable country. At high water, it communicates in every direction with the Atchafalaya, and at all seasons, at its SE extremity with the Teche river.

Chetican Head, cape on the NW coast of the island of Cape Breton. Lon. W C 16 14 E, lat. 46 40 N.

Cheveaux, Point aux, on the north shore of lake Ontario, and to the eastward of river Ganaraska, Upper Canada.

Cheviot, England, district in Northumberland, to the SW of Wooller, on the borders of Scotland, famous for the free chase, much used here by the English and Scots gentry. The adjacent country being hilly is called the Cheviot Hills, of which one is so high that it is seen 60 miles off, and is the first land discovered by ships coming from the E. This is the Cheviot famous for the fierce encounter between the English and Scots under the earls Percy and Douglas, which is celebrated in the ballad of Chery Chase.

Chevrotiere, river of Lower Canada, flows into St. Lawrence from the North, 40 miles above Quebec.

Chiapa, province of Guatemala; bounded NW and N by Vera Cruz; E by Yucatan; SE by Vera Paz; and SW by Guatemala Proper. It is an inland country, drained by the Sumasinta and Tabasco rivers, flowing into the gulf of Mexico. Central lat. 16 50 N.

Chiapa-e'-Real, town in North America, in the province of its own name, with a bishop's see. Its principal trade consists in cocoa-nuts, cotton, and sugar. Lon. W C 16 10 W, lat. 17 10 N.

Chiavenna, town of Switzerland, capital of a country of the same name, under the sovereignty of the Grisons. It is a trading place, especially in wine and delicate fruits; but its chief support is the transport of merchandise, it being the principal communication between the Milanese and Germany. Chiavenna is seated near the lakes of Chiavenna and Como. Lon. 9 19 E, lat. 46 19 N.

Chiavenna, Laghetto ai, small lake of the country of the Grisons, in Switzerland, near the town of Chiavenna, remarkable for its delightful views, which are wild and magnificent. It is surrounded by barren rocks, craggy, and rising into spires sprinkled with snow. The bases of these dread-

ful precipices are lost in the overshadowed water, dangerous on account of its malignant vapours, and affording no asylum, scarcely a landing place, to the crews of those frail boats, which are caught unwarily in the violent storms to which it is subject.

Chicago, small, but very important river entering lake Michigan at its southern extremity. The country over which it flows, is a low flat prairie. Its mouth is obstructed by a bar, over which, vessels drawing more than 3 feet water cannot enter, though inside adequate depth is found for ships of almost any tonnage. The postage between Chicago and Riviereaux Plains, a branch of Illinois, is only about 9 miles. At high water, vessels of considerable size already pass, and a canal is contemplated to unite lake Michigan with Illinois.

Chicama, small river of Peru, falls into the Pacific Ocean, 20 miles NW from Truxillo. Lat. 7 45 S.

Chicasawus, nation of Indians, settled on the head branches of the Tombeche, Mobile, and Yazoo rivers, in the NW of Georgia, and NE of Alabama.

There is depth of water at the mouth of the Chifunete sufficient to admit vessels drawing six or seven feet water, as far as the mouth of the Bogue Falaya.

Chignecto, bay of Nova Scotia, the NW arm of the bay of Fundy.

Chigwell, village in Essex, 10 miles NE of London. It is noted for a free-school, founded by archbishop Harsnett, who had been vicar of this place, and lies buried in the church.

Chihuahua, city of the internal provinces of Spain in North America; situated near the river Conchos, a branch of Rio-grandde Norte, in the province of New

Biscay. It is the capital of the Internal Provinces, and environed by some very rich mines. Population 12,000. Lat. 23 50 N, lon. W C 27 20 W.

Chili, large country of South America, on the coast of the Pacific Ocean, discovered by Diego d'Almagro in 1525, extending from the desert of Attacamas. S lat. 24 30, to Chiloe S lat. 44. The mountainous part of it is possessed by the Puelches, Araucos, and other tribes of its original inhabitants, who are still formidable neighbours to the Spaniards. That part of Chili, therefore, which may be properly deemed Spanish, is a narrow district, extending along the coast, from the desert of Atacamas to the island of Chiloe, above 900 miles. Though bordering on the torrid zone, it never feels the extremity of heat, being screened on the E by the Andes, and refreshed from the W by cooling sea-breezes. The fertility of the soil corresponds with the benignity of the climate, and is wonderfully accommodated to European productions. The most valuable of these, corn, wine, and oil, abound in Chili, as if they had been native in the country. Here all the fruits imported from Europe attain to full maturity; and the animals not only multiply, but improve. The horned cattle are of larger size than those of Spain; and its horses excel in beauty and spirit the famous Andalusian race, from which they sprung. Nature, too, has enriched Chili with valuable mines of gold, silver, copper, and lead. The population of Chili, has been for the last two centuries increasing, and at present, besides the independent tribes of natives, exceeds, it is probable 1,500,000. Since February, 1818, this fine country has been virtually one of the civilized nations of the earth, and was by the government of the United States so recognised, in the Congress of 1821—22.

Chilka, lake in the Deccan of Hindoostan, which bounds the five Circars on the N. It lies on the coast of the bay of Bengal, and seems the effect of the breach of the sea over a flat sandy surface, whose elevation was something above the level of the country within. It communicates with the sea by a very narrow but deep opening.

Chillau, province of Chili, bounded on the E by the Andes; on the N by Maule; W by Itata, and S by Arauco.

Chillau, capital of the province of the same name, on the Chillau river. Lon. W C 6 E, lat. 35 30 N.

Chillicothe, post town and seat of justice in Ross county, Ohio, on the bank of the river Scioto, 45 miles S from Columbus, and 73 E by N from Cincinnati. Lon. W C 5 53 W, lat. 39 20 N. The site of the town is a plain, or river level,

but the adjacent country rises into bold hills of from 200 to 300 feet, affording a fine diversity of surface. It was laid out in 1796, and in 1810 the township contained 1369, and in 1820, 2426 inhabitants. There are in this town two printing offices, three banks, and about thirty mercantile stores. Manufacturing establishments are numerous and flourishing, consisting of cotton spinning factories, oil, fulling, flour, and saw mills.

Chillicothe, land district, is composed of the 9 westernmost of the 22 ranges of townships of the United States army lands. The refugee tracts, and the seven westernmost of the 22 ranges of townships of the United States lands south of the refugee tract. It includes parts of Delaware, Knox, Licking, Franklin, Fairfield, Pickaway, Ross, Athens, Hecking, Lachfor, Lawrence, Pike, Sciota, and Gallia counties but not the whole of either.

Chilmark, township in Dukes county, Massachusetts, in the island of Martha's vineyard. Population in 1810, 723; and in 1820, 695.

Chiloe, group of islands of South America, in Southern Chili. They extend nearly parallel to the coast in a gulf of the same name. The principal island, from which the archipelago is named, is about 105 miles long, and from 10 to 30 wide, lying between lat. 41 50, and 43 10 S.

Chilpanzinco, city of New Spain, intendency of Mexico; situated on the southern slope of Anahuac, 3542 feet above the level of the ocean; surrounded by beautiful fields of wheat and orchards, on the road from Mexico to Acapulco. Lat. 17 40 N, lon. WC 22 20 W.

Chilquesy Mosques, small province of Peru, SW from Cusco, on the sources of the Grand Para central latitude, 14 S.

Chiltern, chain of chalky hills, running from E to W through Buckinghamshire, and forming the S part of the county. They are covered in various parts with woods; and some of the eminences are of considerable height, and afford rich prospects. The air on these heights is extremely healthful; the soil, though stony, produces good crops of wheat and barley.

This district belongs to the crown, which, for time immemorial, has had an officer under it, with the title of Steward of the Chiltern Hundreds.

Chimborazo, mountain of South America, in the chain of the Andes Lat. 1 20 S, about 100 SW from Quito. This immense cone can be seen far into the Pacific Ocean, and presents to the eye of the mariner a most magnificent object. It rises according to Humboldt, to 21,440 feet. That illustrious traveller ascended its slope as high as 19,300 feet, the highest point on the globe ever ascended to by man. It is covered for several thousand feet by perpetual snow, and generally surrounded by fogs.

China, extensive country in Asia, between 98 and 123 E lon. and 21 and 42 N, lat. It is 1330 miles from N to S, and 1030 from E to W; bounded on the E by the Yellow and the China sea, S by the latter sea and the kingdoms of Tonquin, Laos, and Birmah, W by Tibet, and N by Tartary, from which it is separated by a great wall. This stupendous wall exceeds every thing of human art and industry that is read of in history; and is said to have been built about the year 1160, to prevent the frequent incursions of the Monguls. It extends along a hilly surface 1500 miles in length; the breadth, in many parts, is upwards of 15 feet at the top; and it is flanked with towers at the distance of 300 feet: the materials of which the whole is composed are so close and solid, that it is yet almost entire. China is divided into 15 provinces, which are Pe-tche-li, Kiang-nan, Kiang-si, Fo-kien, Tche-kiang, Hou-quang, Ho-nan, Chan-tong, Chan-si, Chen-si, Setchuen, Quang-tong, Quang-si, Yun-nan, and Koci-tcheou. These provinces contain 4402 walled cities, divided into classes, the civil and the military; the civil class containing 2045, and the military 2357. The civil class is again divided into three other classes; the first are called *fu*, the second *tcheou*, and the third *shien*. According to the statement of the population of China, delivered to lord Macartney, in 1793, by a Chinese mandarin, the number of inhabitants was not less than 333,000,000; but from the calculations in Neuhoft's travels the population is about 230,000,000. The climate and soil are various, as the different provinces are nearer to, or remote from the S; severe cold being felt at Peking, while the southern provinces are exposed to excessive heat. Here are several large lakes; the principal of them are the Po-yang, in Kiang-si, 250 miles in circumference; the Tong-ting, in Hou-quang, above 200 miles in circumference; the Tai, part of which extends into Kiang-nan; the Hong-tse, and the Kao-yeou, in the province of Kiang-nan. The chief

rivers are the Kian-ku and the Hoan-ho; beside which there is an infinitude of great and small rivers, and fine canals, one of which, called the *Grand Canal*, surpasses any thing of the kind in the world. By this canal, and some rivers, there is a communication by water between Peking and Canton, the two extremes of the empire, except the interruption of a day's journey, by a mountain in the province of Kiang-si. This inland navigation, upwards of 1400 miles, is effected from Peking by passing down the Peiho to the influx of the Eu-ho, then up that river to the entrance of the grand canal, and along that canal to the Kianku; then up that river into the Poyang lake, and thence up the river that runs through Kiang-si; then over the mountain before-mentioned, and down the river of Canton. The manufactures of China embrace almost every article of industry; but the most noted are porcelain, silk, cotton, and paper. The internal commerce of the country is immense, but the external trade is unimportant; the chief export is that of tea, which is sent to England. In several of the provinces, the land yields two crops a year; yet, though the husbandman cultivates it with such care as not to lose the smallest portion of ground, the country has been often desolated by famine. One great cause of the scarcity of grain is the prodigious consumption occasioned by the composition of wines, and of a spirituous liquor called rack. The numerous mountains of China (which are chiefly in the N and W parts) contain mines of iron, tutenag, copper, quicksilver, gold, and silver: but those of gold and silver are little worked, that the people may attend to the more useful labours of agriculture. Quarries of marble, coal, lapis lazuli, jasper, rock crystals, granite, and a kind of sonorous stones of which musical instruments are composed, are abundant; and here is potter's earth of such various and superior kinds, that the fine porcelain of China is unrivalled. Beside the fruits peculiar to the country, it produces the greater part of those of Europe; but (excepting the grapes and pomegranates) they are much inferior. Oranges were first brought us from China. Here are also lemons, citrons, the tse-tse, a kind of fig peculiar to China; the li-tchi, of the size of a date, its stone covered with a soft juicy pulp, of an exquisite taste, but dangerous when eaten to excess; the long-yen, or dragonseye, its pulp white, tart, and juicy, not so agreeable to the taste, but more wholesome than the li-tchi. The Chinese excel in the art of managing kitchen gardens, and have a number of vegetables unknown to us. They cultivate even the bottom of their waters; the beds of their lakes, ponds, and rivulets, producing crops unknown to us, particularly of the pitsi, or

water chestnut, the fruit of which (found in a cover formed by its root) is exceedingly wholesome, and of a very delicate taste. Among the trees peculiar to China is the tallow-tree, the fruit of which is white, of the size of a small walnut, and the pulp has the properties of tallow; the wax-tree, producing a kind of white wax almost equal to that made by bees; the tsichu, or varnish tree, which produces the admirable Chinese varnish; the tie-ly-mou, or iron wood, the wood of which is so hard and heavy that it sinks in water, and the anchors of the Chinese ships are made of it; the camphire-tree; the bamboo reeds, which grow to the height and size of a large tree, and beside being used as natural pipes to convey water, are employed for numberless other purposes; the tea-plant, &c. with cotton, betel, and tobacco: the flowering shrubs, flowers, herbs, and medicinal plants, are too numerous to be recited. In the mountains and forests are wild animals of every species; but that valuable quadruped, the muskdeer, is peculiar to this country. Of its birds, the most beautiful in China, and, perhaps in the world, is the kinhi, or golden fowl. The complexion of the Chinese is a sort of tawny, and they have large foreheads, small eyes, short noses, large ears, long beards, and black hair; and those are thought to be the most handsome who are the most bulky. The women affect a great deal of modesty, and are remarkable for their little feet. The men endeavour to make a pompous appearance when they go abroad; and yet their houses are mean and low, consisting only of a ground floor. Their towns are so much alike, that those who know one are acquainted with all. Learning, with the arts and sciences in general, is much cultivated in this country. Their writing is very particular; for every letter is a word, and consequently they have as many letters, or characters, as words in their language. Their religion is paganism. They allow polygamy, and keep their wives pretty close. Burials are not permitted in cities or towns, and their sepulchres are commonly on barren hills and mountains. They pretend to have a great veneration for their ancestors; and some keep images of them in their houses, to which they pay a sort of adoration. They have laws which regulate the civilities and ceremonious salutations they pay to each other, for which reason they always appear to be extremely good-natured; and yet they are as deceitful as any people in the world. The government is absolute, and the emperor has the privilege of naming his successor; but the chief mandarin has permission to tell him of his faults. He looks upon his subjects as his children, and professes to govern them with paternal af-

fection. Their empire is very ancient, and they pretend that it existed many thousand years before Noah's flood: it is generally allowed to have commenced 2500 years before the birth of Christ. The Chinese empire now includes Tibet, the greatest part of Tartary, Corea, and numerous islands on the S and E coasts of China, the principal of which are Lieu-kieu, Formosa, and Hainan. The annual Revenues of the crown, according to Sir George Staunton, are said to be 66 000,000*l.* sterling; and the army in the pay of China, including Tartars, amount to 1,000,000 infantry and 800,000 cavalry. Peking is the capital.

China, township in Kennebec county, Maine. Population in 1820, 894.

Chinca, seaport of Peru, seated on a river, in a valley of its own name, 90 miles S of Lima. Lon. W C 0 45 E, lat. 13 10 S.

Chine, La, village of Lower Canada, 6 miles from Montreal upon the same island. It is the upper part of that city; here all boats arrive from, and depart, which are employed in the commerce of the St. Lawrence or Ottawas rivers. A canal is now cutting from La Chine to Montreal, in order to obviate the dangers of the intervening rapids of St. Louis.

Chinon, ancient town of France, in the department of Indre and Loire, and late province of Touraine, with a castle, in which Henry II. king of England expired. Chinon is the birth place of Rabelais and of Quillet. It is seated on the Vienne, 10 miles N of Richelieu, and 150 SW of Paris. Lon. 0 22 E, lat. 47 12 N.

Chinsura, town of Hindoostan Proper, in Bengal. It is a settlement of the Dutch, and is seated on the river Hoogly, nearly midway between Chandernagore, and the old town of Hoogly. It contains several good houses, and a church, with a little mole projecting into the river. It was taken by the English in 1795.

Chiny, town of the Netherlands, capital of a country of the same name, in Austrian Luxemburg, 57 miles W of Luxemburg. Lon. 5 37 E, lat. 49 45 N.

Chios, *Scio*, or *Kio*, by the Turks called *Saki Saduci*, an island lying near the coast of Ionia, in Asia Minor, about 100 miles W of Smyrna. It is mountainous and rocky, and about 160 miles in circuit. The number of its inhabitants is almost incredible, having, besides others, upwards of a million of Greeks, who have 300 churches here, besides chapels and monasteries. It abounds with excellent wines; and from thence the ancients had their nectar.

Chios, capital of the above island. It stands on the E coast, is as well built as

most of the towns in the Levant, the Genoese having been long in the possession of it. The natives pretend that Homer was born here, and show a place they call his school, at the foot of mount Epos, about four miles from the city. Lon. 27 5 E, lat. 38 6 N.

Chiurlic, ancient town of Romania, with the see of a Greek bishop. It is seated on a river of the same name, 47 miles W of Constantinople. Lon. 27 57 E, lat. 41 8 N.

Chiozzo, anciently *Fossa Claudia*, a town and island of Italy, in the territory of Venice, with a bishop's see, and a harbour defended by a fort. It is 18 miles S of Venice. Lon. 12 9 E, lat. 45 17 N.

Chippenharn, borough in Wilts, with a market on Saturday. It sends two members to parliament; and is seated on the Avon, over which is a stone bridge of 16 arches, 21 miles E of Bristol, and 94 W of London. Lon. 2 8 W, lat. 51 27 N.

Chippewan, mountains of North America. This great chain is the principal spine of that continent, and by various names, extends from the Isthmus of Darien to the Frozen Ocean, through 60 degrees of latitude, or 4,150 miles. In Mexico, it is known as by the general term Anahuac. Farther north, the Spaniards designate it as the mountains of New Mexico. In the United States, it is known as the Rocky mountains. In Cabotia or British America, by its true native name Chippewan, or Chippewyan. In Mexico and Guatemala, it rises into Volcanic summits, elevated far above the region of perpetual snow. Popocatepetl, Citlaltepetl, or Peak d'Orizaba, Pico Frailes, and Corede Perote, all rise above 13,500 feet. In the United States, the elevation of this chain remains undetermined, but must be considerable, from the length and rapidity of the streams flowing from its opposite sides.

Chippeway, small river or creek, Lincoln county, Upper Canada, falls into Niagara river, at the village of Chippeway.

Chippeway, village of Lincoln county, Upper Canada, on Niagara river, at the mouth of Chippeway creek. Here a sanguinary battle was fought between the British and the United States armies, July 5th, 1814.

Chunar, fort of Hindoostan Proper, in the province of Allahabad. It is seated on the Ganges, 20 miles above the Benares, and is built on a rock, which is fortified all round by a wall, and towers at various distances. At the end, overlooking the river, is situated the citadel, which has formerly been strong. This fort is said to be of the highest antiquity, and originally built by the Hindoos. In the citadel is an altar, consisting of a plain black marble slab, on which the tutelary deity of the

place is traditionally supposed to be seated at all times, except from sunrise till nine in the morning, when he is at Benares; during which time, from the superstitution of the Hindoos, attacks may be made with a prospect of success. Chunar has always been considered as a post of great consequence on the Ganges, from its insulated situation, projecting forward to a great extent, and being of considerable height. It was unsuccessfully attempted by the English in 1764; the next year it was surrendered to them; they restored it to the Nabob of Gude at the subsequent peace; but in 1772 it was finally ceded to the English by that prince, in exchange for Allahabad. At this place is kept the magazine of ammunition and artillery for the brigade of Cawnpore. It is 385 miles NW of Calcutta. Lon. 85 50 E. lat. 25 10 N.

Chunaub, or *Jenaub*, river of Hindoostan Proper, one of the five eastern branches of the Indus. It runs through Cashmere and Lahore, between the Chelum and the Rauvee. Its general course is from NE to SW, and after leaving Jummo, is through a flat country, gradually approaching to the Chelum. It is united with both these rivers at some distance above Moultan. Its junction with the Chelum, about 50 miles above Moultan, is effected with great violence and noise, and no less danger to navigators. The Chunaub is the Acesines of Alexander.

Chun-te-fou, city of China, in the province of Petcheli, with nine populous cities of the third rank under its jurisdiction.

Cincinnati, is a large commercial city, and seat of justice for Hamilton county, Ohio. It is situated on the north bank of Ohio river, opposite Newport in Kentucky, and about 20 miles from the mouth of the Great Miami river, at the SW corner of the state. The town was laid off in January, 1789, adjacent to fort Washington; which has been erected during the autumn previous. It was settled by emigrants from New Jersey, and the New England states; but did not extensively improve, until after Gen. Wayne had defeated the hostile Indians in August, 1794. Since that period, however, it, together with the adjacent country, has rapidly progressed in population, wealth and internal improvements.

Among the public buildings are two pre-bbyterian, two methodist, one episcopalian, and one friends' meeting houses; beside an elegant and costly court house and jail, and two extensive market houses; one of which, called the lower market, is built with triple rows of pillars 300 feet long. The markets are held in them four days in

a week, two days at each, alternately. Here are also several manufacturing establishments for cotton and woollen goods; for paper, and for silver, brass, copper and iron wares, and machinery of various descriptions. Here are also four printing offices, three of which print weekly newspapers; likewise four book stores, a type foundry, and a manufactory for making cards for carding machines. One of the machines in this establishment is a great specimen of human ingenuity. By the simple process merely, of a boy turning a small crank, the wire is drawn from a reel, cut off at a suitable length, bent into card teeth, the leather perforated, and the teeth set therein, all by the one process above mentioned.

In January, 1819, a Medical College was established here, by the Ohio legislature; and during the same month, the Cincinnati college was also chartered; both of which are now progressing, with a prospect of becoming useful institutions for the western country. The faculties of both colleges are, in some measure, united, and both occupy, conjointly, the public edifices designed for their accommodation.

Cincinnati was formerly, the seat of the old territorial government, until 1800; and in January, 1819, was incorporated as a city. Distance, south by west from Dayton 52 miles, 110 SW from Columbus, 93 W by S from Chillicothe, and 82 N by E from Frankfort in Kentucky. Lat. 39 6 N. lon. 7 25 W.

The following account of the local situation of Cincinnati; and enumeration, and description of the various public edifices, and improvements, are taken from Doctor Daniel Drake's valuable "Picture of Cincinnati and the Miami country," published in 1815.

"Its site is the eastern part of a tract of alluvial or bottom land, bounded on the N by a chain of ridges, on the W by Mill-creek, on the S by the river, and on the E by Deer creek, a brook which originates in the neighbouring uplands. The area of this plain is about four square miles. It is unequally elevated, and the upper and lower tables have received from the inhabitants, the names of Hill and Bottom. The latter (gradually widening) stretches westwardly, from the mouth of Deer creek where it is but 200 feet broad, to the interval lands of Mill creek. Its medium breadth is about 800 feet. The northwest portions of this slope are the lowest. They have been overflowed a few times since the settlement of the town, and in March 1793, the whole of this plain was inundated. The Hill rises about 50 feet above the Bottom. The ascent, which is at first steep, soon becomes gradual, and continues for the distance of nearly 1000 feet, when

the surface declines gently to the base of the adjoining highlands.—The medium breadth of this table is about one mile. Its western portions are uneven, and towards Mill creek descend to the level of the Bottom. On the opposite side of the river, the valley has nearly the same expansion. The ranges of hills bordering these extensive plains, intersect each other in such directions as to compose an imperfect square, through the northeast and southwest angles of which the Ohio enters and passes out. Being variously divided by streams and rivulets, lying at different distances from the town, and having a dense covering of tall trees, these ridges afford a pleasant termination to the view.

"Philadelphia seems to have been the model after which that portion of this town first laid out, was planned. Between Broadway and Western Row there are six streets, each 66 feet wide, running from the river N. 168 W, and lying 396 feet asunder. These are intersected at right angles by others of the same width, and at the same distance from each other; except Water and Front street, and Second and Third street, the former of which are nearer, and the latter, on account of the brow of the Hill, more distant. Not a single alley, court, or diagonal street, and but one common was laid out. The blocks or squares were each divided into eight lots, 99 by 198 feet, except those lying between Second and Third street, which made ten lots each; and those between Front and Water street. The out-lots, 31 in number, contain four acres each, and lie chiefly in the north of the town. This plan was not deposited in the public archives for record until the 29th of April, 1802. The streets in that part of the town laid out by John C. Symmes, are but 60 feet wide. Those intersecting the river run north 44 degrees west, and lie at the same distance from each other as the streets in the original town; but the cross streets are nearer, and hence the lots of this quarter are shorter. The plan of this survey was not recorded by the proprietor till the 12th of September, 1811. The reservation of the General Government was conveyed so as to connect the plots just described. The different subdivisions will be best understood by a reference to the engraved plan.

"The new Presbyterian church is a very spacious brick edifice, measuring 68 by 85 feet. Its eastern and narrower front looks towards Main street, and is cornered with square turrets crowned with cupolas. From the rear is an octagonal projection, for a vestry. The roof is of a common form. The height from the ground to the eaves is only 47 feet, to the top of the cupola 80, which is less than either side including the towers, and hence the aspect of the building

ing is low and heavy.—The stair cases are in the basements of the turrets, and are entered without passing into the house. The inside is divided into one hundred and twelve pews, and five capacious aisles.

"The Episcopalian church, in Sixth street, is a handsome and commodious brick edifice, 49 by 55 feet, well furnished with doors and windows, ornamented with a balustrade, and finished inside with taste.

"The Cincinnati college on Walnut street, in the rear of the Presbyterian church, is an extensive two story brick edifice, consisting of two oblong wings, extending from Walnut street 88 feet deep. Near the front, they are connected by an apartment, for stair cases, 18 by 30 feet, out of which arises a dome capped peristyle, designed for an observatory. The front of this intermediate apartment is to be decorated with a colonnade, forming a handsome portico, 12 feet deep, and 30 feet long. The front and each side are ornamented with a pediment and Corinthian cornice. The aspect of the building is light and airy.

"The buildings of the Cincinnati Manufacturing Company, on the bank above Deer creek, are numerous and extensive; the main edifice is 150 feet long, from 20 to 37 feet wide, and from two to four stories high.

"The most capacious, elevated and permanent building in this place, is the Steam Mill, erected in the years, 1812, '13 and '14, on the river beach, upon a bed of horizontal limestone rocks, and in high floods is for its whole length exposed to the current. The foundation is 62 by 87 feet, and about 10 feet thick. Its height is 110 feet, and the number of stories nine, including two above the caves. To the height of 40 feet, the wall is *battered*, or drawn in; above, it is perpendicular. The cornice is of brick, and the roof of wood, in the common style. It has 24 doors and 90 windows. The limestone with which it was built were quarried at various places in the bed of the river, and measure in the wall 6,620 perches. Besides this, it swallowed up 90,000 bricks, 14,800 bushels of lime, and 81,200 cubic feet of timber. Its weight is estimated at 15,655 tons. Through the building there is a wall dividing each story into two unequal apartments the one designed for manufacturing flour; the other for receiving wool and cotton machinery, a flax seed oil mill, fulling mill, and several other machines.

Cincinnati, land district in Ohio, and Indiana, extends W from the Virginia military tract and of Symmes' purchase. It includes all Miami, Dark, Prebble and Montgomery; and part of Champaign, Warren, Butler and Hamilton counties, with a considerable extent in Indiana.

Cincinnati, township in Courtland county, New York. Population including the city of the same name, in 1820, 885.

Ciney, town of the Netherlands, in the archbishopric of Liege, eight miles E of Dinant. Lon. 4 57 E, lat. 50 18 N.

Cinque Ports, certain ports on the coast of Kent and Sussex, so called by way of eminence, on account of their superior importance, as having been thought by our kings to merit a particular regard for their preservation against invasion. They were five in number, when their first charter was granted by William I. in 1077. These were Dover, Hastings, Hythe, Romney, and Sandwich; to which were afterward added, Winchelsea, Seaford, and Rye. That king appointed a constable of Dover Castle (who is now called Lord Warden of the Cinque Ports) and invested him with the command of these parts, whose inhabitants had considerable privileges.

Cynthiana, post town of Kentucky, in Harrison county, on a branch of Licking river, 13 miles N from Paris.

Cintra, cape of Portugal, in Estramadura, called the Rock of Lisbon, on the N side of the entrance of the Tajo. On it is a town of the same name, 14 miles W of Lisbon. Lon. 9 30 W, lat. 38 46 N.

Ciotat, seaport of France, in the department of the Mouths of the Rhone and late province of Provence, defended by a strong fort. It is famous for Muscadine wine, and is seated on the bay of Laquee, between Marseilles and Toulon. Lon. 5 46 E, lat. 43 12 N.

Circars, Northern, five provinces on the W coast of the bay of Bengal. They were originally denominated Northern, from

their position in respect to Madras, on which they depend. Of the five Northern circars, Cicacole, Rajamundry, Ellore, and Condapilly are in the possession of the English, and Guntoor is in the hands of the Nizam. The first four extend from the N bank of the Kistna to Chilka Lake; forming a narrow slip of country 350 miles long, and from 26 to 75 broad, bounded by mountains and extensive forests on the side opposite the sea. The English circars had been ceded to the French, by the Nizam of the Deccan, in 1753; but they were conquered by colonel Clive in 1759, and produce an annual revenue of 360,000*l*. See *Guntoor*.

Circassia, large country of Asia, situated between 45 and 50 degrees of N latitude, and between 40 and 50 of E longitude. It is bounded by Russia on the N; by Astracan and the Caspian sea on the E; by Georgia and Dagistan on the S; and by the river Don, the Palus Meotis, and the Black Sea on the W. This country has long been celebrated for the extraordinary beauty of its women; and here it was that the practice of inoculating for the small pox first began. Terki, the principal city, is seated in a very spacious plain, very swampy, towards the sea side, in 43 deg. 23 min. N latitude; it is about three wersts in compass, well fortified with ramparts and bastions in the modern style, well stored with cannon, and has always a considerable garrison in it, under the command of a governor.

Cirencester, considerable borough in Gloucestershire, with a market on Monday and Friday. It is seated on the river Churn, and was a place of great account in the time of the Romans. The ruins of the walls and streets are to be seen in the adjacent meadows where many Roman coins, checkered pavements, and inscriptions of marble, have been found. It had also a castle and an abbey. Many Roman antiquities have been discovered; and here the Roman roads crossed each other. It is one of the greatest marts in England for wool, sends two members to parliament, and is 18 miles SE of Gloucester, and 89 W of London. Lon. 1 58 W, lat. 51 43 N.

Circleville, post town and seat of justice in Pickaway county, Ohio, on the E side of the Sciota river, at W lon. W C 5 5, lat. 39 36 N, 26 miles below Columbia. It derives its name from some ancient works in a rude circular form, on the site of which it is situated. The adjacent country is amongst the most fertile of the Ohio valley.

Cirenza, town of Naples, capital of Basilicata, with a bishop's see. It is seated on the river Brandano, at the foot of the Appennines, 97 miles E of Naples. Lon. 16 10 E, lat. 40 44 N.

Cologne, ancient city of Germany, capital of the electorate of Cologne, with a bishop's see, and a famous university, seated on the river Rhine, 17 miles E of Juliers. Lon. 7 10 E. lat. 50 55 N.

Colombia, republic of South America, composed of the former vice royalty of New Granada and the captain generalship of Venezuela, or Caracas. It is bounded by the Pacific Ocean from the mouth of Tumbez river, South America, lat. 3 45 S, to Dulcebay, in North America, lon. W C 5 10 W, lat. 8 30 N; thence crossing the Isthmus between Dulce and Cartago bays, including the provinces of Panama, and Veragua, on the gulf of Nicaragua: thence along the Carribean sea, and Atlantic Ocean, to Cape Nassau, between Spanish and Dutch Guyana, lon. W C 13 22 E. lat. 8 N; thence S to Issequibo river, and up that stream to its source in the mountains, separating Colombia from the Portuguese

territories: thence W along those mountains, to the source of the Orinoco, where the boundary inclines to SW, and continues in that direction to the Rio Negro at Fort de Saint Jose. Here commences an artificial limit which, in a direction something W of S, continues to St. Fernando at the mouth of the Rio Ica on the Amazon; thence up the latter, the Tunguragua, and Lauricocha, to the foot of the Andes at lon. W C 1 30 W. lat. 6 20 S; thence crossing the Andes, and turning to NW by N between Jaen, and Puna, to the place of beginning at Tumbes.

This vast empire includes besides innumerable small streams, the entire waters of the Orinoco, and Magdalena, together with the northwestern confluent of the Amazon. In respect to climate, it embraces from Point Gallinas, 10 20 N. to the banks of the Lauricocha, at the southern extension of Jaen, lat. 6 S. It includes, independent of minor indentings, on the Pacific Ocean 1700 miles of sea coast; 1700 miles on the Caribbean sea; and 300 miles

on the Atlantic Ocean; giving an aggregate navigable ocean border of 3700 miles. The interior land frontier exceeds 2400 miles, the whole yielding an outline of 6100 miles. Within this wide perimeter, are enclosed all the varieties of soil from the frozen summits of Chimborazo, Cayambe Urcu, and Cotopaxi, to the almost illimitable plains of Cassinare, and the alluvial Delta of the Orinoco. The ocean limits present a front to the commerce of Asia, one to the United States and Mexico, and one to Europe and Africa. In the interior the highly navigable confluent of the Amazon, and Orinoco renders these extensive regions accessible at almost every point by water. It is obvious that in this greatly diversified expanse, every vegetable production of the earth can be matured with ease, and in abundance. The whole surface amounts to within a small fraction of 1,100,000 square miles. The following table is taken from an official statement in the Columbian Gazette, published at Bogota, and republished in the Aurora.

The former seven provinces known under the general name of Quito, has not been distributed into departments or senatorial districts; nor had the two North American provinces of Panama and Veragua. It is, however, supposed that the ensuing congress will comprise those nine provinces into three departments, which from the senatorial ratio of four senators to each department will raise that body to 50 members. From the apportionment of representation already adopted, the nine provinces will have five members, augmenting the lower house to ninety five.

Colraine, township in Franklin county, Massachusetts. Population in 1820, 1961.

Colouri, ancient Salamis, small island of Greece, six miles W from Athens.

Columbia, Oregon, or *River of the West*. This is amongst the most singular streams

in America. W of the Chippewan mountains, a valley extends nearly parallel to the coast of the Pacific Ocean, along which another nameless chain extends to an unknown distance. The intervening valley is about 350 miles wide, and very hilly and broken where known. In this valley about N lat. 54 rises the extreme northern source of Columbia, which flowing S upwards of 400 miles, receives Clarks river from the NE. Below the mouth of Clarks river the Columbia assumes a SW course 200 miles, receives at N lat. 46 10 Lewis's river from the NE. Below the mouth of Lewis's river, the Columbia continues to flow S as low as N lat. 46, where it turns abruptly, and assumes from that point to its mouth a general course nearly W. The Multnomah or great southern branch of Columbia joins that stream 288 miles by water, below the mouth of Lewis's river. Thus, the Columbia is formed by four large branches, the Columbia proper, Clark's river, Lewis's river and Multnomah.

Of these branches, the first and last are very imperfectly known. The Columbia proper enterlocks, in the Chippewan mountains with the sources of the Unjiga, and Sashashawin rivers. When seen by McKenzie, it was a stream of considerable size, but from that point to the mouth of Clark's river, the intermediate tributaries of Columbia are unknown.

Clark's river rises by a great number of branches in the Chippewan range, enterlocks with the sources of Missouri, and S branch of Sashashawin rivers. The extreme southern source of Clark's river, is about N lat. 45, and W lon W C 34 30; it thence flows NW by N 500 miles beyond N lat. 49, gradually curves W and SW, finally joins the Columbia after an entire comparative course of upwards of 500 miles.

Lewis's river rises at N lat. 43, enterlocks with the sources of the Arkansas, Plate, and Yellowstone river, it thence flows W two hundred miles and assumes a northern course of 200 miles, receives its northern branch, a large tributary stream of above 200 miles in length. Below the mouth of the northern branch, Lewis's river curves gradually to the W 200 miles, unites with the Columbia, after an entire course of 600 miles.

The Multnomah, draws its waters from a *terra incognita*. The Spanish travellers from Mexico, ascending the Colorado, to its source, found to the N of that river two streams flowing westward, to one of which they gave the name of Rio de Buenaventura, and to the other, and most northerly, that of Rio de San Clementini. From analogy with the other rivers, and the general configuration of that part of N. America the San Clementini, is supposed to be the ex-

trene SE source of the Multnomah. If so, that river rises at N. lat. 41, and W. lon. W C 34, and has an entire comparative course of 700 miles. Its mouth according to Clark and Lewis is 500 yards in width with all the common appearances of a very considerable length of course.

The great valley or basin of Columbia, is considerably elevated above the surface of the Pacific Ocean. Clark's, Lewis's and Columbia proper, are precipitated over a series of ledges, which enrich the scenery, but interrupt the navigation of those streams. Though not actually determined there is little doubt but that the Multnomah is also precipitated from a table land, the level of the tides. It is probable that the tide flows higher in the Multnomah, than in the main stream, in which it is arrested about 50 miles above the mouth of Multnomah.

The Columbia is one of the largest rivers of America, compared to its length, which if estimated by the Columbia proper, would be upwards of 1000 miles, by Clark's river 1000 miles, by Lewis's river 900 miles, or Multnomah 800 miles. But if the length of the Columbia and Multnomah above their junction be added the entire length of the whole stream, from source to source would be 1700 miles.

Below tide water the Columbia rolls on to its mouth with an immense volume of four or five miles wide about 150 miles.

The Columbia basin is upwards of 900 miles from S to N, and 400 miles mean width, or covering an area of 360,000 square miles. Of this expanse the U. S. possess by discovery and treaties from N lat. 42 to 49, or 485 miles N and S, where the basin is at least 450 miles, mean width: of course the U. S. claim near 220,000 square miles, watered by the Columbia, and its confluent.

Between Columbia and Colorado rivers, stretches a region of more than 700 miles by 500 miles, or above 350,000 square miles, which is utterly unexplored. This is a wide field for future enterprise.

From the concurrent testimony of all travellers and voyagers, who have visited the west coast of N. America. The climate is much more mild than in similar latitudes, in the Mississippi Basin or Atlantic slope. This increased warmth on the western coast of America is in perfect analogy with the phenomena of climate on the opposing continent. As far, therefore, as the seasons are concerned, our Columbian territory will be more habitable than will be the corresponding latitudes east of the Chippewan mountains. As in Europe and Asia, the zones of vegetable life will be found to cut those of latitude obliquely in N. America.

Columbia, District of, seat of the United States general government. It is composed of a tract of 10 miles square, lying nearly in a NE, SW, and NW, and SE direction, on both sides of the Potomac. It was formed out of part of Prince Georges and Montgomery counties in Maryland, and part of Fairfax county, Virginia; and was ceded by Maryland and Virginia respectively to the United States in 1790, and in 1800, became the seat of the United States general government. It now contains, besides the city of Washington, properly so called, Alexandria and Georgetown. See these places under their respective heads. It is under the immediate government of Congress, and for local purposes, subdivided into, Washington City, county of Washington, Alexandria, and Georgetown. The surface of the District of Columbia, is generally but very pleasantly diversified by hill and dale. The soil in its natural state, rather sterile. The climate is esteemed very healthy. The following tables will exhibit the progressive advance, and state of the population in 1820.

From its position, Columbia is necessarily the centre of a very extensive and increasing commerce. The first falls in the Potomac at Georgetown, has been passed by a navigable canal; and other canals have been formed at various places on the Potomac and Shenandoah rivers, which have opened to Columbia, the rich interior of Virginia, Maryland and Pennsylvania. The quantity of flour and other domestic produce, brought down the Potomac annually, is very considerable. The principal shipping interest of this district, centers at Alexandria, but extensive business is also done at Georgetown. The amount of exports in 1817, amounted to near 1,800,000 dollars, and the shipping to about 21,750 tons. At the junction of the East branch with the Potomac, the United States have a Navy yard, to which vessels of the largest tonnage can ascend.

A college has been organised in Washington City; as have also a medical society, a botanical society, and the Columbian institute.

Columbia, post town of Fluviana county, Virginia, on the right bank of Rivanna river, 45 miles above Richmond, and 35 from Charlottesville.

Columbia, post town, Richland district, South Carolina. It is also the capital of the state on the left bank of the Congaree, immediately below the confluence of Broad and Saluda rivers. It is regularly laid out, upon ground considerably elevated above the neighbouring streams. Boats of large draught ascend thus high, and a steam boat has recently been built, intended to ply between Columbia and Charleston. Besides the ordinary buildings, suitable to legislative and judicial proceedings, and for religious purposes, a college, under the title of the "South Carolina College," was established in this town in 1801, under the direct patronage of the state. It has now a president, 4 professors, 2 tutors, and above 100 students, with an excellent li-

brary, exceeding 5,000 volumes. It is indeed one of the most flourishing institutions in the United States; south west from the Potomac.

Columbia, county of Georgia; bounded by Savannah river or North Carolina NE; Richmond SE; Warren SW, and Wilkes and Lincoln NW; surface rather waving than hilly; some very productive soil, with much of a middling quality. Staples, grain, and cotton. Chief town, Aplington.

Connaught, province of Ireland, 130 miles long, and 84 broad; bounded on the E by Leinster and Munster, on the S by the latter province, on the W and N by the Atlantic, and on the NW by Ulster.

Connecticut River; this noble stream rises on the border of Lower Canada, and flowing nearly south, separates New Hampshire from Vermont, and thence crosses Massachusetts and Connecticut, enters Long Island Sound.

Connecticut, is amongst the most curious of the Atlantic rivers. Its extreme northern sources are in a hilly, though not mountainous country, at N lat. 45 10, interlocking with the sources of the St. Francis, branch of the St. Lawrence, and with those of the Kennebec; and thence assuming a course of a little west of south, down a valley between two ranges of mountains, as far as N lat. 42 43. Thence crossing Massachusetts and Connecticut, in a direction nearly due south to Middletown in the latter, where it turns to north-east, and finally enters the sound at 41 16 N lat. Its entire basin is about 280 miles in length, with a mean width of 45, draining an area of 12,600 square miles.

Though the basin of Connecticut is almost entirely on a primitive rock, and though passing one small ridge of mountains near Middletown, it is nevertheless navigable for vessels drawing 10 feet water to that place; above the mountain pass 36 miles, following the windings of the stream; and by vessels drawing 7½ feet to Hartford, 15 miles still higher. The latter place is at the head of ship navigation, but though considerably obstructed by falls, rapids, and shoals, the navigation of this river has been so much improved, by dams, locks, and

short canals, as to admit boats of considerable tonnage to ascend to, and descend from the fifteen mile falls above Haverhill, upwards of 250 miles, following the stream from Long Island Sound. This is very considerably the deepest inland navigation in the United States, east from the Hudson.

Connecticut, state of the United States, has the following limits :

On Long Sound	-	-	96 miles
New York	-	-	81
Massachusetts	-	-	85
Rhode Island	-	-	50

Area 4,750 square miles ; 3,040,000 acres ; extending from N lat. 41, to N lat. 42, and lon. W C from 4 18, to 5 12 E.

The coast of this state is finely diversified by harbours, of which New Haven, New London, Bridgeport and Norwich, are the principal ; the Connecticut opens a navigation to sea vessels to Hartford, and the Thames to Norwich. The state is also traversed in every direction by good roads. The face of the country is most delightfully varied by mountains, hills, and dales, which added to the well calculated aspect of the farms, and the neatness of the buildings, gives to the physiognomy of Connecticut, a most seductive appearance.

The manufacturing industry of this state, has been carried to a greater comparative extent than any other state of the United States. Its manufactured and agricultural staples, embrace a great variety of articles, such as tin ware, nails, glass, hats, fire arms, &c. horses, mules, butter, cheese, Indian corn, beef, pork, &c.

Connecticut being settled in the first instance by an enlightened people, the interests of education has been ever interwoven in her colonial and state policy. Yale College in New Haven, is at the head of her literary institutions. This respectable seminary has produced some of the most finished scholars in the United States. Several other literary establishments exist in the state, the principal of which are a theological episcopal seminary in New Haven ; Bacon Academy in Colchester ; an Episcopal Academy in Cheshire, and the Deaf and Dumb Asylum at Hartford.

In 1790, Connecticut contained 237,946 ; and in 1800, 251,002 inhabitants. Its subsequent advance in population, can be seen by the following tables.

Constance, city of Suabia, with a bishop's see; seated on the Rhine, between the upper and lower lakes of Constance. It is 35 miles NE of Zurich. The inhabitants scarcely amount to 3000. Lon. 9 10 E, lat. 47 38 N.

Constance, Lake one of the most considerable lakes of Switzerland, which it separates from Suabia, that part excepted, where the city of Constance is seated on its S side. Like all the lakes in Switzerland, this is deeper in summer than in winter; which is owing to the first melting of the snow from the adjacent mountains.

Constantia, district at the Cape of Good Hope, consisting of two farms, which produce the well known wine so much prized in Europe, and known by the name of Cape or Constantia wine.

Constantia, township in Oswego county, New York. Population in 1820, 767.

Constantina, strong and considerable town of Africa, in the kingdom of Algiers, and capital of a territory of the same name. It is the largest and strongest in all the eastern parts, and seated at the top of a great rock. There is no way to it but by steps cut out of the rock; and the usual way of punishing criminals here is to throw them down the cliff. Here are many Roman antiquities, particularly a triumphal arch. It is 75 miles from the sea, and 210 E by S of Algiers. Lon. 7 0 E, lat. 36 4 N.

Constantina, town of Spain, in Andalusia, with a castle seated on a mountain, 40 miles NE of Seville. Lon. 5 35 W, lat. 37 40 N.

Constantinople, one of the largest cities in Europe, and the capital of the Turkish empire. It is of a triangular form; and

seated between the Black sea and the Archipelago, on a neck of land that advances toward Natolia, from which it is separated by a strait a mile in breadth. The sea of Marmora washes its walls on the S, and a gulf of the strait of Constantinople does the same on the NE. It was anciently called Byzantium, but the name was changed by Constantine the great, who made it the seat of the Roman empire in the east. It was taken, in 1453, by the Turks, who have kept possession of it ever since. The grand signior's palace, called the Seraglio, is on the seaside, surrounded by walls flanked with towers, and separated from the city by canals. It stands on the site of ancient Byzantium, the E point of the present city, and is three miles in circumference, consisting of an assemblage of palaces and apartments placed by the side of one another, without symmetry and without order. The principal entrance of this palace is of marble, and is called Capi, that is, the Port (or gate) a name used frequently to express the court, or the empire. The castle of Seven Towers is a state prison, and stands near the sea of Marmora, at the W point of the city from the seraglio; and at the NW point, without the walls, is the imperial palace of Aijub, with a village of the same name. The number of houses in Constantinople is prodigious; but, in general, they are mean and all of them constructed of wood, and the roofs covered with hollow tiles. The public edifices alone are built in masonry in a very solid manner. The streets are narrow, badly paved, and dirty; and the people are infested with the plague almost every year. The inhabitants, who are said to amount to 520,000, are half Turks, two thirds of the other half Greeks or Armenians, and the rest Jews. Here are a great number of ancient monuments still remaining; particularly the superb temple of St. Sophia, built in the sixth century, which is converted into a mosque, and will contain 100,000 persons conveniently. Between the two mosques of sultan Solymon and Bajazet is the old seraglio, in which are shut up all the wives of the decessed sultans, and also such women as have displeased the grand signior. The bazars, or bezestens, are large square buildings, covered with domes, supported by arcades, and contain all sorts of goods, which are there exposed to sale. The market for slaves of both sexes, is not far off; and the Jews are the principal merchants who bring them here to be sold. There are a great number of young girls brought from Hungary, Greece, Candia, Mingrelia, and Georgia, for the service of the Turks, who generally buy them for their seragios. The great square near the mosque of sultan Bajazet, is the place

for public diversions, where the jugglers and mountebanks play a great variety of tricks. The circumference of this city is by some said to be 15 miles, and by Mr. Tournefort 25 miles: to which if we add the suburbs, it may be 34 miles in compass. The suburb called Pera is charmingly situated; and is the place where the ambassadors of England, France, Venice and Holland reside. This city is built in the form of a triangle; and as the ground rises gradually, there is a view of the whole town from the sea. The public buildings, such as the palaces, the mosques, bagnios, and caravansaries for the entertainment of strangers, are many of them very magnificent. Lon. 29 20 E. lat. 41 4 N.

Constantinople, Strait of, anciently the Thracian Bosphorus, and forming the communication between the Euxine or Black Sea, and the Propontis, or sea of Marmora. It is 20 miles long, and three fourths of a mile broad, where narrowest. The Turks have built two castles opposite to each other, to defend the passage. It forms the separation here between Europe and Asia. On one side of it is situated Constantinople, and on the other Scutari, where the grand seignior has his seraglio.

Constantinow, town of Poland, in Volhynia, on the river Seluczka, 62 miles NE of Kamienieck. Lon. 27 20 E. lat. 49 58 N.

Contessa, seaport of Turkey in Europe, on a gulf of the same name, ancient Strymonicus Sinus, in the Archipelago, 200 miles W of Constantinople. Lon. 23 53 E. lat. 41 8 N.

Conti, town of France, in the department of Somme and late province of Picardy. It formerly gave the title of prince to a branch of the royal family of France. It is seated on the Selle, 14 miles SW of Amiens, and 62 N of Paris. Lon. 2 13 E. lat. 49 42 N.

Contacook, river of New Hampshire, rises in Cheshire county, and flowing NE over Hillsborough, falls into the Merrimac at Concord.

Conway, township and post town, Franklin county, Massachusetts. Population in 1820, 1705.

Conway, borough, post office, Horry district, South Carolina.

Conyatt, township in Crawford county, Pennsylvania. Population in 1810, 285 and in 1820, 265. See *Coneaught*.

Conyngham, village and post town, Luzerne county, situated in Nescoscock Valley, upon the turnpike, leading from Berwick towards Bethlehem. It is 12 miles from the Susquehanna at Berwick, and 18 miles from the Lehigh at Lansanne. It is built upon one street, at the foot of the Buck Mountain.

Conza, town of Naples, in Principato Ulteriore, with an archbishop's see. It was so greatly ruined by an earthquake in 1694, that the place where the cathedral stood is hardly known. It is 52 miles E of Naples. Lon. 15 35 E. lat. 40 50 N.

Cook's River, large river of N. America, which flows into the N. Pacific Ocean. It was discovered in 1778, by Captain Cook, who left a blank for its name which was filled up by the earl of Sandwich. This river was traced as high as lat. 61 30 N, which is above 70 leagues from its mouth, in lon. 152 0 W.

Cooke's-Law office, post office, Elbert county, Georgia.

Cooke's Strait, strait dividing the two islands of which New Zealand is composed: it is about four or five leagues broad.

Coolspring, township in Mercer county, Pennsylvania. Population in 1810, 521, and in 1820, 596.

Cooper, river of South Carolina, which rises in the district of Georgetown, and falls into Charlestown harbour, on the E side of the city. The Santee canal which unites Charleston harbour with Santee river, is extended from the head of Cooper river. See *Santee*.

Cooper's Town, post town, and seat of justice, Otsego county, New York, on Otsego lake, west side of its outlet into Susquehanna river.

Cooper, county of Missouri, between Osage and Missouri rivers. Boundaries and extent uncertain. Surface of the country diversified, with considerable prairie. The alluvial soil of the rivers of first rate quality. Chief town, Booneville.

Coosa River, the NW and main branch of Alabama, rises in the north-west part of Georgia, flowing first SW about 100 miles, enters Alabama, and gradually turns to a south course nearly, in which direction it

continues 200 miles to its junction with the Tallapoosa, or head of Alabama river. It is boatable generally to Weetunka falls, 7 miles above its mouth, and at high water, to the junction of Etowlah and Oostenalah rivers in Georgia.

Coosawatchy, river of South Carolina, falls into Port Royal Sound.

Coosawatchy, post town and seat of justice, in Beaufort county, South Carolina; lying on the Coosahatchie river, about 75 miles westward from Charleston.

Cootstown, post town, Berks county, Pennsylvania; situated on Maiden creek, a branch of the river Schuylkill, and about 17 miles NE of Reading.

Copenhagen, capital of the kingdom of Denmark; situated on the eastern shore of the island of Zealand, upon a fine bay of the Baltic sea, not far from the strait called the Sound. Lon. 13 0 E, lat. 55 30 N. Copenhagen is the best built city of the north; for although Petersburg excels it in superb edifices, yet as it contains no wooden houses, it does not display that striking contrast of meanness and magnificence, but in general exhibits a more equable and uniform appearance. This city is five miles in circumference, and seated on the E shore of the isle of Zealand, 300 miles SW of Stockholm, and 500 NE of London. See *Amak*.

Copely, township in Medina county, Ohio. Population in 1820, 169.

Corby, town of Germany, on the confines of Westphalia, with a famous abbey, whose abbot is a sovereign prince. It is seated on the Weser, 30 miles E by N of Paderborn. Lon. 9 30 E, lat. 51 50 N.

Cordova, episcopal town of Spain, in Andalusia, remarkable for its antiquity, and for having preserved its splendour and riches through so many ages, it being well known to the Romans by the name of Corduba. In 1759, Abdoulrahman only heir of the Omniad line fixed his royal residence at Cordova. Then began those flourishing ages of Arabian gallantry and magnificence, which rendered the Moors of Spain superior to all their cotemporaries in arts and arms, and made Cordova one of the most splendid cities of the world. When Europe was buried in ignorance and debased by brutality of manners, it became the centre of politeness, industry and genius. Great and expensive monuments of architecture were undertaken and completed by many of these Spanish monarchs; whose remains nobody can behold without being strongly impressed with a high idea of the genius of the artists, as well as the grandeur of the prince who carried them into execution. It is seated on the Guadalquivir, over which is a magnificent stone bridge. The circumference is large, but it is not peopled in proportion to its extent, for there are many orchards and gardens within the walls. The palaces, churches, and religious houses are superb, particularly the cathedral, which is very magnificent. It was a mosque when the Moors possessed the town: for which reason it still retains the name of Mezquita. The square, called the Plaza Major, is surrounded by fine houses under which are piazzas. The trade consists in wine, silk

and Cordovan leather; and in the neighbourhood are a vast number of orange and lemon trees. The best horses in Spain come hence. Cordova is 75 miles NE of Seville, and 137 S by W of Madrid. Lon. 4 4 W, lat. 32 10 S.

Cordova, town of S. America, in Tucuman, with a bishop's see, 180 miles E by N of St. Jago. Lon. W C 13 E, lat. 31 29 S. It is situated in an extensive level country.

Cordova, extensive province of the United Provinces of La Plata, of which the preceding place of the same name is the capital. Its limits are uncertain; its population estimated at about 75,000. Chief trade, mules and horses.

Cordova, flourishing town of Mexico, in Vera Cruz, containing about 4,000 inhabitants, 60 miles W from Vera Cruz, and 140 ESE from Mexico. Lon. W C 20 W, lat. 18 50 N.

Corduan, famous lighthouse of France, at the mouth of the Gironde, 55 miles NW of Bordeaux. Lon. 1 9 W, lat. 45 36 N.

Corea, peninsula of Asia, extending between China and Japan. It is bounded on the N by Manshuria, on the E by the sea and isles of Japan, on the S by the Ocean, and on the W by the gulf and province of Leaotong. This kingdom is commonly reckoned 200 leagues from N to S, and 100 from E to W.

Corentin, small river of Guania, falls into the Atlantic Ocean, west from Berbice.

Core Sound, on the coast of North Carolina, extends from Beaufort inlet to Pamlico Sound, 20 miles in length.

Corfe-Castle, borough in Dorsetshire, with a market on Thursday. It is seated in a peninsula, called the Isle of Purbeck, on a river, between two hills, on one of which stands the castle, formerly a place of great importance. It is 21 miles E of Dorchester, and 120 W by S of London. Lon. 2 4 W, lat. 50 36 N.

Corfu, island of the Mediterranean, near Albania, subject to the British government, and forms the principal part of the republic of the 7 islands, or Ionian republic. It is defended by an impregnable castle. Lon. 20 0 E, lat. 39 40 N.

Corfu, ancient Corcyra, capital of the island of Corfu. It is a very strong, but ill built town, with about 15,000 inhabitants. Lon. 20 E, lat. 39 40 N.

Coria, episcopal town of Spain, in Leon; seated on the Alagon, 120 miles SW of Madrid. Lon. 5 30 W, lat. 40 0 N.

Corinth, now called *Corantha*, or *Gorame*, a celebrated city, in the Morea, with a Greek archbishop's see. It was one of the most important places in Greece, on account of its situation on the isthmus into the Morea; its castle on the top of an almost inaccessible rock; its harbours on the

gulphs of Lepanto and Engia; its riches, and its architects, sculptors and painters, who were the most skilful in Greece. It is now greatly decayed; for the houses are not contiguous, but intermixed with fields and gardens, which make it look like a village. The country about it abounds with corn, wine and oil, and from the castle is a fine prospect over the sea to the E and W, and a fertile country N and S. The inhabitants are chiefly Christians of the Greek church. It is forty miles NW from Athens. Lon. 23 3 E, lat. 38 14 N.

Corinth, Isthmus of, in the Morea, a neck of land which joins the Morea to Livadia, and reaches from the gulf of Lepanto to that of Engia. The narrowest part of it is six miles over; and on a mount there, called Oneius, were formerly celebrated the Isthmian games. Julius Cæsar, Caligula, and Nero, in vain attempted to cut a channel through the isthmus; they therefore built a wall across it, called Hexamilium, because it was six miles in length. This was demolished by Amurath II. rebuilt by the Venetians, and levelled a second time by Mahomet II.

Corinth, township and post town, Penobscot county, Maine. Population in 1820, 296.

Corinth, post town, Orange county, Vermont. Population 1900.

Corinth, township of Orange county, Vermont; situated between Washington and Moreton townships, about 12 miles W of Mount Sawer. It contains 1500 inhabitants.

Corinth, post town, Saratoga county, New York. Population in 1820, 1490.

Coria, town of Spain, in Leon, 23 miles E of Salamanca. Lon. 5 49 W, lat. 41 5 N.

Cork, county of Ireland, in the province of Munster, 80 miles in length, and 50 in breadth; bounded on the W by Kerry and the Atlantic, on the N by Limerick, on the E by Waterford, and on the S and SE by St. George's Channel. It contains 232 parishes, and before the Irish Union sent 26 members to parliament. It is fertile and populous, and has two remarkable rivers, the Blackwater and Lee.

Cork, capital of the county of Cork, with a bishop's see. It is a neat, wealthy and populous place, on the river Lee, where it has a commodious harbour. It is the first town of Ireland for trade except Dublin. It was taken by the earl of Marlborough in 1690. It is 14 miles from St. George's Channel, and 124 SW of Dublin. Lon. 8 23 W, lat. 51 54 N.

Corlat, town of Asia Minor, near the gulf of Is Nickmid, near the ruins of Chalcedon.

Corlin, town of Prussian Pomerania, seated on the river Persant, eight miles

SE of Colberg. Lon. 15 47 E, lat. 54 16 N.

Cornwall, county which forms the SW extremity of England; bounded on the E by Devonshire, on the S by the English Channel, and on the NW by St. George's Channel. This country is 80 miles long, 40 broad, and 250 in circumference, containing 960 000 acres. Population in 1801, 188,269, in 1811, 216,687, and in 1821, 257,447. Its chief rivers are the Tamar, Tale, Cober, Loo, Camel, Fowe, Haile, Lemara, Kense and Aire. Its principal capes or head lands are the Land's End, the Lizard, Cape Cornwall, Dead-man's Head, Rame Head, &c. and a cluster of islands, 145 in number, called the Scilly isles, supposed formerly to have belonged to the mainland, though now 30 miles distant; abounding with antiquities particularly druidical. As Cornwall is surrounded by the sea on all sides except the E, the summers are less hot, and the winters less cold, than in other parts of England, and the spring and harvest are observed to be more backward. High and sudden winds are also more common in this than in other counties of England. The soil, as it is

shallow, is not very fruitful, especially in the centre or the hilly parts; the valleys are very pleasant and fertile, yielding great plenty both of corn and pasture. The Phenicians early visited these coasts, some think 400 or 450 years before Christ. It derives its chief importance from its minerals. The mines of tin are numerous, and are in general, very rich in ore; they have rendered this country famous in all ages. There has been sometimes found a small quantity of gold and silver, but not worthy of notice. With the metalline ores are intermixed large quantities of mundic and arsenic. Many sorts of stones are also found here, particularly moorstone which is used both in buildings and for millstones; when polished, it appears more beautiful than any of the marble kind, and makes the richest furniture, as tables, chimney pieces, &c. but being exceedingly hard, the polishing is expensive. The copper mines are also numerous, and rich in ore. In many cavernous parts of the rocks are found transparent crystals, called Cornish diamonds, they being very brilliant when well polished. This country was one of the places to which the ancient Britons retreated, whose language was retained even to this century, but it is now quite extinct. The king's eldest son is born duke of Cornwall, and derives a revenue, not only from lands appertaining to the duchy, but from the mines of tin and copper; he has under him an officer, called lord warden of the Stannary Courts, whose jurisdiction extends over the mines and miners of Cornwall and Devonshire; and he appoints in his privy council, the sheriff of the former county. Launceston is the capital.

On the S it is separated from Sardinia, by the strait of Bonifacio; to the E it has the Tuscan Sea; to the N the gulf of Genoa; and to the W it is opposite the coasts of France and Spain. It is 150 miles from N. to S. and from 40 to 50 in

breadth. On the coast are many excellent harbours. The air is very unwholesome, and the land hilly, full of stones, and cultivated very poorly: however the valleys produce wheat, and the hills fruits, viz. olives, figs, grapes, almonds and chestnuts. They have horses also of a very fiery nature. Besides, there are mines of iron, and a great deal of fish and coral on the coast. There is a ridge of mountains, which divide the island into two parts, the N and S. The capital is Bastia. It belonged to the Genoese, but the natives having for many years taken up arms against them, that state surrendered its right to the king of France. After the French revolution in 1789, Corsica was admitted as an eighty-third department of France, at the particular request of a deputation, of which Paoli was at the head. In consequence, however, of some events which followed the revolution of 1792, Paoli revolted; the French, by the assistance of the English, were expelled from the island; and Corsica, on the 19th of June 1794, was declared annexed to the crown of Great Britain, according to a new constitution, which had been previously formed. It has since revolted to France and the English viceroy has been recalled. It remains to France, and forms two departments, Golo, and Liamore. Napoleon Buonaparte, late emperor of France, was born on this island at Ajaccio.

Crimea, or *Crim Tartary*, the ancient Taurica Chersonesus, a peninsula in Asia; bounded on the S and W by the Black Sea; on the N by the province of Catharinenslaf, with which it communicates by the isthmus of Perekop, and on the NE, and E. by the sea of Asoph, and the strait of Caffa. The mountainous parts were inhabited by the Tauri, probably a colony of Scythians; and its coasts on the W, the E, and the S, by Greeks. The Scythians were driven out by Mithridates; the Greeks by the Sarmatians; and these again by the Alani and Goths, a northern horde of Scythians. The Hungarians, the Cossacks, and Tartars succeeded in their turn; while the Genoese in the 12th century, held a temporary and precarious possession of the seaports, which they were obliged to yield to the Turks in 1475. At the peace of 1774, the Tartars of the Crimea were declared independent. The mountains are well covered with woods fit for the purpose of ship-building, and contain plenty of wild beasts. The valleys consist of fine arable land; on the sides of the hills grow corn and vines in great abundance, and the earth is rich in mines. But these mountaineers are as careless and negligent as the inhabitants of the deserts: sighting all these advantages; and, like their brethren of the lowlands, are sufficiently happy if they are in possession of a fat sheep and as much bread as serves them to eat. In 1783, the Russians took possession of the country with an army; the following year it was ceded to them by the Turks; and the peaceable possession of the whole was secured to them in 1791, by the cession of the fortress of

Oczakow. The Crimea is divided into two parts, by mountains which run E and W. The N division is flat, poor, and fit for pasturage only. In the S parts, the valleys are astonishingly productive, and the climate extremely mild, from the exclusion of these violent winds by which the N division is frequently incommoded. Besides the ports of Kerth and Jenikale, the road of Caffa, and the harbour of Baluclava, there is, near Sebastapol, one of the finest harbours in the world. The Crimea now forms one of the two provinces of the government of Catharinenslaf, under the name of Taurida; in some late maps it is called Taurica. Achmetschet was made the capital in 1785.

Crio, *Cape*, ancient Criumetopon promontory, SW point of the island of Crete.

It lies 60 miles W of Hispaniola, 85 miles N from Jamaica, 80 miles to the E of Jucatan, and 100 to the South from Cape Florida. It commands the entrance of the gulphs both of Mexico and Florida, as also the windward passages. It was discovered by Columbus, in 1492. The Spaniards are entirely masters of it, having extirpated the natives. The soil is varied, in part extremely productive. Extensive Savannahs cheer the interior. A chain of not very elevated mountains ranges nearly the entire length of the island. This ridge is supposed to be rich in minerals. The produce is sugar, ginger, cassia, wild cinnamon, and very good tobacco, called by the Spaniards Cigarros. The hills run through the middle of the island from E to W, but near the coast the land is generally level, and many rivulets flow from the hills to the N and S. The hundredth part of this island is not yet cleared. The true plantations are mostly confined to the beautiful plains of the Havannah, Matanzas, and near St. Jago. Havannah was taken by the English in 1761, but restored by the peace of 1763.

The population of Cuba, no doubt exceeds 500,000; about one half of whom are free whites; the residue slaves, and free blacks. The island would, if peopled equal to Jamaica, have a population of upwards of two millions four hundred thousand inhabitants.

Cumberland, county of England, bounded on the N by Scotland; on the E by Northumberland, Durham, and Westmoreland; on the S by Lancashire, and on the W by the Irish Sea and Solway Frith. The length from north to south may amount to 55 miles, but the breadth does not exceed 40. It is well watered with rivers, lakes, and fountains; but none of its streams are navigable. In some places there are very high mountains. The air is keen and piercing on these mountains towards the north; and the climate is moist, as in all hilly countries. The county produces great quantities of coal, some lead, abundance of the mineral earth called black lead, several mines of lapis calaminaris; and an inconsiderable pearl fishery on the coast near Ravenglass. The Skiddaw is the principal mountain; and the chief rivers are the Eden and Derwent. This county and the adjoining one of Westmoreland, are celebrated for their lakes, which have been repeatedly described by the pen and pencil. The lakes in Cumberland are the Derwent water, Boscworthwaite water, Buttermere water, Cromack water, Lowes-water, Uls-water, W st water, Ennerdale water, Elder water, Broad water, &c. Carlisle is the capital. Population in 1810, 117,230; in 1811, 133,744; and in 1821, 156,124.

Damascus, now called *Sham*, ancient city of Syria, the form of which is an exact square, each side being a mile and a half long. It had three walls now almost entirely ruined; and of the several suburbs which it formerly had, there remains only

one, which extends three miles in length. The extraordinary beauty of this place is owing to several streams which run across the fertile plain of Damascus, and water all the gardens, supply the public fountains, and run into every house. It is an archbishop's see, and contains great numbers of Christians and Jews. It stands on the river Baida, 112 miles S of Antioch, and 112 NE of Jerusalem. Lon. 37 0 E. lat. 33 45 N.

Damascus, Pachalic of Turkey in Asia, of which the city of Damascus is the capital. It contains nearly all northern Syria, extending to Caramaina on the N, and to Palestine S. It is bounded on the W by the Mediterranean and on the E by deserts of sands. Like most countries on the borders of the Asiatic deserts, the Pachalick of Damascus exhibits tracts of exuberant fertility. The banks of the Orontes, the plains of the Hauron, and some other spots are in a high degree productive in vines, olives, and many other vegetable substances.

Dantzie, capital of Western Prussia, standing on a branch of the Vistula, about four miles above where it falls into the Baltic; in lon. 16 36 E, lat. 54 20 N. This city is famous in history on many accounts, particularly that of its being formerly at the head of the Hanseatic association, commonly called the Hanse towns. It is large, beautiful, populous, and rich; its houses generally are five stories high; and many of its streets are planted with Chesnut trees. The houses are well built of stone or brick, six or seven stories high, and the granaries are still higher, to which the ships lie close, and take in their lading. The established religion is the Lutheran; but Roman Catholics, Calvinists and Anabaptists are tolerated. The inhabitants have been computed at 200,000, but other computations have made them considerably less. In 1700, upwards of 30,000 persons died of the plague. It has now lost its independence, being forced to submit to the king of Prussia, who forcibly usurped the sovereignty, in a second partition of the Polish dominions. Besides corn, of which great quantities are exported, they trade in naval stores, and a great variety of other articles. It is seated on the Vistula, near the gulf of Angli, in the Baltic, 30 miles SE of Marienburg, and 160 NW of Warsaw.

Danube, one of the largest rivers in Europe, called the Ister by the ancients. It rises at Doneschingen, in Suabia, and flows NE by Ulm; then E through Bavaria and Austria, by Ratibsen, Passau, Ens, and Vienna; it then enters Hungary, and runs SE by Presburg, Buda and Belgrade; after which it divides Bulgaria, from Morlachia and Moldavia, discharging itself by several channels into the Black Sea. It begins to be navigable for boats at Ulm, and receives several large rivers as it passes along. It is so deep between Buda and Belgrade, that the Turks and Germans have had men of war upon it; yet it is not navigable to the Black Sea, on account of the cataracts. See *Doneschingen*.

Dayton, flourishing post town and seat of justice for Montgomery county, Ohio. It is situated on level ground, upon the eastern bank of the Great Miami river, just below the confluence of that and Mad river. It contains an academy, a printing office, a bank, several mercantile stores, and three apothecary shops; also a presbyterian meeting house, one for methodist, a court house and jail, and above 130 dwelling houses, and 1000 inhabitants. There are numerous mills in the vicinity, particularly on Mad river, near its mouth, where it is peculiarly well calculated for mills and other machinery necessary to be propelled by water. Distance 66 miles, west by south from Columbus, and 52 northerly from Cincinnati. Lat. 39° 42' N, lon. 78° 8' W.

Delaware, river of the United States. The Delaware basin, intervening between that of Susquehannah and that of the Hudson, extends about 250 miles from north to south, with a mean width of 60 miles, extending over an area of 15,600 square miles. The Delaware rises by two branches in the Catsbergs, draining the angle between the Susquehanna and Schoharie branch of Mohawk. The sources of the Delaware flow SW by comparative courses, 50 miles, through Delaware county, in New York, unite at the NE angle of Penn-

sylvania, and turn at right angles to a course of SE; following the latter direction, by comparative courses, 70 miles, to the NW angle of New Jersey, and the base of the Kittatinny mountain; again turning with the mountain to the SW, follows that course along its base, by comparative courses, 40 miles, to the mouth of Broadhead creek, where the river again turns, and passes the Kittatinny mountain. The general physiognomy of the Susquehannah and Delaware, every where remarkable, is in no other place so striking as in the valley between the Kittatinny mountain and the continuation of the Blue Ridge, below Easton and the mouth of the Lehigh. This river has a very crooked course above and even below the Blue Mountains; the country is very mountainous through which it passes, until it leaves the Watergap. It continues hilly along its banks, below the mountain as far down as Weils falls below the village of New Hope, in Bucks county. It has many rapids and shallows along its whole length, until it reaches Trenton falls, where it meets the tide. Boat navigation is very difficult above Easton. From Easton to the tide, the navigation has been improved, and at present, a very considerable trade is carried on in this part of the river.

In the Kittatinny valley, 25 miles, by comparative courses, below the Delaware watergap, the Lehigh comes in from the northwest.

The latter stream claims a very large share of attention, as being one of the great channels from which the city of Philadelphia, and indeed the whole Atlantic coast, is destined to receive exhaustless supplies of coal.

This branch of the Delaware rises in Wayne, Luzerne, and Northampton, and is, emphatically, a mountain stream. Flowing first to SW, curves to S and SE, pierces the Kittatinny mountain, crosses the Kittatinny valley in a SE direction, is turned by the SE mountain at Allentown, where it winds to NE, and joins the Delaware at the borough of Easton, after a comparative course of about 80 miles. See *Lehigh*.

Below the SE mountain, the Delaware turns to a SE course 35 miles, to where it leaves the primitive, and falls into the alluvial formation at the head of tide water. Continuing over the alluvion four or five miles, the Delaware again turns to SW, nearly parallel to, and about five miles distant from, the primitive ledge, in which direction it flows, by comparative courses, 35 miles, to the mouth of the Schuylkill.

Respecting the Schuylkill, it is sufficient to observe, that, it has its principal sources in Northampton and Schuylkill counties: that its general course is from NW to SE,

by comparative courses, 120 miles. Few secondary rivers of the American continent are destined to become of equal importance with the Schuylkill, as a channel of inland navigation. The general course of SW is maintained by the Delaware, about 30 miles below the mouth of the Schuylkill, or about five miles below New Castle. Here the river, already considerably expanded in width, opens into a wide triangular bay, 65 miles in length, and 30 wide, between Capes Hanlopen and May. See *Schuylkill*.

Delaware Bay, the estuary of the Delaware river, between New Jersey and Pennsylvania, and between New Jersey and Delaware. This bay in strictness commences at Trenton, at the head of tide water, but is usually computed from Fishers Point below New Castle to Capes May and Hanlopen. Thus restricted it is about 65 miles long, and varying in width from 3 to 30 miles. It admits the entrance of the largest vessels though much impeded by shoals.

Delaware, one of the United States. This state is bounded by an exterior limit, from its SE angle at Fenwick's island to Cape Hanlopen 20
Along the right shore of Delaware bay - - - 90

Area, 2120 square miles, equal to 1,356,800 acres.

Extreme length from south to north, 96 miles; greatest breadth along its south boundary 36 miles.

Extending from lat. 33° 29', to 39° 54' N.

The state of Delaware from its confined extent, and position pre-ents the most uniform surface of any of the great political sections of the United States. That part of Delaware bordering on Pennsylvania, rises into hills of some little elevation, and is extremely well watered. Receding, however, down Delaware bay, or rather along the intervening peninsula between that and Chesapeake bay the face of the country becomes more monotonous, and finally sinks to a nearly general level. Some parts of the lower sections of the state are marshy, some sandy, but interspersed with productive tracts. The respective fertility of the different divisions of the state can be seen by reference to the different counties with their comparative population.

In the northern part of the state the soil is well adapted to the production of grain

and pasturage. Grain and flour are therefore staple commodities. For the manufacture of the latter article few places in any country can possess greater natural facilities, than does higher Delaware. Brandywine creek rising on the primitive, and secondary formations in Pennsylvania is precipitated over considerable rapids in its passage from the primitive rock to the alluvial tract below. Red Clay and White Clay creeks, branches of Christiana river present similar features to Brandywine, and taken together, afford an uncommon assemblage of seats for mills and other manufactories. Much has been done to improve those natural advantages. Manufactories of paper, gunpowder, and cotton and woollen goods have been extensively established. A canal to unite the Delaware and Chesapeake bays, and to crop the state of Delaware, was undertaken in May, 1804. This enterprise, after considerable labour and funds had been expended, was from various causes, suspended, in 1805; but now, (1822) is again revived, with the most flattering hopes of success.

For political and legal purposes Delaware is subdivided into the following counties; having the population respectively annexed, in 1820.

Delery, seigniory, Lower Canada, Huntingdon county, on the Sorelle river, 27 miles SSE from Montreal. Isle Aux Noix is in this seigniory.

Delft, city of the United Provinces, in Holland. It is clean and well built, with canals in the streets, planted on each side with trees. It is about two miles in circumference; and has a fine arsenal well furnished. It is noted for a considerable manufacture of earthen ware known by the name of Delft ware. It is seated on the Schie, eight miles NW of Rotterdam, and 30 SW of Amsterdam. Lon. 4 24 E, lat. 52 4 N.

Delfshaven, fortified town of Holland, on the N side of the Maese, with a canal to Delft, &c. It is between Rotterdam and Schiedam, not three miles from each.

Delfzy, fortress of the United Provinces, in Groningen. It is seated on the river Damster, 13 miles NE of Groningen.

Delhi, province of Hindoostan Proper; bounded on the NW by Lahore, on the NE by Serinagur, on the E by the Rohilla country, on the S by Agra, and on the W by Moultan. Having been the seat of continual wars for above 50 years, it is almost depopulated; and a tract of country that possess every advantage that can be derived from nature, contains the most miserable of inhabitants. It is now all that remains to the Great Mogul of his once extensive empire.

Delhi, capital of a province of the same name, in Hindoostan Proper, seated on the river Jumna. It is the nominal capital of all Hindoostan, and was the actual capital during the greatest part of the time since the Mahometan conquest. In 1738, when

Nadir Shah invaded Hindoostan, he entered Delhi, and dreadful were the massacres and famine that followed; 100,000 of the inhabitants perished by the sword; and plunder, to the amount of 62,000,000*l.* sterling, was said to be collected. The same calamities they endured on the subsequent invasions of Abdalla, king of Candahar. Delhi is 80 miles NNE of Bombay. Lon. 77 40 E, lat. 28 37 N.

Delhi, post town and seat of justice, in Delaware county, New York, on Coquago branch of Delaware river, 70 miles WSW from Albany.

Delhi, township of Delaware county, New York, including the foregoing village. Population in 1820, 2285.

Delichi, river of Albania, the Acheron of the ancient poets, who feigned it to be in hell.

Delmenhorst, town of Westphalia, in the county of Delmenhorst, belonging to Denmark. It is seated on the Delm, near the Weser eight miles SW of Bremen.

Delos, island of the Archipelago, now called *Dili*. There are abundance of fine ruins supposed to be of the temples of Diana and Apollo, whose birth-place it is said to be. It is six miles in circumference, but now destitute of inhabitants. Lon. 25 59 E, lat. 37 30 N.

Delphi, or *Delphos*, town of Livadia, seated in a valley, near mount Parnassus. It was famous for the oracle of Apollo, which people came from all parts to consult.

Delsperg, town of Swis crand, in the bishopric of Basle, 10 miles NW of Soleure. Lon. 7 23 E, lat. 47 17 N.

Delta, part of lower Egypt, between the branches of the Nile and the Mediterranean. The ancients called it the isle of Delta, because it is in the shape of a triangle, like the Greek letter of that name. It is 130 miles along the coast from Damietta to Alexandria, and 70 on the sides, from the place where the Nile begins to divide itself. It is the most plentiful country of all Egypt, and it rains more here than in other parts; but its fertility is chiefly owing to the inundations of the Nile. The principal towns on the coast are Damietta, Rosetta, and Alexandria.

Demer, river which rises in the bishopric of Liege, waters Hasselt, Diest, Siehem, Arschoot, and Mechlin, below which it joins the Senne, and takes the name of Rupel.

Demerara, river of South America, in Guiana, rises at about lat. 4 N, and flowing nearly north 200 miles, falls into the Atlantic Ocean, 10 miles E from the mouth of the Isiquibo river.

Demerara, province formerly of Dutch Guiana, lying on both sides of the Demerara river. It was ceded to Great Britain in 1814.

Demeraru, settlement formerly belonging

to the Dutch in Guiana, on a river of the same name, three leagues W of Paramaribo. It was taken by the English in April, 1796.

Demmin, ancient town of Swedish Pomerania, in the duchy of Stettin, seated on the river Peen. Lon. 13 22 E, lat. 53 52 N.

Demona, fort of Piedmont, on the river Sture, 10 miles SW of Coni. Lon. 7 28 E, lat. 48 18 N.

Denain, village of France in the department of the North and late province of Hainault. It is seated on the Scheldt 8 miles W of Valenciennes.

Denbigh, county-town of Denbighshire; situate on the side of a rocky hill, on a branch of the river Clwyde. Its ruined castle, with its vast enclosure crowning the top of the hill, forms a striking object. It has a market on Wednesday, sends one member to parliament, and is 27 miles W of Chester, and 208 NW of London. Lon. 3 35 W, lat. 53 11 N.

Denbighshire, county of Wales, bounded on the S by Merioneth and Montgomery shires, on the N by Flintshire and the Irish Sea, on the W by Caernarvon and part of Merionethshire. It is about 40 miles long and 21 broad. The air is wholesome, but sharp; the county being pretty hilly, and the snow lying long on the tops of the mountains. The soil in general is barren. The chief commodities are black cattle, sheep, goats, rye, and lead ore. The county sends two members to parliament. Population in 1801, 60,352, in 1811, 64,240, and in 1821, 74,511.

Dender, river of Austrian Hainault, which waters Lauze, Ath, Lessines, Grammont, Ninove, and Alost, and joins the Scheidt at Dendermonde.

Dendermonde, city of Flanders, with a strong citadel. It was taken by the French in 1794, when they overran Holland. It is surrounded by marshes and fine meadows, which can be covered with water, and is seated at the confluence of the Dender and Scheldt, 16 miles W of Mechlin. Lon. 4 10 E, lat. 51 3 N.

Denia, ancient seaport of Spain, in Valencia. It is seated at the foot of a mountain, on the Mediterranean, 52 miles E of Alicante. Lon. 0 36 E, lat. 38 44 N.

Denmark, kingdom of Europe; bounded on the E by the Baltic sea, W and N by the Ocean, and S by Germany. The country is generally flat, and the soil sandy. The air is rendered foggy by the neighbourhood of the seas and lakes, of which it is full; but it has no considerable river. Denmark, properly so called, consists of Jutland and the islands of Zealand and Funen, with the little isles about them. The king of Denmark's dominions, however, contain the duchy of Holstein, Iceland, the Faroe islands, and also Norway till lately; but in

consequence of Denmark being in alliance with France, during the grand confederacy against that Power, in 1813, the allies, under the crown prince of Sweden, soon after the battle of Leipsic, entered the king's dominions in the North of Germany; and after several severe battles, in which the Danes had to contend with very superior numbers, the king was compelled to conclude a treaty, wherein he ceded Norway to Sweden, and was to receive in exchange, Swedish Pomerania, and the Isle of Rugen. In the East Indies, Denmark possesses Tranquebar on the coast of Coromandel, and the Nicobar islands; in the West Indies, the islands of St Thomas, St. Croix, and St. John; Christianburg on the coast of Guinea; and a small part of Greenland. Denmark was once a limited and elective monarchy; but, in 1660, it was made absolute and hereditary, by a revolution almost unparalleled in history; a free people voluntarily resigning their liberties into the hands of their sovereign. The inhabitants are protestants since the year 1522, when they embraced the confession of Augsburg. The manners and customs of the superior classes differ little from those in other parts of Europe; but the peasantry continue in a state of vassalage, except those of the crown. The revenues, which arise from the crown and duties, are supposed to amount to 1,500,000*l.* a year. The harbours of Denmark are well calculated for trade; and commercial companies are established to the East Indies, West Indies, and Africa. The produce of Denmark, beside fir and other timber, is black cattle, horses, butter, tallow, hides, pitch, tar, fish, oil, and iron. Copenhagen is the capital.

Denmark now contains:

Detroit, post town, and capital of Michigan territory. It is situated on the western bank of the strait St. Clair, or Detroit river, between lake Erie and lake St. Clair; 18 miles north of the west end of the former, and nine miles below the latter. Fort Detroit is of an oblong figure, built with stockades, and advantageously situated, with one entire side commanding the river. The town is near a mile in circumference, and previous to its being burned

in January, 1805, enclosed about 500 houses and a Roman Catholic church; built in a regular manner, with parallel crossing each other at right angles. It is rising again on a large scale, with wider streets. For eight miles below, and the same distance above Detroit, on both sides of the river, the country is divided into regular and well cultivated plantations; and from the contiguity of the farmers' houses to each other, they appear as two long extended villages. The inhabitants, who were mostly French, were about 2000 in number, in 1778, 500 of whom were as good marksmen as the Indians themselves, and as well accustomed to the woods. They raise large flocks of black cattle, and great quantities of corn, which they grind by windmills, and manufacture into excellent flour. The chief trade of Detroit consists in a barter of coarse European goods with the natives for furs, deer skins, tallow, &c. The exports from this place for the year 1804, amounted to 38,028 dollars. By the treaty of Greenville, August 3, 1795, the Indians have ceded to the United States the post of Detroit, and all the land to the north, the west and south of it, of which the Indian title has been extinguished by gifts or grants to the French or English governments. In 1807, the Indians, for 59,500 dollars, ceded to the United States about 50,000,000 of acres, extending from fort Defiance on the Miami, 260 miles on that river, lake Erie, the Detroit river and lake, the river St. Clair and lake Huron, including all the streams falling into those waters. The fort, &c. was delivered up by the British in July, 1796, according to treaty. Lon. W C 5 50 W. lat. 42 25 N.

Detroit River, or Strait of St. Clair, issues from lake St. Clair, and enters the west end of lake Erie, forming part of the boundary line between the United States and Upper Canada. In ascending it, its entrance is more than three mile wide, but it perceptibly diminishes; so that opposite the fort, 18 miles from lake Erie, it does not exceed half a mile in width; and from thence to St. Clair, it widens more than a mile. The channel of the strait is gentle, and wide and deep enough for shipping of great burthen, although it is incommoded by several islands, one of which is more than seven miles in length. These islands are of a fertile soil, and from their situation afford a very agreeable appearance. The length of the river is 28 miles; and several streams fall into it, chiefly from the north-west, viz. Bauche, Clora, Curriere, Detroit and Huron rivers. There are several windmills on the Detroit, and an orchard adjoining almost every house. The settlers are numerous, and the improvements handsome and extensive. When the trees

are in blossom, the prospect as you pass through the strait is perhaps as delightful as any in the world.

Detroit, le Petit, on the Ottawa river, is below the upper main forks of the Ottawa river.

Dettingen, village of Germany, in the territory of Hanau. The French were defeated near this town in 1743 by George II. It lies between Hanau and Aschaffenburg, four miles from each.

Devon, river of Perthshire, over which, in the beautiful vale of Glendevon, is a great curiosity, called the Rumbling Bridge. It consists of one arch, thrown over a horrible chasm, worn by the river, about 80 feet deep, and very narrow. In other places, the river has forced its way in a surprising manner, through the rocks. At the Chldron-lin, it has worn away the softer parts of the stone, and formed immense pits, into which the water falls with a tremendous noise. Below this, the whole river is precipitated in one sheet, from a height of 40 feet.

Devonshire, county of England, 70 miles long and 64 broad, bounded on the NW and N by the Bristol channel, E by Somersetshire and Dorsetshire, SE and S by the English channel, and W by Cornwall. It contains 1,600,000 acres; is divided into 32 hundreds, and 398 parishes; and has one city and 55 market towns. The air is so mild in the valleys, that the myrtle grows unsheltered; but it is cold and bleak on the mountains. The soil is various, for the lower grounds are naturally fertile, and the hills are very barren. In the eastern part there is plenty of good corn, and fine pasturage for sheep, where the grounds

are dry and chalky. The southern part is remarkably fertile; and fruit trees are plentiful especially apples, with which a great quantity of cider is made.

On the coast is found a peculiar rich sand of singular service to husbandmen. The middle part is occupied by the forest of Dartmoor. The western part abounds with game, especially hares, pheasants, and wood-cocks; and here is a bird so very small that it is reputed a humming-bird, and like that constructs its nests in the extreme branches of trees. Devonshire was formerly more celebrated for its mines than even Cornwall; and although the latter has nearly monopolized the trade, the stannary laws in some degree remain in force. Here are veins of leadstone; likewise quarries of good stone and slate, great quantities of which are exported. In the SW parts are much marble, and in many places marble rocks are the basis of the high road. The principal rivers are the Tamar, Taw, Torridge, Ex, Teign, and Dart. Exeter is the capital. Population in 1801, 343,001, in 1811, 383,308, and in 1821, 439,044.

Dismal Swamp, marshy tract, on the coast of North Carolina, 50 miles long and 30 broad. It occupies the whole country between Albermarle Sound and Pamlico Sound.

From the general course of the Blackwater and of the Chowan rivers, below their junction, an extensive flat peninsula is formed between Albermarle Sound, Chesapeake bay, and James' river, of about 70 miles in length from north to south, by 50 mean width, east and west, or 3500 square miles. This extensive flat region is occupied by Currituck, Camden Pasquotank, Perquimans, Chowan, and Gates's counties in North

Carolina, and by the Isle of Wight, Nansemond, Norfolk and Princess Anne counties in Virginia. It is the central parts which are occupied by the Dismal Swamp, but much of the residue is marshy, yet, by the census of 1820, the ten counties comprise a population of 87,510 inhabitants. The canal already executed between the Albermarle Sound and Nansemond river penetrates this tract.

Domingo St. or Hispaniola, one of the richest islands in the West Indies, 400 miles in length, and 75 in breadth. It was discovered by Columbus, in 1492, and is surrounded by craggy rocks and dangerous shoals. The heat to the N and SE would be insupportable for six months of the year, if not qualified by the easterly winds, and frequent rains; but the latter soon spoil the flesh, bread, and fruits. It has a great many rivers, and mines of gold, talc, and crystal. The Spaniards had possession of the whole island for 120 years. They were afterward forced to divide the island with the French, who obtained the W part; and the Spaniards retained the E, the most extensive and fruitful. Since the revolution in France this island has been subject to great calamities. In 1791 an insurrection began in the French plantations, and in a short time not less than 10,000 blacks were in arms; the manufactures and plantations appeared as one general conflagration, and the plains and mountains were covered with carnage and blood. An African by birth, named Toussaint, was afterward invested with the command of the blacks and mulattoes. In 1802 the French sent an additional force, and after several encounters the negro chief was induced to accept of apparently favourable terms; but soon after he was perfidiously seized, and sent in irons to France, where he perished in a dungeon. The other black chiefs, Dessalines and Christophe, saved themselves by flight; the natives again flew to arms; and the French troops fell victims to the climate. Dessalines succeeded to the authority of Toussaint, and in 1804 caused himself to be proclaimed emperor of Hayti, the ancient name of the island. In 1806 the chiefs began to war against each other, and the black emperor was killed. Christophe was elected chief in his place. This latter chief perished in a war with Boyer, the successor of Petion, in 1820, leaving the latter master of the whole of what was French St. Domingo. In 1821, the Spanish part fell also under the authority of Boyer. St. Domingo has Cuba W; Porto Rico E, and Jamaica SW.

The population of this island in 1789, was from the best authorities, about 600,000 inhabitants, of which nearly

500,000 were black slaves. The French part contained 535,000, of whom 480,000 were slaves; the Spanish part 125,000; 15,000 of whom were slaves. It is probable that the present numbers do not materially differ in extent, though the number of whites have no doubt greatly diminished.

The trade of this island has greatly declined. The value of exports in 1791, exceeded 5,370,000 pounds sterling; 23,832,800 dollars. Coffee amounted to 84,617,328 lbs. Sugar 217,463 casks. Indigo 3,257,610 lbs. Cocoa 1,536,017 lbs. and Cotton 11,317,226 lbs.

Domingo, St. capital of the E part of the island of St. Domingo, and an archbishop's see. The cathedral is a superb structure. It is seated on a navigable river, and had formerly a harbour, which is now choked up with sand. Though its trade has been long extinct, it was in a respectable condition while it continued in the hands of the Spaniards. The city itself is large, well built of stone, and defended by batteries. Lon. 70 10 W, lat. 18 20 N.

Dominica, one of the Windward Caribbee islands in the West Indies. It lies about half way between Guadaloupe and Martinico, and is 28 miles long and 13 broad. It was taken by the English in 1761, and confirmed to them by the peace of 1763. The French took it in 1778, but restored it in 1783. It suffered great damage by a tremendous hurricane in 1806. The soil is thin, and better adapted to the rearing of coffee than sugar; but the sides of the hills bear the finest trees in the West Indies, and the island is well supplied with rivulets. The capital is Charlotte-town.

and though the palaces are few, it is deemed the handsomest city in Germany. The palaces of Holland and Japan are full of curiosities from that country and China; and the picture gallery may claim precedence over every individual gallery in Italy. The city and suburbs are estimated to contain 50,000 inhabitants, near 5000 of whom are catholics, and there are about 800 Jews. Here are manufactures of gold and silver lace, jewellery, porcelain, paper-hangings, and wind instruments of music. It was taken by the king of Prussia in 1745, and again in 1756, but re-taken in 1759; and it was bombarded by him in 1760, for nine days, when he was obliged to raise the siege. Dresden is rendered memorable for its neighbourhood being the principal theatre of operations between the allied and French armies during the greater part of the year 1813. The Russian and Prussian troops having entered it in the month of March was obliged to quit it in May after the battle of Lutzen; and Buonaparte afterwards held his head-quarters here for a long time. On the 26th and 27th of August of the same year, the allied army, 200,000 strong, under prince Schwartzenburg, attempted to carry the town by assault; but Buonaparte having arrived from Silesia, with his guards, the night before the attack, repulsed them with great loss in killed, wounded and prisoners. It was at this time, the celebrated general Moreau, received a mortal wound, while in conversation with the emperor of Russia. The allies, in consequence of this disaster, immediately commenced their retreat into Bohemia; and the French, being too eager to profit of their success, had sent general Vandamme with about 30,000 men, into the mountains of that country to cut off their retreat. But on their arrival near Culm, they were assailed on all sides; and after a furious conflict, the whole army was nearly destroyed, and the commander with the whole of his staff were made prisoners. Soon after the battle of Leipsic, Dresden surrendered to the allies, with a garrison of about 25,000 men. It is 80 miles NNW of Prague. Lon. 13 50 E. lat. 51 6 N.

Dublin, capital of Ireland, in a county of the same name, with a bishop's see; seated on the Liffey, in view of the Irish Sea on the E. Its form is that of a square, two miles and a half in extent on each side, and it contains about 22,000 houses, whose inhabitants are estimated at 156,000. With respect to its streets, Dublin bears a near resemblance to London; some of the old streets were formerly narrow, but great improvements have been lately made, in regard both to convenience and embellishment; and there are several magnificent squares, the largest of which is St. Stephen green, nearly a mile in circuit. It has a cathedral and a collegiate church, 18 parish churches, 8 chapels, 16 Roman catholic chapels, numerous meeting-houses for

dissenters of various denominations, four foreign churches, and a synagogue.

Among the principal public buildings are the castle (the residence of the viceroy) the national bank. Trinity college, the hall of justice, the royal exchange, the custom-house, the royal hospital of Kilmainham for invalids, the linen-hall, the barracks, the tolls, or town-house, and Essex bridge and Sarah-bridge, two of the six bridges over the Liffey. The hospitals and other charitable institutions are numerous; and it has two theatres. The Phoenix park, at the W end of the town, is a royal enclosure, seven miles in circuit; and, beside the Hibernian school, is adorned with the villa of the viceroy, the seat of the principal secretary, and few others; also a salute battery of 22 pieces of cannon, and the ammunition magazine, a strong fortification. An observatory is erected on a rocky hill, about four miles NW of the city. The civil government of Dublin is executed by a lord mayor, recorder, two sheriffs, 24 aldermen, and a common council, formed of representatives from the 25 corporations. Beside the silk, woollen, and cotton manufactures carried on in the suburbs, other branches of useful manufacture are establishing in different parts of the metropolis; and its foreign trade is considerable.

The harbour is incommoded by two banks of sand, which prevent vessels of large burden from going over the bar: it has a mole nearly four miles in length, with a lighthouse at the extremity, and another on the promontory opposite, called the hill of Howth. Three miles below the city, at a place called the Pigeon-house, is a commodious dock; and here the packets receive and land their passengers. The Liffey divides the city almost into two equal parts, and has spacious and noble quays on both sides. A grand canal has been made from the Liffey, which communicates with the Shannon near Clonfort. Dublin is seated at the end of a spacious bay seven miles from the Irish Sea, 60 W of Holyhead, in Wales, and 300 WNW of London. Lon. 6 18 W. lat. 53 21 N.

Durand, township of Coos county, New Hampshire. Population in 1820, 78.

Durango, city of New Spain, province of New Biscay, and capital of the intendency of the same name; situated 500 miles in a direct line from the city of Mexico, and 900 from Santa Fe. The height of the town is nearly 7,000 feet above the Ocean. Its environs appear to be volcanic. One of the largest masses of native iron ever discovered, exists near the city of Durango; its weight has been calculated to be above 40,000 lbs. avoirdupois. N lat. 24 25 W, lon. W C 26 35. Population 12,000.

Durango, intendency of Mexico, better known by the name of *New Biscay*, belonging to the Captain Generalship of the Internal provinces, bounded W by Sonora; N by regions yet inhabited by Savages; NE by Texas; SE by a part of San Louis Potosi, and S by Zacatecas and Guadalupe. Area 118,922 square miles; length from north to south, from the mines of Guarissamay 650 miles; mean breadth 180 miles. Population 160,000.

The surface of Durango, is in general mountainous, and for its latitude cold. The soil is in most places dry and arid. Immense barren plains cover this intendency, over which the Spanish and Indian horsemen roam at large, in never ceasing hostility to each other. No races of men differ more essentially than the Spanish Creole of the Viceroyalty, and the European descendants in the Provinces Internas, and the native Indian of Mexico, and the aborigines on the Rio Grande. Active, bold, brave, and extremely athletic, the inhabitants of the Internal provinces, civilized and Savage, know perhaps less of disease, than any part of the human species

in any age or country. Durango lies on the table land of Anahuac, in most places elevated upwards of 6,500 feet above the Ocean, but declining to the east and west. Its productions are European grain and fruits. Chief towns, Durango, Chihuahua, San Juan del Rio, Nombre de Dios, Pasquiaro, Saltillo, Paras and Sta Rosa de Cosiquiriachi.

Durham, county of England, called the bishopric of Durham; bounded on the N by Northumberland, on the E by the German Ocean, on the S and SW by Yorkshire, and on the W by Wes moreland and Cumberland. It extends 37 miles from N to S, and 47 from E to W; contains one city, seven market towns, and 113 parishes; and sends four members to parliament. Its rivers are the Tees, Tine, Were, Tame, Lune, Derwent, Gauntless, Skere, &c. Its principal products are lead, coals, iron, corn, mustard, salt, glass, fine ale, with excellent butter and salmon. The soil is various; the south is rich, but the western parts rocky and moorish. Population in 1801, 160,361, in 1811, 177,625, and in 1821, 207,673.

Durham, capital of the county of Durham, with a market on Saturday, and a bishop's see. Has a manufacture of shalloons, tammies and calmancoes; and around it are grown large quantities of the best mustard. Nevil's Cross, near the city, was erected in memory of the victory obtained by queen Philippa in 1346, over David Bruce, king of Scotland, who was taken prisoner in this battle. Durham sends two members to parliament; is 14 miles S of Newcastle, and 237 N by W of London. Lon. 1 27 W, lat. 54 50 N.

Dutchess, county of New York; bounded E by Connecticut. S by Putnam county in New York; W by Hudson's river, and N by Columbia county, New York; length 35; mean width 24; area 840 square miles. The face of this county is in a peculiar manner diversified. In the valleys of the Housatonic, Fishkill, Wappinger and Jansen, are extensive bodies of first rate land. In the intermediate space between those rich vales, extend fertile tracts of high land little less productive. The banks of the Hudson are steep, rocky and broken, and indeed generally precipitous. On its southern boundary, this county rises into mountains, some of the peaks of which, exceed 1200 feet above the level of tide water. These are the celebrated Highlands, which inflecting first to NE, and thence N, through Dutchess into the SE

angle of Columbia county, separate the sources of the Housatonic, from those of the creeks falling into the Hudson, and gives to the eastern side of Dutchess a bold and mountainous aspect. From the elevated ground from which they flow, and the comparatively deep chasm in which the Hudson is confined, the creeks of Dutchess are eminently calculated for the propulsion of machinery, an advantage to a considerable extent improved by the inhabitants. See *Mateowan*, *Wappingers Creek*, &c. This country is well cultivated and productive in grain, fruits and meadow grasses. Its staples are numerous, and consist of grain, flour, whiskey, beef, pork, butter, cheese, live stock, orchard fruits and garden vegetables. Chief town, Poughkeepsie.

The population of Dutchess for 1810, included, also the townships subsequently formed into Putnam county. See *Putnam*.

Easton, post town and seat of justice Northampton county, Pennsylvania, on the Delaware, 60 miles N from Philadelphia. It is a borough town, situated on a point of land formed by the Delaware and Lehigh rivers and Bushkill creek. The streets are laid out at right angles to each other, and along the cardinal points. The lower part of the town near the Delaware is on an elevated level, but the western extremity rises by a gradual acclivity to a considerable elevation. The adjacent country is bold, broken, and romantic. The soil is highly productive, and being well cultivated, gives a most pleasing aspect to the vicinity of Easton. Farm houses, orchards, fields and meadows, are comingled along the bottoms of the rivers and slopes of the adjacent hills. Bushkill creek is amongst the finest mill streams in the U. States. See *Bushkill*. This stream rises 8 miles N from Nazareth, and has an almost uninterrupted fall to the Delaware. Within the borough of Easton it passes the Chesnut ridge, and by a very winding and precipitous course reaches the Delaware, affording a rapid succession of mill seats.

The following valuable information respecting this interesting place, was communicated to the editor by an intelligent young gentleman, a native of that town. There are within the boundaries of the borough, 3 oil mills, 6 grist mills, 2 saw mills, 2 distilleries, 3 tan yards and tanneries, 1 brewery, and 31 dry good and hardware stores. A library formed in 1811, containing about 1200 volumes. An academy called the Union Academy, in which the learned languages are taught. Three places of public worship, 1 for Presbyterians; 1 for Episcopalians, and 1 for German Lutherans. A court house, erected in 1758. Four fine bridges; one over the Delaware, a most substantial structure, erected at an expense of 80,000 dollars; one a chain bridge, over the Lehigh, on the Philadelphia road, and two over the Bushkill. Two banks; one a branch of that of Pennsylvania, and the other the Easton bank, with a capital of 400,000 dollars. The trade of this town is very considerable, particularly in the arti-

cle of flour, which constitutes the principal staple of Northampton county. Population in 1810, 1657, and in 1820, 2370.

Eddystone, name of some rocks in the English Channel, which cause variety of contrary sets of the tide or current in their vicinity. They are situated SSW from the middle of Plymouth Sound, at the distance of 14 miles. They are almost in the line which joins the Start and the Lizard Points, and their situation with regard to the Bay of Biscay and the Atlantic is such, that they lie open to the swells of the bay and Ocean from all the SW points, so that all the heavy seas from the SW break upon Eddystone with the utmost fury. Three light houses have been erected on these dangerous rocks; the first by Mr. Winstanly, 1696, which on the 27th November, 1703, was destroyed by a storm, and with it perished the ingenious founder. The second was built of wood by Mr. Rudyard, but was burnt in 1755. The third, and the one yet in existence, was constructed in stone by Mr. Smeaton, and finished August 24th, 1759. Its distance from the Ram Head, the nearest point of land, is 12 miles. Lon. 4 24 W, lat. 50 8 N.

Edikofen, town of Germany in the palatinate of the Rhine. A bloody battle was fought here between the Prussians and the French in 1794, which terminated in favour of the French.

Edinburgh, metropolis of Scotland, situated in a county of the same name. It may properly be divided into the Old and New towns. The Old Town is situated on a narrow steep hill, about a mile in length, terminated abruptly on the W side by the castle, from which there is a gradual declivity to the palace of Holyrood-house, which is placed in a beautiful plain called St. Ann's Yards. From the level of this plain, and on each side of the ridge or hill on which the Old Town stands, run two narrow valleys, nearly parallel to each other; the southern one forms a street called the Cowgate, the northern continued a marsh till very lately, which was called the North Loch, but is now drained. The high street which runs between the castle and Holyrood-house, is long and spacious, and the houses are very high. From this street many narrow lanes or closes run off at right angles, towards the N and S. The castle is seated on a vast perpendicular rock, accessible only by a drawbridge on one side, and in ancient times was considered as almost impregnable. In 1811 the number of inhabitants, exclusive of Leith, was 103,000. It is supplied with water conveyed in iron pipes, from Comiston, four miles to the W. It is governed by a lord provost, a dean of guild, a guild council, and 25 common council. Here are 14 incorporated trades, each having its deacon or warden. Edinburgh is two miles SSW of Leith (which is its port) and 377 N by W from London. Lon. 3 12 W. lat. 55 58 N.

This city has become deservedly celebrated for the number, extent, and excellence of its literary institutions. The university of Edinburgh was founded in 1582, and now, embraces professorships, on almost every important pursuit of the human intellect. The number of students ordinarily exceeds 2000. To the university is attached a library containing above 50,000 volumes. As a medical school, the reputation of this university occupies a most exalted rank. The other literary charitable, religious and legal institutions are numerous and highly respectable. Of all the great cities of the British empire, Edinburgh is supposed to derive the least comparative emolument from trade, commerce or manufacturers.

Egypt, country of Africa, 600 miles in length, and 250 where broadest: bounded on the N by the Mediterranean, on the S by Nubia, on the E by the Red Sea and the isthmus of Suez, and on the W by the deserts to the E of Fezzan. The broadest

part is from Alexandria to Damietta, and thence it gradually grows narrower, till it approaches Nubia. It is divided into the Upper, Middle and Lower; which last comprehends the Delta; and though the air is naturally hot, and not very wholesome, it enjoys so many other advantages, that it has been always extremely populous. Egypt carried on a considerable trade in East India commodities, till the Portuguese found the way round the Cape of Good Hope. However the merchants of Europe visit the harbours of the Mediterranean, and import and export several sorts of merchandize; and from other parts the natives get elephant's teeth; ebony, gold dust, musk, civet, ambergris, and coffee. The gold dust is brought from Negroland, to Pez, and Morocco, and thence to Cairo, over immense deserts. The principal commodities which the merchants purchase are coffee, senna, cassia, rhubarb, sal ammoniac, myrrh, saffron, sarpnetre, aloes, opium, indigo, sugar, sandal wood, dates, cotton, cloth, &c. The complexion of the Egyptians is tawny, and the further S the darker, so that those near Nubia are almost black. They are generally indolent and cowardly; the richer sort do nothing all day but drink coffee, smoke tobacco and sleep; and they are ignorant, proud, haughty, and ridiculously vain. From March to November, the heat to a European, is almost insupportable; but the other months are more temperate. The S winds are by the natives called poisonous winds, or the hot winds, of the deserts; they are of such extreme heat, and aridity, that no animated body exposed to it can withstand its fatal influence. During the three days that it generally lasts, the streets are deserted; and wo to the traveller whom this wind surprises remote from shelter. It rains very seldom in Egypt; but that want is fully supplied by the annual inundation of the Nile. When the waters retire, all the ground is covered with mud; then they only harrow their corn into it, and in the following March, they have usually a plentiful harvest; their rice fields are supplied with water from canals and reservoirs. There is no place in the world better furnished with corn, flesh, fish, sugar, fruits and all sorts of garden stuff; and in Lower Egypt, are oranges, lemons, figs, dates, almonds, cassia, and plantains, in great plenty. The sands are so subtle that they penetrate into the closets, chests and cabinets, which, with the hot winds, are probably the cause of sore eyes being so very common here. The animals of Egypt are tigers, hyenas, antelopes, apes, black cattle, fine horses, large asses, crocodiles, the hippopotamus, the camelion, and a kind of rat called ichneumon: ostriches, eagles, hawks, pelicans,

water fowls of all kinds, and the ibis which resembles a duck, and was deified by the ancient Egyptians, on account of its destroying serpents and noxious insects. Here is a serpent called the cerastes, or burned viper, whose bite is fatal to those who have not the secret of guarding against it; for some of the natives can play with the cerastes, and it will not attempt to bite them; but when applied to a hen, or any other animal, it has instantly bit and killed them. The pyramids of Egypt are noticed by all travellers; the largest takes up ten acres of ground, and is, as well as the rest, built upon a rock. Here are also caverns, out of which they get the mummies, or embalmed dead bodies, which are found in coffins, set upright in niches of the walls, and have continued there at least 4000 years; many of these have been brought to England, and were formerly deemed of great use in medicine. The principal city is Cairo. The ancient kings governed Egypt, till Cambyes became master of it, 525 years B. C. and in their time all those wonderful structures were raised, which we cannot behold without astonishment. These are the pyramids, the labyrinths, the immense grottos of the Thebais; the obelisks, temples, and pompous palaces; the lake Mœris, and the vast canals, which served both for trade and to render the land fruitful. After this conquest Cambyes demolished the temples and persecuted the priests. After his death, this country continued under the Persian yoke till the time of Alexander the Great, who having conquered Persia, built the famous city of Alexandria. He was succeeded by Ptolemy, the son of Lagos, 324 years B. C. Ten kings of that name succeeded each other, till Cleopatria, the sister of the last Ptolemy, ascended the throne; when Egypt became a Roman province, and continued so till the reign of Omar, the second calif of the successors of Mahomet, who drove away the Romans, after it had been in their hands 700 years. When the power of the califs declined, Saladine set up the empire of the Mamloucks, which became so powerful in time, that they extended their dominions over a great part of Africa, Syria and Arabia. Egypt was then conquered by Selim, a Turkish emperor, and great numbers of its ancient inhabitants withdrew into the plains. An attempt was then made to deprive the Ottoman Porte of its authority over Egypt by Ali Bey, who having been for some time extremely fortunate, was at last defeated and killed in 1773. Egypt has been since torn by civil wars between the adherents of Ali, and other beys or princes, who rose on his ruins. Alternately expelled from Cairo, they finally agreed to a compromise in 1789. From this period nothing of importance occurs till 1799, when this coun-

try was invaded by the French under Bonaparte; they landed at Alexandria, which surrendered to them after a feeble resistance. They then proceeded to Rosetta and Cairo, which they took without much difficulty. They would probably have subdued the whole country, and finally overturned the Turkish empire, had not their progress been arrested at St. John d'Acre, by the gallant Sir Sidney Smith, who defended that inconsiderable place with such invincible courage and skill, that the enemy were compelled after innumerable desperate attacks to abandon the attempt. They were shortly afterwards deserted by their commander, who has returned to France. A treaty was entered into by Sir Sidney Smith, which did not meet the approbation of the British government. The country was subsequently abandoned by French and British, and has since submitted to the nominal authority of the Turks, but is really subject to the Bey, or Pacha.

Ehrenbreitstein, very ancient castle, in the electorate of Treves, on the E bank of the Rhine, opposite Coblentz. It is seated on the summit of a stupendous rock, not less than 800 feet above the level of the river, and is thought, when supported by a competent garrison, to be impregnable. It has a communication with Coblentz, by subterraneous passages, cut out of the solid rock; and is plentifully supplied with water from a well 280 feet deep. The prospect from this castle is majestic, extensive, and variegated; and the stream at its foot is decorated with two small islands, on each of which is a convent. In the vale of Ehrenbreitstein, is the old palace of the elector.

Elba, island on the coast of Tuscany, remarkable for mines of iron and loadstone, and quarries of marble.

Elba, island in the Mediterranean Sea, between Italy and the island of Corsica, and separated from Tuscany by the channel of Piombino. It was known to the Greeks by the name of *Æthalia*, and to the Romans by that of *Iva*. The form of the island is very irregular, the length from E to W is about 14 miles, and the greatest breadth, which is at the W end, is between eight and nine miles; and contains a population of 13,700 souls. The whole island presents numerous mountains, separated by deep valleys, and some plains of considerable extent; the southwest part is the most elevated, and are composed of black and white granite, susceptible of a fine polish. Elba has been renowned for its mines of iron and loadstone, for a period beyond the reach of history. Aristotle speaks of them as opened from time immemorial; it has also quarries of fine marble. On the NE part, is the mountain, or mine of iron ore, which supplies most of the forges of Italy. The tower of Volterrajo stands on this mountain, on a shaggy rock. The view from this tower is wonderfully fine every way, as the eye overlooks the whole island, that of Corsica, many scattered islets, the channel of Piombino, and a great range of continent. On the E side of the mountain, stands Rio, a village inhabited by miners. Under it breaks out the only rivulet in Elba which does not run above a mile before it falls into the sea; but the water gushes out of the rock in such abundance, that it turns 17 mills in that short course. The soil of Elba is very narrow, with scanty room for cultivation, and few places level enough for corn, producing little more than six months provisions for its inhabitants: but the island is so situated, that it can, in spite of a blockading fleet, be always supplied with provisions, and the garrison with reinforcements. The wine is good, if made with care and properly kept; the fruit of its standard trees are excellent, though not in great plenty; orange and lemon trees thrive very well in the sheltered valleys and narrow plains near the sea. There are several springs of excellent

water in the island; and the climate is much milder than the adjacent continent, for it produces many fruits and plants that cannot stand the Tuscan winters. Among the animals and birds, are wild boars, hedge-hogs, partridges, quails, canary-birds, nightingales, crotolans, &c. It has no rivers; but there are a number of rivulets. This island was held, with Piombino, by the Appiani, as a fief of the empire, till Charles V. thought proper to transfer it to Cosmo I. duke of Florence, that he might rescue it and the adjacent coasts from the Turks and French. Before the French revolution, it was subject to the prince of Piombino, except Porto Ferrajo, and Porto Longone, the former belonging to the duke of Tuscany, and the latter to the king of Naples; but in 1801, the French became possessed of the whole island. In consequence of the late political events in Europe, this island has attracted a considerable degree of interest, on account of Napoleon Buonaparte, emperor of the French, having chosen it for his future residence. By the treaty concluded with him in April, 1814, which was guaranteed by all the powers of Europe, the full sovereignty of the island is vested in him, as his sole property, during the remainder of his life; and to form a separate principality. On the 4th of May following, he landed with his suite, at Porto Ferrajo, (which he left on the 26th of February, 1815, on his last expedition into France) the capital of the island. Lon. 16 15 E. lat. 42 50 N.

Elephanta, island on the W coast of the Deccan of Hindoostan, five miles from the castle of Bomby. It contains one of the most inexplicable antiquities in the world. It is about 3 miles in compass and consists of almost all hill, at the foot of which you land you see the figure of an elephant, of

the natural size, cut coarsely in stone. An easy slope then leads to the portal of a magnificent temple, hewn out of the solid rock. It is an oblong square, 80 feet long, and 40 broad. The roof which is about 10 feet high, is cut flat, and is supported by regular rows of pillars, with capitals resembling large cushions, as if pressed by the incumbent mountain. At the further end are three gigantic figures, which were mutilated by the absurd zeal of the Portuguese, when this island was in their possession. Elephants was ceded to the English by the Mahrattas.

Engadina, country of the Grisons, in the mountains of the Alps. It is divided into Upper and Lower, extending along the banks of the river Inn, from its source to the Tirolese. Upper Engadina is a beautiful valley, yet, on account of its elevation, produces nothing but rye and barley. The winter sets in early, and even in summer, the air is cold and piercing, and the corn occasionally much damaged by the hear-frost.

Engelberg, valley of Switzerland, 10 miles long, entirely surrounded by very lofty and barren mountains, and bounded by the cantons of Bern, Uri, and Underwalden. It was formerly subject to the abbot of a Benedictine monastery of the same name, who was under the protection of the cantons of Lucern, Uri, Schweitz, and Underwalden. The romantic scenery of this country has always delighted the traveller, and engaged the attention of the naturalist. Glaciers, of a very great extent, and extremely diversified, are found on the side of very fertile mountains, and exhibit singular points of view. There is abundance of fine black marble, white veined; a vitriolic earth, slate impregnated with vitriol; small crystals, called Swiss diamonds; silver, and vitriol. The abbey is 12 miles SW of Altdorf. See *Titlisberg*.

Engia, ancient Saronic gulf of Greece, between Livadia and the Morea. In ancient times it separated Attica and Megara from Argolis.

England, the southern part of the

Island of Great Britain, is bounded on the E by the German Ocean; on the S by the English channel; on the W by St. George's channel, the principality of Wales, and the Irish sea; on the N by the Cheviot hills, and by the river Tweed. Its extent is computed at 58,335 square miles; and the population in 1811, amounted to 9,499,400. Its external surface somewhat resembles the form of a triangle, and from the South Foreland in Kent, which may be termed the E point of the triangle to Berwick upon Tweed, which is the N point, its length is 345 miles. From that point to the Land's end in Cornwall, which is the W, it is 425; and the breadth thence to the South Foreland, is 340. The face of the country affords all that beautiful variety which can be found in the most extensive tracts of the globe; not, however, without romantic, and even dreary scenes, lofty mountains, craggy rocks, black barren moors, and wide uncultivated heaths; and yet, few countries have a smaller proportion of land absolutely sterile and incapable of culture. The richest parts are, in general, the midland and southern. Towards the N it partakes of the barrenness of the neighbouring Scotland. The E coast is, in many parts, sandy and marshy. A range of rude and elevated land, sometimes rising into lofty mountains, extends from the borders of Scotland to the very heart of England, forming a natural division between the E and W sides of the kingdom. Cornwall is also a rough hilly tract; and a similar character prevails in part of the adjacent counties. These mountainous tracts abound with various mineral treasures. The rivers are numerous; and the most considerable of them are the Thames, Severn, Humber, Mersey, Medway, Trent, Ouse, Tyne, Tees, Eden, Avon, and Dee. The lakes are neither numerous nor extensive, and are chiefly in the NW counties: those of Westmoreland and Cumberland, in particular, exhibit such varieties of beautiful scenery, as to become the object of summer excursions from every part of the country. With respect to climate, England is situate in the N part of the temperate zone, so that it enjoys but a scanty share of the genial influence of the sun. Its atmosphere is inclined to chillness and moisture, subject to frequent and sudden changes; and is more favourable to the growth, than to the ripening of the products of the earth. No country is clothed with a more beautiful and lasting verdure; but the harvests, especially in the northern parts, frequently suffer from unseasonable rains.

The rigours of winter, however, and the heats of summer, are felt here in a much less degree than in parallel climates on the continent; a circumstance common to all islands. The whole country, some particular spots excepted, is sufficiently healthy; and the longevity of its inhabitants is equal to that of almost any region. All its most valuable productions, both animal and vegetable, have been imported from foreign countries, and have been kept up and improved by constant attention. England has now no other wild quadrupeds than some of the smaller kinds; as the fox, badger, marten, otter, hare, rabbit, squirrel, &c. On the other hand, every kind of domestic animal, imported from abroad, has been reared to the greatest degree of perfection. The horse has been trained up for all the various purposes of strength and swiftness, so as to excel in those qualities the same animal in every other country. The horned cattle have been brought to the largest size and greatest justness of shape. The different races of sheep are variously distinguished, either for uncommon size, goodness of flesh, and plenty or fineness of wool. The deer of its parks, which are originally a foreign breed, are superior in beauty of skin, and delicacy of flesh, to those of most countries. Even the several kinds of dogs have been trained to degrees of courage, strength, and sagacity, rarely to be met with elsewhere. The improvement in the vegetable products of this island is not less striking than in the animal. Nuts, acorns, crabs, and a few wild berries, were almost all the variety of vegetable food which its woods could boast. To other countries, and to the efforts of culture, it is indebted for corn, esculent roots, and plants, and all its garden fruits. The rivers and seas of England are stocked with a great variety of fish, which yield a plentiful article of provision to all ranks of people. The manufactures and commerce of this country are vast, extensive, and various: in the woollen, linen, cotton, and hardware manufactures in particular, it has long maintained a pre-eminence; nor must the recent one of elegant earthenware be omitted; and though nature has denied it the rich fruits of other countries yet the manufacture, if it may be so called, of home-made wines, in imitation of the foreign, has been brought to an uncommon degree of perfection. The English manufactures have been lately estimated at the annual value of 63,000,000*l.*; and supposed to employ 1,585,000 people; of which sum the woollen manufacture is

stated to produce about 15,000,000; the leather 10,000,000; the iron, tin, and lead, 10 000 000; and the cotton 9,000,000. The government of England is a limited monarchy; the legislative power residing in the king, lords, and commons; and the executive in the king, the great officers of state, the judges, and the inferior gradations of magistracy. The army, during the late war, was supposed to exceed 170,000, with 30 000 fencibles, and 80,000 militia. But the great rampart and supreme glory of England consist in her Navy, which in size, strength, and number of ships, far exceeds any thing on record in the history of the world. This, indeed, must be apparent to every one who examines the list of ships and vessels into which the British naval force is divided, according to one of which, at the conclusion of the war, there were 256 ships of the line, 39 of 40 from to 50 guns, 257 frigates, 16 fire-ships, 219 brigs, 33 cutters, 103 schooners or luggers, and making a total of 1113 ships and vessels of war exclusive of the hired armed vessels, which are chiefly employed in protecting the coasting trade. From this immense fleet, the number of seamen amounts to 120,000, a number which no other country, ancient or modern, could have supplied. The civil division of the country is into six circuits, and 40 counties: these last are subdivided into wapen-takes or hundreds, and parishes. In each of the circuits, for the most part, two of the judges administer justice twice a year. They are, 1. The Home Circuit, which contains the counties of Hertford, Essex, Kent, Surry, and Sussex. 2. The Norfolk, containing Buckingham, Bedford, Huntingdon, Cambridge, Suffolk, and Norfolk. 3. The Oxford, containing Oxford, Berks, Gloucester, Worcester, Monmouth, Hereford, Salop, and Stafford. 4. The Midland, containing Warwick, Leicester, Derby, Nottingham, Lincoln, Rutland, and Northampton. 5. The Northern, containing York, Durham, Northumberland, Lancaster, Westmoreland, and Cumberland. 6. The Western, containing Hants, Wilts. Dorset, Somerset, Devon, and Cornwall. Two other counties, Middlesex and Chester, are not included in any circuit. The established religion, as contained in the Articles of the Church of England, is Calvinism; but these articles are interpreted, by the clergy in general, according to the more liberal principles of Arminius; and all other religions are tolerated. The ecclesiastical division of England is into two archbishoprics, called the provinces of Canterbury and

York. That of Canterbury contains the dioceses of London, Winchester, Bath and Wells, Bristol, Chichester, Ely, Exeter, Gloucester, Hereford, Litchfield and Coventry, Lincoln, Norwich, Oxford, Peterborough, Rochester, Salisbury, and Worcester, beside the four Welsh bishoprics of St. David, Bangor, Landaff and St. Asaph. The province of York contains the dioceses of Durham, Chester, and Carlisle, and that of Sodor and Man. Every prelate of the sees enumerated, that of Sodor and Man excepted, has a seat in the house of lords. London is the capital, and the metropolis also of the whole British empire. For the population and other remarkable objects in the topography of England, see the respective counties.

Erie, large lake of the United States and Upper Canada, extending in form of an oval, SW by W, and NE by E, 280 miles in length. It is about 65 miles wide where broadest. Extreme south part at N lat. 43, extreme S. N lat. 41 20 and reaching from one degree E, to 6 W lon. W C. The area of this lake is about 12,000 square miles. When compared to any of the other four great Ca-

nadian lakes, lake Erie is shallow, seldom exceeding 40 or 50 fathoms. Its shores are in some places low and sandy, and in others rock bound. The mouths of its rivers, Detroit and Niagara excepted are shallow, and not very favourable to commerce. Its position, however, and the fertility and extent of the adjacent regions, superinduces a very extensive trade on this great inland sea. It receives from the NW by the Detroit, the immense volume discharged from the Superior, Huron, and Michigan. From the peninsula of Upper Canada, the Ouse flows into Erie from the NW, from the peninsula of Michigan, it receives the Huron and Raisin rivers; from Ohio, Pennsylvania, and New York, Maumee, Portage, Sandusky, Huron, Vermilion, Black, Cuyahoga, Grand, Ashtabula, Conneaut, Cattaraugus, and Buffalo rivers. The United States, possess at present, it is probable more than 3,000 tons of shipping on this lake. Independent of Detroit and Niagara, Erie has, at seasons of high water, a natural communication with Illinois river. The Great Western Canal of New York, will unite it with the Atlantic Ocean through the Hudson, as will that by Cuyahoga and Muskingum river with the Ohio. The whole forming an unequalled interior chain of commercial connexion.

Erie, Fort, strong fortification in the township of Bertie, Upper Canada; situated on the north shore of lake Erie, and on the west bank of the Niagara river, 27 miles south by east of Niagara Fort, and 18 above the carrying place at the Falls of Niagara. It has a barrack for troops and a block house; a company of soldiers are quartered here for the purpose of transporting the public stores. Lake Erie narrows here into the strait, which carries the waters over the great Falls of Niagara; there is a good harbour here for vessels of any size. Fort Erie frequently suffered from the western gales, which occasion the lakes sometimes to rise very considerably. The new fort is projected on a small height in the rear of the present garrison. N lat. 42 53 17 W, long. 79 from London. W C 2 00 W.

Erie, post town, borough, and seat of justice, in Erie county, Pennsylvania. It is the Presquile of the French, but stands on the main land, opposite the peninsula, from which its name is derived. The best part of the village extends in one street from the harbour, on the road towards Pittsburg. The harbour is formed by the main shore, peninsula and a reef of sand. Over the latter, without an extraordinary swell of the lake there is only 8 feet water; the depth and anchorage within, are commodious and safe. The trade of this town is considerable and increasing. A turnpike road extends from there to Pittsburg, distant from each other 136 miles. It is 80 miles SSW from Buffalo. It has a number of neat dwelling houses, several stores, a court-house, jail, and printing office. Population in 1820, 635.

Euphrates, one of the most celebrated rivers in the world, and the principal of Turkey in Asia. It has its rise near Erzerum, in Armenia, from two sources on high mountains covered with snow most part of the year. The plain of Erzerum is enclosed between these two fine streams, which, when united, are called the Euphrates, or the Frat. After this junction it begins to be navigable for boats; but the channel is so rocky, that the navigation is not safe. It first divides Armenia from Natolia, then Syria from Diarbeck; after which it runs through Irac-Arabia, and receives the Tigris on the confines of the Persian province of Kusistan; it then waters Bussarah, and 40 miles SE or it enters the gulf of Persia. It is also the NE boundary of the great desert of Arabia.

Lon. 1 14 E. lat. 49 1 N.

EUROPE, one of the four general parts of the world, bounded on the N by the Frozen Ocean, on the S by the Mediterranean, on the W by the Atlantic and Northern Ocean, and on the E by Asia. From cape St. Vincent to the mouth of the Ob, it is near 3,600 miles in length; and from cape Matapan in the Morea, to the North cape in Lapland, about 2,200 in breadth. It is much less than either Asia or Africa, but surpasses them in many particulars. It is entirely within the temperate zone, except a small part of Norway and Russia; so that there is neither the excessive heat, nor the insupportable cold of the other parts of the continent. It is much more populous, and better cultivated, than either Asia, or Africa; is fuller of villages, towns, and cities, and the buildings are stronger, more elegant and commodious. The inhabitants are all whites, and, for the most part, much better made than the Africans, or even the Asiatics. With regard to arts and sciences, there is no manner of comparison; nor yet in trade, navigation, and war. Europe contains at present the Christian governments of Sweden, Russia, Prussia, Denmark, Great Britain, France, Spain, Portugal, Sardinia; the two Sicilies, the Popes dominions; and several minor states in Italy; Austria, Bavaria, Württemberg and Saxony, with other minor states of Germany. Mahometan Europe embraces all Greece, Epirus, or Albania, Macedonia, Thessaly, Thrace, Bulgaria, Servia and Bosnia, with part of Croatia, and Herzegowina: or briefly, all the continent and most of the islands of Europe, SE from the Save and Danube rivers.

The languages are the Italian, French, Spanish and Portuguese, which are dialects of the Latin; the German, Flemish, Dutch, Swedish, Danish and English, which proceed from the Teutonic; the Slavonian, which reigns (though in disguise) in Poland, Russia, Bohemia, and a great part of Turkey in Europe; the Celtic, of which there are dialects in Wales, the Highlands of Scotland, Ireland, Bretagne in France, and Lapland; the modern Greek, and several others. The principal rivers are the Danube, Dniester, Dnieper, Vistula, Volga, Dwina, Bog, Don, Scheldt, Rhine, Rhone, Seine, Loire, Garonne, Groyne, Tajo, Thames, and Severn. The principal lakes are those of Constance, Geneva, Lausanne, Wenner, Ladoga and

Onega. The chief mountains are the Alps, Appennines, and Pyrenees. The prevailing religion is the Christian divided into Greek, Romish and Protestant churches. There are also Jews in every country, and Mahometanism is the established though not general religion in the Turkish empire.

Eustis, lake of the United States, one of the source of Yellowstone river. Lon. W C 31 3 W lat. 45 N.

Exeter, capital city of Devonshire, situated on the river Ex, 10 miles N of the British channel. It is large, populous and wealthy, with gates, walls, and suburbs; the circumference of the whole is about three miles. Ships of burden formerly came up to this city; but the navigation was almost destroyed by Henry Courtney, earl of Devon, and though repaired, could not be restored to its former state. Its port, therefore, is at Topsham, five miles below. It has 13 companies of tradesmen, a manufacture of serges and other woollen goods, an extensive foreign and domestic commerce, and a share in the fisheries of Newfoundland and Greenland. It is governed by a mayor, sends two members to parliament, and is 68 miles SW of Bristol, and 173 W by S of London. Lon. 3 33 W. lat. 50 44 N.

Flaz, town of Spain, in Catalonia, strong both by art and nature. It is built on a peninsula in the river Ebro, where it makes an elbow, which serves the town instead of a ditch, and may be conducted quite round it. The side where the river does not pass, is covered by mountains, and defended by a castle on an eminence; and near it is a water fall. It is 20 miles S of Lerida. Lon. 0 26 E, lat. 41 15 N.

Florence, capital of the duchy of Tuscany, and one of the finest cities in Italy. It is surrounded on all sides but one with high hills, which rise insensibly, and at last join the lofty mountains called the Apennines. Towards Pisa, there is a vast plain of 40 miles in length; which is so filled with villages and pleasure-houses, that they seem to be a continuation of the suburbs of the city. Independent of the churches and palaces of Florence, most of which are very magnificent, the architecture of the houses in general is in a good taste; and the streets are remarkably clean, and paved with large broad stones chiseled so as to prevent the horses from sliding. The city is divided into two unequal parts by the river Arno, over which there are no less than four bridges in sight of each other. Florence is a place of some strength, and contains an archbishop's see and a university. The number of inhabitants is calculated at 80,000. Florence is 45 miles S of Bologna, and 1 5 NW of Rome. Having an entire outline of 1490 miles. Area 54,000 square miles; 34,560,000 acres, between lat. 25 and 31 N. Extending through 6 degrees of latitude, considerable diversity of seasons must be experienced in Florida; but from the uniformity of the general surface, the whole extent exhibits none of those rapid transitions of seasons which can only arise from great inequality of relative elevation. The interior of the country remains but imperfectly known. As far, however, as correct information has been received, the greatest part of this large peninsula, is composed of a very inferior soil, with exceptions found near, and along the streams. The vegetable productions are numerous and important. Amongst the valuable cultivated plants, may be enumerated, cotton, sugar cane, rice, indigo, tobacco, Indian corn, olive tree, peach, orange, lime and fig tree. It remains undetermined, whether or not the coffee plant can be cultivated in Florida.

Florida was discovered in 1512, by John Ponce de Leon, and named Florida, from having been discovered on Palm Sunday, "Pasqua Florida." The first civilized colony in this country, was planted by the French in 1562, under Francis Ribault. The French colony was surprised in 1565, and the colonists murdered by the Spaniards. St. Augustine was soon after founded, and the Spaniards remained undisturbed possessors, until 1666, when St. Augustine was taken and plundered by an English squadron under John Davis. Pensacola was founded by Don Andre de la Riola, in 1699. The country was frequently attacked by the French and English, but continued a Spanish province until 1763, when it was ceded to Great Britain. In 1783, it was again ceded to Spain. On the 22d February, 1719, by the treaty of Washington, Florida was ceded by Spain to the United States. This treaty was on the 24th October, 1820, ratified by the Cortes and king of Spain; and on February 22d, 1821, ratified by the Congress of the United States. Florida is now a territory of the U. S. under the first grade of territorial government;

Fox river. This fine and very important stream rises to the NW from Green Bay interlocking with the sources of Oniscousin. Both streams, in the higher part of their course, flow nearly south, upwards of 200 miles; they then approach within one and a half miles of each other, and thence turn; the Oniscousin SW, and Fox river NE. The portage from the Fox to Oniscousin is one of those singular situations, which the interior of America affords, where nature seems to have made preparation for the operations of human intercourse. The intervening ground is level prairie, over which at time of high flood loaded canoes are easily navigated. Fox river flows by a gentle course as far as the narrows, through a range of highland passing W off lake Michigan. Below this rocky pass it expands into Winnebago lake, from which it again issues by a course nearly N to Green bay, which it enters at Fort Brown. The entire comparative course of Fox river is about 300 miles.

Francc, country of Europe, bounded on the N by the English channel and the Austrian Netherlands; on the E by Germany, and the Alps, which separate it from Switzerland, Savoy, and Piedmont; on the S by the Mediterranean Sea and Spain, from which kingdom it is divided by the Pyrenees; and on the W by the Atlantic Ocean. From the Pyrenees in the S, to Dunkirk in the N, its extent is 625 miles; and something more from the most easterly part of Alsace to the most western point of Bretagne, which province, it must be observed, extends above 100 miles further into the Ocean than any other part of the country. At the decline of the Roman empire, this country, then called Gaul, was invaded by the Franks, (a people who inhabited the borders of the Rhine) and entirely subdued by them, under the conduct of their leader, or king, Clovis. Their kings were always of the same family, that of Clovis. The kingly government of France continued from Clovis, who established himself at Soissons, in the year 486, till Hugh Capet obtained the crown in 987; and whose descendants are now on the throne. There is no country of Europe more beautiful, or more agreeable to live in than France; the air in general is pure and wholesome, and the change of seasons is less inconvenient than in almost any other. It is not subject to such severe cold as Germany, nor to the violent heat of Italy and Spain. In the southern parts the winters are indeed sharp, but of short duration. The seasons are more regular than in England. The soil, diversified by mountains and plains, is watered by a great number of large and small rivers, which serve at once to fertilize the country, and convey merchandise from one extremity of the nation to the other. The industry of the inhabitants, joined to its natural advantages, render it one of the most fertile countries in Europe. It abounds in corn, legumes, fruit, wines, oil, pasture, hemp, and flax, sufficient for its own inhabitants, and much to spare.

Here are mines of iron, lead, and copper; there are likewise some of silver and gold, but the last are not rich enough to defray the expenses of working. The chief productions of France are wines, as Champagne, Burgundy, claret, &c. brandy, vinegar, fruit, such as prunes and prunelloes, dried grapes, pears, apples, oranges, and olives; corn, salt, hemp, flax, silk, resin, oil, soap, cork, kid-skins, perfumes, drugs, &c. The manufactures are silks, such as lustrings, modes, brocades, velvets, &c. woollen cloth, linen, coarse and fine lace, paper, china, of exquisite beauty and fineness, soap, &c. The principal rivers are the Seine, Loire, Rhone, and Gironde; and there are many others, which gave name to the departments in the new geographical division of this country. The most considerable mountains are the Alps, Pyrenees, Cevennes, and Vosges. France was an absolute monarchy under her kings, from the time of Clovis to the death of Lewis XVI. in 1793. It was divided into several military governments or provinces; namely, Alsace, Angoumois, Anjou, Armagnac, Artois, Aunis, Auvergne, Barrois, Basques, Bearn, Berry, Bigorre, Blaisois, Boulonnois, Bourbonnois, Bresse, Bretagne, Burgundy, Cambresis, Champagne, Couserans, Dauphiny, Forez, Foix, Franche Comte, French Flanders, Gascony, Gervaudan, Guienne, French Hainault, Isle of France, Languedoc, Limosin, Lorraine, Lyonois, Marche, Maine, Marsan, Navarre, Nivernois, Normandy, Orleansois, Perche, Perigord, Picardy, Poitou, Provence, Quercy, Rouergue, Rousillon, Saintongue, Soissonois, Touraine, Velay, and Vermandois. These varied much from each other in point of extent and importance, and there were others of still inferior consideration. The established religion was the Roman catholic; and the ecclesiastical division of the country was into 18 archbishoprics and 113 episcopal sees, exclusive of Avignon, Carpentras, Caivailon, and Vaison, which belonged to the pope. But in 1789, a wonderful revolution took place. The deranged state of the finances of the country had induced Louis XVI to convoke, first an assembly of the notables, and next (on the ineffectual result of their deliberations) the states general, which had not been assembled since 1614. They consisted of three orders; the nobility, the clergy, and the commons. The last were double the number of the other two orders when united; and when the states assembled, on the 5th of May, at Versailles, a contest arose, whether the three orders should make three distinct

houses, or but one assembly. The commons insisted upon the latter, and, assuming the title of the National Assembly, declared, that they were competent to proceed to business, without the concurrence of the two other orders, if they refused to join them. The nobility and clergy found it expedient to concede the point, and they all met in one hall. In the mean time, Paris was encircled by 50,000 men, with the apparent view of coercing that city, if necessary. Notwithstanding this, on the removal of the popular minister, M. Neckar, in July, a dreadful insurrection ensued, on the 14th of that month, in Paris; the military refused to fire upon the people; the Bastille was taken by the citizens, and the governor and some others were beheaded. On the 17th the king visited the Hotel de Ville in Paris, and surrendered himself to his people. The national assembly now proceeded to the most extraordinary measures: they abolished nobility, and the whole feudal system; confiscated the possessions of the clergy; rendering them dependent on a public allowance; and suppressed all the religious houses. The monarchy itself, divested of its formidable prerogatives, became one of the most limited in Europe. In October, in consequence of a dreadful riot at Versailles, the king, the royal family, and the national assembly, removed to Paris. The king was now, in fact, a state prisoner, treated with the formalities appendant to royalty, but watched in all his motions. From this situation he attempted to escape, in June 1791, with the queen, his sister, the dauphin, and his daughter; but they were arrested at Varennes, and conducted back to Paris. Such, however, was then the moderation of the popular party, that the national assembly admitted the king's apologetical explanation of his conduct, and even declared his person inviolable. This was one of the articles of the new constitution, which they completed soon after, and it was accepted by the king in September, when a new national assembly was elected. In April 1792, the king went to the national assembly, and proposed to them to declare war against the king of Hungary and Bohemia. War was accordingly declared; but the king was suspected of acting in concert with the enemy, and with the emigrant princes, who were in arms against their country. In August, the mayor of Paris appeared before the national assembly, and demanded the deposition of the king. Before they could deliberate on this demand, a dreadful insurrection ensued; the Thuilleries

(the royal residence) was attacked; the Swiss guards were massacred; and the king and royal family took refuge in the national assembly. That body instantly decreed the suspension of royalty, and the convocation of a national convention. The king and his family were conveyed to the Temple, and there kept in close confinement. The convention met on the 21st of September, and instantly decreed the formation of a republic. In December, they decreed, that the king should be tried before them. The trial accordingly took place; and this tribunal (notwithstanding the constitution had decreed his person inviolable) condemned the unfortunate monarch, who was beheaded, in the Place de la Revolution, lately the Place de Louis XV. on the 21st of January 1793. All Europe exclaimed against the injustice and cruelty of this proceeding. Powers, hitherto neutral, were eager to take part in the war; and the new republic, in addition to the arms of Austria, Prussia, Sardinia, and the empire, had to encounter the combination of Great Britain, Spain, and Holland. The queen did not long survive her consort: being tried and condemned by the revolutionary tribunal, she was executed in the same place, on the 16th of October. Her fate was a prelude to that of the king's sister, who was also beheaded in the same place, on the 10th of May 1794. The dauphin and his sister remained in confinement; where the former became diseased with swellings, and he died on the 8th of June 1795: the princess was taken the December following to a place, near Basil, on the confines of Germany, where she was exchanged for some French deputies, who had been some time prisoners to the emperor. Various factions successively seized the helm of government, and, in their turn, were overthrown; the prisons were crowded in every part of the republic; the scaffolds streamed, almost incessantly, with blood; and many of the most popular patriots, and of those who had voted for the death of the king, perished on the scaffold, or in exile and misery; while insurrections, proscriptions, and massacres, became, in a manner, only common occurrences. By the conclusion, however, of the year 1794, this reign of despotism and terror gave place to a more moderate system: and although, at one period the shutting up of churches, and the formation of a new calendar (by which the year was divided into decades instead of weeks) indicated open hostility to the christian religion; the convention found it necessary, at last, to conform so far to

the prejudices of the people as to declare publicly their acknowledgment of a Supreme Being, and of the immortality of the soul, and to permit again the exercise of religious worship; abolishing, however, all clerical distinctions, and leaving the whole maintenance of the ministers to the benevolence of the people. With respect to the war, it may be sufficient to state, in general, that after four campaigns, in which great reverses of fortune were experienced, the French nation before the conclusion of 1795, were in the entire possession of Savoy, and of the Austrian and Dutch Netherlands; and had made such progress in Holland, Spain, Italy and Germany, as to procure a peace with Prussia and Spain, and form an alliance with Holland. Their commerce, however, was ruined; and their finances were supported by a vast emission of compulsive paper currency, and by plunder and confiscation: their armies nevertheless fought with ardour, and in 1796, under general Bonaparte, subdued the whole of Lombardy; and, after the capture of Mantua, penetrated through the Tyrol, and threatened the city of Vienna, that the emperor commenced a negotiation for peace. In the mean time, the French turned their arms against Venice, which government they revolutionized; and at the conclusion of the treaty of peace with the emperor of Germany, signed at Campo Formio, Oct. 17, 1797, they ceded the city and the greater part of the territory to Austria. In the beginning of 1798, a congress of deputies from the states of Germany met at Rastadt, to negotiate a peace for the empire, with French plenipotentiaries appointed for that purpose, which came to no final adjustment: but during its continuance the French obtained possession of Mentz, forced Ebrenbreitstein to surrender by a blockade, and sent general Bonaparte with a formidable army into Egypt; the emperor of Germany formed an alliance with Russia; the Turks declared against France, on account of the invasion of Egypt; and the flames of war, which had been for a time suppressed, burst forth with redoubled fury. The French remonstrated to the emperor of Germany on the march of the Russian troops, and receiving no satisfactory answer, passed the Rhine, under general Jourdan, on March 5, 1799. Hostilities were at the same time commenced by the French troops in the Grison country, where they gained several advantages; but on March 25, the army under Jourdan suffered a complete defeat by the archduke Charles, near Stockach, and was com-

pelled to recross the Rhine. The Russian troops, under general Suwarrow, soon after joined the Austrian army in Italy, of which that general took the command. The success of the allied armies were so rapid and decisive, that by the end of August the French were almost entirely driven out both of Italy and Switzerland. But in the latter a reverse of fortune took place ; for the republican armies having been greatly reinforced, general Massena, on Sept. 25, at Zurich, totally defeated the Austro-Russian army, under general Hotze, who was killed : general Suwarrow, who had entered the country from Italy, finding it impossible to join his defeated allies, retreated over the mountains into Germany ; and soon afterward the Russian troops were ordered home. The affairs of the republic in Egypt appeared not prosperous, and general Bonaparte, having found means to escape thence, arrived at Paris in October. He found the authority of the directory was greatly weakened ; and this one man, aided by the bayonets of a few soldiers, affected another revolution on the 10th of November, by which the directory was abolished, and three consuls appointed to govern the republic. A new constitution was afterward formed, in which the whole of the executive and almost all other power was vested in the first consul, general Bonaparte. In April, 1800, the campaign in Italy commenced, and for the most part, with loss to the French, till June 14, when Bonaparte, who had recently arrived, gained a decisive victory over the Austrians, at Marengo, which reinstated them in the full possession of that country. The war in Germany was prosecuted with vigour by the French, who pursued their successes into the territories of Austria, where, in December, they concluded an armistice with the emperor ; and a treaty of peace was signed on the 3d of February, 1801, at Luneville, France now endeavoured to negotiate a peace with Great Britain, the preliminaries of which were settled in London on the 1st of October, and the treaty was signed at Amiens on the 27th of March, 1802 ; but this treaty held little more than a year, the French deeming it violated by the English refusing to evacuate Malta. Bonaparte was now appointed consul for life, with power to nominate his successor ; but his ambition aspired to the throne, and on the 20th of May, 1804, at the request of the senate, he assumed the title of Emperor of the French, and he was shortly afterward crowned by the pope, who was ordered to repair to

Paris for that purpose. War in Germany was again renewed in 1805, and the grand army of the French, headed by the emperor Napoleon, crossed the Rhine on the 1st of October. His success and rapid progress were such, that after the battle of Austerlitz, on the 2d of December, the emperor of Germany was necessitated to negotiate for peace, and a treaty between the two emperors was signed at Presburg on the 26th of that month. In 1806, many of the princes of Germany entered into an alliance with France, and a treaty, called the Confederation of the Rhine, under the protection of Napoleon, was signed on the 12th of July at Paris. Towards the latter part of the same year, the king of Prussia took the field against France ; but all his measures were marked by precipitation, indecision, and a total want of resource, on any unexpected change of circumstances. Instead of waiting to be joined by the Russian army, who was then on its march to assist him, he ventured on a battle alone with the French, (now strengthened by the forces of the Confederation) at Jena, on the 14th of October, which ended in the total destruction of the Prussian army. The consequence was, Russia was now left single, as it were, in the contest ; and after several battles, the French at length succeeded in giving them a total defeat at Friedland, on the 14th of June, 1807, which was decisive ; and a treaty of peace was signed at Tilsit, on the 9th of July following. In the beginning of 1808, the designs of Napoleon began to develop themselves respecting Spain ; and, flushed with the conquest of Prussia, and the brilliant victory which he had gained over Russia at Friedland, he formed the design of seizing the government of Spain, and transferring the crown from the Bourbons to his own family. Having found a pretext for drawing 16,000 of her best troops and sending them out of the country, he marched an army of 80,000 men to depose the king, and place his own brother Joseph on the throne, in which he succeeded. In the following year, however, Austria once more took the field against France. Numerous battles were fought during the months of April and May, with incredible slaughter and various success on each side ; but on the 6th of July, after a whole day spent in manoeuvring, a general engagement took place, in which Napoleon out generalled the archduke Charles, and gained a complete victory. This was the famous battle of Wagram, at which the French took 20 000 prisoners. An armistice was

concluded on the 12th of July, and a definite treaty was also signed and ratified in the month of October following. Soon after his return to Paris, Napoleon, by a formal act of separation, repudiated his empress Josephine, and married Maria Louisa, the archduchess of Austria, whom he espoused with great pomp on the 1st of April, 1810. This event appeared to consolidate his power, and to fix his throne on an immovable basis; and except the war in Spain, the continent of Europe was at peace till towards the month of June, 1812, at which time the French emperor once more marched his army to the north-east of Europe, to attack the emperor of Russia's dominions, who had given him some cause of offence. Passing through Poland, he entered the Russian territory; defeated the armies of the latter at Mohilow and Smolensko; and after the dreadful battle of Borodino, entered the city of Moscow on the 14th of September, with an intention of there fixing his winter quarters. But his career was now drawing towards a close. The houses of Moscow being constructed almost entirely of wood, the governor of the town, Rostopchin, formed the desperate resolution of setting the city on fire, which was so completely carried into effect, at the instant the French army had taken possession of it, that they were foiled in their last resource, and compelled to attempt their retreat, at the moment they considered themselves securely entrenched for the winter. In this crisis of his affairs, the first object of the French emperor, was to offer terms of peace to the Russians, which were rejected; he next proposed an armistice, which was also refused; and on the 19th of October, began his retreat from Moscow. But before the arrival of the French army, however, at Smolensko, the frost had so keenly set in, that it was almost impossible to proceed; and their loss, in the course of a few days, was so great in men and horses, that the army was reduced to a mere wreck. On arriving at Smorgonic, a small town near Wilna, on the 5th of December, Napoleon gave the command of the army to Murat, and immediately departed for Paris. It has been supposed that the loss of the French, in this memorable campaign, was not less than 200,000 men. The remainder of the winter was spent by the hostile powers in vigorous preparations for the campaign of 1813; and notwithstanding the almost entire destruction of his army in the calamitous retreat from Moscow, the French emperor was the first to take the field in the spring of the year. Af-

ter the battles of Lutzen and Bautzen, however, it was soon seen that Russia, although now strengthened by Prussia, was by no means a match for France, without more powerful assistance. Austria, into whose hands the balance of Europe was thrown, now stepped forth to offer her mediation to the contending powers; but finding all her efforts unavailing, after a fruitless negotiation of six weeks, at length joined the allies on the 11th of August. A number of sanguinary engagements soon after took place between the opposing armies with a variety of success, till the month of October, when Bavaria having declared for the common cause, and the allies had collected all their forces together, they determined to hazard a general battle, which was fought in the neighbourhood of Leipsic, on the 16th and 18th of the same month. The result of this battle was the capture of the French rear-guard on the following morning, and the retreat of the French army across the Rhine. The allied army immediately invaded France; and though the issue of the contest there appeared doubtful for a short time, yet the allies, by a skilful manœuvre, at length succeeded in arriving before the gates of Paris, on the 30th of March, 1814, and which was entered by the confederated sovereigns on the next day. As soon as the sovereigns had entered Paris, they declared their intention was not to make any peace with Buonaparte; but recommended to the French, in the mean time, to form a provisional government; and in a few days after, got the senate to pass a vote declaring the dynasty of Napoleon Buonaparte at an end. In this posture of affairs, Buonaparte, whose sway had extended over all the states of Europe, Great Britain excepted, for years, consented to abdicate the thrones of France and Italy, both in his own right and that of his posterity, and to retire upon a pension of 4,500,000 francs, to the island of Elba. The provisional government, at the suggestion of the allies, now restored the ancient family of the Bourbons, and made a tender of the sovereignty to the eldest brother of Louis XVI. who accepted the offer, and ascended the throne of France, with the title of Louis XVIII. A definitive treaty was soon after signed at Paris by all the powers of Europe, on the 30th of June. Napoleon retired to Elba, where he arrived in May, 1814, and remained until February 26th, 1815, when he again left his retreat, sailed to and entered France. The nation declared for him; the king, royal family, and their adherents fled, and

he was once more acknowledged emperor of the French. Great Britain, Prussia, and Russia collected their armies to restore the Bourbons. Austria subsequently acceded, and after a short but sanguinary contest France sunk under the enormous weight opposed to her armies, and on the 18th of June, 1815, at Waterloo a village of Brabant the last hopes of Napoleon perished. His army was defeated—he returned to Paris; abdicated the throne; threw himself under the protection of Great Britain, and was sent to exile, prison and grave, in the island of St. Helena. Louis XVIII. was restored, and France became a regularly limited monarchy.

The Roman Catholic religion is re-established in France, and the ecclesiastical division of the country is into 10 archbishoprics and 50 bishoprics; the protestant religion is also tolerated. As the ancient order of things is now restored, it is necessary to notice the former geographical state of the country. France was divided into 83 departments, nearly equal in extent, instead of the ancient military provinces; and these departments were subdivided into districts, cantons, and municipalities. The names of the departments are Ain, Aisne, Allier, Alps Upper, Alps Lower, Ardeche, Ardennes, Arriege, Aube, Aude, Aveyron, Calvados, Cantal, Charente, Charente, Lower, Cher, Correze, Cote d'Or, Cotes du Nord, Creuse, Dordogne, Doubs, Drome, Eure, Eure and Loir, Finisterre, Gard, Garonne Upper, Gers, Gironde, Herault, Indre, Indre and Loire, Isere, Ile and Vilaine, Jura, Landes, Loir and Cher, Loire, Loire Upper, Loire Lower, Loiret, Lot, Lot and Garonne, Lozere, Mayenne, Mayenne and Loire, Manche, Marne, Marne Upper, Meurthe, Meuse, Morbihan, Moselle, Nord, Nièvre, Oise, Orne, Paris, Pas de Calais, Puy de Dome, Pyrenees Upper, Pyrenees Lower, Pyrenees Eastern, Rhine Upper, Rhine Lower, Rhone, Rhone (Mouths of the) Saone Upper, Saone and Loire, Sarthe, Seine and Oise, Seine Lower, Seine and Marne, Sevres (Two) Somme, Tarn, Var, Vendee, Vienne, Vienne Upper, Vosges, and Yonne. All the countries which the ambition of the government had annexed to its former territory are restored except that part which now constitutes the departments of Mont Blanc and Vaucluse. The number of departments, therefore, are now 85, all of whom appeared in this work; and the account of the late provinces are still retained. The population of the whole is estimated at 30,000,000.

It is a very remarkable fact, that the population of France has regularly increased

since 1789. In that year the inhabitants were 26,300,000; in 1805, 27,700,000 in 1817, upwards of 29,000,000; and at present, 1822, no doubt exceed 30,000,000. The national debt of France considering the efforts made during and subsequent to her revolution, and the heavy contributions of her enemies, is comparatively small. Her annual expenditure is about 150,000,000 of dollars. The revenue nearly an equal sum, but nominally a fraction higher. The French army has been reduced to 90,000 men; and its navy has sunk to utter insignificance. With all its reverses this nation has gained immensely by the revolution. The croud of useless nobility and governmental priests diminished; its internal industry revived, active and flourishing. The literary institutions are on a most respectable footing. There now exists in the kingdom, 26 universities; 36 royal colleges; 3070 primary schools; upwards of 40 divinity schools; about 1400 boarding schools; and near 22,500 primary schools. In all these seminaries are educated nearly 800,000 pupils. Without distracting foreign colonies without paper money, or false credit; and with a mild and limited government, France is now no doubt the most happy and prosperous nation in Europe.

France, Isle of, or Mauritius, island in the Indian Ocean, 200 leagues E of Madagascar. It was early discovered by the Portuguese. After them, the Dutch settled on the SE shore, and gave it the name of Mauritius, in honour of prince Maurice, their slatholder. But they abandoned it, on their acquisition of the Cape of Good Hope. It then remained uninhabited, till the French landed there in 1720. This island is about 45 leagues in circumference. The climate is healthy: but the soil not very fertile. There are many mountains, some of which are so high that their tops are covered with snow: they produce the best ebony in the world. The valleys are well watered with rivers, and are made very productive by cultivation of which indigo is the principal object. The town and harbour are called Port Louis, and are strongly fortified; the town is large and covers a great deal of ground. But in the hurricane months, the harbour cannot afford shelter for more than eight vessels. Here are large storehouses and every thing necessary for the equipment of fleets. The number of inhabitants on the island exclusive of the military, is 8000 whites, and 12000 blacks. Lon. 57 28 E. lat. 20 9 S.

Franklin, county of Pennsylvania, bounded S by Washington county in Maryland; W by Bedford; NW by Huntingdon; N by Mifflin; NE by Perry and Cumberland; and E by Adams; length 30; width 25; area 756 square miles. The surface of this county is highly diversified by mountains, hills and valleys. It is limited by mountains on two sides; on the W and N margin extend the Cove mountain, Tuscarora, and North mountains; and on the SE the South mountain, with the truly fine valley of the Conecocheaque and Conodogwinet intervening. Those two large creeks form nearly a boundary between the limestone and slate formations; leaving the latter to the NW and the former to the SE. The soil of those great rock formations differ essentially, the limestone, in the present state of agricultural science being much the most productive in the growth of valuable cultivated vegetables. *Franklin* county produces as staples, grain, flour, whiskey, apples, cider, live stock, and salted provisions. Its commercial outlet, Baltimore. Chief town, Chambersburg.

Ganges, or *Ganja*, town of Persia, in the province of Eriva, 105 miles S by E of Tefflis. Lon. 45 50 E. lat. 41 10 N.

Ganges, large and celebrated river of Asia, which has its source in two springs on the W side of Mount Kénraiffe, in Thibet. These two streams take their course westward, inclining considerably to the N, for a course of about 300 miles, when meeting the great ridge of Mount Himmaleh, they turn to the S, in which course they unite their waters, and form what is properly called the Ganges. This great body of water now forces a passage through the ridge of Himmaleh, at the distance of 100 miles below the place of its first approach, and, sapping its very foundation, rushes through a cavern, and precipitates itself into a vast basin which it has worn in the rock, at the higher foot of the mountains. The Ganges thus appears, to incurious spectators, to derive its original from this chain of mountains. The mind of superstition has given to the mouth of the cavern, the form of the head of a cow; an animal held by the Hindoos in a degree of veneration, almost equal to that in which the Egyptians held their god Apis. From this second source (as it may be termed) of the Ganges, its course becomes easterly, through the rugged country of Sirinagur, until, at Hurdwar, it finally escapes from this mountainous tract in which it has wandered 800 miles. From Hurdwar where it gushes through an opening in the mountains, and enters Hindoostan, it flows

with a smooth navigable stream through delightful plains, during the remainder of its course to the bay of Bengal, which is about 1350 miles. In the annual inundation of this immense river, the country is overflowed to the extent of more than 100 miles in width; nothing appearing but villages and trees, excepting very rarely, the top of an elevated spot, the artificial mound of some deserted village, appearing like an island. The rise of the water, is, on an average, 31 feet. In a word, it is, in every respect, one of the most beneficial rivers in the world, diffusing plenty immediately by means of its living productions, and secondarily by enriching the lands, affording an easy conveyance for the productions of its borders, and giving employment to many thousand boatmen.

Gawley, river of Virginia, rises in Randolph, and flowing nearly W, separates Greenbrier from Kenhawa counties, enters the right side of Kenhawa, at the great falls.

Gaute or *Indian Appermines*, stupendous wall of mountains, which extend 13 degrees of latitude from Cape Comorin, the S extremity of Hindoostan, to the Tapti, or Surat river, at unequal distances from the coast; seldom more than 70 miles, and commonly about 40; and within one short space only, it approaches within six miles. They rise abruptly from the low country, called the Concan, supporting, in the nature of a terrace, a vast extent of fertile and populous plains, which are so

elevated, as to render the air cool and pleasant. This celebrated ridge does not terminate in a promontory, when it approaches the Tapti; but departing from its meridional course, it bends eastward, in a wavy line, parallel with the river; and is afterwards lost among the hills, in the neighbourhood of Burhampour. In its course along the Tapti, it forms several passes or descents toward that river.

Gayhead, W point of Martha's Vineyard.

Gaza, ancient and celebrated town of Palestine, three miles from the Mediterranean, with a harbour called New Gaza. The foregoing table includes the township of Mount Morris E, and all the other townships of Livingston and Monroe counties west from Genessee river. The two latter counties were formed subsequent to the census of 1820.

Genessee, post town, and township, Livingston county New York, on Genessee river, 30 miles SW by W from Canandaigua. Population 1820, 1598.

Geneva, ancient, large, and populous town, capital of a republic of the same name, and a member of the Swiss confederacy, near the confines of France and Switzerland. It is seated on the most narrow part of the lake of the same name, where the Rhone issues in two large narrow channels, which soon after unite. This river divides the city into two unequal parts. Geneva, which lies partly in the plain on the borders of the lake, and partly on a gentle ascent, is irregularly built. It is the most populous town of Switzerland, containing 24,000 souls. The treaty of alliance which Geneva contracted with Bern and Friburgh, in 1526, may be considered as the era of its liberty and independence; not long after, the dukes of Savoy were deprived of the authority which they possessed over this city; the bishop was expelled; a republican form of government was established, and the reformation introduced. In 1584, Geneva concluded a treaty of perpetual alliance with Zurich and Bern, by which it is allied with the Swiss cantons. Geneva is 40 miles NE of Chamberry, and 136 NW of Turin. Lon. 6 5 E, lat. 46 12 N.

Geneva, Lake of ancient *Leman*, a magnificent expanse of water, in Switzerland, which, from the city of Geneva to Villeneuve, extends 34 miles in length: and its breadth in the widest part, is 12. It is in the shape of a crescent, of which Switzerland forms the concave, and Savoy the convex part.

Geneva, post town, in Seneca township, Ontario county New York, on the NW margin of Seneca lake. In this village is a bank, an academy, and several manufactures; two printing offices, and several places of public worship. The site is uncommonly fine, rising by gentle acclivity from the lake, and affording an elegant prospect of the lake and adjacent country. It is 16 miles E from Canandaigua, and 22 W from Auburn. The population about 2,000.

Geneva, township of Ashtabala county Ohio, on lake Erie. Population, 1820, 315.

Geneva. See *New Geneva*.

Genevieve. See *St. Genevieve*.

Genito, bridge post office, Powhatan county Virginia.

Genovais, duchy of Savoy, of which Geneva and its territory were formerly a part. Annecy is the capital.

Gengenback, town of Suabia, 10 miles SE of Strasburgh. Lon 7 53 E, lat. 48 28 N.

Gengoux de Royal, St town of France, in the department of Saone and Loire and late province of Burgundy, remarkable for its excellent wines. It is seated at the foot of a mountain, 17 miles SW of Chalons. Lon. 4 43 E, lat 46 37 N.

Geniz, St. town of France, in the depart-

ment of Aveiron, 24 miles NE of Rhodes. Lon. 3 0 E, lat. 44 35 N.

Genis, town of Savoy, seated on the Guier, 12 miles W of Chamberry. Lon. 5 30 E, lat. 45 40 N.

Genoa, formerly a republic of Italy, now a province of Sardinia; extending along that part of the Mediterranean called the gulf of Genoa, 152 miles; but its breadth is very unequal, being from eight to 12 miles. Where it is not bounded by the sea, it is bordered from W to E by Piedmont, Montserrat, Milan, Placentia, Parma, Tuscany, and Lucca. It is populous, well cultivated, and fertile near the sea; but the inner parts are mountainous, and barren in several places, having neither trees nor grass upon them.

Genoa, ancient city of Italy, capital of the province of the same name. It is situated at the bottom of a little gulf, partly on the declivity of a pleasant hill; in consequence of which it appears to great advantage from the sea. It is defended on the land-side, by a double wall, which in circumference is about six miles. Genoa is 62 miles SE of Turin, and 225 NW of Rome. Lon. 8 41 E, lat. 44 25 N.

Genoa, post town and township, Cayuga county New York, on the E side of Cayuga lake, 26 miles S from Auburn. Population 1820, 2,585.

Genoa, post village and township in the south part of Delaware county. Population 1820, 493.

George, Fort, strong and regular fortress in Inverness-shire, which has several handsome streets of barracks. It is seated on a peninsula running into the Murray-frith, and completely commands the entrance into the harbour of Inverness.

George, Fort. See *Madras*.

George, Lake, lake of New York. It lies SW of Lake Champlain, and is 35 miles long, but narrow. The adjacent country is mountainous. The scenery around this beautiful sheet of water is high, bold, and extremely romantic. Its vicinity is a favourite resort in summer of the visitants to Ballston and Saratoga springs. It is about 33 long, and with about a mean width of two miles.

George, lake of Florida, in N lat. 29 N about 25 miles in length and 8 wide. This lake is a mere delatation of St. John's river, and is generally surrounded by low marshy grounds. What land is of a sufficient height for cultivation is generally of the first rate quality. The timber, live oak, cabbage palm, cypress, and pine.

George, St. one of the Azores. The inhabitants are employed in the cultivation of wheat, and may amount to 5000. Lon. 28 0 W, lat. 38 39 N.

George, St. island of the United States, in the strait of St. Mary, that forms the

communication between Lake Superior and Lake Huron.

George del mina, *St.* best fort on the Gold Coast of Guinea, and the principal settlement of the Dutch in those parts. It is 30 miles W by S of Cape Coast Castle. Lon. 0 22 W, lat. 5 3 N.

George's, *St.* small island in the gulf of Venice, lying to the S of Venice, to which it is subject. Here is a Benedictine monastery, whose church is one of the finest in Italy.

George's, *St.* largest of the Bermuda Islands, in which is the town of St. George, the capital of all the islands. Lon. 65 30 W, lat. 32 45 N.

George's, *St.* island in the gulf of Mexico, opposite the mouth of the Appalachicola. Lon. W 67 50 W, lat. 29 30 N.

George's Key, *St.* small island of North America, off the coast of Honduras. It is likewise called *Casina* or *Cayo Cassina*. By a convention in 1786, the English Log-wood cutters were permitted to occupy this island.

Georgetown, post village, and township, Lincoln county Maine, on the left side of Kennebec river at its mouth. Population 1820, 1,165.

Georgetown, post village, and township of Madison county New York. Population 1820, 824.

Georgetown, post town, and seat of justice Sussex county Delaware, on the dividing ground between the heads of Indian and Nanticoke rivers, 40 miles S from Dover.

Georgetown, post town and port of entry, District of Columbia, 3 miles W from the Capitol. The site of Georgetown is an acclivity rising by a bold sweep from Potomac river, and Rock creek. It is the seat of a Roman Catholic college, which possesses two large buildings a well chosen library of 7000 volumes, and about 150 students. This town is the mart of considerable commercial business; its progressive population is shown by the following table.

Georgia, country of Asia, called by the Persians *Gurdistan*, and by the Turks *Gurtshi*. It is one of the seven Caucasian nations, in the countries between the Black sea and the Caspian, and comprehends the ancient Iberia and Colchis. It is bounded on the N by Circassia, E by Daghestan and Schirvan, S by Armenia and W by Cuban, or the new Russian government of Caucasia. It is divided into nine provinces. Of these, five form what is commonly called the kingdom of Georgia; and four the kingdom or principality of Imeritia. The last reigning prince ceded this country to Russia on his death, which happened in 1800. The hills of Georgia are covered with forests of oak, ash, beech, chestnuts, walnuts, and elms, encircled with vines, growing perfectly wild, but producing vast quantities of grapes, from which much wine and brandy are made. Cotton grows spontaneously, as well as the finest European fruit-trees. Rice, wheat, millet, hemp, and flax, are raised on the plains, almost without culture. The valleys afford the finest pasturage, the rivers are full of fish, the mountains abound in minerals, and the climate is healthy. The rivers of Georgia, being fed by mountain torrents, are always either too rapid or too shallow for the purposes of navigation. The Georgians are Christians of the Greek communion. The principal mountains are the Caucasus, separating it from Circassia.

Georgia, one of the United States; bounded SE by the Atlantic Ocean; S by Florida; W by Alabama; N by Tennessee, and NE by South Carolina. Length 380 miles; mean width 150; area

within a small fraction of 58,000 square miles, equal to 37,120,000 acres. Lying between lat. 30 22, and 35 N.

Of all the states of the United States, Georgia presents the greatest diversity of climate, and of vegetable production, indigenous and exotic. Its mountainous northern extremity, rises into elevation favourable to the cereal gramina, whilst its southern extremity, on the branches of Apalachicola, St. Mary's and Alapamahah, have a climate sufficiently mild to permit the growth, and even profitable culture of the sugar cane, orange, olive, date and lemon tree. Between those extremes, every valuable vegetable substance produced in the United States, can be brought to perfection. From the much higher temperature of the seasons on the Atlantic coast, than those in the basin of the Mississippi, tender tropical vegetables are cultivated upwards of two degrees of latitude farther north in the former than in the latter region. Sweet oranges are cultivated in Beaufort district, South Carolina. Lat 32 20 N. This fruit ceases in Louisiana, at about lat 30 10 N. Oranges are cultivated along the entire sea board of Georgia, as is the sugar cane. Cotton may, however, be considered as the staple commodity of the state.

Georgia is naturally divided into three zones, presenting very distinct and appropriate features. First, the almost flat, and in many places inundated border; the sand hill tract, between the sea border and the falls of the rivers; and lastly, the hilly and mountainous section above the falls. The first is marked by some very productive islands, but generally, by a marshy, or sterile pine wood soil, reaching 80 or 90 miles inland. The second, or sand hill tract, interspersed with much very valuable river alluvion. The third, the most extensive, most fertile, and much the most salubrious part of the state, reaches from the interior of the middle zone to the utmost limits of the state. On the latter, is cultivated in full perfection, all the grains of the U. S. rice excepted, and an indefinite variety of orchard and garden fruits, and other vegetables. Taken as a whole, this state produces, grain, sugar, cotton, tobacco, indigo, &c.

The interests of education have received their share of attention in Georgia. A university has been planned and partially established, consisting of Franklin college, already in operation at Athens, and of an academy intended to be located in each county. The latter part of the design remains necessarily

incomplete, though several academical establishments have been actually formed. Free schools were projected in 1817, and 200,000 dollars appropriated by the legislature to carry the enlightened project into effect.

The state is judicially divided into four districts, southern, eastern, middle and western. Similar to other states of the United States, the legislature of Georgia, consists of a Senate and House of Representatives; but elections are more than ordinarily frequent. The members of both houses are chosen annually by the respective counties. The governor is chosen biennially by the legislature.

In point of commercial imports, Georgia from the value of her products, holds a high rank; in 1817, her exports amounted to near nine millions of dollars.

For local purposes, Georgia is subdivided into the following counties.

Georgia, gulf of the United States, on the Pacific coast, between the continent and Quadra and Vancouver's island. It extends from Johnson's Straits to the straits of John de Fuca.

Georgia, post town of Franklin county, Vermont; situated on the E side of lake Champlain, about 5 miles N of Milton, containing 1800 inhabitants.

Georgia, *Southern*, island of the South Pacific Ocean, discovered by captain Cook in 1775, and so named by him. It is 31 leagues long, and 10 in its greatest breadth. It seems to abound with bays and harbours, which the vast quantities of ice render inaccessible the greatest part of the year. The valleys were covered with snow; and the only vegetation observed, was a bladed grass, growing in tufts; wild burnet; and a plant, like moss, which sprung from the rocks. Not a stream of fresh water was to be seen on the whole coast. This island lies between 38 13 and 35 34 W, lon. and 53 57 and 54 57 S lat.

Gepping, imperial town of Suabia, in the duchy of Wirtemberg, seated on the river Wils, 25 miles E of Stutgard. Lon. 9 45 E, lat. 48 44 N.

Gera, town of Germany, in Misnia, with a handsome college on the river Elster. Lon. 11 56 E, lat. 50 50 N.

Geraw, town of Germany, in Hesse-Darmstadt, capital of a district of the same name, 10 miles NW of Darmstadt. Lon. 8 29 E, lat. 49 45 N.

Gerberoy, town of France, in the department of Oise, and late province of the Isle of France, 50 miles N by W of Paris. Lon. 1 54 E, lat. 49 32 N.

Gerbes, *Gerbi*, or *Zerbi*, island on the coast of Tunis. It bears no other corn than barley; but has large quantities of figs, olives and grapes, which, when dried, form the principal trade. It depends on the dey of Tripoli. Lon. 10 30 E, lat. 33 56 N.

Gerbevillers, town of France, in the

department of Meurthe and late province of Lorraine, with a handsome castle. The church of the late Carmelites is very elegant. It is seated on the Ajen, five miles from Luneville.

Gergenti, town of Sicily, with a castle, and a bishop's see; seated near the river St. Blaise, 50 miles S of Palermo. Lon. 13 24 E, lat. 47 24 N.

Gerisau, village of Switzerland, on the N side of the lake of Schweitz, at the foot of the Rigi. It is a republic, the smallest in Europe. Its territory is two leagues in length and one in breadth, composed entirely of scattered houses and cottages, of a very neat and picturesque appearance. The inhabitants are computed at about 1200 and are much employed in preparing silk for the manufactures at Basle. This republic is under the protection of the cantons of Lucern, Uri, Schweitz, and Unterwalden; and, in case of war, furnishes its quota of men. Gerisau is 12 miles SW of Schweitz.

Germain, St. town of France, in the department of Seine and Oise and late province of the Isle of France, with a magnificent palace, embellished by several kings, particularly Lewis XIV. Here James II. found an asylum, when he fled to France. It is seated on the Seine, near a forest, 10 miles NW of Paris. Lon. 2 15 E, lat. 48 52 N.

Germain's St. borough in Cornwall, with a market on Friday. It stands near the sea, 10 miles W of Plymouth, and 224 W by S of London. Lon. 4 24 W, lat. 50 22 N.

Germain Laval, St. town of France, in the department of Rhone and Loire, and late province of Forez, remarkable for excellent wine. It is 225 miles SE of Paris. Lon. 4 2 E, lat. 45 50 N.

German Ocean, that expanse of water bounded by Germany and France S: by the British Islands W; a part of the northern Atlantic E; and by Norway, Jutland, and a part of Germany E. See *North Sea*.

Germany, country of Europe, 650 miles in length, and 600 in breadth; bounded on the E by Hungary and Poland, N by the Baltic sea and Denmark, W by the Netherlands and France, and S by Switzerland and Italy; area 220,000 square miles. It contains a great many sovereign princes, who are independent of each other; and lately there was a number of imperial towns, which were so many little republics; but the whole of them formed a great confederacy, governed by political laws, at the head of which was an emperor, whose power in the collective body, or diet, was not directive but executive. The western Roman empire, which had terminated in the year 475, in the person of Augustulus, the last Roman emperor, and which was succeeded by the reign of the Huns, the Ostrogoths, and the Lombards, was revived by Charlemagne, king of France, on Christmas day, in the year 800. This prince being then at Rome, pope Leo III. crowned him emperor, in St. Peter's church; and Nicephorus, who was then emperor of the east, consented to this coronation. After the death of Charlemagne, and of Lewis le Debonnaire, his son and successor, the empire was divided between the four sons of the latter. Lo-

thario, the first, was emperor; Pepin was king of Aquitaine; Lewis king of Germany; and Charles le Chauve, king of France. This partition was the source of incessant feuds. The French kept the empire under eight emperors, till the year 912, when Lewis III, the last prince of the line of Charlemagne, died without issue male. Conrad, count of Franconia, the son-in-law of Lewis, was then elected emperor. Thus the empire went to the Germans, and became elective; for it had been hereditary under the French emperors. The emperor was chosen by the princes, the lords, and the deputies of cities, till the year 1239, when the number of the electors was reduced to seven; one more was added in 1549, and another in 1692; these nine electors continued to the year 1798, when, in consequence of the alterations made in the constitution of the empire, under the influence of France and Russia, they became ten in number; namely, the elector and archbishop of Ratisbon, the elector and king of Bohemia (the then emperor) the elector of Bavaria, the elector of Saxony, the elector of Brandenburg (king of Prussia) the elector of Hanover (king of England) the elector of Wurtzburg (late grand duke of Tuscany) the elector of Wirtemberg, the elector of Baden, and the elector of Hesse. Rodolphus, count of Hapsburg, was elected emperor in 1273. He is the head of the house of Austria, which is descended from the same stock as the house of Lorrain, re-united to it in the person of Francis I, father of the two late emperors, Joseph and Leopold. On the death of Charles VI of Austria, in 1740, an emperor was chosen from the house of Bavaria, by the name of Charles VII. On the death of this prince, in 1745, the above-mentioned Francis, grand duke of Tuscany, was elected emperor; whose grandson, Francis II, enjoyed the dignity of emperor of Germany till 1806, when he formally resigned the title and office. At the close of the Saxon race, in 1024, the prerogatives of the emperor were very considerable; but, in 1437, they were reduced to the right of conferring all dignities and titles, except the privilege of being a state of the empire; of granting dispensations with respect to the age of majority; of erecting cities, and conferring the privilege of coining money; of calling the meetings of the diet, and presiding in them. But after all there was not a foot of land annexed to this title; for, ever since the reign of Charles IV, the emperors depended entirely on the hereditary dominions, as the only source of their power, and even of their subsistence. To prevent the calamities of a contested election, a king of the Romans was often chosen in the lifetime of the emperor, on

whose death he succeeded to the imperial dignity of course. The emperor (always elected and crowned at Frankfort on the Main) assumed the title of Augustus, and pretended to be successor to the emperors of Rome. Although he was chief of the empire, the supreme authority resided in the diet, which was composed of three colleges; the college of electors, the college of princes, and the college of imperial towns. The diet had the power of making peace or war, of settling general impositions, and of regulating all the important affairs of the empire; but the decisions had not the force of law till the emperor gave his consent. When a war was determined on, every prince contributed his quota of men and money, as valued in the matriculation roll; though as an elector or prince he might espouse a different side from that of the diet. All the sovereigns of Germany have an absolute authority in their own dominions, and can lay taxes, levy troops, and make alliances, provided they did not prejudice the empire. They determine all civil causes definitely, unless in some particular cases, in which an appeal may be made. These appeals were to two courts, called the Imperial Chamber, at Wetzlar; and the Aulic Council, at Vienna. The three principal religions are, the Roman catholic, the Lutheran, and the Calvinists; but Christians of all denominations are tolerated, and there is a multitude of Jews in all the great towns. The principal rivers of Germany are the Danube, Rhine, Elbe, Wesser, Maine, and Oder. Germany was divided into nine circles, namely, Austria, Bavaria, Suabia, Franconia, Upper and Lower Rhine, Westphalia, and Upper and Lower Saxony: each of these includes several other states; and Bohemia, Moravia, Lusatia, and Silesia are not comprised in the ten circles. Germany lately contained six archbishoprics and thirty-eight bishoprics; but this hierarchy was thrown into confusion by the secularizations in 1798, and is not yet restored to order: the archbishop of Ratisbon is primate and metropolitan of all Germany; the see of Mentz having been moved to Ratisbon. No country has undergone such a variety of changes for the last 20 years as Germany. This account must be considered as what Germany was previous to the year 1806; after which time, in consequence of the formation of the Confederation of the Rhine, the emperor Francis II, resigned his office as emperor of Germany, which dissolved that ancient constitution. And therefore, that confederation may now be considered as abolished. By the confederation of 1815, Germany was new modelled, and now stand as follows. A permanent diet is formed, and holds its sessions at Frankfort on the

Maine. The states which are entitled to representation in that body are the following.

	Population.
Austrian Germany - -	9,482,000
Prussian Germany - -	7,923,000
Bavaria - - - -	3,560,000
Wirt-mberg - - - -	1,395,000
Hanover - - - -	1,305,000
Saxony - - - -	1,200,000
Baden, grand duchy - -	1,000,000
Hesse Damstadt - - -	620,000
Hesse Cassel - - - -	520,000
Holstein, and Lunenburg -	360,000
Luxanburg - - - -	214,000
Mecktenburg Schwerin -	358,000
Brunswick - - - -	210,000
Nassau - - - -	305,000
	<hr/> 28,450,000 <hr/>

The 6 largest have 4 votes in the general diet; B den, Hesse Damstadt, Hesse Cassel, Holstein, and Lunenburg, and Brunswick, have each 3, and the residue two votes.

The following have each one vote, Saxe-Weimar, Saxe-Gotha, Saxe-Cobourg, Saxe-Meinungen, Saxe-Hildburghausen, Mecklenburg-Strelitz, Oldenburg, Anhalt-Bernburg, Anhalt-Dessau, Anhalt-Köthen, Schwartzburg-Rudolstadt, Schwartzburg-Sonderhausen, Hohenzollern-Heckingen, Lichtenstein, Hohenzollern-Sigmaringen, Waldeck, Reuss-Greiz, Reuss Lobenstein, Hesse Homberg, Schaumburg-Lippe, Lippe, Lippe-Detmold; and the four free towns of Lubeck, Frankfort on the Maine, Bremen, and Hamburg.

Taken collectively these minor states have a population of 1,621,000; which added to 28,450,000, yields 30,071,000 as the entire population of Germany.

Many features of the ancient constitution has been revived. In ordinary concerns, the smaller states are divided into six classes, each class having one vote. The larger states have also, each one vote in the discussion of questions of general import; or in the passage of fundamental laws, the diet is resolved into a general assembly and each state votes in its single capacity as we have noticed. The military contingent more nominal than real, is fixed in peace to 130,000 and in war, to upwards of 300,000. The respective revenues of the German states is also in most instances too uncertain and capricious to admit exact specification. No people apply themselves more closely to their studies than the Germans; and the Hebrew is no where so generally learnt, or better understood. Printing is most extensively encouraged; every man of letters is an author; they multiply books without number; thousands of suppositions and disputations are annually pub-

lished, with which they overstock the fairs of Frankfort and Leipsic; for no man can be a graduate in the universities who has not published one disputation at least. The language of Germany is a dialect of the Teutonic, which succeeded that called the Celtic. Vienna is the principal city.

Germany, southeast township of Adams county Pennsylvania, on the heads of the Monocacy, and Conewago creeks. Population 1820, 1272.

Germany, village of Shade township, Somerset county Pennsylvania, on the head waters of Shade creek, 20 miles NE from Somerset.

Gernersheim, town of Germany, in the palatinate of the Rhine, situated near the Rhine, 5 miles W from Philippsburgh. This is one of the cities of Germany appropriated as a barrier fortress, and 266,400 dollars voted by the diet for the augmentation of its works.

Gibraltar, town of Spain, in Andalusia, near a mountain of the same name, formerly called *Calpe*, which, with Abyla, on the opposite shore of Africa, were

called the pillars of Hercules. Tarick, a general of the Moors, built a fortress here, which he called Gibel Tarick, that is, Mount Tarick. Since that time a town has been built at the foot of this rock, which is strongly fortified. It was formerly thought to be impregnable; but, in 1704, it was taken by the confederate fleet, commanded by Sir George Rooke; and has ever since continued in the hands of the English. The strait of Gibraltar is 24 miles in length, and 15 in breadth, and a strong current always runs through it from the Atlantic to the Mediterranean. Gibraltar is 25 miles N from Ceuta, and 45 SE from Cadiz. Lon. 5 17 W, lat. 36 6 N.

At present it consists of a chancellor, rector, dean of faculty, a principal, and 16 professors, of which one is for law, four for theology, five for the study of medi-

cine and subjects connected therewith, and the others for the faculty of arts. It has lately been greatly enriched in the mathematical department by the library of the late celebrated Dr. Robert Simpson, author of the translation of Euclid, and has received an important addition, by a collection of rare books and manuscripts, in every department of science, but particularly in medicine, bequeathed by the late Dr. William Hunter, who has also left his extensive museum to the university of Glasgow. Besides the anatomical preparations, the museum, for which an elegant building has been erected, contains the collection of shells, corals, insects, and fossils, made by the late Dr. Fothergill, and a cabinet of medals and coins, ancient and modern, the most complete of the kind in Europe. The observatory is well fitted up, and supplied with the most improved instruments for the use of the professor of practical astronomy. Glasgow has a considerable foreign trade; and its numerous manufactures, particularly of muslin, cotton, calico, coarse woollen cloth, porcelain, glass, the refining of sugar, and the tanning of leather, are carried on to a great extent. Glasgow was originally one parish, but is now, for the benefit of the poor and ease of ministers, divided into eight, with as many churches, besides three chapels of ease. The population of Glasgow, with its suburbs and dependencies, amounted in 1811, to 108,000. It is seated on the N side of the Clyde, over which are two stone bridges. The river is navigable for vessels of eight feet water as far as the bridge; but larger vessels stop at Port Glasgow, or Greenock, to unload; it has also the advantage of two canals, beside the Great Canal that joins the Clyde to the Forth. Glasgow is 44 miles W of Edinburgh, and 60 SW of Perth. Lon. 4 30 W, lat. 55 50 N.

Glutz, county of Germany, seated between Silesia, Bohemia, and Moravia; and surrounded by mountains, which render it very difficult of access. It is 38 miles long, and 23 broad. It has mines of coal, copper, and iron, good quarries of marble and stone, and fine springs of mineral waters. In 1724, it was ceded to the king of Prussia, by the queen of Hungary.

Glätz, city of Bohemia, and capital of a county of the same name. It is situated at the foot of the mountains which divide that kingdom from Silesia, near the river Neisse. On the top of the hill is an ancient castle; and the Prussians have not only greatly augmented and improved it, but have built a new citadel. It has been frequently besieged and taken. It is 48 miles SSE of Breslaw, and 82 ENE of Prague. Lon. 16 50 E, lat. 50 25 N.

Glencoe, Vale of, valley in Scotland, near the head of Loch Etive, in Argyleshire, noted for the cruel massacre of its unsuspecting inhabitants in 1691. King William had published a proclamation, inviting the Highlanders, who had been in arms for King James II. to accept a general amnesty before the 1st of January, on pain of military execution after that period. Alexander Macdonald, laird of Glencoe, on the last day of December, went to Fort William, the governor of which referred him to a civil officer. This made it the first of January before he could reach Inverary, where he surrendered to the sheriff, who, however, accepted his submission, in consideration of his offer to surrender the day before. The laird having taken the oaths, returned to Glencoe, in full assurance of safety; notwithstanding which, he, and his whole clan, were butchered, on the 15th of February, and the whole of that beautiful valley rendered a scene of massacre and desolation.

Glencroy, Vale of, wild and romantic tract, near the NE extremity of Loch Lomond, in Argyleshire. The two ranges of mountains, which overhang this valley, approach each other, and between these the traveller is immured. Their stupendous height and the roaring of numerous cataracts, that pour over their broken surface, produce an effect awfully sublime.

Gloimme, longest river of the province of Agerhuys, in South Norway, which flows into the North Sea, at Fredericstadt. It receives the river Worme which issues from Lake Mioss. It is not navigable in any part of its course from this lake to Frederickstadt, its stream being intercepted by such frequent cataracts and shoals, as, in some places, to render it necessary to drag the trees, which are floated down, over the ground. At least 50,000 trees are annually floated by this river to Fredericstadt.

Gloucester, city in Gloucestershire, with a market on Wednesday and Saturday. It is seated on the E side of the Severn, where, by two streams, it makes the isle of Alney. Here is a good stone bridge over the river Severn, with a quay, wharfs and custom house, but most of its business is engrossed by Bristol. It is 24 miles NE of Bristol, and 106 W by N of London. Lon. 2 16 W, lat. 51 50 N.

Greece, country of Europe, included in the empire of the Ottoman Turks. The boundaries of this truly interesting country, as well as the etymology of the name, are equally uncertain. The common opinion of the Greeks themselves, derive their national appellation from Graicus, son of Thessalus. Many sources have been sought for the origin of this people, probability is in favour of the supposition, that the mass of the people originated from Gothic, or Scythian colonies, but, that their civilization, arts, and sciences, were drawn from the cultivated nations of western Asia, and NE Africa. The word Περλαστος, signifies a stork, or bird of passage, and is peculiarly applicable, to either a nomadic or commercial people, and given with the warm and happy felicity of Greek nomenclature. They prided themselves also, on the title of Autochthones; children of the earth. Gradually civilized, and quitting the nomadic state rather by tribes than nationally, new provincial names arose, and in the lapse of successive ages, the primitive names were lost, in those of Hellenians, Ionians, Dorans, &c.

We understand commonly by the name of Greece, the country generally so known, and which forms the SW part of European Turkey. Though I have already observed that this country was peopled by colonies, advancing from the north, I have only, in the present article, included under the name of Greece, divisions admitted by the ancients themselves; but the Greek nation, not only inhabited that part of Europe, they also extended colonies into the south of Italy, to which they gave the name of Magna Græcia; into Sicily, in which they founded many large and populous cities; on the coast of Africa, west from Egypt, and particularly into Asia Minor.

The following synopsis will suffice for Greece proper, and for the principal towns of each section.

Greece was divided into three great portions, by the hand of nature; these sections were, peninsular Greece, or the Peloponnesus, now Morea; Continental Greece, and Insular Greece.

Peloponnesus was subdivided into the provinces of Argolis, in which were the rivers Inachus and Erasinus, and the cities of Argos, Mycenæ and Epidaureis. Læconia, with the Eurotas river, and the cities of Sparta, Amyclæ, Gythium, and Taenarium. Messenia, with the Pamisus river, and the cities of Stenyclarus and Colonides. Elis, with the Alpheus, Anigis, and Selleis, and the cities of Olympia, Pisa, and Elis. Achaia, watered by the Melas and Crathis rivers, and having the cities of Dyme, Patrae and Aegium. Sicyonia, with the river Asopus, and the cities of Sicyon and Phlius. Corinthus, with the cities of Corinth, Lechaëum and Genchrae. The last subdivision of the Peloponnesus, was that of Arcadia in the centre, containing the Alpheus, Erymanthus and Aorian rivers, and the cities of Megalopolis, Mantinea, Tegea, Orchomenus and Phigalia.

Next followed Greece proper, or continental Greece, subdivided, advancing from south to north; into Attica, with the cities of Athens, Eleusis and Marathon. Megaris, with the cities of Megara and Nysæa. Bœotia, with the lake Copais and river Asopus, and the cities of Thebes, Orchomenus, Cheronea, Tanagra, Eleuteræ and Thespiæ. Phocis, with the river Cephissus, and the cities of Delphi, Elatia, Crysæ and Anticyra. Doris, with the city of Cythium. Locris Ozolæa, with the cities of Amphissa, and Naupactus. Locris Epiconemidii, with the city of Cnemides. Locri Opuntii, with the city of Opus. Aetolia, with the rivers Achelous and Evenus, and the cities of Thermi, Calydon and Chalcis. Acarnania, with the cities of Argos, Amphilocheium, Stratus and Actium. Thessalia, with the rivers Peneus, Onches-

tus and Sperchius and the cities of Larissa, Pharsalus, Pieræ and Demetrias. Epirus, with the rivers Acheron and Avas, and the cities of Buthrotum and Nicopolis. Illyria, with the cities of Epidamnia and Apollonia. Macedonia, with the rivers Erigon, Axius, Strymon and Haliacmon, and the cities of Pella, Edessa, Thessalonica and Olynthus.

Insular Greece was subdivided into the East, South and West sections. That of the East, contained the islands of Thera, Naxia, Paros, Delos, Myconus, Tenos, Andros, Eeos, Eubœa, Scyros, Thasos, and some smaller groups. That of the south contained Crete, and Cythera. In the west were Corcyra, Leucadia, Cephallenia, Dulichium and Zacynthus.

In this exposition of the states of Greece Macedonia is included; but it may be observed that it was only after the reign of Philip II. and his son Alexander II.; or Alexander the Great, that the Greeks commenced to regard Macedonia, as a part of Greece. Before that period the people inhabiting the country called Græcia and also Hellas, regarded the Macedonians, as well as the Thracians as barbarians. Similar observations might indeed be extended to Thessaly, Etolia, Acamania, Epirus and Illyria. These countries were slowly and with the advance of arts, science and political power, admitted into the list of Grecian states. Taken in *extenso*, Greece was bounded south by the Mediterranean sea; west by the Ionian, and part of the Adriatic sea; north by the mountains of Illyria, Macedonia and Thrace, and east by Thrace and the Aegean sea. It extended from lat. 35 to 43 N. or about 560 English miles; and from east to west 250 miles wide where broadest. Its area about 40,000 square miles.

Greece is formed by a peninsula bearing a strong resemblance to that of Italy, the Peloponnesus representing Sicily. Nearly parallel to the two opposite coasts extends a range of mountains with lateral ridges, branching towards each sea. The main chain gradually declines in elevation from north to south. In the northern part of Greece, the ridges of Pindus and Parnassus rise to from 7 to 8000 feet, whilst the mountains of Bœotia and Attica do not exceed from 500 to 1000 feet. Parallel to the main chain another rises near the head of the gulf of Salonica or the ancient Sinus Thermaicus, and by the local names of Ossa, and Pelion, and Oeta, and Othrys, extends through Thessaly to the ancient gulf of Artimisius, and is continued through the islands of Eubœa, Andros, Tenos, Myconus, &c. The latter chain is in reality a ramification of the main central chain which it leaves between the sources of the Haliacmon and Peneus rivers, and first

stretching eastward toward the Thermaic gulf, thence turns SE as already described.

Along the northern frontier of Macedonia ranges Mount Orbelus, a part of the great chain of Mount Haemus. From Mount Orbelus, between the sources of the Axios and Strymon rivers extends an humble but distinct ridge of which Mount Athos in the Cealcidice, was the utmost southeastern termination. The countries of Acarnania, Etolia and Epirus are also extremely mountainous.

The Peloponnesus, now Morea, possesses its appropriate mountain ridges, of which the principal are Mount Cyllene in the west, and Taygetus near the south extremity. The whole peninsula is, however, excessively mountainous. The central table land of Arcadia, rising to an elevation which gives it a climate of considerable severity in winter, but a most salubrious and delicious atmosphere in spring, summer and autumn. In brief all Greece may be viewed as a region rough, but highly conducive to the full development of the human frame and mental faculties.

A country so indented, cannot be supposed abundant in rivers, but though comparatively small, and of limited length of course, many of the rivers of Greece are fine mountain streams, and some drain valleys rich with every gift of nature. Advancing from north to south we find in Macedonia, the three beautiful basins of the Strymon, Axios and Haliacmon. In Thessaly spreads the basin of the Peneus, now Salymperia, celebrated in all ages, as one of the most inviting spots on earth. The gorge through Mount Ossa made by the Peneus in its escape to the Aegean sea, is the famous vale of Tempe. The Cephissus river of Boetia is remarkable as having no outlet to any sea.

Though not very generally fertile, the soil of Greece is more productive than could be expected from a country so broken by mountains. It is more celebrated for fruits than grain. The plains and valleys of Greece, produces however, in sufficient abundance, wheat, barley, rice, maize, millet and other cerealia. Its fruits are abundant and delicious; the principal species are, figs, grapes, apples, &c.

In many places, extensive orchards of the white mulberry tree are cultivated, to feed the silk worm. The modern name of the Po'oponnesus the Morea, is derived from Morus, the Latin name of the mulberry tree.

Honey is also amongst the most valuable productions of Greece. That of Attica, has been from time immemorial celebrated for its peculiar excellence. Cotton and tobacco, in modern times, have been introduced and are now generally cultivated.

In brief Greece, wants only freedom and

release from the deteriorating and murderous despotism of the Turks; and national union to again resume her rank amongst the most respectable nations of the world. Considerable advance has been made during the last 70 years, in rousing the Greeks to a recollection of what was once their ancestors, and an anticipation of what they may themselves be, if restored to self government. Literature has made, if we estimate the many impediments opposed to its advance, astonishing progress of late. Great attention is paid to the ancient and modern languages of Greece. The former, distinguished by the title of Hellenic, and the latter, by that of Romæic, and differing about as much as Latin and Italian.

Increasing intelligence, and reading of their own classic authors, have led to a result which was inevitable, a resistance against their ancient and ferocious oppressors. That resistance is now in operation, and lost must that heart be, which is not with its every feeling, arrayed on the side of the Greeks.

Greenland, general name by which are denoted the most easterly parts of America, stretching towards the north pole, and likewise some islands to the northward of the continent of Europe, lying in very high latitudes. This country is divided into W and E Greenland. Greenland was for a long time considered as a part of the continent of West Greenland, but is now discovered to be an assemblage of islands lying between 76 46 and 80 30 of N latitude, and between 9 and 20 of E longitude. It was discovered by Sir Hugh Willoughby in 1553, who called it Greenland; supposing it to be a part of the western continent. In 1595, it was again visited by William Barrentz and John Cornelius, two Dutchmen, who pretended to be the original discoverers, and called the country Spitzbergen, or Sharp Mountains, from the many sharp-pointed and rocky mountains with which it abounds. The only quadrupeds of either W or E Greenland, are deer, white bears, and foxes. To its frozen seas, the English and other nations repair annually, in the proper season, to fish for whales. See *Spitzbergen*.

Guiana, large country of South America, is bounded on the E and N by the Atlantic Ocean, on all other sides its limits are rather indefinite. The term is indeed used vulgarly for the country between Venezuela and Brazil. The British, Dutch, French, Spanish and Portuguese nations, all have settlements in Guiana. British Guiana, reaches from the Essequibo to the Corantyn rivers. Dutch Guiana, from the Corantyn to the Marouï. French Guiana, from the Marouï to the Aruary. Portuguese Guiana, from the Aruary to the Amazon. Spanish Guiana, is now included in Venezuela. The settlements of the civilized nations are confined to the coast, or to the banks of some of the larger rivers, at a very limited distance inland. Dutch Guiana, is more particularly known by the name of Surinam, and that appertaining to France as Cayenne. The principal British settlements, are, Essequibo and Demerara. The population of the European colonies, amount to about 200,000; of which, those of Spain have 30,000; British 70,000; Dutch 80,000; French 20,000. The body of the inhabitants are negro slaves, the whites in all the settlements, not being computed above 20,000. The sea coast of Guiana, is one vast plain of unequalled fertility. Staples, sugar, coffee, and cotton.

Guimaraens, considerable town of Portugal, in the province of Entre-Douero-Minho. It has formerly been the residence of their kings and is divided into the Old and New. The public buildings are magnificent. It is 165 miles NE of Lisbon. Lon. 8 21 W, lat. 41 35 N.

Guinea, large region of Africa, of which little is known except the coast. It lies in the Torrid Zone, between 14 W and 28 E lon. and is divided into Upper and Lower Guinea. The first comprehends Sierra Leone, the Grain coast, the Tooth-coast, the Gold-coast, the Slave-coast (which includes Whidah, Dahomy and Ardrah) Beniu, Biafara, Majombo, Gabon and Anziko. Lower Guinea is commonly called *Congo*. It is very unhealthy for Europeans. There are many little states, whose chiefs are often at war with each other, when the people taken, on both sides, are sold for slaves; and it is not uncommon for the nearest of kin to sell each other. The English, Dutch, Portuguese, Danes, and French, have factories upon this coast.

Guinea, New, or *Paqua*, island of the South Pacific Ocean, to the N of New Holland, from which it is separated by Endeavour strait. It is next in size to New Holland, extending SE from the equator to 12 S lat. and from 131 to 153 E lon. a length of more than 1200 miles, by a medial breadth of perhaps 300; but the coasts of the eastern part are far from being completely investigated. The northern part is said to have been discovered by the Spaniards, in 1528, who had sailed from Mexico to explore the Spice Islands. The coasts are generally lofty; and in the interior, mountain rises above mountain: but the whole appears covered with luxuriance of wood and herbage, as can scarcely be conceived. The cocoa, sago, bread-fruit, and plantain-tree, beside most of the trees, shrubs, and plants, common to the islands in the South Pacific Ocean, are found here in great perfection. This island is the chosen residence of the singular birds of paradise, which breed here during the wet monsoon, and in the dry migrate in flocks westward, to the smaller

islands, particularly Arroo. The inhabitants make much the same appearance as the New Hollanders.

Guzerat, peninsula of Hindoostan Proper, about 200 miles long, and 140 broad, formed by the Arabian Sea and the gulfs of Cambay and Cutch. The West part is mountainous and woody, and inhabited by a wild hardy race governed by rajahs of their own. But the largest as well as the finest part is subject to the Mahrattas. Amedabad is the capital.

Gwalior, ancient fortress of Hindoostan Proper, in the province of Gohud. It stands on a vast rock, about four miles in length, but narrow and of unequal breadth, and nearly flat on the top. The sides are so steep as to appear almost perpendicular in every part; for where it was not naturally so it has been scraped away; and the height from the plain below, is from 200 to 300 feet. This place is considered as the Gibraltar of the East: but in 1780, major Popham took it by an unexpected

nocturnal escalade. It is 80 miles S of Agra. Lon. 78 30 E, lat. 26 9 N.

Hamburg, free and imperial city of

Germany, in Lower Saxony, consisting of the old and the new town; both nearly of an equal size. Most of the houses are built after the manner of the Dutch, and richly furnished within. The principal streets of the old town have long and broad canals, which are filled by the tide. It is seated on the rivers Elbe and Alsters, and the late, before it enters the town by sluices, forms a fine basin. Here is a celebrated college, an arsenal, a bank, and a handsome exchange. The inhabitants were estimated till lately at 100 000. The religion is Lutheran, and now but the English have the liberty of performing divine service in a chapel of their own. Hamburg, from its situation, has all possible advantages for foreign and domestic trade; particularly from its communication, by the Elbe, with some of the principal navigable rivers of Germany; and hence it is one of the most commercial places in the world. It is distinguished for its sugar refinery, and it has manufactures of cotton stockings, gold thread, ribbands and velvets. It is 55 NE of Bremen. Lon. 10 1 E, lat. 53 33 N.

Helena, St island in the Atlantic Ocean, 27 miles in circuit, belonging to the English East India Company. It lies between the continents of Africa and South America, about 1200 miles W of the former, and 1800 E of the latter; and was discovered by the Portuguese, in 1502, on St. Helena day. Afterward, the Dutch were in possession of it till 1600, when they were expelled by the English in 1673, the Dutch retook it by surprise; but it was soon after recovered. It has some high mountains, particularly one called Diana Peak, which is covered with wood to the very top. There are other hills also, which bear evident marks of a volcanic origin, and some have huge rocks of lava and a kind of half vitrified flags. The chief inconvenience to which the island is subject, is want of rain; however, it is far from being barren, the interior valleys, and little hills, being covered with verdure, and interspersed with gardens, orchards and various plantations. There are also many pastures, surrounded by enclosures of stone, and filled with a fine breed of small cattle, and with English sheep; goats and poultry are likewise numerous. The inhabitants do not exceed 3000, including near 500 soldiers, and 1600 blacks, who are supplied with corn and manufactures by the company's ships in return for refreshments. The town, called Jamestown, is small, situate at the bottom of a bay on the S side of the island, between two steep dreary mountains, This

island has now become classic ground in history by becoming the place of exile, and death of the emperor Napoleon, and containing the grave of this extraordinary man. He was landed on the island, October 16th, 1815; died on the 5th, and was interred on the 9th of May, 1821, aged 51 years, eight months, and 20 days. He was born at Ajaccio in Corsica, August 15th, 1769.

Hesdin, strong town of France, now in the department of the straits of Calais, and lately in the county of Artois; it is a regular hexagon, and surrounded with morasses seated on the Ganche, 25 miles SSW of St. Omer, and 165 N of Paris. Lon. 2 6 E, lat. 50 24 N.

Hesse, country of Germany, in the circle of the Upper Rhine; bounded on the N by the bishopric of Paderborn and duchy of Brunswick, on the E by Thuringia, on the S by the territory of Fulde and Wateravia, and on the W by the counties of Nassau, Witgenstein, Hatzfeldt, and Waldeck. The house of Hesse is divided into four branches; namely, Hesse Cassel, Homburg, Darmstadt, and Rhinfield, each of which has the title of landgrave, and takes its name from one of the four principal towns.

The principal Hessian house is that of Cassel; area 4,350 square miles, and 540,000 inhabitants. The title of the sovereign is Elector of Hesse, and grand duke of Fulda; his power is that of a limited monarch. The dominions of the Elector of Hesse Cassel is hilly and drained by the various sources of the Weser. Revenue about 380,000 pounds sterling.

Hesse Darmstadt, or *Grand Duchy of Hesse*. This is the second great division of the family of Hesse. Area about 5000 square miles, and 620,000 inhabitants. The country is mountainous, though the soil is productive. The mountains yield ores of iron, copper, and lead. The country is drained by the sources of the Weser; by some final streams flowing westward into the Rhine, and by the lower northern branches of the Maine. The constitution is that of limited monarchy. The Grand Duke is a member of the Germanic Diet, and in the smaller assembly has one vote and the 9th place, at the larger he has three votes. Revenue about 370,000 pound sterling.

Hesse Homburg, principality of Germany, south of the Maine, and near Frankfort. It belongs with the title of Landgrave, to a branch of the Hesse family. Population 20,000.

Heukelum, or *Hoekelum*, town of the United Provinces, in Holland, seated on the Linghe, 5 miles NE of Gorcum. Lon. 4 55 E, lat. 51 55 N.

Heusden, strong town of the United Provinces, in Holland, seated on the Maese, with a castle. It surrendered to the French in 1795; and is eight miles NW of Bois-le-Duc. Lon. 5 3 E, lat. 51 44 N.

Hexham, town in Northumberland, with a market on Tuesday. It is seated on the river Tyne, and was formerly famous for an abbey: A battle was fought in 1463,

near this place between the houses of York and Lancaster; in which the latter was defeated. Hexham has a manufacture of tanned leather, shoes, and gloves; and is 22 miles W of Newcastle, and 28 $\frac{1}{2}$ NNW of London. Lon. 2 1 W, lat. 55 3 N.

Heydon, borough in the E riding of Yorkshire, with a market on Thursday. It is seated on a river, which soon falls into the Humber; and was formerly a considerable town, but is now much decayed. It is six miles W of Hull, and 181 N by W of London. Lon. 0 5 W, lat. 53 45 N.

Heylessem, town of Austrian Brabant, 14 miles SE of Louvain. Lon. 5 7 E, lat. 50 45 N.

Heytesbury, borough in Wilts, that sends two members to parliament, but has now no market. It is 20 miles NW of Salisbury, and 93 W by S of London. Lon. 2 8 W, lat. 51 12 N.

Hiaqui, river of Mexico, in Sonora, falls into the gulf of California, after a course of 400 miles. Mouth at lat. 27 30 N.

Hiatstown, village of Middlesex county, New Jersey, on the head of Mill-stone river, 13 miles NE from Trenton.

Hickman, county of West Tennessee; bounded by Lawrence S; Perry W; Dickson N, and Murray E. Length 33; mean width 22; area 726 square miles. Surface hilly, and soil varied.

Himmaleh, chain of mountains in Asia, which extends from Cabul along the N of Hindoostan, and is the general boundary of Tibet, through the whole extent from the Ganges to the river Testa; enclosing

between it and Hindoostan, a tract of country from 100 to 180 miles in breadth, divided into a number of small states, which are understood to be either tributaries, or feudatories of Tibet; such as Sirinagur, Napaul, &c. This ridge is probably that designed by the ancients, under the names of Imaus and the Indian Caucasus. The natives call it Hindooko (the Indian mountains) as well as Himmaleh; which last is a Sanscrit word, signifying *snowy*; its summit being covered with snow. The Dawlgeri and several other peaks of this range, rise above 27,000 feet, and are the most elevated mountains yet measured.

Hindoostan, or *India*, celebrated country of Asia, which in its most extensive signification, comprehends the tract situated between the Thibetian and Tartarian mountains on the N, the Indian Ocean on the S, the Burrampooter and the bay of Bengal on the E, and the Indian Ocean and Persia on the W. But this country must be considered under the three grand divisions of Hindocstan Proper, the Deccan, and the Peninsula. Hindoostan Proper includes all the countries on the N of the river Nerbuddah, which bounds it on the S as far as it goes; Bengal and Bahar compose the remainder of its southern boundary. It is divided into eleven soubahs, the names of which are Lahore, Aroultan (including Sindy) Agimere, Delhi, Agra, Oude, Allakabad, Bahar, Bengat, Mdwa, and Guz-rat. A 12th soubah, named Cubul, was formed out of the countries contiguous to the W sources of the Indus, and three new ones out of the conquests of the Deccan; Berar, Candar and Amednagur. The Deccan in its most extensive signification is applied to the whole region of Hindoostan Proper; in its more

restricted sense, it means only the countries situate between Hindoostan Proper and the river Kistna; these are C andish, Dowlatabad, Berar, Oriss, the Circars, the chief part of Golconda, Visapour and Concan. The tract S of these, or the river Kistna, is generally called the Peninsula; although its form does not authorize that appellation; it includes a small part of Golconda, Mysore, and the Carnatic, with Madura, and other smaller districts; the W coast being called that of Malabar, and the E that of Coromandel. The principal rivers of this extensive region are the Ganges, Burrampooter, Indus, Jumna, Pudda, Nerbudda, Tapti, Godavery, Kistna, Pennar and Cauvery. The chief mountains are those of Himmaleh and the Gauts. To give an idea of the modern revolutions in the empire of Hindoostan, it is proper to observe, that from a pure Hindoo government, it became, at last, a Mahomedan state, and continued to be so, under various dynasties, till the beginning of the 18th century. The first irruptions of the Mahometans was in the year 1000. From this period the provinces of Hindoostan were held rather as tributary kingdoms, than as provinces of the same empire; and the conquest of the Deccan, in particular, was for ages an object of considerable importance to the emperors. In 1389, the Mogul Tartars, under the conduct of Timur, or Tamerlane, invaded Hindoostan; but the conquest of the country was not effected till 1525, by Sultan Baber, one of his descendants, who, from this circumstance, was the founder of the Mogul dynasty; and hence Hindoostan has been called the Mogul Empire, and its chief, the Great Mogul. The illustrious Achar, his son, failed in his attack upon the Deccan; an attempt in which many of his successors were equally unfortunate, and which tended, in the sequel, to the decline and dissolution of the empire. In 1615 emperor Jehanguire, his son, received Sir Thomas Roe, as the first English ambassador; and the Portuguese had, by this time, acquired considerable settlements in Bengal and Guzerat. In the reign of his grandson Aurungzebee, which lasted from 1650 to 1707, the empire attained its full extent; his authority reached from 10 to 35 degrees in lat. and nearly as much in lon. and his revenue exceeded 32,000,000 sterling. The conquest of the Deccan employed the last years of his life, from 1678 to 1707 during 15 years of which time he was actually in the field. This dereliction of his capital for nearly 30 years occasioned great disorders there, and laid the foundation of many more. Under his reign the empire attained to its full measure of extent, see major Rennel's memoir of a map of Hindoostan, p. lxiii. In a word,

instead of finding the emperors attempting now the conquest of the Deccan, their empire was attacked by the powerful nizams of that country, through whose contrivance, Nadir Shah, the Persian usurper, invaded Hindoostan in 1738. By the intrigues of the Nizam and his party Mahomed Shah was induced to throw himself on the clemency of the invader, who entered Delhi, and demanded 30 millions sterling, by way of ransom. Tumults, massacres and famine were the result: 100,000 of the inhabitants were massacred, and 62 millions of plunder were said to be collected. He evacuated Delhi, however, and left the Nizam in possession of the whole remaining power of the empire, which he sacrificed to his own views in the Deccan, where he established an independent kingdom. Mahomed Shah died in 1747, having seen the Carnatic and Bengal become likewise independent, under their respective nabobs, an independent state too, formed by the Rohillas (a tribe from the mountains between India and Persia) on the E by the Ganges, within 80 miles of Delhi; and the kingdom of Candahar, erected by Abdulla, one of the generals of Nadir Shah. Ahmed Shah, the son of Mahomed, succeeded; in whose reign the entire division of the empire took place; nothing remaining to the house of Tamerlane but a small territory round Delhi, with the city itself (no longer a capital) exposed to depredations, massacres, and famines, by the contests of invaders. The last imperial army was defeated by the Rohillas in 1749. The Jats, a Hindoo tribe, founded a state in Agra; Oude was seized by the grand father of the present nabob; Allahabad, by Mahomed Kooli. The Mahrattas, besides their ancient domains in the Deccan, obtained great part of Malwa, Guzerat, Berar and Orissa. The Mogul empire was now become merely nominal: and the emperors from this period, must be regarded as of no political consequence, otherwise than as their names and persons, were made use of, by different parties, to promote their own views. That the name and person of the emperor were of use, as retaining a considerable degree of veneration among the bulk of the people in Hindoostan, is evident, from the application made, at different times, for grants of territory, forcibly obtained by the grantee, but which required the sanction of the lord paramount, to reconcile the transaction to the popular opinion. Another instance of the effect of this opinion, is, that the coin throughout the whole tract, known by the name of the Mogul Empire, is to this day struck in the name of the nominal emperor. Ahmed was deposed in 1753, and was succeeded by Aljumgaire, who was deposed and murder-

ed in 1760. He was succeeded, however, by his son Shah Aulum, who was alternately dependent on the contending powers, and more particularly upon the English, who obtained from him a grant of the provinces of Bengal, Bahar and Orissa, together with the Northern Circars on condition of paying him 360,000*l.* per annum by way of tribute. It was his misfortune, however, that he could not accommodate his mind to his circumstances, and put himself into the hands of the Mahrattas, who promised to seat him on the throne of Delhi. He thus lost all he had acquired with the British, and has ever since continued a kind of state prisoner; living on the produce of a trifling domain, allowed him out of veneration for his ancestors, and for the use of his name. In the sequel, he was dethroned and murdered by the Rohillas. These being defeated by Madajee Sindia, a Mahratta chief, his son, Jewan Bucht, was permitted to succeed him, and to live in the same deplorable state of degradation. The whole of Hindoostan in 1792, consisted of six principal states, which hold as tributaries, or feudatories, some inferior states. These six principal states, were, the British, the Poonah Mahrattas, the Berar Mahrattas, Nizam Aliy, soubah of the Deccan; Mysore, or the dominions of Tippoo Sultan: and the Seiks.

The British possessions are Bengal, Bahar, Benares, the Northern Circar, the Jaghire in the Carnatic, Bombay, Salsette, the district of Midnapour in Orissa, and some considerable cession from Tippoo Sultan, in 1792. Since 1792, war broke out with Tippoo, who was defeated, and his capital taken by assault, together with an immense quantity of plunder, Tippoo lost his life in the attack. By his fall, a great extent of territory will accrue to the British, and their power will be secured on a stable and permanent foundation. The allies of the British, who may be considered as dependent upon them, are the nabobs of Oude, and the Carnatic, and the rajahs of Travancore and Tanjore. For the five other principal states, see their respective names, and for an account of some inferior independent states, see Bundela, Ballogistan, the Jats, Rohilcund, &c. According to Mr. Orme, the inhabitants of Hindoostan are computed at about 10,000,000 Mahometans, and 100,000,000 Hindoos. The Mahometans, or Mus-ulmen, whom the English improperly call Moors, are represented to be of a detestable character. The Hindoos, or Gentoos, are of a black complexion; their hair is long, their person straight and elegant, and their countenance open and pleasant. They differ materially from all other nations, by being divided into tribes or casts.

The four principal tribes are the Bramins, Soldiers, Labourers, and Mechanics; and these are subdivided into a multiplicity of inferior distinctions. There are Bramins of various degrees of excellence, who have the care of religion allotted to them, and are held sacred by the rest; some of these acknowledge the errors that have crept into their religion, own one Supreme Being, and laugh at the idolatry of the multitude, but insist upon the necessity of working upon the weaknesses of the vulgar; yet the generality of them are as ignorant as the laity. Such as are not engaged in worldly pursuits are a very superstitious, innocent people, who promote charity as much as they can, both to man and beast; but those who engage in the world are generally the worst of all the Gentoos; for, persuaded that the waters of the Ganges will purify them from their sins, and being exempt from the utmost rigour of the courts of justice (under the Gentoos governments) they run into much greater excesses. The Soldiers are commonly called Rajahpoots; that is, descended from the rajahs. They are much more robust than the rest, have a great share of courage, and a nice sense of military honour, which consists, among them, in fidelity to those they serve. Fighting is their profession; they readily enter into the service of any that will pay them, and will follow wherever he leads; but, should their leader fall in the battle, their cause is at an end, and they run off the field, without any stain of their reputation. The English East India Company have many battalions of them in their service: they are called Sepoys, and are clothed and disciplined in the European manner. The Labourers include farmers, and all who cultivate the land. The Mechanics include merchants, bankers, and all who follow any trade: these again are subdivided into each profession. Beside these, are the Hallachores, who cannot be called a tribe, being rather the refuse of all the tribes. They are a set of unhappy wretches, who perform all the vilest offices of life, bury the dead, and carry away every thing that is polluted. All the different tribes are kept distinct from each other by insurmountable barriers; they are forbidden to intermarry, to cohabit, to eat with each other, or even to drink out of the same vessel with one of another tribe. Every deviation from these points subjects them to be rejected by their tribe, renders them polluted for ever, and obliges them, from that instant, to herd with the Hallachores. The members of each cast adhere invariably to the profession of their forefathers: from generation to generation the same families have followed, and still continue to follow, one uniform manner of life. To this may be

ascribed that high degree of perfection conspicuous in many of the Indian manufactures; and also that striking peculiarity in the state of Hindoostan, the permanence of its institutions, and the immutability in the manners of the inhabitants. Hence it is, that the Hindoos admit no converts, nor are themselves ever converted, whatever the Roman missionaries may pretend. The Hallachores may be here excepted, who are glad to be admitted into any society where they are treated as fellow creatures. The Hindoos vie with the Chinese, in respect to the antiquity of their nation; and the doctrine of transmigration is one of their distinguishing tenets. Their institutions of religion form a complete system of superstition, upheld by every thing which can excite the reverence of the people. The temples consecrated to their deities are magnificent; their religious ceremonies splendid; and the absolute dominion which the Bramins have obtained over the minds of the people is supported by the command of the immense revenues, with which the liberality of princes, and the zeal of pilgrims and devotees have enriched their pagodas. The dominion of religion extends to a thousand particulars, which, in other countries, are governed by the civil laws, or by taste, custom, and fashion. Their dress, their food, the common intercourses of life, their marriages, and professions, are all under the jurisdiction of religion. The food of the Hindoos is simple, consisting chiefly of rice, ghee (a kind of imperfect butter) milk, vegetables, and oriental spices. The warrior cast may eat of the flesh of goats, sheep, and poultry. Other superior casts may eat poultry and fish; but the inferior casts are prohibited from eating flesh or fish of any kind. Their great luxury consists in the use of the richest spices and perfumes, of which the great people are very lavish. They esteem milk the purest of food, because they think it partakes of some of the properties of the nectar of their gods, and because they esteem the cow itself almost as a divinity. Their manners are gentle. Their happiness consists in the solaces of domestic life; and they are taught by their religion, that matrimony is an indispensable duty in every man, who does not entirely separate himself from the world, from a principle of devotion. Their religion permits them to have several wives, but they seldom have more than one; and their wives are distinguished by a decency of demeanour, a solicitude in their families, and a fidelity to their vows, which might do honour to human nature in the most civilized countries. The custom of women burning themselves in the fire with the corpse of their husbands is still practised in Hindoostan. The code of Gentoo laws,

with their sacred books, the *Veidam* and the *Shastah*, are written in the Sanscrit language, which is very copious and nervous, although the style of their best authors is wonderfully concise. Hindoostan, toward the N, is pretty temperate, but hot toward the S; and it rains almost constantly for three months in the year. Its products are diamonds and other precious stones, silks, spices, aromatics, drugs, maize, rice, and sugar; and the chief manufactures are muslins and calicoes. But these and various other particulars will be found under the different names of its provinces, cities, towns, mountains, and rivers, described in this work.

Politically Hindoostan is now divided between the following powers. The *Mahrattas* are yet the most powerful people of India, and retain either all, or part of *Ajmeer*, *Agra*, *Allahabad*, *Gujerarat*, *Malwah*, *Berar*, *Orissa*, *Khandeish*, *Dowlatabad*, *Visiapore*, *Concan*. British India, contains *Bengal*, *Behar*, the *Circars*, and *Canara*, with part of *Agra*, *Oude*, *Allahabad*, *Guzerat*, *Malwah*, *Berar*, and *Orissa*.

The *Nizam*, rules over *Golconda*, part of *Berar*, *Visiapore*, and *Dowlatabad*. Part of *Oude* continues subject to its *Nabob*.

The *Sciks* are next to the *Mahrattas*, the most powerful native people of India, and retain very extensive territories; consisting of states in the *Punjab* and *Moultan*.

Some other regions continue subject to native rulers; the *Afghans* possess extensive territories in the NW part of Hindoostan; *Serinagur*, under its own *Rajah*; *Nepaul*, under the *Ghoorkali*, or *Rajah*; and *Bootan Lama* of *Tibet*; as independent sovereigns, the *Rajahs* of *Assam*, *Odeypore*, *Jypore*, and *Joudpore*, with many other petty chieftains.

Kandahor and *Cashmere*, are, though vaguely, considered as Hindoostanic regions. See *Cashmere* and *Kandahor*.

Hockhocking, *Great*, river of the state of Ohio, which empties into the river Ohio, 200 miles below Pittsburg. It is one of the deepest and best beatable streams of any in the country, in proportion to its quantity of water; but is narrow, not exceeding 50 yards in breadth. Near its source, seven miles northwestwardly from Lancaster, is a very romantic cascade in the stream; the water falling over a stratum of rock, of about 40 feet perpendicular height. A flouring mill, five stories high, is erected on this fall; and 24 or 25 miles below this, is another perpendicular fall of seven feet. Excepting the interruption of the lower falls, and some mill dams, latterly erected, this river is navigable about 70 miles. Among the branches of Hockhocking, are Rush creek, Sunlay, Monday, Margaret's, and Federal creeks.

Hocking, interior county of Ohio, bounded on the north by Fairfield and Perry, east by Athens, south by Jackson, and west by Ross counties. It is 26 by 24 miles in extent, and contains 432 square miles. The land is generally hilly and broken. It, however, contains considerable fertile and valuable land, particularly along the borders of Hockhocking river, which runs across the northeastern quarter of the county, from northwest to southeast. The head waters of Raccoon and Salt creeks, are also in this county. Chief town, Logan.

In point of cleanliness no country surpasses, and few come up to it, especially in North Holland, and that even in the villages. It has considerable linen and woollen manufactures, and numerous docks for the building of ships. The established religion is Calvinism; but all religious sects are tolerated. Amsterdam is the capital.

Holland, New, the largest known land that does not bear the name of a continent: it extends from 10 30 to 43 42 S lat. and from 110 30 to 153 30 E lon. so that its square surface considerably exceeds that of Europe. When this vast island was first discovered, is uncertain. In the beginning of last century, the N and W coasts were traced by the Dutch: the S extremity was discovered by Tasman, in 1642. Captain Cook, in 1770, explored the E and NE from 38 S, and ascertained its separation from New Guinea; and, in 1773, captain Furneaux, by connecting Tasman's discoveries with Cook's, completed the circuit. In that part of it, which Tasman distinguished by the name of Van Diemen's Land, and which was visited by Furneaux in 1773, and again by Cook, in 1777, the land

is, for the most part, of a good height, diversified with hills and valleys. See *Wales*, *New South*.

Holstein, duchy of Germany, bounded by the German Ocean on the W; the Baltic or the gulf of Lubeck on the E; the duchy of Mecklenburg on the SE; that of Bremen, with the river Elbe on the SW; and Lauenburg, with the territory of Hamburg on the S. Its greatest length is about 80 miles, and its breadth 60. A great part of this country consists of rich marshland, which being much exposed to inundations both from the sea and rivers, dykes have been raised at a great expense to guard and defend them. Hamburg and Lubec supply the inhabitants with what they want from abroad; from whence and Altena they export some grain, malt, groats, starch, buck-wheat, peas, beans, rape-seed, butter, cheese, sheep, swine, horned cattle, horses and fish. The manufactures of the duchy are chiefly carried on at Altena, Kiel and Gluckstadt. Denmark now possesses the whole duchy; the imperial cities excepted. The king of Denmark, as

Duke of Holstein, and Lauenburg is a member of the Germanic diet, and entitled to three votes in the general assembly. Area 3250 square miles. Population 360,000.

Hottentots Country of the, large region in the S extremity of Africa, extending N by W, from the Cape of Good Hope, beyond the mouth of Orange river, and from that cape, in an ENE direction, to the mouth of the Great Fish river, which parts it from

Caffraria. It lies between the tropic of Capricorn and 35 S lat. and is bounded on the W, S, and E by the Atlantic, Southern, and Indian Oceans, and on the N by regions very little, if at all, explored. The Hottentots are as tall as most Europeans, but are more slender; and the characteristic mark of this nation is, the smallness of their hands and feet, compared with the other parts of their body. Their skin is of a yellowish brown hue, resembling that of a European who has the jaundice in a high degree. There are not such thick lips among the Hottentots as among their neighbours the Negroes, the Caffres, and the Mozambiques: and their mouth is of the middling size, with the finest set of teeth imaginable. Their heads are covered with hair, more woolly, if possible, than that of the Negroes. That part of the Hottentot country possessed by the Dutch or British is considerable; extending from the Cape of Good Hope, N to lat. 30, and E to the Great Fish river, about 550 miles in length, and 230 in breadth. The whole is naturally barren and mountainous. See *Cape Town*.

Hudson, one of the most flourishing cities in the state of New York; situated on the E bank of Hudson river, in Columbia county, 115 miles N of the city of New York, and 30 S of Albany, in the lat. of 42 15 N. The foundation of the first house was laid in 1783, and in 1800 it contained 4048 inhabitants; and by the census of 1820, 5310. It is considered as the third town in the state in manufactures and the fourth in commerce. The site rises by a gentle acclivity from Hudson river; and the main street following the ascent extends above a mile from the water.

Hudson, river of New York. The basin of the Hudson, if we include Rariton bay and river, the bay of Newark, with its two small confluent rivers, Hackinsack and Passaic, and the contiguous part of Long-Island Sound, in the Hudson basin, we have before us a very curious connexion between inland and maritime navigation. Taken with this extension, the Hudson basin, reaches from Sandy Hook, N lat. 40 30, to the extreme sources of the Hudson, in N lat. 44 05, or above 250 miles in length, with a mean width of 40 miles, exclusive of the western part of the valley of the Mohawk above the mouth of the Schoharie river. This latter section includes a parallelogram of 60 miles long, and 35 wide. The whole basin spreading over an area of 14,600 square miles. The Hudson river is navigable for large ships to Hudson, and for sloops to Albany. The tide flows to Troy, to which small sloops ascend. When the two great canals of New York are

completed, the Hudson will have a water communication with lakes Champlain and Erie.

Hudson, post village and township of Portage county, Ohio, 12 miles NW from Ravenna. Population 1820, 491.

Hudson Bay, bay of N. America lying between 51 and 69 N latitude, discovered in 1610 by captain Henry Hudson. This intrepid mariner, in searching after a NW passage to the Pacific Ocean, discovered three straits, through which he hoped to find out a new way to Asia. This bay communicates on the N by two straits, with Bassin bay, on the E side it is bordered by Labrador on the SW by New South Wales, and on the W by New North Wales. These countries, included under the name of New Britain, abound with animals whose skins and furs are far superior in quality to those found in less northern regions. The natives are called Esquimaux, and northern Indians; and are materially different from all the southern tribes. In 1670, a charter was granted to a company for the exclusive trade to this bay. This company possesses three forts, on the S coast of James bay, by which name the S part of Hudson bay is distinguished; these factories are called Rupert, Moose, and Albany, but the former has been abandoned. On the W side of Hudson bay, up Hayes river, is a factory called Flamborough; and to the N of this is York Fort and Prince of Wales Fort. In December 1770, Mr. Hearne, in the service of the Hudson Bay Company, set out from Prince of Wales Fort to explore a river, that the Esquimaux, who came to the company's factories to trade, had brought to their knowledge; and which, on account of much copper being found near it, had obtained the name of Copper-mine River. Under the convoy of these Indians, he arrived at this river in 1771, and traced it till he came in sight of the Pacific Ocean, finding it incumbered with shoals and falls to its mouth, which is in lat. 72 N. By late observations the position of Hearne's river, is found much more to the W than laid down by that traveller.

Hungary, kingdom of Europe, bounded on the N by Poland and Silesia, W by Moravia, Austria, Stiria, S by Slavonia and Servia, and E by Walachia and Transylvania. It is divided into Upper and Lower Hungary; and to these may be added the Bannat of Temeswar, incorporated into the kingdom of Hungary, in 1778. Hungary formerly included Transylvania, Slavonia, Dalmatia, Servia, and Walachia. The principal rivers are, the Danube, Save, Drave, Tresse, Maros, Raab, and Waag. The air is unhealthy, occasioned by the lakes and bogs; but it abounds in all the necessaries of life, and the wine, especially that called

Tockay, is excellent. There are mines of gold, silver, copper, and iron; and also of opal, at Czerweniza, which gem is peculiar to this country. There is such plenty of game, that hunting is allowed to all. The inhabitants are well shaped, generous, and brave, but haughty and revengeful; and are estimated at seven millions. The trade principally consists in cattle, hogs, sheep, flour, wheat, rye, wool, and wine; and these are almost wholly sent to the Austrian provinces. The kingdom of Hungary can easily raise an army of 100,000 men. The horsemen are called Hussars, and the foot Heydukes. Almost all the towns of Hungary have two names, the one German and the other Hungarian; and the language is a dialect of the Slavonian. The government is hereditary in the house of Austria. No country in the world is better supplied with mineral waters and baths; and those of Buda, when the Turks were in possession of it, were reckoned the finest in Europe. Buda is the capital of Lower Hungary, and Presburg of the Upper. Population 8,580,000; consisting of Roman Catholics 4,000,000, Greeks 2,500,000, Calvinists 1,300,000, Lutherans 700,000; and Jews 80,000.

Iberi, lake of South America, between the Parana and Uruguay rivers. It is rather an overflowed country than a real lake.

Iberville, or *St. Gabriel*, post village, on the left bank of the Mississippi, in the parish of Iberville, 18 miles by water and 6 by land, below the outlet of bayou Iberville.

Iborg, or *Iberg*, town of Germany, in the circle of Westphalia, and in the bishopric of Osnaburg, 10 miles SW of Osnaburg, and 30 NE of Munster. Lon. 8 20 E, lat. 52 14 N.

Ica, province of Peru, bordering on the Pacific Ocean.

Iceland, large island to the W of Norway, 300 miles in length, and 150 in breadth, lying between 64 and 66 N lat. For two months together the sun never sets; and in the winter it never rises for the same space, at least not entirely. The middle of this island is mountainous, stony, and barren; but in some places there are excellent pastures, and the grass has a fine smell. The ice which gets loose from the more northern country in May, brings with it a large quantity of wood and several animals, such as foxes, wolves, and bears. Mount Hecla is the most noted mountain, and is a volcano, which sometimes throws out sulphureous torrents. The inhabitants believe that some of the souls of the damned go to this mountain, and that others are confined to the ice near this island. Their houses are at a distance from each other, and many of them deep in the ground; but they are all miserable huts, covered with skins. Many of the inhabitants profess Christianity; but those that live at a distance are pagans. They are mostly clothed with the skins of beasts. The Danes trade with the natives for hides, tallow, trainoil, whale-bone, and seahorses teeth, which are as good as ivory. Iceland, which was considered by the ancients as the Ultima Thule, or the extremity of the world, and by us as scarcely habitable, once abounded in learning and science, at a time when great part of Europe was involved in darkness. Their language was the old Gothic or Teutonic, the vernacular tongue of the Swedes, Danes, and Norwegians, before it branched into the several dialects since spoken by the natives of these three kingdoms.

Ichwell, village in Bedfordshire, with a fair on April 5.

Ickleton, village in Cambridgeshire, with a fair on August 2d.

Ickworth, town in Suffolk, with a market

on Friday. Here are the ruins of an ancient priory, and several Roman coins have been dug up. It is 23 miles NW of Ipswich, and 74 NNE of London. Lon. 1 0 E, lat. 52 22 N.

Icolmkill, formerly *Iona*, famous little island, one of the Hebrides, near the SW point of the isle of Mail. It is only three miles long, and one broad; but is very fertile. This once celebrated seat of royalty and learning is now almost destitute of an instructor, to teach the people the common duties of religion.

Ida, *Mount*, lofty and pointed mountain, in the middle of the island of Candia, famous in ancient times. All the cattle that are bred on it are a few paltry horses, some sheep, and half starved goats.

Ida, mountain of Turkey in Asia, in Nattolia Proper, famous in ancient fable, for the judgment of Paris, and for being the resort of the gods during the Trojan war.

Ilanha la-Nuera, town of Portugal, in Beira, five miles SW of Ilanha la-Vella.

Ilanha la Vella, town of Portugal, in Beira. The French took it by assault in 1704. It is seated on the river Ponsul, 25 miles NE of Castel-Brance, and 25 N W of Alcantara. Lon. 6 14 W, lat. 39 39 N.

Ibria, town of Austria in Illyria, in the circle of Adesberg, remarkable for its mines of quicksilver. Lon. 14 08 E, lat. 46 N.

Illinois is the fourth state of the United States in respect to extent of territory, and the first in point of fertility of soil. Excepting Georgia, it is also the state whose climate and seasons differ most at the north and south extremities. Extending through five degrees of latitude, Illinois embraces the greatest extent north and south, of any section of the United States. New York only reaching through four and a half; and Georgia about an equal distance. The latter is indebted to the greater inequality of its surface, for the superior variety of its climate.

Illinois is a country of very little inequality of surface compared with its great extent. The lower or southern part is rolling rather than hilly, and not one eminence in the state, it is probable, would reach 600 feet above the common level.

In point of soil Illinois admits a similar classification with Ohio and Indiana; though in proportion to extent, the former has less wet irreclaimable land, and more rich prairie than the two latter. The state may be considered as rolling in its southern and western, and level in its eastern and north-eastern sections.

In its central parts the prairies almost vie in extent with those of Louisiana, Arkansas, and Mississippi. Their margins are generally composed of rich soil, which as elsewhere deteriorates in receding from the woods. Extensive, however, as are the prairies, the much greater proportion of the state is covered with forest timber of growth suitable to the soil and climate.

The Illinois river is an object, however, that though its entire course is within the state of the same name, yet from some peculiar circumstances in its natural history it becomes rather a subject of general than local interest.

In examining the rivers of the Ohio valley flowing from its right slope, we find their currents slow towards their sources, and gaining accelerated rapidity in their progress towards their common recipient. The causes of this increased velocity of current has been discussed and explained. This common characteristic distinguishes the Muskingum, Sciota

Great Miamee, and Wabash, but does not extend to the Illinois. The latter has many traits peculiar to itself; the most remarkable of which are the immensity of its bed, and the uniformity of its current. What may in strictness be designated the bed of Illinois is from two to three miles wide, and in some places even more. This space would seem to indicate an ancient quantity of water far greater than now flows down that river. In fact the present appearance of the stream much more resembles a strait than river, in the simple acceptance of the latter term. The water flows gently, and in a great measure uniform in all its length. Rapids there exists none worth notice in Illinois, and except at very low water, but very little local acceleration is anywhere perceptible.

The country around the southern extremity of Michigan lake is mostly composed of level swamp intersected by interlocking streams, or rather lagoons. This is more particularly the case between the lake and the heads of the Plein branch of Illinois. Here the face of the globe so nearly approaches to a perfect level, as to produce almost stagnation in the waters, and leave them nearly balanced on this table land.

Lake Erie is elevated 565 feet above tide water in the Hudson at Albany. The distance from Lake Erie to Lake St. Clair, is 28 miles; from Lake St. Clair to Lake Huron 35 miles, and through the straits of Michilimackinac 10 miles, or the entire length of current between Lakes Erie and Michigan is 73 miles. Of this distance the current is every where gentle except the efflux of St Clair river from Lake Huron at Fort Gratiot, where a strong current rather than rapid continues about 2 miles. An allowance of 6 inches per mile is too high an estimate; but in this instance we will assume that rate; and consequently allow an elevation of 36½ feet for the surface of Lake Michigan over that of Erie, and give to the former 601½, or in round numbers 600 feet above tide water in the Hudson, and about 500 above the surface of the Gulf of Mexico. The existence of the Gulf stream demonstrates that the surface of the Gulf of Mexico is elevated at least 100 feet above that of the Atlantic Ocean between the Chesapeake and New York bays inclusive. The point of confluence of the Monongahela and Alleghany rivers, at the city of Pittsburgh, is above the surface of Chesapeake bay, within a trifle of 800 feet. All these estimates are formed, on mathematical operations, or on the result of analogical induction, almost equally certain; and the singular facts are developed, that if channels were open from Pittsburgh into Erie and Michigan, the Ohio would flow into the latter with a

descent of 200 feet in about 400 miles, and into the former 235 feet in little more than 100 miles.

If we allow 361 feet, as the difference of level, between the water at the mouth of Ohio, and the surface of the Gulf of Mexico. It is about 230 miles by water between the mouths of Illinois and Ohio; a fall of 6 inches per mile would amount to 150 feet, which, added to 361, yields 476 feet as the height of the mouth of Illinois above the surface of the Gulf of Mexico.

We have already determined that of Lake Michigan to be 600 feet, therefore differing only 36 feet from the Mississippi at its junction with the Illinois.

It has been determined by repeated experiment, that loaded boats of considerable size can pass from the Mississippi through Illinois, into the Canadian sea, and *vice versa*. Very little current is found in the small, and very short streams, which interlock with the sources of the Illinois, and flow into the southern extremity of Michigan; therefore the sources of Illinois cannot be much above the surface of Lake Michigan. Fifteen or twenty feet is as much as the data before us will justify; of course the whole volume of Illinois, from a point opposite the head of Chicago river, in a distance following the windings of up-wards of 400 miles, does not fall 60 feet.

The face of the globe may in vain be examined, to find any other spot, except the sources of Orinoco, and the Rio Negro, in South America, where natural facility to internal communication by water is equal to that we have this moment surveyed. If we glance an eye over the immense regions thus connected; if we regard the fertility of soil, the multiplicity of product which characterize those regions; and if we combine those advantages afforded by nature, with the moral energy of the free and active people which are spreading their increasing millions over its surface, what a vista through the darkness of future time opens. The view is indeed almost too much for the faculties of man. We see arts, science, industry, virtue, and social happiness already increasing in those countries beyond what the most inflated fancy would have dared to hope, thirty or forty years ago.

The foregoing estimate is confined to the southern and settled parts of Illinois. The whole state is calculated to embrace 58,900 square miles; it is obvious, therefore, that but comparatively a small part of this state is yet inhabited by civilized settlers. Taken as a whole, it is, however, from the tenor of the best information, the most fertile continuous tract of land in the United States; and in a peculiar manner accessible to navigation.

By the census of 1820, there were found in Illinois, whites, 53,788; free coloured persons, 506; and slaves, 917: the whole amounting to 55,211, thus classed:

Foreigners not naturalized	-	598

Illinois was admitted into the confederation as an independent state, in December, 1818

The progressive population of Illinois since 1810, has advanced with considerable, though unequal celerity with that of Ohio and Indiana, but nevertheless with constant and considerable rapidity. In 1810, the number of inhabitants was 12,382, and in 1820, had risen to 55,211.

Illock, strong town of Slavonia, seated on the Danube, 15 miles from Peterwaradin, and 55 NW of Belgrade. Lon. 20 6 E, lat. 45 36 N.

Ilm, or *Stadt Ilm*, town of Upper Saxony, in the county of Schwarzburg-Rodolstadt, 14 miles S of Erfurt.

Imene, lake of Russia, in the government of Novogorod, which has a communication with the lake Ladoga, by the river Volkhof. Lon. 34 0 E, lat. 58 0 N.

Ilminster, town in Somersetshire, with a market on Saturday. It is seated in a dirty bottom, among the hills, 137 miles W by S of London. Lon. 2 54 W, lat. 50 55 N.

Illyria, vague name for the regions NE from the gulf of Venice. It has in no age been clearly defined. Since 1816, the title of *kingdom of Illyria*, has been given to that part of the Austrian empire, included in Carinthia, Carniola, Friule, Cividale, Istria and Croatia. It is again subdivided into the governments of Laybach and

Trieste. Area 15,500 square miles. Population, 1,060,000.

Ilse, river of Germany, rising in the mountains of Bohemia, and running S falls into the Danube at Illsradt.

Ilsey, *East*, town in Berkshire, with a market on Wednesday. It is seated on a pleasant valley, between two hills, and excellent downs for feeding sheep. It is 53 miles W of London. Lon. 1 22 W, lat. 51 32 N.

Ilst, town of the United Provinces, in Friesland, seated on the Weymer, 12 miles S of Lewarden. Lon. 5 24 E, lat. 53 1 N.

Ilten, town of Lower Saxony, in the principality of Lunenburg.

Illzhofer, town of Suabia, in the territory of Halle.

Imenstadt, town of Suabia, 20 miles E of Lindau. Lon. 10 20 E, lat. 47 35 N.

Imbro, woody and mountainous island in the Grecian archipelago. It abounds with game, and is about 20 miles in circumference.

Imeritia, country of Asia, between the Black Sea and the Caspian, bounded on the S by Turkey, on the W by Mingrelia, on the N by Ossetia, and on the E by Georgia, of which it is, properly speaking, a part. The Imeritians are of the Greek religion. Their patriarch, who is generally of the royal family, can seldom read or write; and the inferior clergy are not better instructed. Their churches are wretched buildings, scarcely to be distinguished from common cottages, but from a paper cross over the principal door, and some paintings of the virgin and the saints. Cutais is the capital. Imeritia is now, politically subject to Russia, but in its own municipal concerns independant.

Immenhausen, town of Hesse-Cassel, in Germany.

Immenstadt, town of the county of Koenigsegg in Suabia. It is situated on a small river 14 miles SE of Isny.

Imola, populous town of Italy, in Romagna, with a bishop's see; seated on the Santarno, 45 miles N by E of Florence. Lon. 11 45 E, lat. 44 28 N.

Imperial, pleasant town of South America, in Chili, seated on a craggy rock in a charming country. Lon. 72 35 W, lat. 38 40 S.

Inchcolm, island in the frith of Forth, near the coast of Fife, but within the county of Edinburgh.

Inchkeith, desolate little island in Edinburghshire, in the frith of Forth, lying

midway between the ports of Leith and Kinghorn. Here is a ruinous fort.

Inchmarnock, beautiful little island of Scotland, SW of the isle of Bute. It is one mile long, and on the W side are vast strata of coral and shells. It derives its name of Inchmarnock from a chapel dedicated to St. Marnoc, the ruins of which are still to be seen.

Indapour, seaport of the island of Sumatra. Lon 100 50 E, lat. 41 50 N.

Independence, township of Sussex county, New Jersey. Population 1820, 1850.

Independence, township of Cuyahoga county, Ohio. Population 1820, 354.

Independence, post village and seat of justice, Bond county, Illinois, on Kaskaskia river, 65 miles a little N of E from St. Louis.

India, extensive region in Asia, which lies between 66 and 93 E lon. and 7 and 35 N lat. Under this name, the Europeans have erroneously included all the countries which lie S of Tartary, and extend from the eastern frontiers of Persia to the eastern coasts of China. But the name of India can be applied, with propriety to that country only, which is distinguished both in Asia and Europe, by the name of Hindoostan. The countries to the E of the river Burampooter, namely, Aracan, Assam, Ava, Burmah, Cambodia, Cochin-China, Laos, Malacca, Pegu, Siam and Tonquin, which geographers have hitherto distinguished by the name of the Peninsula of India beyond the Ganges, are no more to be considered as belonging to India, than the bordering countries of Persia, Tartary and Thibet. See *Hindoostan*.

Indiana, state of the United States; bounded by Ohio river S; the state of Illinois W; lake Michigan NW; Michigan territory N; and state of Ohio E.

Up Wabash river to a meridian line extending from North lat.

Due south to the mouth of Great Miami, - - - 185

Having an outline of 973

Area 84,000 square miles; 21,760,000 acres.

The longest line that can be drawn in

Indiana, is from its south-west to its north-east angle, 325 miles.

Its mean breadth between Ohio and Illinois, 150 miles.

Extreme south, at the mouth of Wabash, 37 49.

Extreme north, along the territory of Michigan, 41 45.

The position of this state lying lengthwise, north and south, exposes it to considerable vicissitude of seasons and difference of temperature. It is, still less than Ohio, marked by bold and prominent scenery. Advancing towards the lowest depression of the Mississippi basin, its surface is in most places monotonous, and in the central and northern parts level and marshy. In every general attribute, the two states of Ohio and Indiana, have, however, so much resemblance, that the same terms of description apply to both. They are in fact naturally, one undivided part of the right slope of the Ohio valley; and as such might be connected in geographical description.

The prairies which we have found commencing in Ohio, expand in entering Indiana. The central flat, or table land, is also wider in the latter than in the former. The sources of the Illinois, Wabash, St. Joseph, and Maumee, are all on this table land. The Maumee is a very remarkable stream. Its two superior branches, the St. Joseph and St. Mary's, unite in Indiana. The St. Mary's river rises in Allan, and Mercer county in Ohio, and pursues a north-west course of 65 miles to Fort Wayne. The St. Joseph river rises in Michigan, within less than 20 miles of the mouth of Maumee, flows 80 miles south-west to Fort Wayne, unites with the St. Mary's river at that place, and forms the Maumee. The latter, literally turns upon its constituents, flows north-east 60 miles, and falls into the extreme south-west angle of Lake Erie.

From the junction of the St. Mary's and St. Joseph's rivers, at Fort Wayne, to the navigable sources of Wabash is not 10 miles.

The country before us, is one widely extended flat, interspersed with small lakes, low, long ridges of arable land, and much swamp. Prairies extend themselves between the streams. The waters are sluggish in their descent. The country around the extreme south bay of Lake Michigan, has the appearance of the sea marshes of Louisiana. Low flooded prairies intersected by lakes and interlocking creeks. No eminences are seen; one unbroken horizon encircles the eye. It is the same, timber excepted, at the mouth of the Maumee. I sailed in a very clear morning into the bay at its mouth, and very carefully swept my eye repeatedly around

the limit of vision, but none, not the smallest swell in the landscape met my view. The resemblance to many a scene I had previously examined in Louisiana was indeed striking. The resemblance is, however, still more strong at the bottom of Michigan, at the north-west part of Indiana.

In proportion to extent, Indiana does not possess as much arable land as does Ohio. That part of both states, lying within 100 miles of Ohio river, is, as I have already observed, a continuation of one natural section, and of course similar in common physiognomy. This tract would be found to enter Indiana, near where its western meridian leaves the Wabash, and winding through the state, between the sources of White and Wabash rivers, would enter Ohio in Mercer county; and following in the latter state the general course of Ohio river, would merge into Lake Erie, between Black and Huron rivers in Huron county.

This fine margin includes all the hilly, and most of the rolling tracts of both states; leaving to the north-west, the level plains we have already noticed. It will at once be seen by a glance on a map of both states, that the level region of Indiana is much more comparatively extensive than that of Ohio.

The civil and political subdivisions of Indiana are the following, with the result of the census of 1820, -unjoined.

The foregoing estimate embraces all that part of Indiana purchased from the Indians, and subdivided into counties. A large parallelogram, extending across the entire northern part of the state, and containing about 6,630 square miles, continues yet Indian territory. This, added to 27,372, yields within a very small fraction, the same general area which is given in page 431.

In a review, however, of the settled parts of Indiana, the counties of Wabash and Delaware with the adjacent Indian county, ought to be excluded, as their extent is beyond every reasonable proportion to their population; and more, these counties are mere momentary divisions of convenience, occupying the central, and otherwise unappropriated parts of the state. Rejecting therefore the area of these three sections, amounting together to 20,022 square miles, the actually inhabited section of Indiana will be restricted to 13,972, say 14,000 square miles. Deducting 3824, the number of persons given by the census, as inhabitants of Delaware and Wabash, from 147,178, will yield a balance of 143,354, as the compact mass of population in Indiana, on 14,000 square miles, or a little more than 10 to the square mile.

The progressive population of this state has been exceedingly rapid, since 1800, at which epoch it stood at 5640. In 1810, the inhabitants amounted to 24,520. The next period of ten years swelled the population, as we have seen, to 147,178.

This increasing body is composed of whites, 145,758; free persons of colour, 1230, and 190 slaves.

They are classed by the census thus:

Foreigners not naturalized	-	833
Engaged in agriculture,	-	61,315
Do. manufactures,	-	3,229
Do. commerce,	-	429

Indies, East, name given by Europeans, to a great number of islands in the Indian Ocean, extending from the peninsula of Hindoostan as far E as New Guinea, and from the bay of Bengal and the China Sea as far S as New Holland. The most western of them are the Maldives, and the most eastern the Molluccas : between which are several very large ones, as Ceylon, Sumatra, Java, Borneo and Celebes, besides many others of considerable importance as to riches, though much inferior in extent. Their produce and other particulars, are described under their several heads.

Indies, West, name given to a great number of islands in the Atlantic Ocean, which extend across the entrance of the gulf of Mexico, from the NW extremity of the Bahama islands, off the coast of Florida, to the island of Tobago, 120 miles from the coast of Terra Firma. Cuba is the most western of these islands. When Columbus discovered them in 1492, he considered them as part of those vast regions in Asia comprehended under the general name of India, to reach which, by a W course across the Atlantic, had been the grand object of his voyage ; and this opinion was so general, that Ferdinand and Isabella, king and queen of Castile, in their ratification of an agreement granted to Columbus, upon his return, gave them the name of Indies. Even after the error which gave rise to this opinion was detected, and the position of the New World, was ascertained, the name has remained, and the appellation of West Indies is given by all the people of Europe to these islands, and that of Indians to the inhabitants, not only of these islands, but of the continent of America. They are likewise called the Caribbee Islands, from the aborigines of the country : and the sea in which they lie is called the Caribbean Sea. By the French they are called the Antilles : and nautical men distinguish them, from the different courses taken by ships, into the Leeward and Windward Islands, which see. The name of Caribbee should properly be confined to the smaller islands, lying between Porto Rico and Tobago. These were inhabited by the Caribs, a fierce race of men, nowise resembling their timid neighbours in the larger islands. Columbus was a witness to their intrepid valour ; and the same character they have maintained invariably in all subsequent contests with the Europeans. The British islands are Jamaica, Barbados, St. Christopher, Antigua, Anegada, Nevis, Montserrat, Barbuda, Anguilla, Dominica, St. Vincent, Granada, the Bahama islands, Trinidad, Tobago, St. Lucia and part of the Virgin Islands. Cu-

ba, Porto Rico and Margarita, belong to the Spaniards. The French have Guadeloupe, Marigalante, Desenda, Hispaniola and Martinico. The Dutch have St. Eustatia, Curacao, Sada, and St. Martin. The Danes, St. Thomas, St. Croix, and part of the Virgin Islands.

Irekin, *Jerkin*, or *Tarkan*, rich and populous town of Tartary, the capital of Bocharia, with a castle. It is the staple town of all the trade carried on between India and the N part of Asia. The Kalmucks are masters of it; and never disturb any one on account of their religion. It is eight miles N of Cashgur. Lon. 73 25 E, lat. 41 40 N.

Ireland, large island of Europe, lying to the W of that of Great Britain. It is 280 miles in length, and 160 in breadth; bounded on the E by St. George's channel and the Irish sea, which separate it from England and Wales; on the NE by a channel, called the North Channel, 34 miles broad, which separates it from Scotland; and on every other side by the Ocean. It contains about 19,436,000 acres. Ireland is divided into four provinces; namely, Ul-

ster to the N, Leinster to the E, Munster to the S, and Connaught to the W: and these are subdivided into 32 counties. Ulster contains the counties of Down, Armagh, Monaghan, Cavan, Antrim, Londonderry, Tyrone, Fermanagh, and Donegal; Leinster has those of Dublin, Louth, Wicklow, Wexford, Longford, East Meath, West Meath, King's county, Queen's county, Kilkenny, Kildare, and Carlow: Munster includes Clare, Cork, Kerry, Limerick, Tipperary, and Waterford: and Connaught has Leitrim, Roscommon, Mayo, Sligo, and Galway. The climate of Ireland is mild and temperate, but more humid than in England. In general, it is a level country, well watered with lakes and rivers; and the soil, in most parts, is very good and fertile; even in those places where the bogs and morasses have been drained, there is good meadow ground. It produces corn, hemp, and flax, in great plenty; and there are so many cattle, that beef and butter are exported to foreign parts; and not only the English, but other ships, frequently come to be victualled here. The other commodities are hides, wool, tallow, wood, salt, honey, and wax. The principal manufacture, is fine linen cloth, which is brought to great perfection, and the trade in it is very great. This country is well situated for foreign trade on account of its many secure and commodious bays and harbours. Its principal rivers are the Shannon, Foyle, Liffey, Boye, Sure, Barrow, Blackwater, and Lee. The laws of Ireland differ but little from those of England; and the established religion is the same; but the majority of the people are Roman catholics, and yet retain their nominal bishops and dignitaries. The ecclesiastical districts are four archbishoprics and eighteen bishoprics; the former are Armagh, Dublin, Cashel, and Tuam; the latter are Dromore, Down, and Connor, Londonderry, Raphoe, Clogher, Kilmore and Ardagh, Meath, Kildare, Ferns and Leighlin, Ossory, Waterford and Lismore, Cloyne, Cork, and Ross, Limerick, Ardfert and Aghadoe, Killaloe and Kilfenora, Clonfert and Kilmacduagh, Elphin, and Killala and Achonry. Formerly, this kingdom had a parliament, which was subordinate to that of Great Britain; but, in 1800, it was deemed expedient for the welfare of Ireland that it should be united to Great Britain. The two parliaments passed acts for that purpose, and the two kingdoms, at the commencement of 1801, were styled the United Kingdom of Great Britain and Ireland: and 32 peers (four of them bishops) and 100 commoners of Ireland, are elected to represent that country in the Imperial Parliament, assembled in England. The lord lieutenant of Ireland, as well as the council, are appointed, from time to

time, by the king. The country people in Ireland, uncorrupted by commerce, are remarkably hospitable, and very warm in all their affections. The stranger, who has dwelt in a commercial city, and been long inured to that general neglect of the pious offices of humanity, which the incessant pursuit of gain produces, on passing through their country, is surprised at the earnestness they manifest in serving him, or in helping him on his way: he is also astonished on observing how these simple people reckon upon a similar disposition, as a thing of course, in the country about: "I am sorry I cannot go with you now, but when you get to the house beyond, why Mr. Such-a-one will send a boy with you, till you are after crossing the bog, and then you will soon be at the village; and why, if you cannot stay all night with them, they will some of them go with you." Such are the unaffected replies the traveller meets with in this hospitable land; and even in the towns, formality and etiquette, are often so lost in hearty salutations, and a familiar manner of address, that the stranger soon feels himself at home, and imagines the people about him all relations. It is a most grievous circumstance, that this amiable people should sometimes be provoked to rise upon those who are over them, when, unhappily giving a loose to their revenge, they sometimes commit such violent acts, as to induce those who do not know their provocations, to think they are wantonly barbarous, instead of barbarously avengeful. The condition of the common people has been always very wretched: they were so poor, and it was so hard for them to get a livelihood, that they frequently went into other countries to seek their fortunes; and, particularly, great numbers went over to the plantations in America. Their diet consists chiefly of coarse bread, potatoes, and butter-milk; the favourite liquor is usquebaugh, an ardent distillation from corn; and the rural cottage is a wretched hovel of mud. The manners of the superior classes differ little from those of the same rank in England; but the gentry are more addicted to hunting and other robust exercises, than to literature and the arts. That part of the inhabitants, called the Wild Irish, were formerly as savage as the native Americans; and, like them, lived in huts, making a fire in the middle of them, but it is to be hoped, that all the rude and barbarous customs, as well as every other trace of wretchedness and degradation, will vanish in time, and such measures be taken as shall remove all restrictions on their trade and commerce, and admit them to an equal share of all the advantages enjoyed by the empire of which they make a part. Dublin is the capital.

Ispahan, celebrated city, capital of Persia, in the province of Irac-Agemi, and thought by some to be the finest city in the East. It stands in the middle of a plain, surrounded on all sides by mountains at eight miles distance, and on a small river, called Sanderut, which supplies almost all the houses with water. It is 20 miles in circumference, with well built houses and flat roofs, on which they walk, eat, and lie, in summer, for the sake of the cool air. The inhabitants were computed at about 1,000,000; but this kingdom having been distracted by civil wars, the principal towns are greatly depopulated. Ispahan has three large suburbs, called Juissa, Hassenbath, and Kebrabath. Though at a distance from the sea, it carries on a great trade, people of several nations resorting there for the sake of traffic. It is 265 miles NE of Bussarah, and 1400 SE of Constantinople. Istria, kind of peninsula of Illyria, lying on the NE part of the gulf of Venice. It is bounded by Carniola on the NE, and on all other sides by the sea. The air is unwholesome, especially near the coast; but the soil produces plenty of wine, oil and pasture: there are also quarries of fine marble. Istria now forms a part of the Austrian kingdom of Illyria. Capo d'Istria is the capital.

Italy, one of the finest and most celebrated countries of Europe; bounded on the NNW and NE by France, Switzerland, the country of the Grisons, and Germany; on the E by the gulf of Venice; and on the S and W by the Mediterranean; its figure bearing some resemblance to that of a boot. Its length from Aosta, at the foot of the Alps, in Mount Blanc, Savoy, to the utmost verge of Calabria, in Naples, is about 600 miles; but its breadth is very unequal, in some places near 400 miles, in others not above 25 or 30. It was formerly the seat of the Roman empire, and afterwards, of that more astonishing usurpation the dominion of the pope. In the middle ages the kingdom of Lombardy and that of Naples held the two extremes, and the Ecclesiastical and Tuscan states occupied the centre. In more modern times the northern part became divided into a great number of states; and previous to the alterations made by the late French government, the whole country was divided in the following manner. Between the confines of France and Switzerland, on the W and N were the continental dominions of the king of Sardinia, namely, Savoy, Nice, Piedmont, part of the Milanese and Oneglia. To the NE are the territories of Venice, which are enumerated under that article. South of these, were the dominions of the emperor of Germany, namely, part of the Milanese and the Mantuan; and S of the latter is the Modenese, which belonged to the duke of Modena. West of the Modenese is the duchy of Parma, to the SW of which lay the republic of Genoa; and

SE of Genoa, that of Lucca. Hence extends, along the coast of the Mediterranean, the grand duchy of Tuscany. The pope's territories lies NE and E of Tuscany, between the gulf of Venice and the Mediterranean; and all S of this is the kingdom of Naples. By the treaty of Campo Formio, in 1797, the Venetian territories to the E and N of the river Adige were ceded to Austria; and the remainder of the Venetian states, with the duchies of Modena, Milan and Mantua, the principality of Massa, and the three legations of Ferrara, Bologna, and Romagna in the pope's dominions, were erected into a government by the French, and called the Cisalpine Republic. This republic was overturned in 1799, but restored after the battle of Marengo, in 1800; and in 1802, it received a new constitution, under the name of the Italian Republic, and Bonaparte, then first consul of France, was elected president. In 1806, the Italian republic was erected into a kingdom, and the emperor of France assumed the title of King of Italy. In December following, the Austrian part of the Venetian states were added to its territories, by the treaty of Presburg. The kingdom was divided into departments, and the city of Milan was the capital. But the important changes that have lately taken place in Europe, have again deranged the political situation of this country. The kingdom of Italy has been overturned; and although a part of its territories has been restored to its former possessors, yet the greater part was first provisionally taken possession by Austria, and by the Congress of Vienna, finally incorporated into the Lombardo Venetian kingdom. The air of Italy is very different, according to the different situation of the countries it contains: in these on the NE side of the Apennines, it is more temperate; but on in the SW it is very warm, in Campagna di Roma, and the Ferrarese, it is said to be unwholesome, from the lands not being duly cultivated, nor the marshes drained; but in the other parts it is generally pure, dry and healthy. The principal rivers are the Po, Tiber, Arno, Adige, and Yar; and there are several fine lakes as the Maggiore, Lugano, Como, Garda, Perugia, Bracciano, and Celano. The soil, in general, is very fertile. It produces a great variety of wines, and the best oil in Europe; excellent silk in abundance; corn of all sorts, but not in such plenty as in some other countries; oranges, lemons, citrons, pomegranates, almonds, raisins, sugar, figs, peaches, apricots, pears, apples, filberts, chestnuts, &c. Most of these fruits were at first imported by the Romans from Asia, Asia Minor, Greece, Africa and Syria and were not the natural products of the soil.

This country also yields good pasture, and abounds with cattle, sheep, goats, buffaloes, wild boars, mules, and horses. The forests are well stored with game; and the mountains have not only mines of iron, lead, alum, sulphur, marble of all sorts, alabaster, jasper, porphyry, &c. but also gold and silver, with a great variety of aromatic herbs, trees, shrubs, and evergreens. Wine, oil, perfumes, fruits and silks, are the principal articles of exportation; and great sums of money are expended by travellers in the purchase of pictures, curiosities, relics, antiquities, &c. There are forty-one archbishoprics in Italy, but the bishoprics are too indefinite and arbitrary to be depended on; the pope creating or suppressing them as he pleases. The established religion is the Roman catholic; but all sects live unmolested, provided no gross insult is offered to their worship. Their language, a corruption of the Latin, is remarkable for its smoothness, and is said to be spoken in its greatest purity at Florence. Further particulars of this country will be found under the names of its particular divisions, as Naples, &c.

Italy is now subdivided into the kingdom of the two Sicilies; states of the Church; Grand Duchy of Tuscany; Austrian Italy; Sardinia; Parma; Modena; Lucca; and San Marina. Area 117,000 square miles. Population about 20,000,000.
